Authorization for Credit Card Transactions

Department of Homeland Security

Form G-1450

How To Fill Out Form G-1450

1. Type or print legibly in black ink.
2. Complete the "**Applicant's/Petitioner's/Requester's Information**," "**Credit Card Billing Information**," and "**Credit Card Information**" sections and sign the authorization. **NOTE:** The credit card must be issued by a U.S. bank.
3. Place your Form G-1450 ON TOP of your application, petition, or request package.

NOTE: Failure to provide the requested information may result in DHS and your financial institution not accepting the payment. DHS cannot process credit card payments without an authorized signature.

NOTE: Please see the USCIS Form G-1450 website for additional information.

We recommend that you print or save a copy of your completed Form G-1450 to review in the future and for your records.

By completing this transaction, you agree that you have paid for a government service and that the filing fee, biometric services fee and all related financial transactions are final and not refundable, regardless of any action DHS takes on an application, petition, or request. You must submit all fees in the exact amounts. DHS will charge your credit card up to the amount you authorize below.

Please refer to the form(s) you are filing for additional information, or you may call the USCIS Customer Contact number at **1-800-375-5283**. For TTY (deaf or hard of hearing) call: **1-800-767-1833**.

e-Notification of Application/Petition Acceptance

Department of Homeland Security
U.S. Citizenship and Immigration Services

USCIS
Form G-1145

What Is the Purpose of This Form?

Use this form to request an electronic notification (e-Notification) when U.S. Citizenship and Immigration Services accepts your immigration application. This service is available for applications filed at a USCIS Lockbox facility.

General Information

Complete the information below and clip this form to the first page of your application package. You will receive one e-mail and/or text message for each form you are filing.

We will send the e-Notification within 24 hours after we accept your application. Domestic customers will receive an e-mail and/or text message; overseas customers will only receive an e-mail. Undeliverable e-Notifications cannot be resent.

The e-mail or text message will display your receipt number and tell you how to get updated case status information. It will not include any personal information. The e-Notification does not grant any type of status or benefit; rather it is provided as a convenience to customers.

USCIS will also mail you a receipt notice (I-797C), which you will receive within 10 days after your application has been accepted; use this notice as proof of your pending application or petition.

USCIS Privacy Act Statement

AUTHORITIES: The information requested on this form is collected pursuant to section 103(a) of the Immigration and Nationality Act, as amended INA section 101, et seq.

PURPOSE: The primary purpose for providing the information on this form is to request an electronic notification when USCIS accepts immigration form. The information you provide will be used to send you a text and/or email message.

DISCLOSURE: The information you provide is voluntary. However, failure to provide the requested information may prevent USCIS from providing you a text and/or email message receipting your immigration form.

ROUTINE USES: The information provided on this form will be used by and disclosed to DHS personnel and contractors in accordance with approved routine uses, as described in the associated published system of records notices [**DHS/USCIS-007 - Benefits Information System and DHS/USCIS-001 - Alien File (A-File) and Central Index System (CIS)**, which can be found at **www.dhs.gov/privacy**]. The information may also be made available, as appropriate for law enforcement purposes or in the interest of national security.

Complete this form and clip it on top of the first page of your immigration form(s).

13.h. Country

USA

Part 4. Client's Consent to Representation and Signature

Consent to Representation and Release of Information

I have requested the representation of and consented to being represented by the attorney or accredited representative named in **Part 1.** of this form. According to the Privacy Act of 1974 and U.S. Department of Homeland Security (DHS) policy, I also consent to the disclosure to the named attorney or accredited representative of any records pertaining to me that appear in any system of records of USCIS, ICE, or CBP.

Part 4. Client's Consent to Representation and Signature (continued)

Options Regarding Receipt of USCIS Notices and Documents

USCIS will send notices to both a represented party (the client) and his, her, or its attorney or accredited representative either through mail or electronic delivery. USCIS will send all secure identity documents and Travel Documents to the client's U.S. mailing address.

If you want to have notices and/or secure identity documents sent to your attorney or accredited representative of record rather than to you, please select **all applicable** items below. You may change these elections through written notice to USCIS.

1.a. ☒ I request that USCIS send original notices on an application or petition to the business address of my attorney or accredited representative as listed in this form.

1.b. ☒ I request that USCIS send any secure identity document (Permanent Resident Card, Employment Authorization Document, or Travel Document) that I receive to the U.S. business address of my attorney or accredited representative (or to a designated military or diplomatic address in a foreign country (if permitted)).

NOTE: If your notice contains Form I-94, Arrival-Departure Record, USCIS will send the notice to the U.S. business address of your attorney or accredited representative. If you would rather have your Form I-94 sent directly to you, select **Item Number 1.c.**

1.c. ☐ I request that USCIS send my notice containing Form I-94 to me at my U.S. mailing address.

Signature of Client or Authorized Signatory for an Entity

2.a. Signature of Client or Authorized Signatory for an Entity

Alek Dardas

2.b. Date of Signature (mm/dd/yyyy) 05/27/2026

Part 5. Signature of Attorney or Accredited Representative

I have read and understand the regulations and conditions contained in 8 CFR 103.2 and 292 governing appearances and representation before DHS. I declare under penalty of perjury under the laws of the United States that the information I have provided on this form is true and correct.

1. a. Signature of Attorney or Accredited Representative

1.b. Date of Signature (mm/dd/yyyy) 05/27/2026

2.a. Signature of Law Student or Law Graduate

N/A

2.b. Date of Signature (mm/dd/yyyy) N/A

Part 6. Additional Information

If you need extra space to provide any additional information within this form, use the space below. If you need more space than what is provided, you may make copies of this page to complete and file with this form or attach a separate sheet of paper. Type or print your name at the top of each sheet; indicate the **Page Number**, **Part Number**, and **Item Number** to which your answer refers; and sign and date each sheet.

Dallas, TX 75266-0128

Re: EB-1 FIRST PREFERENCE: EMPLOYMENT-BASED IMMIGRATION PETITION

Petitioner/Beneficiary:	**DANTAS, Alessandra Kurahashi**
Nature of submission:	**ORIGINAL SUBMISSION**
Type of Petition:	**I-140, EB-1 Employment-based, first preference visa based on petitioner's extraordinary ability**
Classification Sought:	**Immigration and Nationality Act 203(b)(1)(A)**

Dear USCIS Officer:

Our office represents beneficiary and self-petitioner Dr. Alessandra Kurahashi Dantas (hereinafter Dr. Dantas) in her petition for classification as a person of extraordinary ability under the EB-1A category. Enclosed please find the following forms in support of her petition:

- Form G-1450 in the amount of $715 towards I-140 filing fee.
- Form G-1450 in the amount of $300 towards Asylum Program fee.
- Form, G-1145, e-Notification of Application/Petition Acceptance.
- Form G-28, Notice of Entry of Appearance as Attorney or Accredited Representative.
- Form I-140, Petition for Alien Worker.
- Supporting documents for Petitioner.

Dr. Dantas qualifies as an alien of extraordinary ability **in the Sciences – Ophthalmology and Oculoplastic Surgery**[1]. under INA§203(b)(1)(A). The regulation at 8 CFR § 204.5(h) defines "extraordinary ability" as follows:

> (a) Extraordinary ability means a level of expertise indicating that the individual is one of that small percentage who have risen to the very top of the field of endeavor.
>
> (b) Initial evidence. A petition for an alien of extraordinary ability must be accompanied by evidence that the alien has sustained national or international acclaim and that his or her achievements have been recognized in the field of expertise. Such evidence shall include

[1] The specialized field of ophthalmology focused on surgical and reconstructive treatment of the eyelids, tear ducts, orbit (eye socket), and surrounding facial structures.

evidence of a one-time achievement (that is, a major, internationally recognized award), or **at least three** of the following (8 CFR 204.5(h)(3)):

i. Documentation of the alien's receipt of lesser nationally or internationally recognized prizes or awards for excellence in the field of endeavor;
ii. Documentation of the alien's membership in associations in the field of endeavor, which require outstanding achievements of their members, as, judged by recognized national or international experts in their fields;
iii. Published material in professional or major trade publications or major media about the alien and relating to the alien's work in the field of endeavor;
iv. Evidence of the alien's participation, either individually or on a panel, as a judge of the work of others in the same or an allied field of specification for which classification is sought;
v. Evidence of the alien's original scientific, scholarly, or business contributions of major significance in the field of endeavor;
vi. Evidence of alien's authorship of scholarly articles in the field, in professional journals or other major media;
vii. Evidence of the display of the alien's work at artistic exhibitions or showcase;
viii. Evidence that the alien has performed in a leading or critical role for organizations or establishments that have a distinguished reputation;
ix. Evidence that the alien has commanded a high salary or other significantly high remuneration for services, in relation to others in the field; or
x. Evidence of commercial successes in the performing arts, as shown by box office receipts or record, cassette, compact disk, or video sales.

(c) If the above standards do not readily apply to the beneficiary's occupation, the petitioner may submit comparable evidence to establish the beneficiary's eligibility.

This letter serves as a guide for all submitted evidence. Please find enclosed the referred documentation.

The petition is to obtain the immigrant classification on behalf of Dr. Dantas as a person of extraordinary ability. Dr. Dantas is a physician with over 25 years of experience in the sciences and clinical medicine, holding an M.D. from the Federal University of Paraná, Brazil, a residency and specialist certification in Ophthalmology, with recognized expertise and leadership in Oculoplastic Surgery, Lacrimal Surgery, medical education, research, and public health ophthalmic care.

Dr. Dantas has strong and clear evidence that she has attained a level of expertise indicating she is one of that small percentage of individuals who have risen to the very top of her field of specialization, as can be evidenced by (ii) membership in association that requires outstanding achievements; (iii) Published material about her in professional or major trade publications or other major media related to her work in the field; (iv) participation as a judge of the work of others in the same or allied field; (v) original scientific, scholarly, or business contributions of major significance to her field; (vi) authorship of scholarly articles in professional or major trade publications; (vii) display of her work at artistic exhibitions or showcases, herein submitted as a

comparable evidence (8 CFR 204.5 (h)(4)); (viii) leading or critical role for organizations or establishments that have a distinguished reputation; and (ix) high salary or substantially high remuneration for services in relation to others in the field.

Dr. Dantas will demonstrate through objective and credible evidence that, by applying the preponderance of evidence standard ("more likely than not"), she meets **at least eight** of the regulatory criteria, and when considering the petition in its entirety for the final merits determination, she also demonstrates the high level of expertise required for the classification. *(Kazarian v. USCIS*, 596 F.3d 1115 (9th Cir. 2010)).

Moreover, Dr. Dantas seeks to enter the United States to continue work in the area of extraordinary ability and her entry will substantially benefit the United States in the future, as it will be further demonstrated in this petition.

A. ELIGIBILITY:

I. Dr. Dantas' distinguished career and qualification as an individual of extraordinary ability

Dr. Dantas has built a distinguished medical career spanning more than twenty-five years of continuous practice in the sciences, with sustained accomplishments in Ophthalmology and advanced specialization in Oculoplastic Surgery, Lacrimal Surgery, and Ocular Surface Diseases. She earned her Doctor of Medicine degree from UFPR, one of Brazil's respected public universities, where she graduated first in her medical class and received the prestigious Professor Nilo Cairo Academic Award, the institution's highest academic distinction for superior scholastic performance. She subsequently completed her residency in Ophthalmology at the University of Campinas (UNICAMP), one of Brazil's leading academic medical centers, where she received highly specialized training in Oculoplastics, Cornea, Glaucoma, and Lacrimal Surgery.

Since 1998, Dr. Dantas has served as a government-appointed ophthalmologist within the Municipal Health Department of Campinas, in Sao Paulo, Brazil, where she has provided high-volume specialized care to thousands of patients in the public healthcare system. Her practice has focused on complex and functionally significant conditions involving the eyelids, tear drainage system, ocular surface disorders, glaucoma, diabetic eye disease, and cataract management. In this demanding public role, she became an internal clinical reference for oculoplastic and lacrimal cases, helping optimize patient flow, improve access to specialized treatment, and reduce waiting times for higher-complexity centers. Such long-term leadership in a major municipal health network reflects professional trust, recognized expertise, and sustained impact in her field.

In parallel, Dr. Dantas has maintained a successful private ophthalmology practice since 2002, where she continues to deliver advanced diagnostic and surgical care. Her longstanding dual service in both public and private medicine demonstrates an extraordinary level of professional demand, versatility, and sustained recognition by patients and institutions alike. Few physicians maintain high-level performance across both sectors for decades while preserving a reputation for clinical excellence, continuity of care, and specialized surgical judgment. Her more than two decades of concurrent practice underscore that her acclaim is not isolated or temporary, but rather the product of a consistently distinguished career.

Dr. Dantas' achievements have also been recognized through significant academic and teaching involvement. At UNICAMP's teaching hospital, she served as a volunteer surgical supervisor for ophthalmology residents over many years, providing hands-on training in lacrimal surgery, eyelid reconstruction, ptosis correction, tumor surgery, and cataract procedures. She was repeatedly selected as invited lecturer, panel coordinator, instructor, and course leader at major ophthalmology symposia and professional congresses, where she presented on subjects such as eyelid disorders, lacrimal disease, red eye differential diagnosis, botulinum toxin applications in ophthalmology, and oculoplastic surgery. These recurring appointments confirm that peer institutions relied upon her expertise to educate other physicians and healthcare professionals for a long period of time.

Beyond clinical practice and teaching, Dr. Dantas has contributed to the advancement of medical science through research, scholarly publication, and peer review invitations. She authored and co-authored scientific articles published in recognized medical journals, including *Arquivos Brasileiros de Oftalmologia* (The Brazilian Ophthalmology Archive), and she later received certification as an *ad hoc* reviewer for that same respected ophthalmic journal. She also participated as a sub-investigator in multicenter clinical trials involving innovative glaucoma therapies sponsored by Allergan[2], contributing to the evaluation of long-term efficacy and safety outcomes. In fact, these roles as author, reviewer, and clinical investigator demonstrate that her expertise has been acknowledged in patient care, an in the generation, evaluation, and advancement of scientific knowledge.

Moreover, Dr. Dantas' sustained acclaim is evidenced by continued honors and international recognition. In addition to graduating first in medical school, she was awarded the Certificate of Merit for 25 Years of Ethical Medical Service by the São Paulo State Medical Council, an official institutional recognition reserved for physicians with an unblemished professional trajectory and meaningful contributions to the prestige of medicine. Second, she has been selected for advanced clinical observerships and specialized training at internationally respected institutions, including the University of California, Irvine and the University of California, San Diego, while participating in prominent scientific meetings such as those of the American Academy of Ophthalmology and the American Society of Ophthalmic Plastic and Reconstructive Surgery. For all the reasons that will be better demonstrated through the accolades herein, Dr. Dantas is a physician whose career has been marked by excellence, leadership, professional trust, and sustained national and international recognition, fully consistent with classification as an individual of extraordinary ability in the sciences.

II. Dr. Dantas will continue working and contributing to the area of extraordinary ability in the United States

Under INA 203(b)(1)(A)(ii), to qualify as a person with extraordinary ability, the beneficiary must intend to continue to work in the area of his or her expertise upon immigrating to the United States. The statute does not require a specific job offer; rather, the petitioner must demonstrate a clear and credible intent to pursue professional activities within the same field in which extraordinary ability has been established. In this case, as a self-petitioner, Dr. Dantas clearly demonstrates intent to

[2] a globally recognized pharmaceutical company with substantial operations in ophthalmology and medical innovation.

continue working and contributing to the United States in the field that she is a demonstrated expert and that she has been engaged throughout her professional life.

Dr. Dantas' intended activities in the United States fall squarely within the same field in which she earned sustained distinction: the sciences, specifically Ophthalmology with advanced specialization in Oculoplastic Surgery and related periocular disorders. Her professional reputation was built through decades of clinical excellence, surgical experience, physician training, academic presentations, research participation, and specialized patient care in eyelid, lacrimal, orbital, and ocular surface conditions. The activities she intends to pursue in the United States directly correspond to that same body of expertise. Rather than seeking to transition into an unrelated occupation, Dr. Dantas intends to remain professionally engaged in ophthalmic and oculoplastic medicine through structured observerships, academic collaboration, continuing education, research support, conference participation, mentorship, and integration into professional societies while she completes the necessary licensing pathway for future clinical practice.

Dr. Dantas plans to begin her U.S. professional integration through formal observerships and institutional exposure that will allow her to align her extensive background with American protocols, standards of care, and healthcare systems. This is a continuation of her longstanding career, not a departure from it. She has already demonstrated commitment to international professional engagement through advanced training and observership experience at the University of California, Irvine, as well as planned advanced surgical education at the University of California, San Diego. These actions show that she is already actively participating in the U.S.-centered advancement of her specialty and has taken concrete steps to continue doing so upon relocation.

In addition, Dr. Dantas intends to contribute in non-licensure-dependent capacities that are highly valuable to the field of ophthalmology. Given her decades supervising residents, teaching physicians, organizing scientific courses, and managing high-volume public ophthalmic services, she is fully equipped to assist academic departments, training programs, nonprofit vision initiatives, research groups, and clinical education environments. Her over two decades experience in early detection of preventable blindness, glaucoma follow-up, diabetic eye disease management, triage systems, and access-to-care protocols provides practical expertise particularly relevant to underserved and aging populations in the United States.

Further evidencing prearranged professional commitment, Dr. Dantas has received support from peers in her specialty and has applied for membership with the American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS), the leading professional organization in her subspecialty. This step is significant because it reflects her active intention to integrate into the premier professional community governing the exact field in which she achieved distinction. Therefore, her documented plans for observerships, continued specialty training, research and educational involvement, professional society engagement, and eventual licensure pathway establish that Dr. Dantas will continue working in and materially contributing to the same area of extraordinary ability in the United States: advanced ophthalmology and oculoplastic surgery.

Accordingly, Dr. Dantas clearly satisfies the requirement under INA § 203(b)(1)(A)(ii). Her detailed and credible plan to expand, teach, research, and implement her specialty the United States constitutes a direct continuation of her area of extraordinary ability in Ophthalmology and Oculoplastic Surgery.

III. Dr. Dantas' entry to substantially benefit the United States in the future

INA 203(b)(1)(A)(iii) establishes that to qualify as a person with extraordinary ability, his/her entry must also substantially benefit the United States in the future. **This interpretation should be broad as neither the statute nor the regulations specifically define the statutory phrase "substantially benefit"**. (*see* U.S. Citizenship & Immigr. Servs., Policy Manual, vol. 6, pt. F, ch. 2, § A.3, https://www.uscis.gov/policy-manual/volume-6-part-f-chapter-2 (last updated Oct. 20, 2021).). The inquiry focuses on whether the individual's continued work in the field will provide meaningful, forward-looking contributions to the nation's interests, including scientific, educational, medical, or public health advancement.

Dr. Dantas' entry will substantially benefit the United States because her expertise directly aligns with longstanding national healthcare priorities involving prevention of avoidable vision loss, expanded access to specialty care, and improved outcomes for aging and medically vulnerable populations. Ophthalmic disease carries major public-health consequences in the United States, particularly where delayed diagnosis leads to blindness, falls, loss of independence, inability to work, and increased healthcare expenditures. Federal agencies have consistently recognized vision health as a national priority. The National Eye Institute and Healthy People 2030 identify the reduction of visual impairment, early detection, and access to eye care as important public health goals. See National Eye Institute, *About NEI*; U.S. Dep't of Health & Human Servs., *Healthy People 2030 – Vision*. Dr. Dantas' decades of experience diagnosing and managing cataracts, glaucoma, diabetic retinopathy, ocular surface disease, and eyelid disorders position her to support these objectives in a meaningful and practical manner.

In fact, her anticipated benefit is especially strong because it is grounded in sustained real-world service within high-demand public healthcare systems. For more than two decades, Dr. Dantas served in the public health network, where she treated thousands of patients and functioned as a clinical reference for complex oculoplastic and lacrimal cases. She also contributed to ophthalmic access and triage protocols designed to improve patient flow and prioritize urgent care. That experience is highly transferable to the United States, where many communities continue to face delays in specialty access, particularly low-income, elderly, immigrant, and rural populations. The ability to improve screening pathways, referral efficiency, perioperative counseling, and continuity of care can generate substantial public benefit even before independent licensure, through observerships, research collaboration, training support, quality-improvement initiatives, and institutional consulting within ophthalmology settings.

Dr. Dantas will also substantially benefit the United States through education and workforce development in a field that depends on highly trained professionals. She has extensive experience supervising residents, teaching surgical principles, organizing scientific courses, and mentoring physicians in complex ophthalmic procedures. The federal government has repeatedly emphasized strengthening the healthcare workforce and improving care capacity, including through the U.S. Department of Health and Human Services' workforce development initiatives and Healthy People 2030[3] goals relating to healthcare access and provider capacity. Her ability to contribute to physician training, continuing medical education, clinical protocol development, and specialty mentorship represents a forward-looking benefit that extends beyond any single patient encounter.

[3] https://odphp.health.gov/healthypeople

Experienced specialists who can transfer knowledge, elevate standards, and support younger practitioners provide multiplier effects throughout the healthcare system.

Finally, Dr. Dantas' future benefit is concrete because she has already begun structured integration into the American professional environment. Her U.S.-based observership at the University of California planned advanced training in California, and application to the American Society of Ophthalmic Plastic and Reconstructive Surgery demonstrate active steps toward contributing within the exact specialty in which she earned distinction. Her intended focus on early diagnosis, preventable blindness, periocular reconstruction, and access to ophthalmic services corresponds to recognized U.S. healthcare needs and measurable patient outcomes. In totality, the record shows that Dr. Dantas' entry would not yield speculative or generalized value; rather, it would bring a highly accomplished specialist whose expertise can enhance patient care systems, specialty education, and vision-health outcomes in the United States for years to come.

Accordingly, under the broad interpretation contemplated by INA § 203(b)(1)(A)(iii) and USCIS policy guidance, Dr. Dantas' entry will prospectively and substantially benefit the United States. Her continued work in ophthalmology, oculoplastic surgery, institutional collaboration, professional training, and scalable preventive vision-health initiatives will advance public health, clinical excellence, and healthy aging efforts nationwide. By a preponderance of the evidence, the statutory requirement of substantial prospective benefit is fully satisfied.

For supporting documentation demonstrating how Dr. Dantas intends to continue working in her field and substantially contribute to the United States, please refer to **Exhibit A**:

A.1. Dr. Dantas' Personal Statement.
A.2. Dr. Dantas' Resume.
A.3. Diploma of Physician and school transcripts – Federal University of Parana.
A.4. Certificate of completion medical residency in Ophthalmology – State University of Campinas.
A.5. Specialist certification in ophthalmology – Brazilian Medical Association (AMB).
A.6. Certificate - Specialization in Quantum Biophysics and Bioresonance Applied to Health - Cieph school of health technology.
A.7. Certificate of completion Specialization Program in Integrative Medicine – FACONNECT.
A.8. Certificate of completion Advanced Oculofacial Surgery Course 2026 – University of California, San Diego School of Medicine.
A.9. Acceptance email as International Associate Member with the American Society of Ophthalmic Plastic and Reconstructive Surgery – ASOPRS.
A.10. Eye Health Data and Statistics, Nat'l Eye Inst., Nat'l Insts. of Health, U.S. Dep't of Health & Hum. Servs., https://www.nei.nih.gov/about/education-and-outreach/eye-health-data-and-statistics.
A.11. United States Medical Licensing Examination (USMLE) Step 1 Scheduling Permit issued by the Federation of State Medical Boards (FSMB), evidencing Dr. Dantas' active pursuit of U.S. medical licensure and concrete steps toward continuing her professional activities and contributions in the United States healthcare sector.

B. EVIDENCE OF EXTRAORDINARY ABILITY

In the first step of the analysis, the adjudicatory framework requires a threshold evidentiary assessment to determine whether the petitioner has submitted documentation satisfying the regulatory criteria for classification as an individual of extraordinary ability. See 8 C.F.R. § 204.5(h)(3). At this first step, the inquiry is confined to evaluating whether the record demonstrates either (1) a singular, major internationally recognized award, or (2) evidence meeting **at least three** of the ten enumerated regulatory criteria, or evidence comparable to at least three of those criteria where applicable. Id.; U.S. Citizenship & Immigr. Servs., Policy Manual, vol. 6, pt. F, ch. 2, § B (updated Oct. 20, 2021).

When conducting this preliminary analysis, USCIS applies the preponderance of the evidence standard[4], requiring the petitioner to establish that it is more likely than not that the submitted documentation satisfies the applicable regulatory provisions. See USCIS Policy Manual, supra, vol. 6, pt. F, ch. 2, § B.

Criterion 2: Membership in associations in the field for which classification is sought that require outstanding achievement of their members, as judged by recognized national or international experts in their disciplines or fields.

In observance of this eligibility criterion under 8 CFR 204.5(h)(3)(ii), USCIS determines if the association for which the person claims membership requires that members have outstanding achievements in the field as judged by recognized experts in that field. Examples of associations in the field requiring outstanding achievement of their members may include but are not limited to: A membership in certain professional associations and a fellowship with certain organizations or institutions. See USCIS Policy Manual, Vol. 6, Pt. F, Ch. 2. The USCIS Policy Manual also clarifies that general membership in a professional association with higher, selective level of membership may qualify where admission is based on demonstrated, significant contributions to the field and is evaluated by recognized experts. Id.

The Brazilian Society of Oculoplastic Surgery - SBCPO

Dr. Danta's membership within SBCPO

Dr. Dantas has been a Full Member (Titular Member) of the Brazilian Society of Oculoplastic Surgery since 2018. SBCPO is the principal national association in Brazil dedicated to oculoplastic surgery, lacrimal surgery, orbital surgery, and related periocular specialties. The organization is affiliated with the Brazilian Council of Ophthalmology and the Brazilian Society of Ophthalmology, confirming its recognized standing within the profession.

[4] USCIS adjudicates immigration benefit requests under the **preponderance of the evidence** standard, analogous to the civil evidentiary burden recognized in U.S. proceedings, requiring that the claim be shown as **more likely than not**. See *Matter of Chawathe*, 25 I&N Dec. 369, 375–76 (AAO 2010).

The Society's bylaws establish several distinct membership levels, including Founding, Fellow, Aspirant, Adjunct, Titular (Full), Retired, Honorary, Emeritus, and International members. This tiered structure is important because it demonstrates that membership is not uniform and that higher classifications reflect greater professional standing and qualification.

SBCPO requires outstanding achievements of its members, as judged by recognized national or international experts.

The record shows that Full Membership is not open enrollment. SBCPO's published membership criteria state that Full Members must be physicians with more than three years of active practice in oculoplastics, orbit, and lacrimal pathways after completion of specialization training. Importantly, applicants must also submit documentary proof of their medical degree, ophthalmology specialization, curriculum vitae, recommendation letters from active members, and receive approval by the Society's Deliberative Council.

These requirements exceed mere possession of a license or years of experience in the area. They demand sustained post-training professional experience in the precise specialty field, peer endorsement from existing members, and formal review of the applicant's credentials and career history. Such standards are consistent with recognition of established professional achievement rather than open admission.

As a matter of fact, the adjudicating body, the Society's Deliberative Council, and the recommending members are themselves ophthalmologists and oculoplastic surgeons selected from the national professional community. They therefore constitute recognized national experts qualified to assess whether an applicant has attained the professional distinction necessary for Full Membership. Because SBCPO is a specialty society devoted exclusively to oculoplastic surgery, those evaluating candidates possess subject-matter expertise directly relevant to the field of classification sought.

Dr. Dantas' own admission into Full Membership is especially probative because, by 2018, she had already accumulated decades of ophthalmic practice, specialized surgical experience, teaching and supervision of residents, invited lectures, and recognized expertise in eyelid, lacrimal, and periocular disorders. Her acceptance into the Society's Full Member category reflects peer acknowledgment of those achievements.

The American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS)

Dr. Dantas membership within ASOPRS

Very recently, on April 26, 2026, Dr. Dantas' application for membership was formally accepted by the American Society of Ophthalmic Plastic and Reconstructive Surgery ("ASOPRS") under the International Associate membership. This recent acceptance is highly favorable evidence of Dr. Dantas' continuing professional recognition at the international level from one of the most respected specialty organizations in her field, demonstrating that her achievements remain current, relevant, and valued by leading peers in oculoplastic surgery.

Her admission is particularly significant because it occurred through a contemporary review of her professional qualifications, confirming that Dr. Dantas' expertise continues to meet the standards expected by a selective international society dedicated to advanced ophthalmic plastic and reconstructive surgery. USCIS has long recognized that recent honors, appointments, and memberships may be especially probative of sustained acclaim because they show that the beneficiary's reputation is ongoing rather than historical. Dr. Dantas' fresh acceptance into ASOPRS therefore provides timely evidence that her professional standing continues to grow and receive international acknowledgment.

Founded in 1969, ASOPRS is a leading professional membership society devoted to advancing education, research, and the quality of clinical practice in plastic and reconstructive surgery involving the face, orbits, eyelids, and lacrimal system. ASOPRS also publishes the peer-reviewed scientific journal Ophthalmic Plastic and Reconstructive Surgery, hosts annual scientific meetings, and sponsors one of the largest international conferences dedicated to oculofacial plastic surgery.

In addition, ASOPRS is directly relevant to Dr. Dantas' field because her career has focused on ophthalmology with specialization in oculoplastic surgery, including eyelid procedures, periocular reconstruction, functional blepharoplasty, and related eye-adjacent surgical care. These subject areas fall squarely within the exact disciplines ASOPRS exists to promote. For this reason, this membership therefore strongly supports that Dr. Dantas is recognized by distinguished professional peers in her area of extraordinary ability.

ASOPRS International Associate Membership requires outstanding achievements of its members, as judged by recognized national or international experts.

ASOPRS International Associate membership is *not* automatic, fee-based, or open to any physician upon request**.** Rather, the organization expressly limits this category to professionals practicing outside the United States who satisfy at least one substantive prerequisite: successful completion of an ASOPRS-approved international fellowship or membership in a recognized reciprocal society.

Dr. Dantas was accepted through the pathway requiring completion of an ASOPRS-approved international fellowship. This requirement is significant because it reflects prior successful training under standards recognized and approved by ASOPRS itself. Fellowship-based admission is qualitatively different from ordinary association membership based only on licensure or payment of dues. It requires advanced subspecialty training, demonstrated competence, and successful completion of a structured program directly within the precise field of oculoplastic surgery.

Moreover, ASOPRS requires applicants to submit a formal application, curriculum vitae, two recommendation letters from current ASOPRS members of at least five years, and documentary proof of eligibility**.** The organization further states that the ASOPRS Membership Committee reviews International Associate applications quarterly. This confirms that membership is conferred only after individualized review of credentials and peer-supported qualifications.

The evidence also demonstrates that the reviewing body itself consists of highly experienced experts. ASOPRS states that committee members must be ASOPRS members for a minimum of ten years, and the committee is chaired by the Membership Director with additional senior

members. Such requirements ensure that admissions decisions are made by established specialists with substantial standing in the field.

Indeed, the Membership Committee Chair, Edward J. Wladis, M.D., F.A.C.S., exemplifies the caliber of experts involved in this process. His credentials include leadership positions at Albany Medical College, numerous peer-reviewed publications, national lectures, awards, and service as an examiner, editor, and committee chair within ASOPRS and the American Academy of Ophthalmology. The participation of experts of this stature strongly supports that membership decisions are rendered by recognized national or international authorities.

Thus, Dr. Dantas' acceptance was not based merely on years in practice, payment of dues, or holding a medical license. It followed a selective, evidence-based admissions process requiring advanced subspecialty qualifications, peer recommendations, and review by veteran leaders in oculoplastic surgery.

Therefore, Dr. Dantas satisfies 8 C.F.R. § 204.5(h)(3)(ii). She is a Full Member of SBCPO and International Associate Member within ASOPRS, and the evidence demonstrates that these levels of membership require documented professional accomplishment, specialty experience, peer sponsorship, and approval by recognized experts in the field. Accordingly, her memberships constitute qualifying evidence of membership in an association that requires outstanding achievements of its members, as judged by recognized national or international experts. Supporting evidence establishing that Dr. Dantas meets this criterion is submitted under **Exhibit B**.

> **B.1.** Certificate of membership as a full member, the Brazilian Society of Oculoplastic Surgery, demonstrating that Dr. Dantas is a member within the society since 2018.
> **B.2.** Letters of recommendation written by national experts that supported her application back in 2018, demonstrating that SBCPO's membership requires outstanding achievements.
> **B.3.** Sections of SBCPO's which clearly demonstrate that the society requires outstanding achievements to be admitted as a full member.
> **B.4**. Expert Opinion Letter from Patricia Mitiko Santello Akaishi, M.D., Former President, Sociedade Brasileira de Cirurgia Plástica Ocular (SBCPO), explaining SBCPO membership standards and expert evaluation requirements for Full Membership.
> **B.5.** Printout *Become a Member of SBCPO*, Sociedade Brasileira de Cirurgia Plástica Ocular (SBCPO), https://sbcpo.org.br, demonstrating that the Society requires outsanting achievements of its members as judged by experts.
> **B.6.** SBCPO Deliberative Council information, demonstrating that the professionals that judge the applications for membership are recognized national experts in the field.
> **B.7**. ASOPRS acceptance email, dated April 26, 2026, demonstrating that Dr. Dantas is a current International Associate Member within the international association.
> **B.8**. Printout from the American Society of Ophthalmic Plastic and Reconstructive Surgery official website, "About ASOPRS," describing the organization's mission

dedicated to education, research, and quality of clinical practice in oculofacial plastic surgery.
B.9. Copy of Dr. Dantas' application within ASOPRS including support letters and ongoing emails, demonstrating that the association requires outstanding achievements of its members.
B.10. Printout from ASOPRS official membership page for International Associate status, submitted to demonstrate that this level of membership requires distinguished professional qualifications and expert review.
B.11. Printout from ASOPRS official webpage for the Membership Committee, stating that the Committee's purpose is to oversee the membership entry process and review membership applications with recommendations to the Board, and further stating that committee members must be ASOPRS members for a minimum of ten years, submitted to demonstrate that admissions decisions are made by recognized experts in the field.
B.12. Resume of Edward J. Wladis, M.D., F.A.C.S.**,** identified by ASOPRS as the Membership Director and Chair of the Membership Committee, submitted to demonstrate that ASOPRS membership applications are evaluated by recognized experts in ophthalmic plastic and reconstructive surgery.

Criterion 3. Published material about the beneficiary in professional or major trade publications or other major media, relating to the beneficiary's work in the field for which the classification is sought.

USCIS interprets the plain language of this criterion under 8 CFR 204.5(h)(3)(iii) requiring evidence that (1) the published material is related to the person and the person's specific work; (2) whether the publication qualifies as a professional publication, major trade publication, or major media publication. The USCIS Policy Manual further explains that qualifying evidence under this criterion may include documentation such as articles appearing in newspapers, magazines, academic or industry journals, books, textbooks, comparable publications, or transcripts of professional audio or video coverage discussing the individual and the individual's work. See U.S. Citizenship & Immigr. Servs., Policy Manual, vol. 2, pt. M, ch. 4(D)(3).

Officer must then evaluate whether the submitted material was published in a professional publication, a major trade publication, or other major media outlet. Id. In making this determination, adjudicators consider factors such as the intended audience of the publication, particularly for professional or trade publication, as well as the relative circulation, readership, or viewership associated with the publication when assessing whether it qualifies as major media. Id.

The record objectively demonstrates that Dr. Dantas and her work have been featured in major media, including widely circulated online newspapers and video-based media platforms. These independent media outlets selected Dr. Dantas for televised interviews concerning ophthalmology and eye health, reflecting public recognition of her expertise, and demonstrating that her professional reputation extends beyond private practice into broader educational and scientific outreach.

<u>Band Campinas – Band Mulher – Daytime talk show</u>

Digital broadcast media published by established television outlet featuring Dr. Dantas as an invited ophthalmology expert.

On December 17, 2025, Band Campinas / TV Band published and broadcast the segment titled "Blepharoplasty: Functional and Aesthetic Indications" on its daytime talk show Band Mulher, featuring Dr. Alessandra Dantas as the invited ophthalmology specialist. The enclosed transcript constitutes major video coverage of Dr. Dantas and her work, as the program specifically highlighted her professional expertise in oculoplastic surgery, public education regarding eyelid procedures, and the medical significance of functional and aesthetic blepharoplasty. Produced by a recognized television broadcaster and further disseminated through its online media channels, the segment serves as published media material about Dr. Dantas and her contributions in the field of ophthalmology.

Band Mulher is a weekday daytime talk show broadcast live on TV Band every weekday from Monday through Friday at 11:30 a.m. (Brazilian Time), reaching the station's regular television audience through one of Brazil's recognized broadcast networks. Following the live television transmission, the program is subsequently published on the broadcaster's official YouTube platform, allowing members of the public to view the segment on demand after the original airing. Accordingly, the preserved YouTube publication serves not merely as an internet reposting, but as documentary evidence that Dr. Alessandra Dantas was interviewed live on a major television channel and that the televised feature was later archived for continued public access.

TV Band publications classify as a major media publication.

Under 8 C.F.R. § 204.5(h)(3)(iii), a petitioner may satisfy this criterion through published material about the beneficiary in professional or major trade publications or other major media, relating to the beneficiary's work in the field. USCIS policy guidance explains that, when determining whether a source qualifies as major media, officers may consider the relative circulation, readership, or viewership of the publication or media outlet. The inquiry is practical and comparative rather than limited to print newspapers, and modern digital broadcasts, television programming, and online video publications may qualify where the source demonstrates substantial audience reach and recognized media status.

Neither the regulation nor the Policy Manual requires that a qualifying media source be exclusively national in origin. Rather, USCIS evaluates the totality of the evidence, including market reach, audience size, brand recognition, and actual dissemination. Accordingly, a regional affiliate of a

nationally recognized broadcast network may qualify as major media where it operates under the umbrella of a major network and reaches substantial television and digital audiences.

TV Band (Rede Bandeirantes) is one of Brazil's longstanding national television networks, widely recognized throughout the country for news, sports, entertainment, and daytime programming. As a branded affiliate of that network, Band Campinas operates within the larger Band broadcast system and carries the goodwill, market identity, and audience recognition associated with the national Band platform. Thus, although the interview was aired through a regional affiliate, it was not an obscure or isolated local source, but part of a major national media ecosystem.

The specific program, Band Mulher, is a weekday daytime talk show broadcast live Monday through Friday at 11:30 a.m. Brazilian time, a recurring scheduled television program designed for regular public viewership rather than a one-time internet upload. Dr. Dantas was selected as an invited medical expert for a featured segment titled "Blepharoplasty: Functional and Aesthetic Indications," where the program highlighted her expertise and professional work in ophthalmology and oculoplastic surgery. Selection for live televised expert commentary strongly supports that the outlet considered her a credible authority of interest to its audience.

Moreover, the program's digital presence confirms major-media reach. After live television broadcast, the segment is published on Band's official YouTube channels, extending public access beyond the original airtime and allowing continued on-demand viewership. In addition, Band's principal website, band.com.br, demonstrates substantial traffic and audience engagement. Independent web analytics reflect approximately **4.683 million monthly visits worldwide** in March 2026, confirming significant public visibility and sustained user traffic. These figures substantially exceed what would ordinarily be expected of minor or niche media sources.

Importantly, USCIS has repeatedly recognized that "major media" is a comparative concept. A source need not be the single largest outlet in a country to qualify; rather, it must demonstrate meaningful prominence, substantial audience exposure, or recognized industry significance. Here, TV Band's established national identity, Band Campinas' affiliate status, scheduled television broadcasting, and millions of monthly digital visits collectively demonstrate that the publication medium is major media under the regulation.

For this reason, the televised interview and subsequent online publication featuring Dr. Dantas on Band Mulher qualifies as published video material appearing in major media relating to Dr. Dantas and her work in the field. The evidence establishes that TV Band / Band Campinas is part of a recognized national broadcast network with substantial television and digital reach, and that the video feature therefore constitutes major video publication within the meaning of 8 C.F.R. § 204.5(h)(3)(iii).

Record TV – *Tha com tudo* TV show

The major video publication is about Dr. Dantas and Her Work

For purposes of 8 C.F.R. § 204.5(h)(3)(iii), the material must be about the beneficiary and must relate to the beneficiary's work in the field. Coverage centered on the beneficiary's expertise, professional analysis, medical services, or scientific contributions satisfies this requirement.

On December 5, 2025**,** Rede Record / Tha Com Tudo published and broadcast the segment titled "Blepharoplasty: Aesthetic and Functional Benefits", featuring Dr. Dantas as the invited ophthalmology specialist. The program was authored and disseminated through Record TV's official media channels and preserved on YouTube for public access. In the segment, Dr. Dantas explains eyelid surgery, patient indications, functional improvements, aesthetic outcomes, and medical considerations associated with blepharoplasty.

The subject matter directly concerns Dr. Dantas' specialized work in ophthalmology and oculoplastic surgery, a subspecialty devoted to eyelid, lacrimal, orbital, and periocular conditions. The interview showcases her professional knowledge and relies upon her as an expert educator for the viewing audience. Because the publication centers on her medical expertise and clinical specialty, it plainly constitutes material about Dr. Dantas and her work in the field.

Rede Record and *Tha Com Tudo* qualify as major media.

USCIS evaluates "major media" by considering practical indicators such as circulation, readership, viewership, brand recognition, distribution channels, and comparative audience reach. The regulation does not require that the specific segment originate from a headquarters studio or national newsroom. A regional station operating under a nationally recognized network may qualify where the evidence shows meaningful audience access and integration into a major broadcast platform.

Record TV is one of Brazil's largest and most established television networks, with nationwide brand recognition, long-running news and entertainment programming, and extensive terrestrial and digital distribution. Record TV Campinas functions as a local affiliate within this broader national network structure, broadcasting under the Record brand and benefiting from its market identity, credibility, and audience reach. Accordingly, the relevant publication source is not an isolated local blog or minor outlet, but part of one of Brazil's principal television systems.

Tha Com Tudo is a recurring daytime lifestyle and public-interest television show broadcast to regular viewers and designed for mainstream audience engagement. Dr. Dantas' selection as a featured medical guest demonstrates that the show sought expert commentary of public relevance.

Record's digital footprint further supports major-media status. Independent analytics for record.r7.com, Record's official web platform, reflect approximately **2.992 million monthly worldwide visits** in March 2026. These figures demonstrate substantial public exposure and continuing audience engagement beyond traditional television broadcasting. Additionally, the televised segment was later published on YouTube, extending reach through on-demand replay, searchable indexing, and continued public accessibility. This combination of broadcast television plus digital syndication is fully consistent with modern major-media dissemination.

In conclusion, the submitted evidence demonstrates that Dr. Dantas was invited to appear as a subject-matter expert on multiple television programs across prominent Brazilian media outlets, including TV Band and Record TV. The screenshots and transcripts included in the record clearly show Dr. Dantas being interviewed or featured in discussions related to ophthalmology, eye health, blepharoplasty, and functional and aesthetic periocular treatment, topics directly associated with her professional expertise in ophthalmology and oculoplastic surgery. The captions and

accompanying materials identify the relevant broadcast details, including the program name, channel, publication platform, and approximate broadcast or upload date, thereby providing reliable contextual evidence that these televised and digitally archived segments constituted published major media coverage discussing Dr. Dantas and her professional work fully satisfying the elements under 8 CFR 204.5(h)(3)(iii).

To demonstrate published video material about Dr. Dantas and her work in major media we are submitting the following evidence on **Exhibit C**:

C.1. Screenshot and transcript of *Band Mulher 12/17/2025*, featuring Dr. Alessandra Kurahashi Dantas discussing blepharoplasty and ophthalmology, published by Band Campinas on YouTube, https://www.youtube.com/watch?v=qShR1EyFjIs (Dec. 17, 2025), demonstrating published material about Dr. Dantas and her work.
C.2. Printout of Band Campinas official programming schedule showing *Band Mulher – Campinas* as a regularly scheduled weekday television program airing at 11:30 a.m., published on the official Band website, Band Campinas – Full Programming, demonstrating that the publication qualifies as a major media publication.
C.3. Screenshot of the official Band Campinas YouTube channel showing channel metrics, including approximately 91,900 subscribers, 32,387 uploaded videos, and 20,312,934 cumulative views, demonstrating substantial digital audience reach and viewership, consistent with a major media publication available at https://www.youtube.com/@BandtvCampinas.
C.4. Printout of independent web analytics for Band TV's official website, band.com.br, showing approximately 4.683 million monthly worldwide visits in March 2026, corroborating the national reach, audience engagement, and standing of the Band network brand as a major media publication**.**
C.5. Screenshot and transcript of *THA WITH EVERYTHING – LIVE* (Tha Com Tudo), featuring Dr. Dantas discussing eye health, ophthalmology, and specialized treatment of ocular conditions, published by TH+ Record on YouTube, https://www.youtube.com/watch?v=aHatsz7sFQE (May 12, 2025), demonstrating published material about Dr. Dantas and her professional work.
C.6. Screenshot of the official TH+ Record YouTube channel showing channel metrics, including approximately 18,900 subscribers, 1,935 uploaded videos, and 13,275,621 cumulative views, demonstrating substantial digital audience reach and viewership consistent with a major video publication.
C.7. Printout of independent web analytics for Record TV's official digital platform, record.r7.com, showing approximately 2.992 million monthly worldwide visits in March 2026, corroborating the national reach, audience engagement, and standing of the Record network brand as a major media publication.

Criterion 4. Participation, either individually or on a panel, as a judge of the work of others in the same or an allied field of specialization for which classification is sought.

To qualify for this eligibility criterion, the regulation determines whether the person has acted as the judge of the work of others in the same or allied field of specialization. The petitioner must

show that the person has not only been invited to judge the work of others, but also that the person actually participated in the judging proceeding (8 CFR 204.5(h)(3)(iv)).

***Ad hoc* reviewer – *Arquivos Brasileiros de Oftalmologia* (ABO)**

Dr. Dantas was invited, on October 09, 2025, to perform as *Ad hoc* Reviewer of the work *Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting* for Arquivos Brasileiros de Oftalmologia, a peer-reviewed scientific medical journal and one of Brazil's leading publications in ophthalmology, dedicated to disseminating original research, clinical studies, and scholarly developments in eye medicine and vision science. Dr. Dantas accepted the invitation to review the work on October 10, 2025, and actually submitted the review on October 12, 2025, according to official institution's communications.

This scientific article, published in *Arquivos Brasileiros de Oftalmologia*, addresses important issues related to eye health and the medical treatment of ophthalmic conditions. The publication falls directly within Dr. Dantas' professional field because it concerns ophthalmology, the branch of medicine dedicated to diagnosing, treating, and preventing diseases affecting the eyes and surrounding structures. As a physician specialized in ophthalmology and oculoplastic surgery, Dr. Dantas' review of this article demonstrates her active contribution to scientific knowledge in her specialty and her engagement through scholarly research and professional publication.

Therefore, Dr. Dantas' service as peer reviewer for this scientific journal squarely satisfies this criterion because it constitutes peer review of independent researchers' original scholarly work, a form of judging that USCIS has recognized as classic and **highly probative** evidence under this prong. *See* U.S. Citizenship & Immigr. Servs., USCIS Policy Manual, vol. 6, pt. F, ch. 2, § A.4. This role is inherently selective and extended based on demonstrated expertise and professional reputation, rather than any institutional obligation or routine academic duty. As a reviewer, the petitioner evaluates the originality, methodological rigor, and scientific merit of submitted manuscripts and provides confidential recommendations that directly influence publication outcomes, placing the petitioner in a position of authority over the work of other experts in the field. Such evaluation of original research for publication lies at the very core of "judging the work of others" contemplated by the regulations.

Moreover, publicly available editorial policies of ABO confirm that, after preliminary editorial review, specialized editors select anonymous volunteer reviewers to evaluate submitted manuscripts. Accordingly, Dr. Dantas' service as an *ad hoc* reviewer reflects that the journal's editorial leadership specifically selected her, based on her recognized expertise, to judge the scholarly work of other professionals prior to publication.

Collective, the submitted evidence demonstrates that Dr. Dantas was invited and actually participated as ad hoc reviewer for the scientific journal Arquivos Brasileiros de Oftalmologia, squarely aligned with the regulation and the USCIS adjudication standards pursuant to 8 CFR 204.5(h)(3)(iv).

To demonstrate the fulfillment of all elements within this criterion, we are summitting the following evidence under **Exhibit D**:

D.1. E-mail from Prof. Rodrigo Lira, Assoc. Ed., *Arquivos Brasileiros de Oftalmologia*, to Dr. Alessandra Dantas (Oct. 9, 2025, 15:07 BRT), inviting Dr. Dantas to peer-review Manuscript ID ABO-2025-0287, *Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting*, and thereby evidencing her invitation to judge the work of others in her field of extraordinary ability.
D.2. E-mail from Prof. Rodrigo Lira, Assoc. Ed., *Arquivos Brasileiros de Oftalmologia*, to Dr. Alessandra Dantas (Oct. 10, 2025, 09:38 BRT), acknowledging Dr. Dantas's acceptance of the invitation to review Manuscript ID ABO-2025-0287 and confirming access to the journal's Reviewer Center.
D.3. E-mail from Conselho Brasileiro de Oftalmologia, via Web of Science (Clarivate), to Dr. Alessandra Dantas (Oct. 12, 2025, 10:31 BRT), offering Web of Science recognition for her completed peer review of *Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting*, thereby confirming her participation as a reviewer.
D.4. E-mail from Prof. Rodrigo Lira, Assoc. Ed., *Arquivos Brasileiros de Oftalmologia*, to Dr. Alessandra Dantas (Oct. 12, 2025), confirming submission of Dr. Dantas's completed review of Manuscript ID ABO-2025-0287 and thereby demonstrating that she actually performed the peer evaluation.
D.5. *Arquivos Brasileiros de Oftalmologia*, *About*, https://www.aboonline.org.br/about establishing that ABO is a peer-reviewed ophthalmology journal published continuously since 1938 by the Brazilian Council of Ophthalmology, indexed in Web of Science, PubMed/MEDLINE, SCOPUS, EMBASE, SciELO, and LILACS, with a 2025 Impact Factor of 1.029, thereby demonstrating the reputability and trustworthiness of the publication and confirming that its scope falls squarely within Dr. Dantas's field of extraordinary ability.

Criterion 5. Original scientific, scholarly, artistic, athletic, or business-related contributions of major significance in the field.

In evaluating this specific regulatory criterion (8 CFR 204.5(h)(3)(v)), USCIS first determines whether the person has made original scientific, scholarly, artistic, athletic, or business-related contributions to the field. Then, Service determines whether the person's original contributions are considered of major significance to the field.

Dr. Dantas is one of the collaborators in the creation of the Ophthalmology Protocol – Access and Risk Assessment for the City of Campinas, Brazil, a structured clinical and public-health guideline that has been utilized by the municipal government from 2004 to the present and later adopted as a model by other Brazilian states. In addition to her role in developing this protocol, Dr. Dantas serves as a medical professional within the Municipal Program for the Promotion of Eye Health and Prevention of Blindness of the Municipality of Campinas, São Paulo, formally established and regulated by Municipal Decree No. 20,044, dated October 9, 2018. This governmental program constitutes an official municipal public policy implemented throughout Campinas' public health system, with emphasis on preventing avoidable blindness through coordinated eye-health

education, early vision screening, and organized access to specialized ophthalmological care within Brazil's Unified Health System ("SUS")[5].

The Ophthalmology Protocol to which Dr. Dantas contributed also served as a foundational framework for subsequent public health initiatives of substantial community impact, including "Outubro Brilhante" ("Bright October")[6], an official eye-health awareness campaign focused on prevention, early detection, and public education regarding avoidable vision loss. Built upon the same structured principles of screening, risk prioritization, and organized access to care, the campaign generated measurable public-health benefits through expanded outreach and increased awareness of eye disease. Its implementation and results were formally documented by governmental sources and disseminated through media coverage, further demonstrating that Dr. Dantas' work helped support scalable public-health programs with significant real-world impact, serving as a role model on a national scale.

Ophthalmology Protocol –Risk Assessment and Blind Prevention programs – Campinas, Sao Paulo, Brazil

Dr. Dantas' contribution to the creation of long-standing Risk Assessment protocol for a governmental entity is original.

The Protocol for Access and Risk Assessment in Ophthalmology is an official governmental clinical-access framework issued by the City of Campinas, Brazil. It was created to organize patient referrals and prioritize access to specialized ophthalmological care within the public health system using structured medical risk criteria. The protocol classifies patients by urgency levels (including emergency, priority, routine, and low-priority categories), establishes referral pathways, and directs prompt care for conditions associated with preventable blindness, cataracts, glaucoma, diabetic eye disease, pediatric vision disorders, ocular trauma, and other serious ophthalmic conditions. In practical terms, the protocol functions as a population-level triage and access-management system designed to allocate limited specialty resources efficiently while reducing avoidable visual impairment.

The documentary evidence demonstrates that Dr. Dantas was one of the identified contributors to its creation. The official 2004 original version and the 2011 revised edition expressly lists "Working Group – October 2004," identifying Dr. Dantas among the professionals who participated in the original working group responsible for developing the protocol. This is significant evidence because it directly links Dr. Dantas to the protocol's foundational development rather than subsequent implementation alone, therefore demonstrating its originality.

The protocol itself reflects a structured and specialized system that creates standardized ophthalmic triage criteria, visual acuity screening requirements, referral prioritization, emergency routing, and

[5] The country's publicly funded universal healthcare system, responsible for providing broad access to medical care, preventive services, vaccinations, specialty treatment, and public health programs to millions of residents nationwide.

[6] https://www.outubrobrilhante.com.br/

disease-specific pathways for glaucoma, cataracts, diabetic retinopathy, pediatric risk factors, eyelid tumors, and other vision-threatening conditions. Such a coordinated framework required professional medical judgment and specialty expertise in ophthalmology. Dr. Dantas' participation as an ophthalmologist within the working group therefore supports that she contributed expert knowledge to the development of a new governmental access model.

Furthermore, the protocol has remained in governmental use for many years and was formally revised in 2011 and 2018, indicating that the original framework possessed continuing utility and institutional value. Long-term adoption strongly suggests that the work was substantive and effective rather than temporary or experimental. The evidence further indicates that the protocol later served as a model for related eye-health initiatives and was referenced beyond Campinas, reinforcing that the underlying framework was innovative and replicable.

USCIS does not require proof that a beneficiary singlehandedly authored every aspect of a qualifying contribution. Where, as here, a physician is expressly named as part of the official working group that created a durable and specialized public-health protocol, the evidence supports a meaningful collaborative original contribution.

The Risk Assessment and Blindness Prevention has a major impact on ophthalmologic care and public health.

Under 8 C.F.R. § 204.5(h)(3)(v), it is not sufficient that a contribution be original; the petitioner must also demonstrate that the contribution is of major significance in the field. USCIS evaluates significance by considering practical evidence such as long-term adoption, implementation by governmental or respected institutions, measurable public benefit, replication by other entities, use as a model for subsequent programs, and sustained influence on professional or public-health practices. A contribution need not transform an entire national field to qualify; meaningful impact within a governmental healthcare system or specialty area may satisfy the criterion.

The evidence demonstrates that the Campinas ophthalmology protocol has had sustained and major impact on public healthcare delivery. First, the protocol was not a temporary pilot project. It was formally created in 2004, officially revised in 2011, incorporated into subsequent blindness-prevention structures, and confirmed by documentary evidence as remaining in governmental use through at least 2025. Continued governmental reliance over more than two decades strongly supports major significance. Public agencies do not maintain outdated or ineffective clinical-access systems for extended periods unless those systems provide continuing operational value.

Second, the protocol directly affects ophthalmologic care by organizing access to scarce specialty services through medically informed risk classification. It prioritizes urgent and preventable-blindness cases, including glaucoma, cataracts, diabetic eye disease, pediatric visual disorders, ocular trauma, and other serious conditions. By structuring referral pathways and triage criteria across the municipal health network, the protocol improves timely access to care, reduces delays for high-risk patients, and promotes more efficient use of ophthalmology resources. These are substantial healthcare outcomes with direct consequences for vision preservation and patient functioning.

Third, the record shows that the protocol served as a foundational framework for later public-health programs, including Outubro Brilhante ("Bright October"). News coverage and governmental documentation reflect that this initiative generated broad community outreach, public education, and screening activity designed to reduce avoidable vision loss[7]. The fact that later programs relied upon the protocol's structure demonstrates that Dr. Dantas' contribution was scalable and influential beyond the original document itself.

What is more, the protocol's major significance is confirmed by adoption outside Campinas. The evidence indicates that other jurisdictions used the Campinas model as a reference, including the State of Espírito Santo's 2020 ophthalmology protocol, where the Campinas protocol appears as a bibliographic source. Replication by another state-level health authority is powerful evidence that the work carried professional credibility and practical value beyond its city of origin. USCIS has recognized that when other institutions adopt or rely upon a beneficiary's work, such use strongly supports major significance. U.S. Citizenship & Immigr. Servs., *Policy Manual*, vol. 6, pt. F, ch. 4.

In conclusion, Dr. Dantas satisfies both components of 8 C.F.R. § 204.5(h)(3)(v) and corresponding USCIS policy guidance. The record establishes that she made an original contribution through her documented participation in the creation of the Campinas Protocol for Access and Risk Assessment in Ophthalmology, a specialized governmental framework for prioritizing ophthalmologic care and preventing avoidable blindness. The evidence further demonstrates that this contribution achieved major significance in the field, as shown by its long-standing governmental use at minimal from 2004 through 2025, continued official revisions and implementation, use as the foundation for broader public-health initiatives such as *Outubro Brilhante*, and adoption as a reference model by other Brazilian jurisdictions. Accordingly, Dr. Dantas has demonstrated original contributions of major significance in the field of ophthalmology and public health within the meaning of the regulation.

To assist in making the final determination for this criterion, we are submitting the following supporting documents under **Exhibit E:**

E.1. Original copy of "Protocol for access and risk assessment in ophthalmology", from city of Campinas, dated November 2011, listing Dr. Dantas as a member of the working group 2004, demonstrating that she made an original contribution to her field.
E.2. Original copy of "Protocol for access and risk assessment in ophthalmology", from city of Campinas, 2024 edition, listing Dr. Dantas as a member of the working group review - 2022, demonstrating that she made an original contribution to her field.
E.3. Official statement from City of Campinas, dated December 16, 2025, declaring that Dr. Dantas participated in the preparation of the Ophthalmology Protocol - Access and Risk Assessment of the Municipal Health Secretariat in the year 2004, demonstrating that she made original contributions.
E.4. Copy of Decree No. 20,044 of October 9, 2018 (municipal ordinance)**,** establishing "Outubro Brilhante" ("Bright October") and Cataract Blindness

[7] Outubro Brilhante*, supra note 6, at 20.*

Prevention Week, expressly recognizing the existence of the Protocol for Access and Risk Assessment for the ophthalmology specialty to organize referrals and guarantee priority access for preventable blindness cases, submitted to demonstrate the long-standing governmental adoption and major public-health impact of the ophthalmology risk assessment framework to which Dr. Dantas contributed.

E.5. The State Health Department of Espírito Santo entitled *Protocolo Gestão da Clínica e Regulação Formativa – Especialidade Oftalmologia* (2020/2021), listing in its bibliographic references the Campinas Protocol for Access and Risk Assessment in Ophthalmology, submitted to demonstrate that the ophthalmology risk assessment framework to which Dr. Dantas contributed was relied upon as an authoritative reference by another Brazilian state jurisdiction, thereby evidencing replication, external recognition, and major impact in the field.

E.6. Institution declaration of public health impact from the city of Campinas Health Department, stating that Dr. Dantas' program has been continuously implemented throughout the entire public health system of Campinas since 2018, benefits thousands of children annually, particularly vulnerable populations, and has achieved significant population-level impact in the prevention of avoidable blindness and promotion of eye health, therefore demonstrating major impact.

E.7. Printout of official Campinas municipal news article titled *Outubro Brilhante: ação especial reúne 3,4 mil vagas para atendimentos oftalmológicos gratuitos* (Oct. 1, 2025), reporting that the public-health campaign provided hundreds of free ophthalmologic appointments, pediatric services, diagnostic testing, and eyeglasses for children and teenagers, submitted to demonstrate the substantial public-health reach and measurable impact of a blindness-prevention initiative developed from the ophthalmology access and risk assessment framework to which Dr. Dantas contributed.

E.8. Printout of media article titled *Campinas zera demanda reprimida de consultas oftalmológicas, diz Saúde* (Oct. 6, 2025), highlighting the role of *Outubro Brilhante* and reorganized ophthalmologic care pathways, submitted to demonstrate recognized, measurable, and population-level impact of the ophthalmology system and related initiatives associated with Dr. Dantas' work.

Criterion 6. Authorship of scholarly articles in the field, in professional or major trade publications.

Under 8 C.F.R. § 204.5(h)(3)(vi), a petitioner may satisfy this evidentiary criterion by demonstrating authorship of scholarly articles in the field published in professional journals, major trade publications, or other major media. The USCIS Policy Manual explains that scholarly articles generally include publications reporting original research, analysis, or expert commentary intended for a specialized audience in the beneficiary's field of expertise. Such works are typically subject to editorial or peer review and are disseminated through recognized academic or professional publishing channels. See USCIS Policy Manual, Vol. 6, Pt. F, Ch. 2.

Dr. Dantas authored a scholarly article in her field in scientific journals

Dr. Dantas is one of the co-authors of a scientific article in the field of ophthalmology published in the *Arquivos Brasileiros de Oftalmologia* medical journal. Her publication is a clinical study

examining the effects of sildenafil citrate (Viagra®)[8] on retrobulbar circulation and visual field, a topic directly within the scope of ophthalmologic research and clinical practice.

The article published in 2021 reflects the defining characteristics of scholarly work as contemplated by USCIS. It presents a controlled clinical study, involving methodology, data collection, and analysis of results related to ocular physiology and visual function. The structure of the article, including abstract, methods, results, and conclusions, demonstrates adherence to standard scientific publication formats. Moreover, the study includes technical terminology, quantitative analysis, and clinical findings, and is clearly intended for a specialized audience of ophthalmologists, researchers, and medical professionals.

Furthermore, the journal's submission requirements confirm that published works must constitute original studies, epidemiological analyses, or theoretical contributions that add new information to the scientific literature, and must follow rigorous formatting, citation, and methodological standards. These requirements ensure that published articles are not general-interest writings, but rather scholarly contributions evaluated for scientific merit.

Accordingly, Dr. Dantas' authorship meets the USCIS definition of a scholarly article, as it is a peer reviewed, technical, research-based publication authored by a trained physician and specialist, contributing to the body of knowledge in ophthalmology.

The publication qualifies as a professional publication

USCIS next evaluates whether the publication qualifies as a professional publication, major trade publication, or major media, considering factors such as the intended audience and the nature of the publication. A professional publication is one directed to learned persons in the field, including physicians, researchers, and specialists.

Arquivos Brasileiros de Oftalmologia qualifies as a professional publication within the meaning of the regulation. It is the official scientific journal of the Brazilian Council of Ophthalmology, a leading professional organization in the field, and is dedicated exclusively to the dissemination of ophthalmologic research and clinical studies.

The journal publishes peer-reviewed original articles, including clinical, epidemiological, and experimental studies, all of which must present new and relevant scientific information based on appropriate methodology. Manuscripts are subject to formal submission requirements, including structured abstracts, ethical approval, references following international standards (ICMJE), and scientific formatting. These features are hallmarks of recognized professional medical journals.

Importantly, the journal's intended audience consists of ophthalmologists, medical researchers, and healthcare professionals, clearly satisfying the USCIS requirement that the publication be directed to "learned persons" in the field. The content is technical in nature and not accessible to lay audiences, further confirming its classification as a professional publication rather than general media.

[8] If someone takes this medicine, does it change how blood moves in the eye, and does it change what they can see?

Lastly, the journal is indexed in recognized scientific databases and serves as a platform for the dissemination of peer-reviewed research, reinforcing its standing within the professional ophthalmologic community.

Dr. Dantas' published conference presentations at nationally recognized conferences – The Brazilian Congress of Ophthalmology (CBO)

Under 8 C.F.R. § 204.5(h)(3)(vi) and the policy guidance, authorship of scholarly articles may include published conference presentations at nationally or internationally recognized conferences. A qualifying scholarly article is one that reflects technical or scientific discourse, is written for a learned audience, and contributes to the body of knowledge in the field. USCIS further recognizes that conference presentations may satisfy this criterion where they are part of **a** formal scientific program, particularly where submissions are reviewed and accepted for presentation at recognized professional conferences in the field.

Dr. Dantas satisfies this criterion through her authorship of three scientific presentations accepted and presented at the XXIX Brazilian Congress of Ophthalmology, held from September 3–6, 1997, in Goiânia, Brazil. The Brazilian Congress of Ophthalmology is organized by the Brazilian Council of Ophthalmology, the principal national professional organization governing the specialty, and constitutes the leading national scientific congress in ophthalmology in Brazil, bringing together specialists, researchers, and clinicians to present and discuss advances in the field.

The posters presentations authored by Dr. Dantas were titled:

- *"Simplified Technique of Suture in Canalicular Lacerations"*
- *"Use of Hyaluronidase in Functional Blockade of the Lacrimal Pathway – A Therapeutic Proposal"*
- *"Study of Dacryoscintigraphy in the Postoperative Period of Canaliculus Reconstruction"*

These works address specialized topics within ophthalmology, specifically in the area of lacrimal system surgery and postoperative evaluation, reflecting technical clinical analysis and therapeutic innovation. The subject matter is inherently scientific and directed to a learned audience of ophthalmologists and medical professionals, consistent with USCIS's definition of scholarly work.

In addition, presentations accepted at the CBO are part of a formal scientific program, which necessarily involves evaluation and selection of submissions based on relevance, methodology, and contribution to the field. Such conferences serve as platforms for the dissemination of new clinical approaches, surgical techniques, and diagnostic methodologies, and are widely recognized within the profession as contributing to the advancement of ophthalmologic knowledge and practice.

As the official congress of the Brazilian Council of Ophthalmology, the event holds national recognition, functioning as a central forum for scientific exchange in the field. Participation as an author and presenter at this congress reflects that Dr. Dantas' work was deemed original and valuable to be included in a nationally recognized scientific meeting, further supporting its classification as scholarly authorship under the regulation.

Thus, the record demonstrates that Dr. Dantas authored scholarly publications directed toward a professional audience within the field of ophthalmology. These publications therefore fall within the type of scholarly authorship contemplated by 8 C.F.R. § 204.5(h)(3)(vi) and the USCIS Policy Manual, which recognizes authorship of scholarly works disseminated through professional publications intended to a learned audience.

Objective and original evidence demonstrating that Dr. Dantas meets each requirement for this criterion, is submitted under **Exhibit F:**

> **F.1.** Copy of the scholarly article titled *The effects of a single dose of sildenafil citrate (Viagra®) on the retrobulbar circulation and visual field*, published in *Arquivos Brasileiros de Oftalmologia*, identifying Dr. Alessandra Kurahashi Dantas as a co-author, submitted to demonstrate her authorship of a scholarly article in the field of ophthalmology.
> **F.2.** Official website information from *Arquivos Brasileiros de Oftalmologia* "Instructions to Authors" webpage describing accepted manuscript types, including original clinical and scientific studies requiring methodological rigor, structured format, and compliance with international publication standards, submitted to demonstrate that the journal qualifies as a professional, peer-reviewed publication directed to a learned audience in the field of ophthalmology.
> **F.3.** Certificates of Poster Presentations the XXIX Brazilian Congress of Ophthalmology, dated September 1997, demonstrating that Dr. Dantas is the author of Published conference presentations at nationally recognized conferences.
> **F.4.** Printout of the Brazilian Council of Ophthalmology (CBO) Guidelines for Submitting Free Themes and Case Reports for the Brazilian Congress of Ophthalmology, detailing that submitted works must be original, follow structured scientific formats (including objective, method, results, and conclusion), and are subject to review and potential rejection by a Scientific Committee based on criteria such as methodological rigor and scientific contribution, submitted to demonstrate that conference presentations are formally evaluated and constitute scholarly works presented within a recognized professional scientific forum.

Criterion 7. Display of the work in the field in Public Exhibitions – submitted as comparable evidence.

When evaluating this eligibility criterion, USCIS first determines whether the work that was displayed is the person's work product. Second, USCIS determines whether the venues (virtual or otherwise) were a public showing as per *Merriam-Webster Dictionaries* (*see* 8 CFR 204.5(h)(3)(vii)).

Merriam-Webster's online dictionary defines "exhibition" as a public showing (as of works of art, objects of manufacture, or athletic skill). The policy continues with additional clarifications by stating that "While the dictionary definition includes public showings other than those that are artistic in nature, the plain language of the criterion includes the modifier "artistic" and explicitly requires that the exhibitions or showcases be artistic in nature. **USCIS only considers non-artistic exhibitions or showcases as part of a properly supported claim of comparable evidence**".

According to the USCIS Policy Manual, "petitioners may submit comparable evidence … if the evidentiary criteria **do not readily apply to the person's occupation**." U.S. Citizenship & Immigr. Servs., Policy Manual, vol. 6, pt. F, ch. 5, § B(2). (*See* 8 C.F.R. § 204.5(h)(4)).

Dr. Dantas' case merits a favorable adjudication of this criterion as comparable evidence. This specific regulatory criterion does not readily apply to her field of endeavor, the sciences with specialization in Ophthalmology and Oculoplastic Surgery. Criterion (vii) refers to exhibitions or showcases of an alien's work in the arts, but for scientists and medical researchers, the professional equivalent is the presentation of original research at prestigious scientific congresses and conferences. Dr. Dantas' original research has been co-displayed at such prestigious national and international forums on **several opportunities**, where her findings have been disseminated to and critically observed by distinguished experts worldwide. These presentations constitute a professional equivalent to exhibitions in the arts and therefore serve as valid comparable evidence under the regulation.

Additionally, while these events are designed primarily for professionals, they are often open to the public and scientific enthusiasts, thereby serving a similar function of public display and recognition of one's work. Accordingly, Dr. Dantas' presentations of her research at these nationally and internationally recognized scientific meetings are directly analogous to the exhibitions contemplated by the regulation. Under USCIS guidance, where a specific criterion does not align with the applicant's field, comparable evidence is permissible, and her sustained high number of presentations of her work in these distinguished scientific venues clearly demonstrates recognition of her contributions.

Brazilian Council of Ophthalmology (CBO)

Event: XXXII Brazilian Congress of Ophthalmology
Location: Salvador, Bahia, Brazil
Date: September 10–13, 2003
Role: Lecturer
Lecture: "Study of 305 Cases of Chronic Dacryocystitis" (Course: Infectious Diseases of the Lacrimal Pathways)
Organizer: Brazilian Council of Ophthalmology (CBO)
The Brazilian Congress of Ophthalmology is one of the most important national scientific meetings in ophthalmology, bringing together leading specialists, researchers, and clinicians to discuss advances in eye health, surgical techniques, and clinical research.

Brazilian Congress on Prevention of Blindness and Visual Rehabilitation

Event: XV Brazilian Congress on Prevention of Blindness and Visual Rehabilitation
Location: Curitiba, Paraná, Brazil
Date: August 31 – September 3, 2002
Role: Lecturer
Symposium Presentation: "Study of Chronic Dacryocystitis in 350 Cases" (Symposium: Infectious Diseases of the Lacrimal Pathways)
Organizer: Brazilian Council of Ophthalmology (CBO)
This congress is a major national forum focused on prevention of blindness, visual rehabilitation,

and public health strategies in ophthalmology, gathering experts dedicated to reducing visual impairment and advancing eye care.

SINCLIO – International Symposium on Cataract and Intraocular Lens

Event: X SINCLIO – International Symposium on Cataract and Intraocular Lens (Pre-Congress Course)
Location: UNICAMP, Campinas, Brazil
Date: March 7–10, 2005
Role: Lecturer
Course Lecture: "Lacrimal Pathways"
Organizer: UNICAMP Ophthalmology Seminar
SINCLIO is a well-recognized international symposium focusing on cataract surgery and intraocular lenses, promoting exchange between national and international experts on surgical innovations and clinical practice.

International Symposium on Cornea and Contact Lenses

Event: XI International Symposium on Cornea and Contact Lenses (Pre-Symposium Course)
Location: São Paulo, Brazil
Date: March 25–26, 2004
Role: Lecturer
Course Lecture: "Dacryocystorhinostomy" (Course: Loco-regional Anesthesia / Ocular Plastic Surgery Practice)
Organizer: UNICAMP Ophthalmology Seminar with institutional support (e.g., SOBLEC)
This international symposium focuses on cornea, contact lenses, and related surgical and clinical practices, attracting specialists in anterior segment and ocular surface diseases.

International Symposium on Cataract and Intraocular Lens

Event: VI International Symposium on Cataract and Intraocular Lens
Location: São Paulo, Brazil
Date: March 20–22, 1998
Role: Lecturer
Course Lecture: "Eye Drops Most Commonly Used in Ophthalmology" (Course for Ophthalmologist Assistants)
Organizer: Ophthalmology academic institutions and symposium committee
This symposium is an important international meeting addressing cataract surgery and intraocular lens advancements, with educational activities for both physicians and ophthalmic assistants.

UNICAMP Ophthalmology Seminar

Event: Ophthalmology Update Course
Location: Campinas, São Paulo, Brazil
Date: October 18, 2003
Role: Lecturer
Symposium Lecture: Ocular Plastic Surgery

Organizer: Department of Ophthalmology, UNICAMP
The UNICAMP Ophthalmology Update Course is an academic event focused on continuing medical education, offering updates on clinical and surgical ophthalmology topics.

UNICAMP Ophthalmology Seminar

Event: II Ophthalmology Update Course
Location: Campinas, São Paulo, Brazil
Date: October 16, 2004
Role: Lecturer
Course Lecture: "Differential Diagnosis of the Red Eye" (Emergency in Ophthalmology Course – Basic to Advanced)
Organizer: Department of Ophthalmology, UNICAMP
This course provides structured academic training in ophthalmology, emphasizing emergency care, diagnostic skills, and clinical decision-making.

Across these many events presented through extensive documentation, Dr. Dantas appears on **multiple occasions** in the role of coordinator and instructor, presenting and teaching on Ophthalmology in universities, teaching hospitals, municipal and federal programs, professional congresses, and major social/service institutions throughout Brazil.

Although conference presentations are not listed as a standalone regulatory criterion under 8 C.F.R. § 204.5(h)(3), USCIS permits applicants to submit comparable evidence when the listed criteria do not readily apply to the beneficiary's field. In the sciences field, dissemination of innovative methodologies through national scientific conferences, academic workshops, and invited lectures represents a recognized means of demonstrating influence and professional recognition.

Dr. Dantas' repeated invitations and selections to present her work at major conferences organized by leading institutions in Brazil and across the globe illustrate that her methodology attracted significant professional interest and recognition within the medical community. Therefore, these presentations serve as comparable evidence demonstrating that Dr. Dantas' work has been publicly exhibited and disseminated to professional audiences, reflecting the impact and recognition of her contributions within her field**.**

Importantly, **USCIS Policy Manual explicitly recognizes that, particularly in STEM fields, comparable evidence may include presentations at major trade shows or professional forums when a listed criterion is not easily applicable**. Dr. Dantas' documented work presentations at multiple nationally organized scientific congresses therefore constitute evidence of comparable significance to the artistic exhibition criterion, as they establish public display of her work product before a recognized professional audience as well as to the broader community.

Accordingly, because the artistic exhibition criterion does not readily apply to a research scientist, and because the evidence submitted demonstrates competitive, public display of her original scientific work at nationally recognized professional conferences, the regulatory requirements under 8 C.F.R. § 204.5(h)(4) for comparable evidence are satisfied.

For a comprehensive list of congresses and conferences where Dr. Dantas has presented her work, please refer to **Exhibit G**:

G.1. Certificate of participation as Lecturer at the XXXII Brazilian Congress of Ophthalmology, held in Salvador, Bahia, Brazil, from September 10–13, 2003, where Petitioner presented "Study of 305 Cases of Chronic Dacryocystitis" in the course on Infectious Diseases of the Lacrimal Pathways, organized by the Brazilian Council of Ophthalmology (CBO).
G.2. Certificate of participation as Lecturer at the XV Brazilian Congress on Prevention of Blindness and Visual Rehabilitation, held in Curitiba, Paraná, Brazil, from August 31 to September 3, 2002, where Petitioner presented "Study of Chronic Dacryocystitis in 350 Cases" in Symposium I on Infectious Diseases of the Lacrimal Pathways, organized by the Brazilian Council of Ophthalmology (CBO).
G.3. Certificate of participation as Lecturer at the X SINCLIO – International Symposium on Cataract and Intraocular Lens (Pre-Congress Course), held in Campinas, Brazil, from March 7–10, 2005, where Petitioner delivered a lecture on "Lacrimal Pathways," organized by the UNICAMP Ophthalmology Seminar.
G.4. Certificate of participation as Lecturer at the XI International Symposium on Cornea and Contact Lenses, held in São Paulo, Brazil, on March 26, 2004, where Petitioner lectured on "Dacryocystorhinostomy" in the course on Loco-regional Anesthesia, organized by the UNICAMP Ophthalmology Seminar.
G.5. Certificate of participation as Lecturer at the XI International Symposium on Cornea and Contact Lenses (Pre-Symposium), held in São Paulo, Brazil, on March 25, 2004, where Petitioner lectured on "Use in Ophthalmology" within the course "The Daily Practice of the Ophthalmologist – Ocular Plastic Surgery," organized by the UNICAMP Ophthalmology Seminar.
G.6. Certificate of participation as Lecturer at the VI International Symposium on Cataract and Intraocular Lens, held in São Paulo, Brazil, from March 20–22, 1998, where Petitioner presented "Eye Drops Most Commonly Used in Ophthalmology" in the Course for Ophthalmologist Assistants.
G.7. Certificate of participation as Lecturer at the Ophthalmology Update Course held at the School of Medical Sciences of UNICAMP, Campinas, Brazil, on October 18, 2003, where Petitioner lectured in the Ocular Plastic Surgery Symposium, organized by the Department of Ophthalmology of UNICAMP.
G.8. Certificate of participation as Lecturer at the II Ophthalmology Update Course, held in Campinas, Brazil, on October 16, 2004, where Petitioner presented "Differential Diagnosis of the Red Eye" in the Emergency in Ophthalmology Course, organized by the Department of Ophthalmology of UNICAMP.

Criterion 8. Evidence that the person has performed in a leading or critical role for organizations or establishments of distinguished reputation.

To demonstrate beneficiary's eligibility under this criterion (8 CFR 204.5(h)(3)(viii) USCIS first evaluates whether the person has performed in a leading or critical role for an organization, establishment, or a division or department of an organization or establishment as well as whether the role is (or was) leading or critical. Second, USCIS determines whether the organization or

establishment (department or division) for which the petitioner holds or held a leading or critical role, is of distinguished reputation.

Partner at *Nova Campinas* Ophthalmology Center

Dr. Dantas performs a leading or critical role for the organization.

Dr. Dantas satisfies the first requirement defined in the regulation by demonstrating that she performs *both* a leading and critical role at *Nova Campinas Oftalmologia* (Nova Campinas Ophthalmology Center), as established through documentary evidence and a detailed confirmation letter from a knowledgeable professional within the organization.

First, Dr. Dantas holds the formal title of partner (owner) of the clinic, as evidenced by the company's official registration records and partnership agreement. Under USCIS policy guidance, a title, when supported by corresponding duties, may establish a leading role. Here, the evidence demonstrates that Dr. Dantas' ownership is accompanied by substantive leadership responsibilities, including participation in the strategic direction and governance of the organization. She is directly involved in defining the scope of services offered, approving major investments in medical equipment and infrastructure, and making high-level decisions regarding the clinic's positioning and expansion. She also participates in the approval of annual budgets, monitors financial performance, and exercises authority over hiring and allocation of both medical and administrative personnel.

The evidence also establishes that Dr. Dantas retains decision-making authority over core institutional matters, including the establishment of clinical quality standards, approval of internal protocols, and ensuring compliance with regulatory and ethical requirements. These responsibilities reflect primary leadership over essential aspects of the organization, consistent with USCIS's definition of a leading role.

In addition to her leadership role, Dr. Dantas' role is independently critical to the organization's core activities. As a practicing ophthalmologist within the clinic, she provides direct clinical care, including outpatient consultations, surgical procedures, interpretation of diagnostic exams, and coordination of care for patients with complex or chronic ocular conditions. In a specialized medical practice, such clinical functions are central to the organization's mission, and the performance of highly trained physicians directly impacts patient outcomes and institutional success.

Furthermore, the evidence demonstrates that Dr. Dantas' contributions have had measurable and significant impact on the organization's growth and operations. Under her leadership and participation, the clinic has expanded to include 11 ophthalmologists and 23 support staff, and currently provides approximately 16,000 patient consultations and 800 surgical procedures annually, with consistent growth of approximately 5% per year. This expansion reflects the effectiveness of her strategic decisions, particularly in the client database, development of services, acquisition of advanced medical technology, and strengthening of the clinic's operational capacity.

Dr. Dantas has also played a key role in establishing and maintaining institutional partnerships, including agreements with major health insurance providers in Brazil, such as Unimed[9], Bradesco Saúde[10], Sul América Saúde[11], and Amil[12]. These partnerships are essential to expanding access to care and increasing patient volume, further demonstrating that her role contributes directly to the outcomes and success of the organization's activities, as contemplated by USCIS policy.

Finally, consistent with USCIS guidance, the detailed letter from Dr. Denise de Oliveira, another partner at *Nova Campinas*, provides first-hand, probative evidence of the significance of Dr. Dantas' role (**Exhibit H.5.**). The letter describes with specificity her leadership authority, clinical responsibilities, and measurable contributions to the organization's growth, thereby reinforcing that her role is both leading in structure and critical in function.

***Nova Campinas Oftalmologia* is an organization with a distinguished reputation**

For the second part of the regulation, USCIS determines that the petitioner must establish that the organization for which the beneficiary performed a leading or critical role has a distinguished reputation, meaning it is marked by excellence, recognition, or prominence within its field. *Distinguished*, MERRIAM-WEBSTER. While factors such as longevity alone are not dispositive, USCIS considers the totality of the evidence, including the scale of operations, size of the client base, scope of services, institutional partnerships, and demonstrated growth, as well as any evidence of market presence or recognition.

Nova Campinas Oftalmologia meets the standard of a distinguished organization when evaluated under the totality of the evidence. The clinic demonstrates substantial operational scale and consistent growth, reflecting its established position within the regional healthcare market. Founded in 2002, the clinic has over two decades of continuous operation, evidencing stability and sustained demand for its services. More importantly, the clinic currently provides approximately 16,000 patient consultations and 800 surgical procedures annually, supported by a team of 11 ophthalmologists and 23 staff members, as confirmed by the record. This volume of services significantly exceeds that of a small or routine practice and reflects a high-capacity medical operation serving a large patient population, a factor USCIS expressly recognizes as relevant to reputation.

In addition, the clinic offers a comprehensive range of specialized ophthalmologic services, including care in cataract surgery, refractive errors, cornea and anterior segment, glaucoma, retina, pediatric ophthalmology, strabismus, and oculoplastics. The breadth of these services indicates that the clinic functions as a multi-subspecialty center, rather than a limited or general practice, further supporting its standing as an established and capable institution within the field.

What is more, *Nova Campinas Oftalmologia* maintains institutional relationships with major national health insurance providers in Brazil. These partnerships require credentialing, compliance, and demonstrated clinical capacity, and are typically extended only to providers that meet recognized standards of quality and reliability. The existence of such agreements reflects the

[9] https://www.unimed.coop.br/site/unimed-do-brasil
[10] https://www.bradescoseguros.com.br/clientes/produtos/plano-saude
[11] https://portal.sulamericaseguros.com.br/
[12] https://institucional.amil.com.br/

clinic's integration into the formal healthcare system and recognition by major industry stakeholders, further supporting its reputation.

Additionally, publicly available information on the clinic's website[13] confirms its positioning as a specialized ophthalmologic center providing diagnostic, clinical, and surgical services with modern infrastructure and a multidisciplinary medical team. The clinic's continued expansion in services, personnel, and patient volume, combined with documented annual growth of approximately 5%, demonstrates sustained institutional development and reinforces its standing in the regional healthcare market.

Taken together, these factors establish that *Nova Campinas Oftalmologia* is marked by excellence, scale, and recognized capacity within its field, consistent with the USCIS understanding of a "distinguished" organization. Its long-standing operation, large and growing patient base, breadth of specialized services, and formal partnerships with major healthcare providers collectively demonstrate a level of eminence and professional recognition beyond that of an ordinary medical practice.

Accordingly, the evidence establishes that Dr. Dantas has sustained a leading and critical role for an organization of distinguished reputation for decades. Her role as a partner for *Nova Campinas Oftalmologia* demonstrates her sustained leadership, institutional impact, and recognition within her field, thereby satisfying the evidentiary criterion set forth under 8 C.F.R. § 204.5(h)(3)(viii) and the corresponding interpretation provided in the USCIS Policy Manual. To demonstrate that she clearly meets this criterion we are submitting the following evidence under **Exhibit H**:

H.1. Amendment to the Partnership Agreement of Nova Campinas Oftalmologia further evidencing Petitioner's continued leadership role and expanded responsibilities within the organization.
H.2. Nova Campinas registration – Brazilian National Register of Legal Entities.
H.3.Official Clinical Staff ("Corpo Clínico") documentation of Nova Campinas Oftalmologia identifying Petitioner as a leading physician within the institution, confirming her senior position in the organization's professional structure.
H.4. Letter from Denise Fornazari de Oliveira, attesting to Petitioner's leadership role, professional standing, and significant contributions within Nova Campinas Oftalmologia.
H.5. Official Statement from Nova Campinas Oftalmologia, signed by André Flores, certifying the institution's 25-year history of operations, its substantial patient volume of approximately 16,000 consultations and 800 surgeries annually, and its consistent 5% annual growth rate, demonstrating its distinguished reputation.
H.6. Printout from the Brazilian National Registry of Health Establishments (CNES/DATASUS) listing Andre Corio Flores as an Administrator affiliated with Nova Campinas Oftalmologia, including his active status and role within the organization, submitted to demonstrate his official position and competence to provide a statement regarding the clinic's operations with elements sufficient to support its distinguished reputation.

[13] https://nco.med.br/

Criterion 9. Evidence that the person has commanded a high salary or other significantly high remuneration for services in relation to others in the field

The regulation provides that a petitioner may satisfy this criterion by submitting evidence that the beneficiary has commanded a high salary or other significantly high remuneration for services, in relation to others in the field. 8 C.F.R. § 204.5(h)(3)(ix). The USCIS Policy Manual clarifies that remuneration may include not only wages but also bonuses, equity distributions, profit participation, dividends, or other forms of compensation derived from professional activities, and that evidence may include tax records, accountant statements, or financial documentation demonstrating the beneficiary's earnings relative to the field. *See* U.S. Citizenship & Immigr. Servs., USCIS Policy Manual, vol. 6, pt. F, ch. 2(D)(2).

Dr. Dantas' official source of income demonstrate that she commands a substantially high remuneration in her field.

The record demonstrates that Dr. Dantas commands substantial remuneration through multiple concurrent professional roles all related to her field – the sciences (Ophthalmology and Oculoplastic Surgery), including (i) revenue derived as a partner in two ophthalmology practices and (ii) a salaried government physician position.

First, as a partner in Nova Campinas Oftalmologia Ltda., Dr. Dantas derives income from a highly active and established ophthalmology clinic. According to a certified statement from her accountant, the company generated R$ 3,438,244.82 in gross revenue in 2023**,** R$ 3,689,351.47 in 2024**,** and R$ 3,841,196.35 from January through October 2025, reflecting sustained high-volume operations, continued growth, and significant earnings capacity attributable to its physician-partners.

Second, as a partner in Dantas Oftalmologia Ltda**.**, Dr. Dantas similarly derives substantial professional income from her own ophthalmology practice. Certified accounting records show R$ 1,719,415.60 in gross revenue in 2023**,** R$ 1,870,251.02 in 2024, and R$ 1,686,442.99 from January through October 2025, further demonstrating consistent and significant revenue generation across multiple years.

Third, Dr. Dantas is employed as an ophthalmologist by the City of Campinas, where she receives a gross annual salary of R$ 180,502.40**,** inclusive of the statutory 13th salary, reflecting her recognized qualifications and continued engagement in public-sector medical service.

These figures demonstrate that Dr. Dantas has commanded a substantially high level of remuneration across multiple years and revenue streams, combining private-sector income with public-sector employment compensation, all related to her field. Based on the certified accounting evidence, her combined annual remuneration for 2024 alone totals at least R$ 5,740,104.89**,** derived as follows:

- Nova Campinas Oftalmologia Ltda.: R$ 3,689,351.47
- Dantas Oftalmologia Ltda.: R$ 1,870,251.02
- Prefeitura de Campinas (salary): R$ 180,502.40

Dr. Dantas' remuneration is substantially high in comparison with other professionals in her field, according to the comparative salary analysis.

Dr. Dantas' remuneration is substantially high relative to others working in her field, as required by the regulation. In 2024, Dr. Dantas earned at least R$ 5,740,104.89 from her professional activities, including income derived from her medical practice entities and her public employment as a physician.

To evaluate whether this compensation is substantially high, it is appropriate to compare her earnings to reliable, location-specific salary data for similarly situated professionals. According to a nationwide salary survey based on administrative labor data (CAGED)[14] Ophthalmologists in Brazil earn an average monthly salary of approximately R$ 7,815.66, with a reported maximum monthly salary of R$ 13,753.10. This corresponds to an approximate annual average salary of R$ 93,787.92 and an estimated **upper-range annual salary of R$ 165,037.20**.

When compared to these benchmarks, the Beneficiary's annual remuneration of **R$ 5.74 million** is extraordinary. Specifically, her earnings are approximately:

- 61 times higher than the national average for ophthalmologists; and
- Nearly 35 times higher than the upper-end salary range **reported for the profession.**

This dramatic disparity establishes that Dr. Dantas' compensation lies far beyond even the highest reported earnings within her occupational category. Even accounting for variations in experience, specialization, or geographic location, the magnitude of this difference places her remuneration well outside the standard compensation spectrum for ophthalmologists in Brazil.

Moreover, while the survey reflects salaries under the traditional employment model, her compensation appropriately includes income derived from her leadership and ownership of specialized ophthalmological practices. USCIS policy explicitly recognizes that, for entrepreneurs and founders, business-generated income constitutes valid evidence of remuneration for services. Here, the Beneficiary's substantial earnings directly reflect the market value of her expertise, reputation, and leadership within the field.

For this reason, the income earned by Dr. Dantas' shown through a template of recent years, demonstrates that the services developed and delivered by her command substantially high remuneration relative to others in the same field, reflecting the extraordinary demand and market recognition of her expertise in ophthalmology and oculoplastic surgery. Such financial performance places her well within the top compensation percentiles among professionals in her specialty, providing strong objective evidence that her services are valued far above the norm in the marketplace. Accordingly, the record establishes that Dr. Dantas has commanded significantly high remuneration for services in relation to others in the field, consistent with the evidentiary criterion set forth under 8 C.F.R. § 204.5(h)(3)(ix) and interpreted in the USCIS Policy Manual.

[14] https://www.gov.br/trabalho-e-emprego/pt-br/assuntos/estatisticas-trabalho/o-pdet/o-que-e-caged

To demonstrate that Dr. Dantas meets this criterion, we are submitting the supporting evidence under **Exhibit I**:

> **I.1.** Certified statement from Petitioner's accountant, Edivalmir Antonio Massa, attesting to Petitioner's remuneration derived from her activities as a partner in Nova Campinas Oftalmologia Ltda. and Dantas Oftalmologia Ltda., as well as her salary as a public employee physician, including detailed revenue figures for 2023, 2024, and 2025.
> **I.2.** Corporate tax filing (ECF) for Nova Campinas Oftalmologia Ltda. for the 2024 fiscal year, documenting the company's gross revenue and corroborating Petitioner's substantial remuneration derived from her role as a partner.
> **I.3.** Corporate tax filing (ECF) for Nova Campinas Oftalmologia Ltda. for the 2023 fiscal year, further evidencing consistent and significant revenue generation attributable to Petitioner's professional activities.
> **I.4.** Official income statement from the City of Campinas reflecting Petitioner's salary as a government-employed ophthalmologist, including her annual compensation.
> **I.7.** Copy of Dr. Dantas' foreign federal income tax return.
> **I.6.** Industry compensation data for ophthalmologists in Brazil, demonstrating that Petitioner's remuneration is substantially higher than that of other professionals working in the same field.

C. TOTALITY OF EVIDENCE - FINAL MERIT DETERMINATION:

In *Kazarian v. USCIS,* 596 F.3d 1115 (9th Cir. 2010), the court ruled that USCIS officers should use a two-step analysis to evaluate the evidence submitted with the petition to demonstrate eligibility for classification as a person with extraordinary ability in the sciences, arts, education, business, or athletics through sustained national or international acclaim indicating that the person is one of that small percentage who has risen to the very top of the field of endeavor. The officer applies a preponderance of the evidence standard of proof when making this determination.

Furthermore, according to the USCIS Manual: "At this step, officers consider any potentially relevant evidence in the record, even if such evidence does not fit one of the above regulatory criteria or was not presented as comparable evidence. The officers consider all the evidence in the totality. Some evidence may weigh more favorably on its own, while other evidence is more persuasive when viewed with other evidence." (Emphasis added). *See* U.S. Citizenship & Immigr. Servs., Policy Manual, vol. 6, pt. F, ch. 2, § A(2) (2025), https://www.uscis.gov/policy-manual.

After establishing that Dr. Dantas clearly meets far above the minimum eligibility criteria, it is also persuasive that she meets, when applying the standard of proof, the character of extraordinary ability in the field of sciences. The extensive record of her career accomplishments, the several mentions to her name and her method in the major media and professional venues, the originality and major impact of her protocol for the public health, her published articles in high-ranking Journals with great impact factor, the high-profile original contributions to academia and groundbreaking research, her critical roles for organizations of distinguished reputation, and her substantially high remuneration, are sufficient to demonstrate her sustained national and international acclaim in her field throughout Brazil.

Beyond satisfying the plain language of multiple regulatory criteria, the totality of the evidence demonstrates that Dr. Dantas has achieved the level of sustained national and international acclaim required under the second step of the analysis set forth in *Kazarian*. Id. The record does not reflect isolated achievements or temporary recognition. Rather, it establishes a career marked by continuous distinction, peer recognition, leadership, and influence spanning more than two decades in the field of ophthalmology, with advanced specialization in oculoplastic and lacrimal surgery.

Dr. Dantas' career trajectory reflects early recognition followed by long-term excellence. Graduating first in her medical class and receiving the highest academic honor from her institution, she continued to build a career defined by increasing responsibility, specialization, and professional trust. Her decades-long service as a government-appointed ophthalmologist within a major municipal health system, combined with her parallel success in private practice, demonstrates consistent demand for her expertise across distinct and competitive environments. This dual-track career, sustained over more than twenty years, is itself a hallmark of physicians who have achieved enduring professional recognition rather than transient success.

Importantly, Dr. Dantas' acclaim is externally validated by her peers and institutions, not merely self-asserted. She has been repeatedly selected to teach, lecture, and train other physicians, including supervising residents in surgical procedures and presenting at major national and international conferences. Such invitations are inherently selective and reflect that professional peers rely on her expertise to educate others in the field, a strong indicator of sustained recognition and not merely an accomplished professional. In parallel, her role as a peer reviewer for a respected ophthalmology journal confirms that she is entrusted to evaluate the scientific work of other experts, placing her within the group of professionals who shape the field's scholarly standards.

Her contributions also extend beyond individual practice into lasting institutional and public-health impact. As a named contributor to the Ophthalmology Protocol for Access and Risk Assessment implemented by the City of Campinas, Dr. Dantas helped develop a system that has remained in use for over two decades, has been formally updated, and has served as a model for other jurisdictions. The longevity, replication, and governmental reliance on this work demonstrate that her contributions are not only original, but also enduring and influential at a systemic level, which is precisely the type of impact contemplated by USCIS in assessing sustained acclaim.

Furthermore, Dr. Dantas' recognition has expanded beyond national borders, confirming that her acclaim is not geographically limited. Her recent acceptance into the American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS), a leading international organization in her subspecialty, reflects current and ongoing peer recognition at the international level. This is particularly probative under *Kazarian*, as it shows that her reputation continues to be evaluated and affirmed by leading experts in the field today, not only earlier in her career.

Assuredly, this is not a record of isolated achievements, but a consistent and reinforcing pattern of innovation, validation, dissemination, leadership, and recognition over more than three decades. The evidence demonstrates that Dr. Dantas is not simply an experienced practitioner, but a field-defining expert whose original work has been adopted, recognized, and relied upon by both institutions and the broader community. Accordingly, under the totality of the evidence, it is more likely than not that she belongs to that small percentage of individuals who have risen to the very top of the field of ophthalmology, fully satisfying the standard set forth under INA § 203(b)(1)(A).

Accordingly, when viewed under the totality-of-the-evidence framework in *Kazarian*, Dr. Dantas has demonstrated that she is one of the small percentages who have risen to the very top of her field of endeavor.

Rarity of Oculoplastic Specialists and Value to the United States

Dr. Dantas' expertise is particularly significant because it lies within a highly specialized and relatively rare subspecialty of ophthalmology. Oculoplastic surgery, encompassing eyelid reconstruction, lacrimal system surgery, orbital disease, and periocular functional and aesthetic procedures, requires additional fellowship-level training beyond general ophthalmology. According to the American Society of Ophthalmic Plastic and Reconstructive Surgery, the number of surgeons who complete formal oculoplastic fellowship training worldwide remains limited, and membership in leading professional societies reflects a select group of highly specialized practitioners. Similarly, workforce data from the American Academy of Ophthalmology[15] indicates that subspecialists represent only a fraction of practicing ophthalmologists, with oculoplastic surgeons comprising a particularly small subset.

This relative scarcity is highly relevant to the United States, where demand for specialized ophthalmic care continues to grow due to population aging, increasing prevalence of chronic eye disease, and the need for reconstructive and functional periocular procedures. Federal public-health initiatives, including those supported by the National Eye Institute, emphasize the importance of early diagnosis, surgical intervention, and specialized care to prevent vision loss and improve quality of life. In this context, Dr. Dantas' level of subspecialized expertise, combined with decades of high-volume clinical experience and public-health system leadership, represents a valuable and scarce professional resource whose contributions can directly support national healthcare priorities.

Additional Evidence of Extraordinary Ability

Finally, in addition to the evidence submitted under the enumerated regulatory criteria, the Petitioner includes supplementary documentation under **Exhibit J** to further demonstrate Dr. Dantas' level of extraordinary ability. While this evidence may not fall squarely within a single regulatory category, USCIS policy confirms that adjudicators must consider the totality of the record, including relevant documentation that reflects the beneficiary's professional standing, influence, and recognition in the field. This additional evidence provides further context and reinforces that Dr. Dantas' career, when viewed holistically, reflects the level of distinction, sustained acclaim, and professional impact expected of individuals classified as possessing extraordinary ability.

> **J.1.** State Council of Medicine in Sao Paulo Certificate of recognition for 25 years of practice to Dr. Dantas;
> **J.2.** Certificates of participation as a coordinator for national congresses and conferences in her field.
> **J.3.** Other relevant digital media publications about Dr. Dantas' work not classified as major media – radio, regional magazines, and youtube channels.

J.4. Evidence of recognition and trust – certificate of voluntary work performed by Dr. Dantas in her field.
J.5. Certificate of collaborator in the health week from the Union of Gakusseis in Curitiba, Brazil.
J.6. Declaration from the Ophthalmology Department, School of Medical Sciences (FCM/UNICAMP), certifying that Dr. Dantas conducted a lecture on "Antibiotics and Antivirals" (May 20, 1997).
J.7. Certificate from the Federal University of Paraná confirming that Dr. Dantas received the "Professor Nilo Cairo" Academic Award for ranking first in the Medicine program and achieving the highest overall academic performance (Jan. 22, 1996).
J.8. Certificate of recognition from the Brazilian Council of Ophthalmology for Dr. Alessandra Kurahashi Dantas' participation in the National Visual Rehabilitation Campaign "Eye to Eye" (2001).
J.9. Declaration from the Department of Ophthalmology, Clinical Hospital of UNICAMP, confirming Dr. Alessandra Kurahashi Dantas' participation in the "Meninas dos Olhos de Atibaia" blindness prevention program (Sept. 27, 2025).
J.10. Letter of Support from Maria Augusta Montenegro, PhD.
J.11. Letter of Support from Carlos Eduardo Leite Arieta, PhD.
J.12. Letter of Support from Jeremiah Tao, MD.
J.13. Letter of Support from Pablo Cibils, MD.
J.14. Letter of Support from Cintia de Paiva, MD.
J.15. Dr. Dantas' personal documents
J.16. Derivative beneficiary's personal documents.

In sum, the breadth of the evidence unequivocally establishes that Dr. Dantas meets the burden of proof for classification as an alien of extraordinary ability under INA §203(b)(1)(A). Her consistent record of high-level contributions to sciences affirms that she is at the forefront of her profession and whose continuous presence in the United States will be invaluable.

Conclusion and Request for Favorable Adjudication

In conclusion, Dr. Dantas high-level achievements, and consistent contributions to her field demonstrate that she meets the standard required for the EB-1A visa classification. Her work has left a significant and lasting impact in the scientific community, as evidenced by the several accolades and widespread recognition her projects have received.

In the aggregate, this evidentiary record confirms Dr. Dantas extraordinary ability and her eligibility under INA 203(b)(1)(A). The evidentiary portfolio, evaluated under the preponderance of evidence standard and in accordance with *Kazarian v. USCIS*, affirms that she belongs to the small percentage of professionals who have risen to the very top of the Sciences – Ophthalmology and Oculoplastic Surgery.

We trust that the documents presented herein are sufficient to warrant a favorable decision on the request. In totality, Dr. Dantas has proven her eligibility for classification as a person with extraordinary ability in the sciences. We are confident that her extraordinary abilities will continue

to benefit this nation. We kindly request that you consider her application favorably and grant her the opportunity to further her outstanding career in the United States.

Thus, for all the reasons set forth in this letter, we respectfully request that the USCIS grant ALESSANDRA KURAHASHI DANTAS request for the EB-1A Visa.

Your attention to this case will be deeply appreciated. Thank you for your time and consideration of this request.

Sincerely,

Otavio Haverroth Silva
California Bar # 343486

Exhibit list

Exhibits:	Pages:
Exhibit A	
A.1. Dr. Dantas' Personal Statement.	1
A.2. Dr. Dantas' Resume.	2-11
A.3. Diploma of Physician and school transcripts – Federal University of Parana.	12-23
A.4. Certificate of completion medical residency in Ophthalmology – State University of Campinas.	24-28
A.5. Specialist certification in ophthalmology – Brazilian Medical Association (AMB).	29-36
A.6. Certificate - Specialization in Quantum Biophysics and Bioresonance Applied to Health - Cieph school of health technology.	37-41
A.7. Certificate of completion Specialization Program in Integrative Medicine – FACONNECT.	42-46
A.8. Certificate of completion Advanced Oculofacial Surgery Course 2026 – University of California, San Diego School of Medicine.	47
A.9. Acceptance email as International Associate Member with the American Society of Ophthalmic Plastic and Reconstructive Surgery – ASOPRS.	48-50
A.10. Eye Health Data and Statistics, Nat'l Eye Inst., Nat'l Insts. of Health, U.S. Dep't of Health & Hum. Servs., https://www.nei.nih.gov/about/education-and-outreach/eye-health-data-and-statistics.	51-52
A.11. United States Medical Licensing Examination (USMLE) Step 1 Scheduling Permit issued by the Federation of State Medical Boards (FSMB), evidencing Dr. Dantas' active pursuit of U.S. medical licensure and concrete steps toward continuing her	53-55

professional activities and contributions in the United States healthcare sector.

Exhibit B - Membership in associations in the field for which classification is sought that require outstanding achievement of their members, as judged by recognized national or international experts in their disciplines or fields

B.1. Certificate of membership as a full member, the Brazilian Society of Oculoplastic Surgery, demonstrating that Dr. Dantas is a member within the society since 2018. 56-58

B.2. Letters of recommendation written by national experts that supported her application back in 2018, demonstrating that SBCPO’s membership requires outstanding achievements. 59-64

B.3. Sections of SBCPO’s which clearly demonstrate that the society requires outstanding achievements to be admitted as a full member. 65-73

B.4. Expert Opinion Letter from Patricia Mitiko Santello Akaishi, M.D., Former President, Sociedade Brasileira de Cirurgia Plástica Ocular (SBCPO), explaining SBCPO membership standards and expert evaluation requirements for Full Membership. 74-78

B.5. Printout Become a Member of SBCPO, Sociedade Brasileira de Cirurgia Plástica Ocular (SBCPO), https://sbcpo.org.br, demonstrating that the Society requires outsanting achievements of its members as judged by experts. 79-80

B.6. SBCPO Deliberative Council information, demonstrating that the professionals that judge the applications for membership are recognized national experts in the field. 81-84

B.7. ASOPRS acceptance email, dated April 26, 2026, demonstrating that Dr. Dantas is a current International Associate Member within the international association. 85-87

B.8. Printout from the American Society of Ophthalmic Plastic and Reconstructive Surgery official website, “About ASOPRS,” describing the organization’s mission dedicated to education, research, and quality of clinical practice in oculofacial plastic surgery. 88-89

B.9. Copy of Dr. Dantas’ application within ASOPRS including support letters and ongoing emails, demonstrating that the association requires outstanding achievements of its members. 90-94

B.10. Printout from ASOPRS official membership page for International Associate status, submitted to demonstrate that this level of membership requires distinguished professional qualifications and expert review. 95

B.11. Printout from ASOPRS official webpage for the Membership Committee, stating that the Committee’s purpose is to oversee the membership entry process and review membership applications with recommendations to the Board, and further stating that committee members must be ASOPRS members for a minimum of ten years, submitted to demonstrate that admissions decisions are made by recognized experts in the field. 96

B.12. Resume of Edward J. Wladis, M.D., F.A.C.S., identified by ASOPRS as the Membership Director and Chair of the Membership Committee, submitted to demonstrate that ASOPRS membership applications are evaluated by recognized experts in ophthalmic plastic and reconstructive surgery. 97-123

Exhibit C - Published material about the beneficiary in professional or major trade publications or other major media, relating to the beneficiary’s work in the field for which the classification is sought

C.1. Screenshot and transcript of Band Mulher 12/17/2025, featuring Dr. Alessandra Kurahashi Dantas discussing blepharoplasty and ophthalmology, published by Band Campinas on YouTube, https://www.youtube.com/watch? 124-151

v=qShR1EyFjIs (Dec. 17, 2025), demonstrating published material about Dr. Dantas and her work.

C.2. Printout of Band Campinas official programming schedule showing Band Mulher – Campinas as a regularly scheduled weekday television program airing at 11:30 a.m., published on the official Band website, Band Campinas – Full Programming, demonstrating that the publication qualifies as a major media publication. 152-153

C.3. Screenshot of the official Band Campinas YouTube channel showing channel metrics, including approximately 91,900 subscribers, 32,387 uploaded videos, and 20,312,934 cumulative views, demonstrating substantial digital audience reach and viewership, consistent with a major media publication available at https://www.youtube.com/@BandtvCampinas. 154

C.4. Printout of independent web analytics for Band TV’s official website, band.com.br, showing approximately 4.683 million monthly worldwide visits in March 2026, corroborating the national reach, audience engagement, and standing of the Band network brand as a major media publication. 155-157

C.5. Screenshot and transcript of THA WITH EVERYTHING – LIVE (Tha Com Tudo), featuring Dr. Dantas discussing eye health, ophthalmology, and specialized treatment of ocular conditions, published by TH+ Record on YouTube, https://www.youtube.com/watch?v=aHatsz7sFQE (May 12, 2025), demonstrating published material about Dr. Dantas and her professional work. 158-177

C.6. Screenshot of the official TH+ Record YouTube channel showing channel metrics, including approximately 18,900 subscribers, 1,935 uploaded videos, and 13,275,621 cumulative views, demonstrating substantial digital audience reach and viewership consistent with a major video publication. 178

C.7. Printout of independent web analytics for Record TV’s official digital platform, record.r7.com, showing approximately 2.992 million monthly worldwide visits in March 2026, corroborating the national reach, audience engagement, and standing of the Record network brand as a major media publication. 179-181

Exhibit D - Participation, either individually or on a panel, as a judge of the work of others in the same or an allied field of specialization for which classification is sought

D.1. E-mail from Prof. Rodrigo Lira, Assoc. Ed., Arquivos Brasileiros de Oftalmologia, to Dr. Alessandra Dantas (Oct. 9, 2025, 15:07 BRT), inviting Dr. Dantas to peer-review Manuscript ID ABO-2025-0287, Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting, and thereby evidencing her invitation to judge the work of others in her field of extraordinary ability. 182-185

D.2. E-mail from Prof. Rodrigo Lira, Assoc. Ed., Arquivos Brasileiros de Oftalmologia, to Dr. Alessandra Dantas (Oct. 10, 2025, 09:38 BRT), acknowledging Dr. Dantas's acceptance of the invitation to review Manuscript ID ABO-2025-0287 and confirming access to the journal's Reviewer Center. 186-189

D.3. E-mail from Conselho Brasileiro de Oftalmologia, via Web of Science (Clarivate), to Dr. Alessandra Dantas (Oct. 12, 2025, 10:31 BRT), offering Web of Science recognition for her completed peer review of Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting, thereby confirming her participation as a reviewer. 190

D.4. E-mail from Prof. Rodrigo Lira, Assoc. Ed., Arquivos Brasileiros de Oftalmologia, to Dr. Alessandra Dantas (Oct. 12, 2025), confirming submission of Dr. Dantas's completed review of 191

Manuscript ID ABO-2025-0287 and thereby demonstrating that she actually performed the peer evaluation.	
D.5. Arquivos Brasileiros de Oftalmologia, About, https://www.aboonline.org.br/about establishing that ABO is a peer-reviewed ophthalmology journal published continuously since 1938 by the Brazilian Council of Ophthalmology, indexed in Web of Science, PubMed/MEDLINE, SCOPUS, EMBASE, SciELO, and LILACS, with a 2025 Impact Factor of 1.029, thereby demonstrating the reputability and trustworthiness of the publication and confirming that its scope falls squarely within Dr. Dantas's field of extraordinary ability.	192-196

Exhibit E - Original scientific, scholarly, artistic, athletic, or business-related contributions of major significance in the field

E.1. Original copy of “Protocol for access and risk assessment in ophthalmology”, from city of Campinas, dated November 2011, listing Dr. Dantas as a member of the working group 2004, demonstrating that she made an original contribution to her field.	197-221
E.2. Original copy of “Protocol for access and risk assessment in ophthalmology”, from city of Campinas, 2024 edition, listing Dr. Dantas as a member of the working group review - 2022, demonstrating that she made an original contribution to her field.	222-242
E.3. Official statement from City of Campinas, dated December 16, 2025, declaring that Dr. Dantas participated in the preparation of the Ophthalmology Protocol - Access and Risk Assessment of the Municipal Health Secretariat in the year 2004, demonstrating that she made original contributions.	243-245
E.4. Copy of Decree No. 20,044 of October 9, 2018 (municipal ordinance), establishing “Outubro Brilhante” (“Bright October”) and Cataract Blindness Prevention Week, expressly recognizing the	246-248

existence of the Protocol for Access and Risk Assessment for the ophthalmology specialty to organize referrals and guarantee priority access for preventable blindness cases, submitted to demonstrate the long-standing governmental adoption and major public-health impact of the ophthalmology risk assessment framework to which Dr. Dantas contributed.

E.5. The State Health Department of Espírito Santo entitled Protocolo Gestão da Clínica e Regulação Formativa – Especialidade Oftalmologia (2020/2021), listing in its bibliographic references the Campinas Protocol for Access and Risk Assessment in Ophthalmology, submitted to demonstrate that the ophthalmology risk assessment framework to which Dr. Dantas contributed was relied upon as an authoritative reference by another Brazilian state jurisdiction, thereby evidencing replication, external recognition, and major impact in the field. 249-263

E.6. Institution declaration of public health impact from the city of Campinas Health Department, stating that Dr. Dantas' program has been continuously implemented throughout the entire public health system of Campinas since 2018, benefits thousands of children annually, particularly vulnerable populations, and has achieved significant population-level impact in the prevention of avoidable blindness and promotion of eye health, therefore demonstrating major impact. 264-266

E.7. Printout of official Campinas municipal news article titled Outubro Brilhante: ação especial reúne 3,4 mil vagas para atendimentos oftalmológicos gratuitos (Oct. 1, 2025), reporting that the public-health campaign provided hundreds of free ophthalmologic appointments, pediatric services, diagnostic testing, and eyeglasses for children and teenagers, submitted to demonstrate the substantial public-health reach and measurable impact of a blindness-prevention initiative developed from the ophthalmology access and risk assessment framework to which Dr. Dantas contributed. 267-272

E.8. Printout of media article titled Campinas zera demanda reprimida de consultas oftalmológicas, diz Saúde (Oct. 6, 2025), highlighting the role of Outubro Brilhante and reorganized ophthalmologic care pathways, submitted to demonstrate recognized, measurable, and population-level impact of the ophthalmology system and related initiatives associated with Dr. Dantas' work.	273-298

Exhibit F - Authorship of scholarly articles in the field, in professional or major trade publications

F.1. Copy of the scholarly article titled The effects of a single dose of sildenafil citrate (Viagra®) on the retrobulbar circulation and visual field, published in Arquivos Brasileiros de Oftalmologia, identifying Dr. Alessandra Kurahashi Dantas as a co-author, submitted to demonstrate her authorship of a scholarly article in the field of ophthalmology.	299
F.2. Official website information from Arquivos Brasileiros de Oftalmologia "Instructions to Authors" webpage describing accepted manuscript types, including original clinical and scientific studies requiring methodological rigor, structured format, and compliance with international publication standards, submitted to demonstrate that the journal qualifies as a professional, peer-reviewed publication directed to a learned audience in the field of ophthalmology.	300-307
F.3. Certificates of Poster Presentations the XXIX Brazilian Congress of Ophthalmology, dated September 1997, demonstrating that Dr. Dantas is the author of Published conference presentations at nationally recognized conferences.	308-314
F.4. Printout of the Brazilian Council of Ophthalmology (CBO) Guidelines for Submitting Free Themes and Case Reports for the Brazilian Congress of Ophthalmology, detailing that submitted works must be original, follow structured scientific formats (including objective, method, results, and conclusion), and are subject to review and potential	315-320

rejection by a Scientific Committee based on criteria such as methodological rigor and scientific contribution, submitted to demonstrate that conference presentations are formally evaluated and constitute scholarly works presented within a recognized professional scientific forum.

Exhibit G - Display of the work in the field in Public Exhibitions

G.1. Certificate of participation as Lecturer at the XXXII Brazilian Congress of Ophthalmology, held in Salvador, Bahia, Brazil, from September 10–13, 2003, where Petitioner presented “Study of 305 Cases of Chronic Dacryocystitis” in the course on Infectious Diseases of the Lacrimal Pathways, organized by the Brazilian Council of Ophthalmology (CBO). 321-323

G.2. Certificate of participation as Lecturer at the XV Brazilian Congress on Prevention of Blindness and Visual Rehabilitation, held in Curitiba, Paraná, Brazil, from August 31 to September 3, 2002, where Petitioner presented “Study of Chronic Dacryocystitis in 350 Cases” in Symposium I on Infectious Diseases of the Lacrimal Pathways, organized by the Brazilian Council of Ophthalmology (CBO). 324-326

G.3. Certificate of participation as Lecturer at the X SINCLIO – International Symposium on Cataract and Intraocular Lens (Pre-Congress Course), held in Campinas, Brazil, from March 7–10, 2005, where Petitioner delivered a lecture on “Lacrimal Pathways,” organized by the UNICAMP Ophthalmology Seminar. 327-329

G.4. Certificate of participation as Lecturer at the XI International Symposium on Cornea and Contact Lenses, held in São Paulo, Brazil, on March 26, 2004, where Petitioner lectured on “Dacryocystorhinostomy” in the course on Loco-regional Anesthesia, organized by the UNICAMP Ophthalmology Seminar. 330-332

G.5. Certificate of participation as Lecturer at the XI International Symposium on Cornea and Contact Lenses (Pre-Symposium), held in São Paulo, Brazil, on March 25, 2004, where Petitioner lectured on “Use in Ophthalmology” within the course “The Daily Practice of the Ophthalmologist – Ocular Plastic Surgery,” organized by the UNICAMP Ophthalmology Seminar. 333-335

G.6. Certificate of participation as Lecturer at the VI International Symposium on Cataract and Intraocular Lens, held in São Paulo, Brazil, from March 20–22, 1998, where Petitioner presented “Eye Drops Most Commonly Used in Ophthalmology” in the Course for Ophthalmologist Assistants. 336-338

G.7. Certificate of participation as Lecturer at the Ophthalmology Update Course held at the School of Medical Sciences of UNICAMP, Campinas, Brazil, on October 18, 2003, where Petitioner lectured in the Ocular Plastic Surgery Symposium, organized by the Department of Ophthalmology of UNICAMP. 339-341

G.8. Certificate of participation as Lecturer at the II Ophthalmology Update Course, held in Campinas, Brazil, on October 16, 2004, where Petitioner presented “Differential Diagnosis of the Red Eye” in the Emergency in Ophthalmology Course, organized by the Department of Ophthalmology of UNICAMP. 342-344

Exhibit H - Evidence that the person has performed in a leading or critical role for organizations or establishments of distinguished reputation

H.1. Amendment to the Partnership Agreement of Nova Campinas Oftalmologia further evidencing Petitioner’s continued leadership role and expanded responsibilities within the organization. 345-379

H.2. Nova Campinas registration – Brazilian National Register of Legal Entities. 380-382

H.3.Official Clinical Staff (“Corpo Clínico”) documentation of Nova Campinas Oftalmologia identifying Petitioner as a leading physician within 383-387

the institution, confirming her senior position in the organization’s professional structure.

H.4. Letter from Denise Fornazari de Oliveira, attesting to Petitioner’s leadership role, professional standing, and significant contributions within Nova Campinas Oftalmologia. 388-389

H.5. Official Statement from Nova Campinas Oftalmologia, signed by André Flores, certifying the institution’s 25-year history of operations, its substantial patient volume of approximately 16,000 consultations and 800 surgeries annually, and its consistent 5% annual growth rate, demonstrating its distinguished reputation. 390-392

H.6. Printout from the Brazilian National Registry of Health Establishments (CNES/DATASUS) listing Andre Corio Flores as an Administrator affiliated with Nova Campinas Oftalmologia, including his active status and role within the organization, submitted to demonstrate his official position and competence to provide a statement regarding the clinic’s operations with elements sufficient to support its distinguished reputation. 393

Exhibit I - Evidence that the person has commanded a high salary or other significantly high remuneration for services in relation to others in the field

I.1. Certified statement from Petitioner’s accountant, Edivalmir Antonio Massa, attesting to Petitioner’s remuneration derived from her activities as a partner in Nova Campinas Oftalmologia Ltda. and Dantas Oftalmologia Ltda., as well as her salary as a public employee physician, including detailed revenue figures for 2023, 2024, and 2025. 394-398

I.2. Corporate tax filing (ECF) for Nova Campinas Oftalmologia Ltda. for the 2024 fiscal year, documenting the company’s gross revenue and corroborating Petitioner’s substantial remuneration derived from her role as a partner. 399-407

I.3. Corporate tax filing (ECF) for Nova Campinas Oftalmologia Ltda. for the 2023 fiscal year, further evidencing consistent and significant revenue generation attributable to Petitioner’s professional activities. 408-414

I.4. Official income statement from the City of Campinas reflecting Petitioner’s salary as a government-employed ophthalmologist, including her annual compensation. 415-417

I.5. Copy of Dr. Dantas’ foreign federal income tax return. 418-500

I.6. Industry compensation data for ophthalmologists in Brazil, demonstrating that Petitioner’s remuneration is substantially higher than that of other professionals working in the same field. 501-502

Exhibit J - Totality of Evidence - Final Merit Determination

J.1. State Council of Medicine in Sao Paulo Certificate of recognition for 25 years of practice to Dr. Dantas; 503-505

J.2. Certificates of participation as a coordinator for national congresses and conferences in her field. 506-532

J.3. Other relevant digital media publications about Dr. Dantas’ work not classified as major media – radio, regional magazines, and youtube channels. 533-584

J.4. Evidence of recognition and trust – certificate of voluntary work performed by Dr. Dantas in her field. 585-608

J.5. Certificate of collaborator in the health week from the Union of Gakusseis in Curitiba, Brazil. 609-613

J.6. Declaration from the Ophthalmology Department, School of Medical Sciences (FCM/UNICAMP), certifying that Dr. Dantas conducted a lecture on “Antibiotics and Antivirals” (May 20, 1997). 614-616

J.7. Certificate from the Federal University of Paraná confirming that Dr. Dantas received the “Professor 617-619

Nilo Cairo” Academic Award for ranking first in the Medicine program and achieving the highest overall academic performance (Jan. 22, 1996).

J.8. Certificate of recognition from the Brazilian Council of Ophthalmology for Dr. Alessandra Kurahashi Dantas’ participation in the National Visual Rehabilitation Campaign “Eye to Eye” (2001). 620-622

J.9. Declaration from the Department of Ophthalmology, Clinical Hospital of UNICAMP, confirming Dr. Alessandra Kurahashi Dantas’ participation in the “Meninas dos Olhos de Atibaia” blindness prevention program (Sept. 27, 2025). 623-627

J.10. Letter of Support from Maria Augusta Montenegro, PhD. 628-649

J.11. Letter of Support from Carlos Eduardo Leite Arieta, PhD. 650-658

J.12. Letter of Support from Jeremiah Tao, MD. 659-660

J.13. Letter of Support from Pablo Cibils, MD. 661-662

J.14. Letter of Support from Cintia de Paiva, MD. 663-664

J.15. Dr. Dantas’ personal documents 665-672

J.16. Derivative beneficiary’s personal documents. 673-682

Exhibit A

SELF-STATEMENT OF PROFESSIONAL TRAJECTORY AND FUTURE CONTRIBUTIONS

Alessandra Kurahashi Dantas, MD

I am a licensed physician and ophthalmologist with more than twenty-five years of continuous medical practice in Brazil. My career has been built on a foundation of clinical excellence, long-term service in public healthcare, surgical experience, academic involvement, and sustained contributions to diverse patient populations. The purpose of this statement is to provide an objective overview of my professional trajectory, the relevance of my work in medicine, and my intention to contribute meaningfully to the healthcare system of the United States.

I completed my medical degree at the Federal University of Paraná (UFPR) and my ophthalmology residency at the University of Campinas (UNICAMP), one of the leading academic medical centers in Latin America. Throughout my career, I have worked in both public and private healthcare settings. For more than two decades, I have served as a government-appointed ophthalmologist in the municipality of Campinas, in addition to eleven years of dedicated service in the neighboring city of Sumaré, both located in the State of São Paulo. In these roles, I have provided essential eye care to thousands of patients, many of whom have limited access to specialized services. This long-standing commitment reflects professional reliability, adaptability to demanding clinical environments, and a sustained dedication to public service.

In addition to my responsibilities within the public health system, I have maintained a stable private practice since 2002 and contributed extensively to medical education. As a volunteer surgical instructor at UNICAMP, I trained ophthalmology residents, emphasizing rigorous clinical evaluation, safe surgical practice, and ethical patient care. I also served as an ophthalmic surgeon in the Lions/UNICAMP "Sight First" Program, an international blindness-prevention initiative known for its social impact. These experiences highlight my commitment to improving patient outcomes while helping prepare the next generation of physicians.

Beyond subspecialty responsibilities, the broader field of ophthalmology plays a critical role in public health. Early diagnosis of ocular disease—whether related to cataracts, glaucoma, diabetic retinopathy, infections, trauma, or age-related conditions—is essential to prevent irreversible vision loss. Timely evaluation by a well-trained ophthalmologist is often the determining factor in whether vision can be preserved. Throughout my career, I have prioritized early detection, accurate diagnosis, and evidence-based management to reduce preventable blindness and improve quality of life.

Looking ahead, I intend to contribute to areas of significant public health priority in the United States, particularly early diagnosis, preventable vision loss, and access to ophthalmic care for underserved populations. National agencies such as the NIH, CDC, and HRSA have repeatedly emphasized the importance of addressing disparities in eye health and the rising burden of chronic ocular disease. My long-standing experience in public healthcare, prevention programs, and community service positions me to support these initiatives. I am currently studying for the revalidation of my medical diploma and am also being evaluated to become a member of the American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS). While I recognize that practicing as a physician in the United States requires specific licensing, I am committed to obtaining the necessary credentials to work in clinical practice in the medium- and long-term. By aligning my future contributions with these national priorities, I aim to help reduce preventable blindness, expand access to timely evaluation, and strengthen the continuum of care for vulnerable populations.

I intend to begin my professional integration in the United States through structured observerships that will allow me to understand institutional protocols and align my experience with American standards of medical practice. This initial step will support my transition into academic and clinical environments where I can contribute meaningfully, collaborate with colleagues, and build long-term professional relationships based on excellence, dedication, and continuous improvement.

Immigrating to the United States represents a natural continuation of my personal and professional goals. The country offers an environment grounded in innovation, advanced technology, and strong institutional support for medical research and academic development. It also provides a stable and enriching educational environment for my children, which aligns with my long-term plans for family and career. My objective is to pursue a sustained medical career that complements the healthcare needs of American communities, including preventive care, aging populations, and improved access to specialized services. I am confident that my extensive clinical experience, professional maturity, and commitment to public health and medical education will allow me to make meaningful contributions to the United States while continuing a career defined by service, continuity, and dedication.

Alessandra Kurahashi Dantas

✉ E-mail: alekdantas@nco.med.br ✆ Phone: +55 (19) 99202-2882

Ophthalmologist with over 25 years of clinical experience, specializing in Oculoplastics, Lacrimal Surgery, and Ocular Surface diseases. Trained at top-tier Brazilian institutions (UFPR and UNICAMP), she has a distinguished career marked by leadership in high-volume public health systems and the surgical supervision of residents in university hospital settings for over a decade. A recognized expert in her field, she was awarded the "Professor Nilo Cairo" Academic Award for ranking 1st in her medical class and recently received the Certificate of Merit for 25 years of ethical medical service. Her international profile includes clinical research, peer-review activity for indexed journals, and advanced surgical training at the University of California, Irvine (UCI) and San Diego (UCSD).

PROFESSIONAL EXPERIENCE

08/1998 – Present

Ophthalmologist, Municipal Health Department of Campinas | Campinas, São Paulo, Brazil

Provides high-volume specialized ophthalmic care in the public health system, managing approximately 240 patients per month (2,800+ annually). Her clinical practice focuses on the diagnostic and surgical management of complex functional eyelid disorders (ptosis, entropion, ectropion), ocular surface diseases, and lacrimal system obstructions.

- Clinical Leadership & Reference: Serves as an internal clinical reference for Oculoplastics and Lacrimal cases within the municipal network, performing specialized evaluations and surgical indications that optimize patient flow and reduce waiting lists for high-complexity centers.
- Protocol Development: Contributed to the "Access Protocol and Risk Assessment in Ophthalmology" for the City of Campinas, establishing clinical guidelines for triage and longitudinal monitoring of ocular conditions.
- Medical Education: Provides informal supervision and clinical guidance for physicians in training, supporting decision-making in ophthalmic emergencies and organizing clinical workflows to improve resource allocation.
- Comprehensive Management: Manages a broad spectrum of conditions, including non-proliferative diabetic retinopathy, glaucoma, and cataract follow-up, ensuring high resolutivity in a high-demand public health environment.

2002 – Present

Ophthalmologist – Private Practice, Nova Campinas Oftalmologia | Campinas, São Paulo, Brazil

Provides comprehensive and specialized ophthalmic care in a private setting, with a focus on Oculoplastics, Lacrimal system disorders, and Ocular Surface diseases. Responsible for the longitudinal management of patients, from initial diagnosis to complex surgical indications and post-operative follow-up.

- Specialized Clinical Practice: Expert management of functional eyelid conditions, chronic blepharitis, and evaporative/aquodeficient dry eye, utilizing up-to-date clinical protocols and advanced diagnostic tools.
- Surgical Coordination: Defines diagnostic and therapeutic plans for complex cases, coordinating integrated care with other medical specialties and ensuring high clinical resolutivity and patient safety.
- Continuous Professional Development: Implements cutting-edge clinical practices derived from ongoing international training (UCI and UCSD) and participation in major scientific symposia (ASOPRS, AAO), enhancing the quality of care in private practice.
- Urgent Care Management: Manages urgent ophthalmic consultations and pre-operative counseling, maintaining a high standard of clinical excellence and continuity of care for a diverse patient base.

01/2000 – 12/2011

Ophthalmologist, Municipal Health Department of Sumaré | Sumaré, São Paulo, Brazil

Provided comprehensive outpatient ophthalmology care within the public health system, focusing on the diagnostic and therapeutic management of functional eyelid disorders, lacrimal system obstructions, and ocular surface diseases. Contributed to increasing access to specialized care in the municipal network, managing a broad spectrum of conditions including glaucoma, retinal diseases, and ophthalmic emergencies.

EDUCATION

May 2022
Postgraduate Specialization in Integrative Medicine (Lato Sensu), Faculdade Conectada – Faconnect | Brazil

August 2021
Postgraduate Specialization in Applied Quantum Biophysics in Health (Lato Sensu), Faculdade de Tecnologia em Saúde CIEPH | Brazil

January 1998
Residency in Ophthalmology, State University of Campinas – UNICAMP | Campinas, São Paulo, Brazil

- Specialized training (R3) in Oculoplastics, Lacrimal Surgery, Cornea, and Glaucoma.

December 1995
M.D. – Doctor of Medicine, Federal University of Paraná – UFPR | Curitiba, Paraná, Brazil

- Awarded the **Professor Nilo Cairo Academic Award** for ranking 1st in the graduating medical class (highest cumulative GPA).

KEY COURSES / SEMINARS

Invited Lectures / Teaching / Course Leadership

"Eyelid Disorders and Lacrimal System" — Invited Lecturer, Ophthalmology Seminar (UNICAMP), Campinas, Brazil — **03/2001**

"Chronic Dacryocystitis: Review of 350 Cases" — Invited Speaker, Symposium on Infectious Lacrimal Disorders, Brazilian Congress on Prevention of Blindness, São Paulo, Brazil — **09/2002**

"Chronic Dacryocystitis: Analysis of 305 Cases" — Invited Lecturer, Course on Infectious Lacrimal Disorders, Brazilian Congress of Ophthalmology, São Paulo, Brazil — **09/2003**

Oculoplastic Surgery Session — Invited Speaker, UNICAMP Ophthalmology Update Seminar, Campinas, Brazil — **10/2003**

"Local Anesthesia for Dacryocystorhinostomy (DCR)" — Invited Speaker, XI International Symposium of Cornea and Contact Lenses, Campinas, Brazil — **03/2004**

"Differential Diagnosis of the Red Eye" — Invited Lecturer, Emergency Ophthalmology Course, Campinas, Brazil — **10/2004**

Applied Anatomy for Facial Aesthetics — Panel Coordinator & Invited Panelist, SINCLIO – International Symposium of Clinical Ophthalmology, Campinas, Brazil — **05/2017**

Ophthalmic Assistant Training Program — Course Faculty & Session Coordinator, SINCLEC – Convention of Clinicians of Campinas, Campinas, Brazil — **1999; 2005**

Course for Ophthalmic Assistants — Instructor/Organizer, SINCLEC, Campinas, Brazil — **08/1999**

Ocular Surface Panel — Panel Coordinator, SINCLEC, Campinas, Brazil — **08/1999**

"Live Demonstration of Cosmetic Botulinum Toxin Application" — Invited Speaker, IX International Symposium of Cataract and Intraocular Lens Surgery, São Paulo, Brazil — **03/2003**

Course Coordinator — "Use of Botulinum Toxin in Ophthalmology", IX International Symposium of Cataract and Intraocular Lens Surgery (UNICAMP Ophthalmology Seminar), Brazil — **03/2003**

Course Coordinator — "Use of Botulinum Toxin in Ophthalmology", XI International Symposium of Cornea and Contact Lenses (UNICAMP Ophthalmology Seminar), Brazil — **03/2004**

Speaker — "Ophthalmologist's Daily Practice: Oculoplastics", XI International Symposium of Cornea and Contact Lenses (UNICAMP Ophthalmology Seminar), Brazil — **03/2004**

peaker, X SINCLIO (pre-congress program), UNICAMP Ophthalmology Seminar — **03/2005**

Table/Session Chair — Ophthalmic Assistants Course ("Clinic Administration Support"), X SINCLIO — **03/2005**

Module Coordinator — "Intermediate Assistants Course (Block 1): Glaucoma", XII SINCLEC — **05/2006**

General Coordinator — Ophthalmic Assistants Symposium (Basic Block 1: Introduction to Ophthalmology), UNICAMP Ophthalmology Congress / SINCLIO — **04/2007**

General Coordinator — Ophthalmic Assistants Symposium (Advanced Blocks : Operating Room Support, Specialized Complementary Exams, Innovations in Ophthalmology and Contact Lens Course), UNICAMP Ophthalmology Congress / SINCLIO — **04/2007**

Course Coordinator — Ophthalmic Assistants Course A2 (Cataract and Contact Lenses), XIII SINCLEC — **05/2008**

Course Coordinator — Ophthalmic Assistants Course A3 (Retina and Oculoplastics), XIII SINCLEC — **05/2008**

Course Coordinator — Ophthalmic Assistants Course, XII SINCLIO — **10/2009**

Advanced Training & International Courses

Observership — Orbital, Eyelid & Lacrimal Surgery Service, University of California, Irvine (UCI), USA — **2024**

Observership — Orbit, Oculoplastics & Lacrimal System Service, University of Buenos Aires, Argentina — **2016**

Advanced Oculofacial Surgery Program, University of California, San Diego (Shiley Eye Institute), La Jolla, USA — **Scheduled 02/2026**

ASOPRS Annual Scientific Symposium, American Society of Ophthalmic Plastic and Reconstructive Surgery, Chicago, USA — **10/2024**

31st International Oculoplastic Congress (CIOP/CIEPO) — 06/2024

Course: Eyebrow Techniques (Periocular Aesthetics), CIOP/CIEPO / International Congress of Periocular Aesthetics — **06/2024**

Face Anatomy — Hands-On: Eyelid Techniques, ITC Belo Horizonte, Brazil — **06/2025**

Advanced Course in Oculoplastic Surgery, Hospital Paranaense de Otorrinolaringologia, Brazil — **10/2015**

Periocular Rejuvenation Hands-On Workshop, ISMD (Instituto Superior de Medicina), Brazil — **03/2018**

American Academy of Ophthalmology (AAO) Annual Meeting, USA — **10/1999**

Ophthalmology Congresses & seminars

V International Symposium of Cataract and Intraocular Lens, São Paulo, Brazil — **03/1995**

International Symposium of Oculoplastic Surgery, Orbit and Lacrimal System, Campinas, Brazil — **05/1996**

International Symposium of Ocular Immunology, Uveitis and AIDS / National Forum on Uveitis / Ophthalmic Photography Module, São Paulo, Brazil — **06/1996**

XII Brazilian Congress on Prevention of Blindness / I Pan-American Congress on Prevention of Blindness, São Paulo, Brazil — **09/1996**

VII International Symposium of Cornea and Contact Lenses, São Paulo, Brazil — **03/1997**

VII Course: Diagnosis and Management of Strabismus / XLIII Meeting of the Brazilian Center of Strabismus, Campinas, Brazil — **05/1997**

VI International Symposium of Cataract and Intraocular Lens, São Paulo, Brazil — **03/1998**

VIII Symposium: Diagnosis and Management of Strabismus / XLV Meeting of the Brazilian Center of Strabismus, Campinas, Brazil — **06/1998**

VIII International Symposium of Cornea and Contact Lenses / VII International Symposium of Cataract and Intraocular Lenses, São Paulo, Brazil — **03/1999**

American Academy of Ophthalmology & Pan-American Academy of Ophthalmology, USA — **10/1999**

III International Glaucoma Course (UNICAMP Ophthalmology Seminar) — 07/2000

Endoscopic Nasal Surgery in Lacrimal System Disorders, UNICAMP Ophthalmology Seminar — **03/2001**

X International Symposium of Cornea and Contact Lenses (UNICAMP Ophthalmology Seminar) — 03/2002

XV Brazilian Congress on Prevention of Blindness and Visual Rehabilitation, Brazil — **08–09/2002**

XXXII Brazilian Congress of Ophthalmology, Brazil — **09/2003**

Pre-Symposium of XII SINCLEC (Cornea & Contact Lenses; International Glaucoma Course; Ibero-American Glaucoma Symposium) — **05/2006**

XII SINCLEC (Cornea & Contact Lenses; International Glaucoma Course; Ibero-American Glaucoma Symposium) — **05/2006**

Advanced International Course in Oculoplastic Surgery (theory + hands-on), Hospital Paranaense de Otorrinolaringologia — **10/2015**

47th SIMASP / "Oftalmo Escola" Congress, São Paulo, Brazil — **02/2025**

VOLUNTEER WORK

Hospital de Clínicas – UNICAMP | Campinas, SP, Brazil
Volunteer Ophthalmologist & Surgical Supervisor
1999 – 2007; 2018 – 2019

- Provided direct surgical supervision for ophthalmology residents in training, focusing on lacrimal surgery (DCR), canalicular repair, eyelid reconstruction, ptosis management, and eyelid tumor surgery, as well as cataract surgery. Responsible for hands-on surgical training in hundreds of operations over the period.

Hospital de Clínicas – UNICAMP / Lions Eye Hospital | Campinas & Taquaritinga, SP, Brazil
Volunteer Ophthalmic Surgeon – Cataract Projects
1996 – 2000

- Volunteer surgeon in cataract projects organized by the Ministry of Health and university partners (UNICAMP and Lions Eye Hospital), providing free surgical care, preoperative evaluation, and postoperative follow-up to underserved populations.

ONG Sírius | Campinas, SP, Brazil
Social Assistance Volunteer
2023 – Present

- Weekly volunteer work providing essential supplies, food, beverages, clothing, and blankets to homeless and socially vulnerable populations in the city of Campinas.

UNICAMP Preventive Ophthalmology Unit + Rotary Club | Atibaia, SP, Brazil
Volunteer Ophthalmologist – "Meninas dos Olhos de Atibaia" Program
2025

- Participated in community ophthalmology screening and care programs focused on visual health education and early diagnosis in the local population.

Brazilian Council of Ophthalmology (CBO) | Campinas, SP, Brazil
Volunteer – National Visual Rehabilitation Campaign "Olho no Olho"
2001

- Volunteer in a national campaign for visual screening and public education on eye health, aimed at preventing blindness and promoting ocular care.

Curitiba Eye Bank | Curitiba, PR, Brazil
Volunteer – Corneal Donation Campaign
1993

- Volunteer in public awareness campaigns and donor recruitment to support corneal transplantation services and eye bank activities.

União dos Gakusseis de Curitiba | Andirá & Curitiba, PR, Brazil
Community Health Volunteer
1991 – 1994

- Participated in the Scientific and Cultural Caravan (1991) and the First Health Week (1994), providing community health support and promoting health education in various regions.

Ministry of Health | Brazil
Volunteer – EBID (Brazilian Incidence Study of Diabetes)
1992 – 1993

- Volunteer in a nationwide epidemiological study on diabetes mellitus, contributing to data collection and coordination of chronic disease screening.

Municipality of Araucária | Araucária, PR, Brazil
Coordinator – "Diabetes Day" Community Event
1993

- Organized and coordinated a community health event focused on diabetes education and screening for the local population.

PARTICIPATION IN RESEARCH & MULTICENTER STUDIES

Allergan – Bimatoprost SR Study (Protocol 192024-091) | Site 11207
Sub-Investigator
2016

- Participated as sub-investigator in a multicenter, randomized, masked, parallel-group clinical trial evaluating the efficacy and safety of Bimatoprost SR in patients with open-angle glaucoma or ocular hypertension, comparing two dose strengths against timolol eye drops over a period of up to 20 months.

Allergan – Bimatoprost SR Long-Term Extension Study (CG2782-BR002)
Sub-Investigator
2019

- Participated as sub-investigator in the long-term extension phase of the Bimatoprost SR clinical trial, contributing to the evaluation of sustained efficacy and safety outcomes in glaucoma patients.

INTERNATIONAL CLINICAL OBSERVERSHIPS

February 2024 – March 2024
Clinical Observer, Orbital, Eyelid & Lacrimal Surgery Service
University of California, Irvine (UCI) | Irvine, CA, USA

- Supervised by Prof. Dr. Jeremiah Tao, focusing on advanced oculofacial surgical techniques and clinical management of complex orbital cases.

2016
Clinical Observer, Orbit, Oculoplastics & Lacrimal System Sector
University of Buenos Aires (UBA) | Buenos Aires, Argentina

- Supervised by Prof. Dr. Daniel Weil, focusing on specialized surgical approaches and oculoplastic reconstruction.

OTHER SKILLS

Clinical Leadership & Public Health Management: Extensive experience in managing high-volume public health outpatient services, optimizing clinical workflows, and implementing triage protocols to improve healthcare efficiency in municipal networks.

Surgical Mentorship & Medical Education: Proven track record in teaching and supervising medical residents in complex oculoplastic, lacrimal, and cataract procedures at a major university teaching hospital (UNICAMP).

Clinical Research & Peer Review: Expertise in international multicenter clinical trials (Allergan) and active contribution as an ad-hoc reviewer for indexed scientific journals (Arquivos Brasileiros de Oftalmologia).

Advanced Surgical Proficiency: Specialized skills in functional and aesthetic blepharoplasty, dacryocystorhinostomy (DCR), and management of complex ocular surface diseases.

Digital Health & Protocols: Proficient in electronic medical records (EMR) and contributor to official clinical access protocols for municipal health systems.

Languages: Portuguese (Native), English (Professional Working Proficiency).

DECLARATION

I hereby declare, for all due purposes, that **Dr. Alessandra Kurahashi** completed, in 1997, the Specialization Program offered by the Department of Ophthalmology of the State University of Campinas – UNICAMP, and, having been approved in the National Ophthalmology Examination held on January 16, 1998, is entitled to the Specialist Certification in Ophthalmology issued by this Council in agreement with the Brazilian Medical Association.

São Paulo, January 29, 2003

Dr. Mário Luiz Ribeiro Monteiro
Secretary-General

Note: To proceed with the issuance of your Specialist Certification, you must send to the CBO a nominal check (crossed) for R$ 200.00 (two hundred reais) or make a deposit at Banco do Brasil – branch 3221-2 – account 7.128-5, write your name on the deposit receipt, and send it by fax to Luciane. Please allow approximately 180 days to receive the certification after payment of this fee.

Responder A: info@asoprs.org

American Society of Ophthalmic Plastic and Reconstructive Surgery

Dear Alessandra Dantas,

Congratulations! Your application for International Associate membership with ASOPRS has been approved. This email outlines member benefits and serves as an introduction to the Society.

ASOPRS WEBSITE: YOUR PROFILE AND MEMBERS ONLY SECTION www.asoprs.org

The members only section of the website is updated periodically with news and has information available of ongoing interest to our members. At your earliest convenience, please visit your profile in the online database and verify your contact information. If you don't know/remember your password, please use the reset password link.

DUES

You will receive your dues invoices electronically, near the end of the year. Please pay upon receipt to maintain your membership in good standing. **Dues are required annually to maintain membership.**

SOCIETY'S JOURNAL: OPRS

As a member of the Society, you will receive an online subscription to the Society's Journal: *Ophthalmic Plastic and Reconstructive Surgery*. You'll receive an email from our publisher with instructions on how to access the journal online.

ASOPRS FORUM

The Forum is a robust listserv that provides opportunities to network, learn from and share with your peers and colleagues. The Forum can be accessed at www.asoprsforum.org. Please contact info@asoprs.org if you would like to be set up for access to the Forum.

ASOPRS MEETINGS

We look forward to your participation in the Spring and Fall Scientific Symposia; please be sure to mark your calendars.

We welcome the opportunity to connect with members. You can reach us at the main headquarters line (612) 601-3168 or by emailing info@asoprs.org

Please note that, according to the ASOPRS Membership Policy, International Associate membership status applies only to those who are living outside the United States and Canada. If you relocate to the US or Canada, your International Associate status will become invalid.

Welcome to ASOPRS!

National Eye Institute
Research Today...Vision Tomorrow

Eye Health Data and Statistics

Several different agencies collect, analyze, and report data on estimates of eye diseases and conditions. This page highlights work to gather and report eye health data and statistics led by the U.S. Department of Health and Human Services (HHS), the Centers for Disease Control and Prevention (CDC), and the U.S. Census Bureau.

Please keep in mind that data are reported as estimates. Estimates may show a higher or lower number of eye disease cases than what is present in a population due to how researchers collected the data and how many people provided information.

U.S. Department of Health and Human Services

HHS leads Healthy People 2030, a national public health initiative, and NEI leads the Healthy People 2030 Vision Workgroup.

- Through Healthy People 2030 (https://health.gov/healthypeople), HHS and NEI set and track data-driven objectives, including those focused on eye health and vision loss
- The Vision Workgroup (https://health.gov/healthypeople/about/workgroups/vision-workgroup) provides data on progress toward Healthy People 2030's objectives

Centers for Disease Control and Prevention

Public health surveillance is central to CDC's mission. As part of this mission, CDC, an agency within HHS, collects, analyzes, and shares data on eye health, eye diseases, and vision loss.

- CDC's Vision and Eye Health Data Portal (https://chronicdata.cdc.gov/browse?+Eye+Health=&category=Vision+%26+Eye+Health) provides detailed datasets on eye health and vision loss
- The National Vision and Eye Health Surveillance System (https://www.cdc.gov/vision-health-data/prevalence-estimates/?CDC_AAref_Val=https://www.cdc.gov/visionhealth/vehss/estimates/index.html) (VEHSS) shares data estimates on vision loss and blindness in the United States
- If you have questions about VEHSS, email Elizabeth Lundeen (mailto:yxj4@cdc.gov), Ph.D., M.P.H., M.N.S.P., senior scientist in CDC's Division of Diabetes Translation
- CDC also provides information on low vision and blindness in urban and rural populations

(https://www.cdc.gov/disability-and-health/articles-documents/disability-prevalence.html?CDC_AAref_Val=https://www.cdc.gov/ncbddd/disabilityandhealth/features/disability-prevalence-rural-urban.html)

U.S. Census Bureau

The Census Bureau falls within the U.S. Department of Commerce, which is the leading source of data about the nation's people and the economy.

- The Census Bureau's American Community Survey (https://www.census.gov/programs-surveys/acs/about.html) (ACS) asks about vision difficulties or trouble seeing
- The Census Bureau uses the information from the ACS to publish data on how many people have various disabilities (https://www.census.gov/library/visualizations/2020/comm/living-with-disabilities.html), including vision difficulties
- You can ask questions about the data on the Census Bureau's website (http://ask.census.gov/)

See our eye disease infographics

By 2050, we expect the number of people with visual impairment or blindness to double (https://www.nei.nih.gov/about/news-and-events/news/visual-impairment-blindness-cases-us-expected-double-2050)
. Our infographics help illustrate trends in eye disease prevalence and steps people can take to prevent eye conditions and diseases.

Assunto: USMLE Step 1 Scheduling Permit Available USMLE ID: 80041528

Dear Dr. Kurahashi Dantas,

Please find your USMLE Step 1 Scheduling Permit at the end of this email. The permit is also accessible through the FSMB USMLE website.

You will NOT BE ALLOWED TO TEST if you do not present 1) your scheduling permit and 2) an unexpired government-issued ID (e.g., driver's license or passport) that includes a recent photograph and signature on all testing days. Therefore, please do the following as soon as possible:

1. **Review the name on your permit.**
   - Your name, as it appears on your scheduling permit, **must exactly match the name on the identification you bring to the test center or you will not be allowed to test.**
   - If the name listed on your permit is incorrect, contact us immediately.
2. **Print your scheduling permit.**
   - We strongly encourage you to print your scheduling permit at least several days in advance of your first scheduled test date to avoid any problems accessing or printing your permit on your test days. On your test days, you may bring your printed permit or present it electronically (e.g., via Smartphone). If you opt to present your permit electronically, please note that if you are unable to access and/or display the permit – for any reason – you must present the paper copy.
3. **Schedule your test date.**
   - Refer to the instructions on the scheduling permit to schedule your test date.
   - Appointments are first-come, first-served and test centers fill up quickly. Therefore, you are advised to schedule a test date as soon as possible. This will also provide you with the greatest flexibility in case you need to reschedule your appointment.
   - You are responsible for observing all scheduling, rescheduling and cancellation procedures listed on the scheduling permit. Failure to do so may result in a rescheduling fee charged by Prometric.

IMPORTANT NOTE ABOUT EXAM SECURITY: Please help maintain the integrity of USMLE by reporting suspected security violations. If you observed irregular behavior during your exam administration or while preparing for your exam, report a tip anonymously through the "STOPit" app. Information is available at www.usmle.org.

Please do not hesitate to contact us if you have any questions or if we can be of assistance in any way.

Sincerely,

Assessment Services
Federation of State Medical Boards

---- Permit ----

United States Medical Licensing Examination®

Step 1 SCHEDULING PERMIT

IMPORTANT DOCUMENT - TAKE TO TEST CENTER

Name: Alessandra Kurahashi Dantas	**Eligibility Begins:** June 01, 2026
USMLE#: 8-004-152-8	**Eligibility Ends:** August 31, 2026
Program: STEP1	**# Test Days:** 1
Exam: STEP1	**CIN (Candidate ID #):** CHUU959XDVK
Scheduling #: 054231530	**(for use on test date only to access your exam)**
(for appointment scheduling)	
Testing Region: Latin America	

This Scheduling Permit authorizes you to sit for Step 1 during the period noted above. **You must bring this permit to the test center in order to take your exam.** You may print this permit or present it electronically (e.g. via Smartphone). If, on the day of your exam, you are unable to access the permit electronically for any reason, you must present a paper copy. Review the *USMLE ® Bulletin of Information* at www.usmle.org for specific procedures.

1. **SCHEDULE A TEST DATE:** Using the information above, schedule a test date via the Prometric website at **www.prometric.com/USMLE** or call 1-800-633-3926 located in Baltimore, MD, USA, available M-F 8:30AM-5:30PM (local time). Provide a valid telephone number and email address when scheduling so Prometric can email you a Confirmation Notice and contact you in the event that your appointment must be rescheduled. The Confirmation Notice contains a Prometric Confirmation Number -- You need this number to **confirm or change** your appointment.

2. **CONFIRM OR CHANGE APPOINTMENT:** Confirm your appointment using your Prometric Confirmation Number one week before your appointment at www.prometric.com/USMLE or by calling the telephone number above. You may change (e.g., reschedule, cancel, change test center location) your appointment within the eligibility period noted above. **To avoid an appointment change fee, you must change your appointment 46 or more days before (but not including) the first day of your scheduled test date.** All deadlines are calculated using local time in Baltimore, MD, USA. If you reschedule your appointment or change your test center location within 45 days, you must pay a fee to Prometric at the time you make the change. If you cancel your appointment within 45 days or do not test as scheduled, before you can schedule a new appointment, you must **call** Prometric at 443-751-4990 to pay a fee to reinstate your eligibility record. Refer to your Confirmation Notice for specific fee information.

3. **ELIGIBILITY PERIOD EXTENSION**: If you are unable to test within your eligibility period, contact FSMB to inquire about a one-time, contiguous three-month eligibility period extension. A fee is charged for this service. Visit FSMB's website for more information. If you do not take the test within your original or extended eligibility period and wish to take it in the future, you must reapply by submitting a new application and fee(s).

4. **PRACTICE SESSION:** To take a Practice Session at a Prometric Test Center for a fee payable to Prometric, register on the USMLE website, www.usmle.org, using the Scheduling # and CIN from this permit. You will be issued a Practice Session Scheduling Permit within seven business days of registering. Upon receipt of your permit, you may contact Prometric to pay the fee and schedule an appointment.

5. **ADMISSION TO THE TEST CENTER:** You **must** bring this Scheduling Permit and an unexpired, government-issued form of ID (such as a driver's license or passport) that includes both your recent photograph and signature. **The name on your ID must match the name on this permit exactly.** The only acceptable differences are variations in capitalization; the presence of a middle name, middle initial or suffix on one document and its absence on the other; or the presence of a middle name on one and middle initial on the other. The name on your ID must appear in the Latin alphabet, i.e., in "English language letters." If the names on your ID and permit differ, contact FSMB immediately. **You cannot make a name change or correction within seven business days of your scheduled test date.** If you are required to carry a Permanent Residency Card, be sure to bring it with you along with the other required form of ID as noted above.

6. **TEST DAY:**
   - **ARRIVAL:** Report to the test center 30 minutes before your scheduled appointment. You must sign in and your photograph will be taken. If you arrive later than your scheduled appointment, you **may not** be admitted. If you arrive **more than 30 minutes after your scheduled appointment**, you **will not** be admitted to the testing center.
   - **PERSONAL ITEM STORAGE: You must place all of your personal items, including cell phones, pagers, watches, wallets, food, and beverages in a small locker.** Pagers and cell phones must be turned off.
   - **TESTING:** The Test Center Administrator (TCA) will instruct you to write your name and CIN listed above on a laminated writing surface provided for making notes. You will enter your CIN into the computer at your workstation to initiate your exam and to resume testing after breaks. **Do not erase your name and CIN** from the laminated writing surface until the end of your test day.

7. **END OF TEST DAY:** The TCA will provide you with a printout that confirms you appeared for that day's testing session. Once you leave the test center, Prometric cannot reproduce the printout.

BYLAWS OF THE BRAZILIAN SOCIETY OF OCULAR PLASTIC SURGERY

CHAPTER I

Section I - NAME, PURPOSE, AND DURATION

Article 1 - The BRAZILIAN SOCIETY OF OCULAR PLASTIC SURGERY, founded on September 8, 1979, in the city of São Paulo and registered with the 3rd Registry Office of Titles and Documents and Civil Registry Office of Legal Entities of the Capital, is a scientific and philanthropic association, not-for-profit, affiliated with the Brazilian Council of Ophthalmology. The Society includes ophthalmologist physicians specializing in surgery of the ocular adnexa, namely the eyelids, orbits, lacrimal pathways, and periocular region.

Article 2 - The Association shall exist for an indefinite period, and its dissolution, termination, or liquidation shall be carried out by resolution of the General Assembly of members or by legal determination.

Article 3 - Adopting the acronym "SBCPO," it is governed by these Bylaws, regulated through Internal Regulations and a Manual of Ethical Conduct.

Sole Paragraph - Any doubt or omission shall be resolved by the Deliberative Council.

Article 4 - The members of the SBCPO shall not be jointly or subsidiarily liable for the obligations assumed by the association.

Section II - REGISTERED OFFICE

Article 5 - The SBCPO shall maintain an Executive Secretariat at its registered office located in the city of São Paulo, at the registered office of the Brazilian Council of Ophthalmology, situated at Rua Casa do Ator, No. 1,117, suite 21, ZIP Code 04546-004.

Section III - PURPOSES

Article 6 - The SBCPO aims to improve and disseminate the study of Ocular Plastic Surgery through meetings, congresses, courses, research, and publications related to the specialty; to defend the legitimate interests of those who comprise the association and to grant, in accordance with applicable regulations, the titles to which its members are entitled. In addition, the SBCPO shall accredit training programs (fellowships) in this area of Ophthalmology in the country that comply with the standards established by these Bylaws. As means to achieve its purposes, the SBCPO proposes to:

I - to ensure respect for professional ethics and work toward the defense, regulation, and supervision of professional practice, collaborating for this purpose with medical and related entities that have similar objectives;

II - to promote educational campaigns and take part in the organization of ophthalmological services and campaigns;

III - to bring together Brazilian specialists in this field, promote their social and scientific interaction, and provide them with maximum support;

IV - to create, develop, and implement philanthropic projects that provide less privileged segments of the community with the opportunity to benefit from its technological and surgical advances.

Article 7 - The SBCPO may receive or affiliate with other national or international Associations whose purposes and objectives align with those specified in these Bylaws, provided there is no legal impediment to such affiliations.

CHAPTER II

Section I - MEMBERSHIP CATEGORIES

Article 8 - The membership of the SBCPO is composed of members grouped into the following categories:

I - Founding Members;

II - Fellows;

III - Aspirant Members;

IV - Associate Members;

V - Full Members;

VI - Honorary Retired Members;

VII - Honorary Members;

VIII - Emeritus Members;

IX - International Members.

Section II - FOUNDING MEMBERS

Article 9 - FOUNDING MEMBERS shall be those who signed the Founding Charter of the SBCPO (Brazilian Society of Ocular Plastic Surgery).

Section III - FELLOW MEMBERS

Article 10 - FELLOW MEMBERS shall be physicians residing in the country who are undertaking a Fellowship Program in Services accredited by the SBCPO. Candidates must submit a medical degree, certification from the Brazilian Council of Ophthalmology or the Ministry of Education (MEC), a full curriculum, letter of recommendation from the Head of the Fellowship Service (an in-good-standing Full Member) accredited by the SBCPO, and payment of 50% (fifty percent) of the current year's annual fee. Thereafter, they may apply for ASSOCIATE MEMBER status upon completion of the fellowship, provided they submit a fellowship completion certificate, a letter of recommendation from two (2) FULL MEMBERS in good standing, and proof of payment of the current year's annual fee.

Sole Paragraph - In the event that the Fellowship service is de-accredited, the Fellow member shall not be entitled to apply for ASSOCIATE MEMBER status.

Section IV - ASPIRING MEMBERS

Article 11 - ASPIRANT MEMBERS shall be physicians residing in the country who graduated more than three (3) years ago. Candidates must submit a letter of recommendation from at least two (2) FULL MEMBERS in good standing with the SBCPO, a medical degree, certification from the Brazilian Council of Ophthalmology or the Ministry of Education (MEC), a full curriculum, a certificate of completion of an Ocular Plastic Surgery Fellowship carried out in a service not accredited by the SBCPO, and payment of an amount equivalent to one (1) annual fee for the current year.

Registry Office of Titles and Documents and Civil Registry Office of Legal Entities - SP
788148
REGISTRATION No.

Section V - ASSOCIATE MEMBERS

Article 12 - ASSOCIATE MEMBERS shall be physicians residing in the country who graduated more than three (3) years ago. Candidates must submit a letter of recommendation from at least two (2) FULL MEMBERS in good standing with the SBCPO, a medical degree, certification from the Brazilian Council of Ophthalmology or the Ministry of Education (MEC), a full curriculum, a certificate of completion of an Ocular Plastic Surgery Fellowship carried out in a service accredited by the SBCPO, and payment of an amount equivalent to one (1) annual fee for the current year.

Sole Paragraph - For applications to the Fellow and Associate categories, the period during which the applicant completed their Fellowship in an accredited service shall be considered. If the service is accredited during or after the completion of the Fellowship, the applicant must apply for ASPIRANT MEMBER status.

Section VI - FULL MEMBERS

Article 13 - FULL MEMBERS shall include all members admitted up to December 31, 2019, with their last three annual fees paid to the SBCPO. Thereafter, only ASPIRANT or ASSOCIATE MEMBERS with at least three (3) years in such category may apply for FULL MEMBER status. Promotion to FULL MEMBER shall occur if, after this three (3)-year period as an ASPIRANT/ASSOCIATE MEMBER, the applicant has at least one (1) scientific publication in Oculoplastic Surgery as first author in a PubMed-indexed journal, **OR** a certificate of completion of a stricto sensu graduate program in Oculoplastic Surgery (Master's or Doctorate), **OR** a certificate of completion of an SBCPO-accredited fellowship program **AND** presentation of at least one (1) scientific work in the last three (3) years at CIOP/CIEPO*.

Section VII - HONORARY RETIRED MEMBERS

Article 14 - HONORARY RETIRED MEMBERS shall be FULL MEMBERS aged seventy (70) years or older, provided they are in good standing with their obligations to the SBCPO over the last five (5) years and have a minimum contribution period of (10) years.

Registry Office of Titles and Documents and Civil Registry Office of Legal Entities - SP
788148
REGISTRATION No.

Section VIII - HONORARY MEMBERS

Article 15 - HONORARY MEMBERS shall be Brazilian or foreign physicians and ophthalmologists who have distinguished themselves in the field of Ocular Plastic Surgery and have made an exceptional contribution to the SBCPO. This distinction shall be granted upon nomination by at least ten (10) FULL MEMBERS and approval by the Deliberative Council. This category also includes former presidents of the SBCPO.

Section IX - EMERITUS MEMBERS

Article 16 - EMERITUS MEMBERS shall be FULL MEMBERS aged seventy (70) years who have contributed by paying annual fees for the last five (5) years over a minimum period of ten (10) years, who request this distinction from the Deliberative Council, and who are granted it by majority vote as recognition for their efforts in Scientific Research and/or Teaching in the field of Ocular Plastic Surgery in Brazil. EMERITUS MEMBERS (and therefore HONORARY RETIRED MEMBERS) shall also include FULL MEMBERS who, due to proven disability, request such promotion, provided that the event that caused the disability occurred after their admission as a FULL MEMBER.

Section X - INTERNATIONAL MEMBERS

Article 17 - INTERNATIONAL MEMBERS shall be foreign physicians, presenting a Fellowship completion certificate recognized in their country of origin obtained more than two (2) years ago **AND** practicing the specialty comprising at least 50% (fifty percent) of their activities **AND** presenting at least one (1) publication in the field of oculoplastic surgery in an indexed journal within the last two (2) years **AND** presenting a letter of recommendation from two (2) FULL MEMBERS of the SBCPO **AND** payment of an amount equivalent to one (1) annual fee for the current year.

CHAPTER III

Section I - RIGHTS

Article 18 - The following are included among the general statutory rights of members:

Article 77 - The disclosure of the list of members, their data, and personal information to third parties is prohibited, except for information already available in the public area of the SBCPO website.

Article 78 - The courts of the Judicial District of São Paulo, Capital, are hereby elected as the jurisdiction to resolve any disputes arising from the application of these Bylaws.

These Bylaws were approved at an Extraordinary General Assembly held on 04/17/2023, as recorded in the minutes, which form an integral part hereof.

ESTATUTO DA SOCIEDADE BRASILEIRA DE CIRURGIA PLÁSTICA OCULAR

CAPÍTULO I

Seção I - DA DENOMINAÇÃO, NATUREZA E DURAÇÃO

Art. 1º - A SOCIEDADE BRASILEIRA DE CIRURGIA PLÁSTICA OCULAR, fundada em 08 de setembro de 1979, na cidade de São Paulo e registrada no 3º Cartório Oficial de Registros de Títulos e Documentos de Pessoa Jurídica da Capital, é uma associação de caráter científico e filantrópico, sem fins lucrativos com filiação ao Conselho Brasileiro de Oftalmologia. A Sociedade inclui médicos oftalmologistas especialistas em cirurgia dos anexos oculares, ou seja, pálpebras, órbitas, vias lacrimais e região periocular.

Art. 2º - A Associação durará por tempo indeterminado e sua dissolução, extinção ou liquidação se fará por deliberação da Assembleia Geral dos associados ou por determinação legal.

Art. 3º - Adotando a sigla "SBCPO" está regida pelo presente Estatuto, regulamentada através de Regimento Interno e Manual de Condutas Éticas.

Parágrafo único - Qualquer dúvida ou omissão deverá ser dirimida pelo Conselho Deliberativo.

Art. 4º - Os Membros da SBCPO não respondem solidária ou subsidiariamente pelas obrigações assumidas pela associação.

Seção II - DA SEDE SOCIAL

Art. 5º - A SBCPO manterá uma Secretaria Executiva em sua sede social, situada na cidade de São Paulo, junto à sede do Conselho Brasileiro de Oftalmologia, localizada à Rua Casa do Ator, nº 1.117 conjunto 21, CEP 04546-004.

788148

Seção III – DOS FINS SOCIAIS

Art. 6º - A SBCPO tem por objetivo aprimorar e difundir o estudo da Plástica Ocular através de reuniões, congressos, cursos, pesquisas e publicações referentes à especialidade; defender os legítimos interesses dos que constituem a agremiação e conceder, na forma regulamentar, os títulos a que fizerem jus os seus membros. Além disso, a SBCPO credenciará cursos de formação (*fellowship*) desta área da Oftalmologia no país que estiver de acordo com as normas determinadas por este Estatuto. Como meios para alcançar os seus fins, a SBCPO se propõe a:

I - zelar pelo respeito à ética profissional e trabalhar pela defesa, regulamentação e fiscalização do exercício profissional, colaborando para isso, com as entidades médicas e afins com idênticos objetivos;

II – promover campanhas educativas e se fazer presente na organização de serviços e campanhas oftalmológicas;

III - congregar os especialistas brasileiros interessados nesta área, estimular suas relações sociais, científicas e dar-lhes a máxima assistência possível;

IV - criar, desenvolver e executar projetos filantrópicos que levem, às camadas menos favorecidas da comunidade, a possibilidade de usufruir dos avanços tecnológico-cirúrgicos por ela alcançados.

Art. 7º - A SBCPO pode receber filiadas ou se filiar a outras Associações, nacionais ou internacionais, cujos fins e objetivos coincidam com os específicos neste Estatuto, desde que não haja impedimento legal para estas filiações.

CAPÍTULO II

Seção I – DA CATEGORIA DOS MEMBROS

Art. 8º - O quadro social da SBCPO é formado de membros, agrupados nas seguintes categorias:

I – Fundadores;

II – Fellows;

III – Aspirantes;

IV – Adjuntos;

788148

V – Titulares;

VI – Remidos;

VII – Honorários;

VIII – Eméritos;

IX - Internacionais.

Seção II – DOS MEMBROS FUNDADORES

Art. 9º - Serão considerados Membros FUNDADORES os subscritores da Ata de Fundação da SBCPO (Sociedade Brasileira de Cirurgia Plástica Ocular).

Seção III – DOS MEMBROS FELLOWS

Art. 10 - Serão considerados Membros FELLOWS, médicos radicados no país, e que estejam realizando Programa de *Fellowship* em Serviços Credenciados pela SBCPO. Devem os candidatos apresentar diploma médico, título do Conselho Brasileiro de Oftalmologia ou MEC, currículo completo, carta de recomendação do Chefe do Serviço de *Fellowship* (membro Titular adimplente) credenciado pela SBCPO e o pagamento do valor a 50% (cinquenta por cento) da anuidade do ano corrente. Doravante poderão requerer condição do membro ADJUNTO após a finalização do *fellowship*, devendo apresentar certificado de conclusão do *fellowship*, carta de apresentação de dois membros TITULARES adimplentes e comprovante de pagamento da anuidade do corrente ano.

Parágrafo único. No caso de descredenciamento do serviço de *Fellowship*, o membro Fellow não poderá requerer a condição de membro ADJUNTO.

Seção IV – DOS MEMBROS ASPIRANTES

Art. 11 - Serão considerados membros ASPIRANTES médicos radicados no país, formados há mais de 3 (três) anos. Devem os candidatos apresentar carta de recomendação de pelo menos 2 (dois) membros TITULARES desde que adimplentes com a SBCPO, diploma médico, título do Conselho Brasileiro de Oftalmologia ou MEC, currículo completo, certificado de conclusão de *Fellowship* de Plástica Ocular realizado em serviço não credenciado pela SBCPO e pagamento do valor equivalente a 1 (uma) anuidade do corrente ano.

788148

Seção V – DOS MEMBROS ADJUNTOS

Art. 12 - Serão considerados membros ADJUNTOS médicos radicados no país, formados há mais de 3 (três) anos. Devem os candidatos apresentar carta de recomendação de pelos menos dois membros TITULARES adimplentes da SBCPO, diploma médico, título do Conselho Brasileiro de Oftalmologia ou MEC, currículo completo, certificado de conclusão de *Fellowship* de plástica ocular realizado em serviço credenciado pela SBCPO e pagamento do valor equivalente a 1 (uma) anuidade do corrente ano.

Parágrafo único. No requerimento das categorias Fellow e Adjunto, considera-se o período no qual o requerente realizou seu *Fellowship* em serviço credenciado. Caso o credenciamento do serviço ocorra durante ou após o término do *Fellowship*, o requente deve solicitar a categoria membro ASPIRANTE.

Seção VI – DOS MEMBROS TITULARES

Art. 13 - Serão considerados membros TITULARES todos os membros admitidos até 31 de dezembro de 2019 com suas últimas três anuidades quitadas com a SBCPO. Doravante poderão requerer condição de membro TITULAR somente membros ASPIRANTES ou ADJUNTOS com pelo menos 3 (três) anos nesta categoria. A promoção para membro TTITULAR ocorrerá se, após este período de 3 (três) anos como membro ASPIRANTE/ADJUNTO, o postulante possuir ao menos 1(um) trabalho científico em Oculoplástica como primeiro autor em revista indexada no Pubmed **OU** certificado de conclusão de pós-graduação *stricto sensu* em Oculoplástica (mestrado ou doutorado) **OU** certificado de conclusão de programa de *fellowship* credenciado pela SBCPO **E** apresentação de ao menos 1(um) trabalho científico nos últimos 3 (três) anos no CIOP/CIEPO.

Seção VII – DOS MEMBROS REMIDOS

Art. 14 - Serão considerados membros REMIDOS, membros TITULARES com 70 (setenta) anos ou mais de idade, desde que estiverem quites com suas obrigações com a SBCPO nos últimos 05 (cinco) anos e com um tempo mínimo de contribuição de 10 (dez) anos.

788148

Seção VIII – DOS MEMBROS HONORÁRIOS

Art. 15 - Serão considerados membros HONORÁRIOS os médicos e oftalmologistas brasileiros ou estrangeiros que tenham se destacado no setor de Cirurgia Plástica Ocular e contribuído de maneira excepcional com a SBCPO. Esta distinção será concedida mediante indicação por, no mínimo, 10 (dez) membros TITULARES e aprovação pelo Conselho Deliberativo. Nesta Classificação também se incluem os(as) ex-presidentes da SBCPO.

Seção IX – DOS MEMBROS EMÉRITOS

Art. 16 - Serão considerados membros EMÉRITOS, os membros TITULARES com 70 (setenta) anos de idade, tendo contribuído com o pagamento das anuidades nos últimos 5 (cinco) anos ou por um período de 10 (dez) anos, requeiram esta distinção ao Conselho Deliberativo e este, por maioria, conceda esta distinção ao requerente como reconhecimento pelo esforço desenvolvido em Pesquisa Científica e/ou Ensino na área de Cirurgia Plástica Ocular no Brasil. Serão também considerados EMÉRITOS (e portanto REMIDOS) os membros TITULARES que, por motivo de invalidez comprovada, requererem sua promoção, desde que o fato que originou a invalidez tenha ocorrido, depois de sua admissão como membro TITULAR.

Seção X – DOS MEMBROS INTERNACIONAIS

Art. 17 - Serão considerados membros INTERNACIONAIS, médicos estrangeiros, apresentando Certificado de conclusão de *Fellowship* reconhecido do país de origem há mais de 2 (dois) anos **E** atuar na especialidade perfazendo no mínimo 50% (cinquenta por cento) das suas atividades **E** apresentar ao menos 01 (uma) publicação na área de oculoplástica em revista indexada nos últimos 2 (dois) anos **E** apresentar Carta de recomendação de 02 (dois) membros TITULARES da SBCPO **E** pagamento do valor equivalente 1 (uma) uma anuidade do corrente ano.

CAPÍTULO III

Seção I – DOS DIREITOS

Art. 18 – Incluem-se entre os direitos gerais estatutário dos membros, os seguintes:

788148

Art. 77 - É vedada a divulgação da relação dos membros, de seus dados e de informações pessoais para terceiros, exceto as informações já disponíveis na área pública do site da SBCPO.

Art. 78º – Fica eleito o foro da Comarca de São Paulo capital para dirimir quaisquer questões oriundas da aplicação desde estatuto.

O presente Estatuto Social foi aprovado em Assembleia Geral Extraordinária datada de 17/04/2023, conforme ata que fica fazendo parte integrante do presente.

March 08, 2026

To Whom It May Concern,

I am writing to provide my strong endorsement of Dr. Alessandra Kurahashi Dantas in support of her application for an EB-1A visa based on her ability in the field of ophthalmology. I have known Dr. Dantas since our ophthalmology residency at the University of Campinas (UNICAMP), where we worked within the same academic environment. During her residency, Dr. Dantas distinguished herself through her knowledge of ophthalmology and her ability to share that knowledge with colleagues.

Over the years, we have continued to meet at ophthalmology and oculoplastic surgery congresses and professional courses. I have followed her career and observed her consistent commitment to responsible patient care and sound clinical practice. Because I shared clinical training with Dr. Dantas and have maintained professional contact with her over time, my relationship with her is best characterized as a professional relationship with prior direct collaboration, rather than that of a completely independent outside observer.

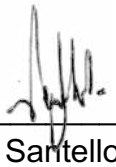

Throughout her career, Dr. Dantas has maintained a broad and responsible clinical practice in ophthalmology. Her work encompasses the medical and surgical management of oculoplastic conditions, as well as clinical care in glaucoma, retinal disorders, and pediatric ophthalmology. Over time, she has demonstrated sustained engagement in professional development and adherence to high standards of patient care. In my experience, these qualities are characteristic of dependable ophthalmologists who maintain long-term competence and solid professional standing within the field.

Dr. Dantas is a full member of the Brazilian Society of Oculoplastic Surgery (SBCPO), a reciprocal society of the American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS), indicating that she fulfilled all requirements for admission to this membership category. SBCPO has been affiliated with the Brazilian Council of Ophthalmology for more than 50 years. The society’s admission

criteria include formal documentation such as professional certificates and letters of recommendation. Through this process, the society verified that Dr. Dantas satisfied the requirements for membership and that her professional background meets the standards expected of members in this category.

I am pleased to support Dr. Dantas's EB-1A petition and remain available to provide verification or any further clarification if required.

Sincerely,

Patricia Mitiko Santello Akaishi, MD, PhD

HOW TO BECOME A MEMBER OF SBCPO

Required documents for the categories **ADJUNCT** , **ASPIRANT** , and **FELLOW** :

1. Proof of medical degree;
2. Specialist Title in Ophthalmology;
3. Proof of training in the specialty, indicating who the supervisor was and where the Fellowship in Ocular Plastic Surgery, Lacrimal Pathways and Orbit was completed. For fellowships from accredited institutions (see Specialization), submit a letter of request from the head of the department;
4. Curriculum Vitae, preferably on the Lattes Platform;
5. Letter of recommendation from 2 active full members of SBCPO (except for Fellow members);
6. Approval by the Deliberative Council.

Documents required for the **INTERNATIONAL** category :

1. Certificate of completion of a Fellowship recognized by the country of origin more than 2 years ago;
2. To work in the specialty, completing at least 50% of its activities;
3. Submit at least one (1) publication in the field of Oculoplastics in an indexed journal within the last two years;
4. Letter of introduction from 02 full members of SBCPO or members of Reciprocal Societies;
5. Approval by the Deliberative Council.

The necessary documents should be sent to:

tesouraria@sbcpo.org.br

SBCPO MEMBER CATEGORIES:

- **Full Member** – Active member for more than 3 years.
- **Adjunct** – Member who has completed a Fellowship in Oculoplastics, Orbit and Lacrimal Pathways at an educational institution accredited by the SBCPO (Brazilian Society of Oculoplastics).
- **Aspirant** – Member who has NOT completed their

REGARDING PAYMENT:

- Exclusive information for the **Adjunct** , **Fellow** , and **International** categories : after payment, please send an email with proof of payment to tesouraria@sbcpo.org.br .
- For the **Aspirant** category : you must send the documents to tesouraria@sbcpo.org.br and await

Oculoplastic training at an educational institution accredited by SBCPO.

- **Fellow** – Ophthalmologists who are completing their specialization in Oculoplastics at accredited institutions.
- **International** – Oculoplastic surgeons from other countries.

review.

De: ASOPRS Executive Office <info@asoprs.org>
Data: 24 de abril de 2026 às 16:50:09 BRT
Para: ALEKDANTAS@nco.med.br
Assunto: ASOPRS International Associate Membership
Responder A: info@asoprs.org

American Society of Ophthalmic Plastic and Reconstructive Surgery

Dear Alessandra Dantas,

Congratulations! Your application for International Associate membership with ASOPRS has been approved. This email outlines member benefits and serves as an introduction to the Society.

ASOPRS WEBSITE: YOUR PROFILE AND MEMBERS ONLY SECTION www.asoprs.org

The members only section of the website is updated periodically with news and has information available of ongoing interest to our members. At your earliest convenience, please visit your profile in the online database and verify your contact information. If you don't know/remember your password, please use the reset password link.

DUES

You will receive your dues invoices electronically, near the end of the year. Please pay upon receipt to maintain your membership in good standing. **Dues are required annually to maintain membership.**

SOCIETY'S JOURNAL: OPRS

As a member of the Society, you will receive an online subscription to the Society's Journal: *Ophthalmic Plastic and Reconstructive Surgery*. You'll receive an email from our publisher with instructions on how to access the journal online.

ASOPRS FORUM

The Forum is a robust listserv that provides opportunities to network, learn from and share with your peers and colleagues. The Forum can be accessed at www.asoprsforum.org. Please contact info@asoprs.org if you would like to be set up for access to the Forum.

ASOPRS MEETINGS

We look forward to your participation in the Spring and Fall Scientific Symposia; please be sure to mark your calendars.

We welcome the opportunity to connect with members. You can reach us at the main headquarters line (612) 601-3168 or by emailing info@asoprs.org

Please note that, according to the ASOPRS Membership Policy, International Associate membership status applies only to those who are living outside the United States and Canada. If you relocate to the US or Canada, your International Associate status will become invalid.

Welcome to ASOPRS!

About ASOPRS

The American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS) is dedicated to education, research, and the quality of clinical practice in oculofacial plastic surgery. Founded in 1969, ASOPRS has almost 1,000 members in the US, Canada and over 30 other countries around the world who are dedicated to facial rejuvenation and disorders of the eyelids, eye socket, and tear drainage system.

To advance our mission, the Society publishes the scientific journal, *Ophthalmic Plastic and Reconstructive Surgery*, hosts an annual members-only spring conference, and every autumn, sponsors the largest international meeting dedicated to oculofacial plastic surgery in the world.

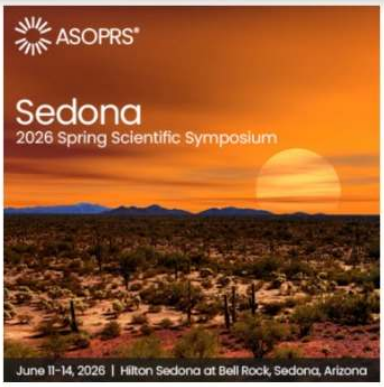

ASOPRS is a professional membership society, providing resources, education, and a community for oculofacial plastic surgeons. ASOPRS is not a certifying or accrediting body.

Fellow membership in ASOPRS requires that the individual be highly trained in oculofacial plastic surgery, have an unrestricted license to practice medicine or appropriate authorization to practice, and be certified by the American Board of Ophthalmology or The Royal College of Physicians and Surgeons of Canada (or equivalent, if the Fellow has moved outside the US or Canada). The majority of Fellow members reside and practice in the United States or Canada.

Hi Don,

Happy New Year!

Thanks for sending the letter to the ASOPRS.

See you in February.

Best

Alessandra

Dear Members of the ASOPRS Membership Committee,

I hope this message finds you well.

I am writing regarding my application for International Membership in the ASOPRS, specifically to clarify the submission of my letters of recommendation .

The first letter of recommendation has been submitted directly by Dr. Don O. Kikkawa, in accordance with the application requirements. The second letter of recommendation is attached to this email for your review.

Please let me know if any additional information or documentation is required to complete my application.

Thank you very much for your time and consideration.

Sincerely,

Alessandra Kurahashi Dantas, MD

Admissions Committee
American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS)

Re: International Membership Recommendation – Dr. Alessandra Kurahashi Dantas

Dear Members of the Admissions Committee,

I am pleased to write this letter in support of Dr. Alessandra Kurahashi Dantas's application for International Membership in the American Society of Ophthalmic Plastic and Reconstructive Surgery.

My name is Dra. Ivana Cardoso Pereira. I am an ophthalmologist with subspecialty training and extensive experience in oculoplastic and orbital surgery. I hold a Doctorate and Post-Doctorate degree from the University of São Paulo (USP) and currently serve as President of the Brazilian Society of Ophthalmic Plastic Surgery (SBCPO) for the 2026–2027 term.

I have known Dr. Alessandra Kurahashi Dantas as a colleague in the field of oculoplastic surgery, and I can attest to her professional ethics, clinical experience, and dedication to periocular surgery. With more than 25 years of ophthalmology practice, she consistently works with functional and aesthetic eyelid surgery, periocular reconstruction, lacrimal disorders, and trauma, bringing solid judgment and technical competence to her patients.

Dr. Kurahashi Dantas is recognized for her careful approach, reliability, and ongoing commitment to education and high standards of care—qualities that align well with the values upheld by ASOPRS. I am confident she will be a valuable addition to the Society's international community.

For these reasons, I fully support her application. Please feel free to contact me if further information is needed.

Sincerely,

Dra. Ivana Cardoso Pereira, M.D.

Admission Committee
American Society of Ophthalmic Plastic and Reconstructive Surgery -ASOPRS
1041 Grand Avenue #132, St. Paul, MN 55105

Dear Members of the Admission Committee,

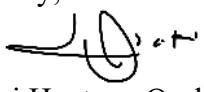

I am pleased to present Alessandra Kurahashi Dantas for your consideration for international membership in the American Society of Ophthalmic Plastic and Reconstructive Surgery (ASOPRS). As a colleague, I have had the privilege of witnessing her dedication and excellence in the field of oculoplastics.

Dr. Alessandra completed her medical degree at the Federal University of Paraná and specialized in Ophthalmology, focusing on oculoplastics, with her training completed at the State University of Campinas. She is a member of the Brazilian Oculoplastic Surgery Society and has excelled in both aesthetic and reconstructive surgery, demonstrating a remarkable commitment to clinical practice and lifelong education.

Dr. Alessandra is a dedicated professional who continually seeks to enhance her skills and knowledge. Her participation in ASOPRS will be a valuable addition to our community, bringing new perspectives and collaborating to advance the field of oculoplastics.

Thank you for considering her application. I am available to provide any further information that may be required.

Sincerely,

Midori Hentona Osaki, MD, MBA, PhD
Past President of Brazilian Oculoplastic Surgery Society

International Associate

For those practicing solely outside of the US

Candidates must satisfy at least ONE of the following requirements:

(1) Have successfully completed an ASOPRS-approved international fellowship OR

(2) Are a member of a Reciprocal Society

International Associates are not eligible to vote, serve on committees, or hold elected office in the Society.

Application
You will need:

1. Application form
2. CV (PDF)
3. 2 Letters of Recommendation from current ASOPRS members of at least five years
4. Additional documentation:
    - If you've completed an ASOPRS International Fellowship, documentation of completion OR
    - If you're a member of a Reciprocal Society, a copy of your membership certificate (PDF)

ASOPRS Membership Committee reviews International Associate applications quarterly.

Membership Committee

Purpose.

To oversee the membership entry process.

Primary Responsibilities

- Provide oversight of membership entry processes
- Review External Pathway membership applications and make recommendations to the Board.

Composition

1. Membership Director, Chair
2. Immediate Past Membership Director
3. At least four (4) members

Qualifications

Committee members must be ASOPRS members for a minimum of 10 years.

Terms

The Chair is the Membership Director and shall serve during their time of office. Members serve a two (2) year term and may be appointed to an additional two (2) year term.

Time Commitment

15-20 hours per year.

TRANSCRIPT

0:00
It's Christmas time. Can you imagine how frequent that is? Good afternoon. Good afternoon to you. Good afternoon to you at home. My little heart is already like this, look.
0:06
Anxiety is creeping in. Santa Claus is almost here. Oh, how wonderful. The year is drawing to a close and...
0:12
I don't know about you, but since this is the last working week, we're starting to miss what's passed, but it'll...
0:18
feeling that relief too, from all the burdens we were talking about today in
0:24
Our dressing room. Listen, this last week here has been the hardest for me. Ah, it's because it's been so hectic, so much going on.
0:31
to help those who are going to travel, those who are going to have Christmas at home, those who are going to do Secret Santa, it is
0:36
There's so much to do this week, it's been a lot of fun. This week has been very, very heavy, but next week will be something else!
0:43
Peace. It's just the rush on Christmas Eve there. But that part is nice. The feeling is
0:48
It's crazy because this week you're feeling the weight of the whole year. Yeah, then the very last one.
0:54
Then darkness falls, and there's nothing left. But listen, don't do more than you can handle, okay? Because December will pass.
0:59
And you'll still be here, still having to do things. So let December pass. Whatever you can leave behind.
1:05
Do it later. And one thing you can put off until later is stressing over these little things.
1:11
There are basic things going on. Do this: now, during this hour that the women's band has, you relax, sit down, and let it be.
1:17
Our hand, agreed? You can relax, you can stay informed about various topics. So, Band Mulher is on the air.
1:22

Here on this Wednesday, which is the middle of the week. I think it is. Oh, how delightful our little middle of the week is. Yes, exactly. So, look, today
1:28
Let's talk about blepharoplasty, a plastic surgery procedure that involves...
1:33
Removal of excess skin from the upper or lower eyelids, thus reducing the appearance of
1:40
Tired, that aged look. Some people really do have droopy eyes, right?
1:45
And then you can solve it. We'll answer all your questions as experts. Absolutely. Plus, we'll give you some safety tips so you can...
1:52
Run, so you can avoid injuries. It's not just about running around aimlessly, you know? You have to be careful, it's extremely dangerous.
1:59
So do this: grab your phone—I know it's right there next to you, or maybe you're texting while watching Band de Mulher—and send us a message.
2:06
Participation, because you make this program together with us, you know? Exactly. Without you here, it wouldn't exist.
2:12
Women's band. So join in. The area code is 19991969255.
2:18
Send a photo, a video, a message, whatever you want. It's allowed. Because now we're going to get into a topic, Nati.
2:25
That's really cool. For me, it was something cool. How old are you? 24. 24. I'm 29 and I still consider myself...
2:34
A teenage chauffeur, right? Very logical. People say to me, "Lari, don't you want to be a mother?" I say, "Guys,
2:40
"My biggest dream is to be a mother, but I'm scared because I still feel like a teenager." How am I supposed to get pregnant as a teenager? I'm a 24-year-old teenager.
2:46
years. Exactly. Why am I saying this, guys? Because they invented a new word to define people who
2:52
They're past 50 or 60 and aren't afraid to reinvent themselves. We'll see.
2:58
Now, Giib Manhoto will tell a little bit of this story.
3:03
The word "node" comes from the combination of the English words "never" and "old".
3:10
People who reject traditional age labels. Oh, and the word "elderly" doesn't exist for them.
3:18
Who knows what I mean? There are people who, at 60 and over, are more active than ever, because...

3:24
Age is just a number; it doesn't stop us from inventing and reinventing ourselves.
3:31
Enque was a flight attendant. After 23 years, he was unexpectedly fired and...
3:36
Desperation at not being able to find another job led him down a different path: sales. And what's more, he took advantage of it and...
3:43
She studied psychology in college. Now, at 55, she has graduated. And then I had to...
3:49
To break myself. To break myself in what sense? To go back to studying, to do psychology, because I've always had that...
3:56
Work progress with care for people, bringing dreams, caring,
4:01
Reinventing. And within psychology, this came to add value. In everyday life, being "no" means having
4:08
attitudes such as going back to school, traveling, taking care of your body, discovering new
4:13
Hobbies. Maturity doesn't mean stopping. And it takes a lot of courage to deal with it.
4:19
with these challenges and accepting the age one is and accepting the dreams one has and
4:24
consequently strive to achieve them. Carla worked in the field for 30 years.
4:30
design, videography, website development, but she already liked the field of
4:35
Food. She used to bake cookies for her friends. Superfoods with seeds.
4:41
The sprouted plants were a success and turned into a business. Now, at 50, she is even more...
4:48
Stronger than ever in this area. It took courage back then, but now it's a
4:54
purpose. I think there's a spiritual aspect to looking at life and saying, "Wow, I walked the entire first half of the game and now
5:01
"What's the second half going to be like?" If what I do now, I have the feeling that it matters more. The more I live,
5:07
But I want to live. What would you say to people our age? It's a
5:12
Just a little more. Exactly. That age is not a burden and that your dream is bigger than your age.
5:21
That's beautiful. That's an inspiration for us too, right, Nati?
5:26

Oh, sure. I like to joke around. My mom, me giving away my mom's age. This year she turned 50. I gave away a "Your mom is too." And I
5:33
I gave her a gift. We dancers say that life is divided into acts. And I think that's the...
5:38
The second act of life, which is usually the climax of the story. The second act is when everything starts to fall into place. So I
5:45
I think it's time for you to change, it's time for you to make things happen, to realize your dreams. But we don't have a place for that.
5:50
You're talking about that, right, L? Exactly. Not yet, you know? So, look, as we saw, there's even a name for it.
5:55
Something new for those over 50 who aren't afraid of change. And today we want to know what's changed in you at home.
6:02
After 50, Nati, I want to know. Oh, I'm super curious, guys. I really want to know, because if you also have
6:09
Any advice, speak up. You know that advice you give: "Wow, if I had known this at 20, now at 50, 60,
6:16
"Would everything be different?" Can you advise us here that the fewer wrong things we do in life, the better, right? So, go ahead.
6:23
So, tell us what changed in your life after you turned 50. Tell us, give us some advice, tell us how...
6:29
What's your life like today after 50? The area code is 19991969255.
6:35
Send it, I want that question. Guys, I'm turning 30 this March and I can say I'm in my best shape.
6:41
It's a different time, it's historic, right? You see, many people always said: "Oh, 30 is the age of success."
6:46
I used to say, "Oh my god, 30... I don't know, oh 30!" I was terrified of turning 30, very terrified. And today I'm not afraid.
6:53
Today I love myself much more than I did at 20, at 18, at 15.
6:58
Guys, today I'm feeling like this, in my best phase. Really? Oh, I hope my best phase is yet to come, you know? Because I think...
7:04
Now I'm turning 25, which is a little milestone too. And so I'm leaving behind that girlish thing and transforming into a...
7:11

Being a woman is difficult too. I think each phase has its own peculiarities, but tell us about it, don't forget to participate.
7:17
Because we want your advice from home and want to know what's changed, okay? The number is on the screen, feel free to call and you'll show up here, see?
7:23
Right next to us. Agreed? That's it. Meanwhile, let's get to the news, Nati. Let's go, because look, the world of celebrities...
7:29
He's a total hypocrite, isn't he? This world of celebrities. You don't understand anything I'm saying?
7:35
In the last few days, a video of an influencer and some friends talking about Ana Castela has been circulating on the internet, sort of...
7:44
Judging her sexuality. Yes, this video went viral and the person who talked about it has already shared this on...
7:52
That's in the past, that's why people are judging her as a hypocrite. I'm going to tell you all the details, I'm going to elaborate on the subject here so that...
7:57
You after the video. [Music]
8:06
It was a crazy, chaotic mess that happened, you know? We have the video, we're going to check it out. What happened?
8:12
It was an influencer, Vivi, who made a video with some friends talking about Ana Castela's sexuality.
8:19
Many people claim that Ana Castela is bisexual or that she's a lesbian, and so on, and they start saying things that...
8:25
The girl has never spoken in her life. And I think that's a tremendous lack of respect.
8:31
You first talk about someone's sexuality. Seriously, for God's sake, especially Ana.
8:36
Castile, which says nothing. It's not a subject that needs to be discussed, it's not an issue. Exactly, folks. If
8:41
If that were the case, what's the problem anyway? It's not, you know? Oh my god, I think she would talk about it, I think.
8:46
She would talk about the subject, she would come and debate the subject. So much so that even Zé Felipe later went there and posted about it.
8:53
A photo of her, kind of saying, "No, she's not." Anyway, let's watch the video to understand the gist of it.
9:00

It's a joke, and then we can analyze it and make our comment. Yeah, will it make us bitter? How awful, that's what he did.
9:07
I'm sure my God, it weighed heavily on me, old man.
9:12
But it's true. It's offensive. I'm not going to go to another gay man's house.
9:17
Right, guys? No, I'd eat the pizza too. Totally, man. Would it be bitter?
9:23
Horror? I'm sure she's human, she said I'm sure. The joke L
9:29
It was like this: it was saying something you were sure of, but that you couldn't prove.
9:34
Hmm. It's a trend, right? A trend and all that, and they made this trend. You can see that the intention there wasn't malicious.
9:41
At no point, especially since Ana Castela even commented on a post by a psychic who said she was going to leave...
9:47
closet this year and everything. She went there and commented, laughing. Then the girls
9:52
They imagined that this matter was something that perhaps she wouldn't care about.
9:58
that she thought everything was fine. But I think whether she thought it was okay or not, or whether she thought it was alright,
10:05
Regardless, you don't have to talk about the other person's life. Of course not, people. Especially not on such a sensitive subject, right?
10:11
People can't talk like that. No, no. Just kidding, for God's sake. Exactly. So, like, oh, she came to speak up, she said
10:18
Did anything happen? She spoke up, she talked to Ana Castela, said that everything is fine, that she called Ana.
10:23
Castela and no direct, she talked privately, but she also wanted to speak to the people who follow her,
10:30
She, I have, and she said, I thought it was a joke about her, because she had already joked about it and
10:35
Furthermore, I told her: "Look, I in no way meant to offend you with this, I was very wrong to have agreed,
10:40
"Having participated, because we don't have to give our opinion, I agree, on anyone's sexuality." She then added, "You guys..."
10:47

They wanted me to say her name here. She's someone I admire a lot, someone I followed closely, and I'm very upset to have been complicit in this situation.
10:55
That's not who I am. I apologize, I already said what I had to say via direct message. She dated her current boyfriend.
11:02
From the marina scene, right? Juliano Floss, who everyone talks about, right?
11:08
Exactly. It's funny because she thought she was killing it, making videos with her friends, and then she got canceled and...
11:14
She came to worry. Oh my, I didn't want it to be like this. And why did she say that? Well, because she had already lived through it.
11:20
Right on the skin, you know? Yes, exactly. People still talk about Juliano to this day, right? Yes. They talk about him because we... we have...
11:26
Some prejudices exist regarding clothing, the way a person walks, and the way a person dresses.
11:33
All of this stems from some deeply ingrained prejudices that have been around for years. And if a man, for example, like...
11:39
Juliano, he's super fashionable, he's just like João Guilherme, just like João Guilherme, he paints one color and wears it.
11:45
Someone with hair that's different from what we're used to seeing, and then people immediately jump to the conclusion of sexuality, right? The same thing.
11:52
In Castile, she has a different way about her, she's very much unmarried, things like that.
11:57
Women can't do that in society, right? Because she drinks beer, because she
12:04
Swearing is something women can't do. So, it's very complicated.
12:10
This situation. I think it went too far. That's why I wanted to bring it up here, because I think it's an issue that...
12:16
People need to debate, yes. Regardless of whether someone is famous or not, or whether they've been through something.
12:21
Whether that's the case or not, I think we need to stop having these prejudices and stop making fun of and talking about it.
12:27
Sexuality of others. Exactly. You said it all, you know? And look, I hope Ana Cela says something, but I don't think she will, because she is...
12:33

Okay. If it were him, he would have already spoken. Oh, but her boyfriend spoke for her. Let's talk about Xo Mendes. We talked.
12:40
João Guilherme was there, but Xo Mendes and Bruna Marquezini were also spotted together.
12:46
Together. Once again, girl, he went back to Brazil, you see? He came back because of her. I thought he had fallen in love with Brazil.
12:53
He wanted to see Net, he wanted to see L. I won't even tell you what he liked. Nes
12:58
Lari is back. He's back, he was seen having dinner with Bruna Marquezini and... (Unbelievable!).
13:04
They didn't care at all, you know? They didn't care at all. These candid shots here, see that little dog over there? The
13:09
The little dog that was in the photo here, look. That little dog belonged to João Guilherme and
13:14
Bruna Marquezinho. She's totally passed by. And now she's passing by because they got this puppy, they adopted it.
13:21
The puppy, when they went on that trip to Japan or China. Hmm. Hmm. Yes. And then they adopted the puppy.
13:27
They brought them to Brazil and they have joint custody of the dog because she already talked about it on the show.
13:33
Angelica. Anyway, now I think the dog is spending the weekend, the week of Christmas, with his mother and X.
13:40
Mendes. And the funniest thing about all this is that now she's appearing in all the...
13:45
International websites. Of course, right, guys? OX Mendes. She's X Mendes' Brazilian girlfriend. And
13:51
Then they bring up that she dated Neymar to provide context, because here we know who she is, but abroad...
13:57
Well, things are different. And then they were seen having dinner together, the two of them plus another couple of friends, they left.
14:04
Together, nobody cares, they were seen at the airport together. I think they are, in fact, now as they want to be.
14:11
Seen together, I think, maybe there's already a relationship going on and I can tell you when the person she does
14:16

It happened. So if he came back, he really wants something with her. Yeah. Wow. Very much. It's not because, you know, there are things...
14:23
The minimum things we say, "Oh, it's minimal." And people don't bother to do them, so she doesn't want to do them. Uh-huh.
14:28
When he came all the way from the United States, he took a plane, endured hours of flight time, just to be with Bruna Marquezini. Seriously, if...
14:34
This is love, if this isn't love, what is it? You there, my lady, sitting there waiting, going out on a date
14:41
And she says, "Oh my, he won't be able to, he's not answering me." My love, when someone wants Shao Mendes, Shao Mendes is there.
14:48
He had so many shows to do, so many television programs to go on, you know what he did? He said, "Stop, stop, stop, I'm going to see my beloved." So, if
14:54
Value yourself, my lady, value yourself and do like Bruna Marquezini, demand that he [someone] who wants it, gets it, right, Larissa?
15:01
Sure. Let's change the subject, Lari. Let's change the subject or we'll go to break, okay? What do you think?
15:06
Oh, I think we can go for a quick break. Let's go to the break. When we get back we'll talk about something really cool. You...
15:12
home, I was talking about the over 50s and most women of that age.
15:18
There's that problem with the eyelids being a little bigger. So we're going to talk about blepharoplasty, which is the surgery.
15:24
which consists of removing this excess skin from the eyelids. Not for sure. If you have any questions about...
15:29
Don't be shy about asking us about this. You can send it to us. WhatsApp is also available for you to ask your questions, okay? Area code 1991969255.
15:38
We'll leave a little space on the screen for you to take notes and send us your questions. We'll be right back, don't get off the screen. Time to...
15:44
Drink water and the women's band is back.
15:50
[Music]
17:54
[Music] is back. And look, getting older is a
18:01
It's a natural and inevitable process, but for some people it's extremely bothersome.

18:06
the drooping appearance of the eyes, caused by excess skin, fat deposits and
18:11
Sagging eyelids. In cases like the one Lari described, the solution is blepharoplasty, an excellent procedure.
18:17
A resource to renew your perspective and self-esteem. And today we're going to talk about that with Dr. Alessandra Cura.
18:22
She's an ophthalmologist specializing in oculoplastic surgery. How wonderful! Welcome, doctor.
18:28
Good afternoon, Lari. Good afternoon, Nati. Thank you for the invitation, for being here to talk a little about my experience.
18:34
That's great. That's it. Doctor, tell us what the right age is to start looking for help.
18:39
Whether or not to seek blepharoplasty also depends on the amount of excess skin each person has.
18:44
That's exactly what you said, there's no right age to seek surgery. The indication isn't...
18:51
Chronological, right? It mainly depends on the anatomy and whether you actually have this excess skin and that's it.
18:58
Wanting to improve. Look at that. And blepharoplasty doesn't always solve this excess skin problem. Sometimes it's necessary...
19:04
Something complementary, doctor? Well, uh, blepharoplasty is, by definition,
19:12
This involves removing skin from both the upper and lower eyelids. However, sometimes
19:18
You have to combine it with other procedures. Then, you can remove or reposition it.
19:24
Regarding the fat pads, you can improve the position of the tail of your eyebrows here. So, sometimes you have
7:30 PM
that is associated with these procedures. Look. And this surgery isn't just for aesthetics, right, doctor? There are people who...
19:37
The eyelid droops so much that it even bothers you when you try to see through it, when you try to open your eyes.
19:43
There are two main indications for this surgery, which is the indication
19:48
Functional, as you just said, is when this excess skin is covering the field of vision. So the
19:56

The patient has impaired vision, so this is a functional indication. And the vast majority is for aesthetic reasons.
20:03
That's right, that patient who's looking for rejuvenation in that peripheral area. And what exactly does that entail?
20:10
Surgery, doctor? We're curious, aren't we? We want to know the risks, how long it takes.
20:16
It all leads to surgery. Well, in the vast majority of cases, that
20:21
The surgery is performed under local anesthesia and sedation. So the patient is awake, but sedated, so
20:28
He'll basically be sleeping there. And the recovery... it's surgery.
20:34
It's relatively easy, okay? During recovery you can expect to be a little bruised, right? Just a little bit of
20:41
There will be swelling, but that will last for a few weeks. You'll have the stitches removed after about 7 days, and recovery is...
20:49
In about 14 days you'll be able to get back to your daily routine. Of course, that will be...
20:55
continuity, but in 14 days you'll be able to return to your work. Look at that. And doctor, this surgery...
21:02
Is there one, is it permanent, or could the eyelid droop again?
21:08
No, the eyelid can droop again. We generally say it lasts for about 15 years.
21:14
But that will depend a lot on how well the person takes care of their skin, right? The fact that they spend a lot of time in the sun, the person
21:22
who don't use sunscreen, who don't take care of themselves, a diet that leaves you, as we call it, with free radicals, that
21:28
It contributes to skin aging. So, some people's results last longer, and some people's results last a little longer.
21:34
Less. Doctor, and the scar? Because it's right here, isn't it? It becomes visible after a while.
21:40
So, like the scar on the upper eyelid, we do it on top of this juice.
21:45
We have this here on the eyelid, right above the crease. So, it becomes practically nonexistent.
21:51
And the scarring from lower blepharoplasty will depend on the type of surgery you undergo. If the surgery is for...
21:58

An external approach, the surgery is located right down here, in the eyelash area. But you can also do this
22:05
Internal surgery, which we call transconjunctival, means I practically have no scar.
22:11
Look at that. And many people also do it, and they do it on the lower part here, on these lower eyelids here.
22:17
That fat, that water retention. And does it also help prevent dark circles under the eyes, doctor? Or is that a myth?
22:25
No, if the dark circles under your eyes are due to excess puffiness, they will improve.
22:30
But dark circles under the eyes can also be a result of a person's skin type, right? So, the color, that's it...
22:36
Surgery cannot change that. The same applies to wrinkles; in this case, it doesn't correct wrinkles.
22:43
No. The surgery will remove the excess skin, but the quality of the
22:48
Regarding the skin, the fact that the patient has more cracked, more wrinkled skin, I can't address that, right? I remove that...
22:55
That's the excess that's left over. To improve those fine lines and improve skin quality, we need to...
23:02
to make use of other procedures associated with cephaloplasty. I loved this chat, doctor. Very much.
23:08
Thank you, you know? Thank you for... But first, we have a question for the doctor from a viewer, look...
23:14
Just this from Ieda from Espírito Santo do Pinhal. Look at this. Good afternoon, ladies. Good afternoon, doctor. I need to have blepharoplasty.
23:22
Or there are creams that reduce that skin under the eyes. I also eat healthily. I'm not a big eater.
23:27
I eat meat, but also vegetables and legumes, and I exercise regularly. She even...
23:32
She sent a photo, look. That's cool. So, it depends, right? We have to make a personal assessment of the person.
23:39
to see what the best indication really is. But in the vast majority of cases, we have it when there's excess skin, I have
23:45

that needs to be removed. But often the patient actually has a lack of fat and sometimes you have to transplant it.
23:52
fat in that area. So the recommendation is very personal. Definitely. Just for...
23:58
Finally, many people sometimes associate the two cataract surgeries,
24:03
Because she's already at an advanced age, with blepharoplasty. Can I do both at the same time or is there some other way?
24:09
Order? No, no. Actually, these are surgeries that we don't have to do together. They are
24:15
Different surgeries for different indications. And there's no set order, we...
24:20
You can have the cataract surgery first or the blepharoplasty later. It doesn't interfere with anything. And the gap between one and the other...
24:26
Another option would be how long, as recommended? More or less, the time one could generally wait is around...
24:32
About 30 days, right? I loved it, doctor. Thank you so much! Come back anytime. Her Instagram is on...
24:38
Your screen, everyone. @doraalessandraas. Come on, follow her on social media. And
24:44
Hey you, who's been watching Band de Mulher, send in your participation, because we have a question here, right, Nati?
24:49
Oh, that's right. You, who are already 50 years old, what advice would you give us? What has changed in your life?
24:55
After 50. For the better, right folks? Tell us what changed after you turned 50. Okay?
25:02
Are you experiencing your second act to the fullest? Tell us about it, we're curious. Just send us an email with DDD1991969255.
25:08
[Music] Send it now, we'll put it on in a little while because we're going to take a break now and when we come back we'll talk about...
25:14
Running, injuries, and of course how we protect ourselves in those situations. Don't go away.
25:23
[Music]
27:28
[Music] Back again, and we already know that street racing has become a passion for many people. Each
27:34
More and more people are going beyond 5 km, tackling races of 10, 21, and even more.
27:40

Marathons, which are 42 km. But Lari, along with this growth, doubts and injuries also increase.
27:47
And to talk about that, about how to run more safely, we are joined today by orthopedist Dr. Rodrigo Vicente. He...
27:53
He specializes in runners and athletes. That's great. Welcome, doctor. Thank you. Thank you for the invitation. (Speaking)
27:59
Just a little bit about running, which is my daily routine at the office. Definitely. We were just chatting backstage and a lot of people think it's...
28:05
It's easy to run. You start running 5 or 10 times and in a year you already want to run a marathon.
28:11
This can actually injure a person, doctor? It can. It's a very rapid progression, isn't it?
28:18
Running, unfortunately, has this drawback; it's an excellent sport, but it has this characteristic that allows for very rapid progress.
28:25
So, some characteristics suggest that the lighter the wind is, the better we run. This already increases...
28:33
The chance of a person falling into a calorie deficit and ending up getting hurt is that they have as much energy as they are expending. And the
28:39
Running shoes nowadays really help us with this progress, and each week you have a different run.
28:45
So, even through social media, there's a huge appeal for people to evolve and showcase that performance. By doing that
28:51
By accelerating your behavior, you're exposing your body to a much greater risk. It doesn't necessarily mean you'll get injured, but it can certainly lead to serious problems.
28:58
Certainty increases the chance. Look, doctor, some research indicates that women end up getting injured more often.
29:03
What about men in the matter of running? Why does this happen? Is there something anatomically different, even in the matter of...
29:09
Hormonal issues in us women? There's a very important question, especially when you talk about longer distances.
29:15
Well, between 21 and 42, women tend to have less muscle mass than men. And
29:21
It does have characteristics, as you mentioned, of the anatomy that sometimes shows that women tend to have their knees pointing slightly inward. Look,

29:28
If we exaggerated that X-shaped knee, what could be harmful to running biomechanics?
29:34
We know that it's related to an increased risk factor, so the more your knee turns inward, the greater the chance.
29:40
You have to get hurt, and the woman, because she naturally already has a bit more of that alignment in some of them, ends up...
29:46
which is also beneficial. Furthermore, as I said before, being a woman also makes it much easier for us to fall into a deficit.
29:52
It's high in calories, right, especially during this time of year when everyone is so concerned about their appearance. So you
29:58
You have a calorie deficit, meaning you're consuming less energy than you're expending, and this, when done chronically, ends up...
30:04
making it difficult to gain muscle mass and thus increasing the risk of injuries. So runners have to do...
30:10
Weight training is important because some people say, "Oh, I already run, I'm not going to do weight training, I don't want to lift weights, it's already good enough." You have to do it.
30:16
Yes, you have to do some kind of strength training, right? It doesn't have to be hardcore weight training, for
30:21
Going to the gym, lifting weights, but doing functional exercises... We say that functional exercise, the exercise that...
30:26
You'll be learning the complex biomechanical movements of running, tennis, or whatever sport you do, and...
30:34
Break that down into several exercises so you can show your body how you want it to react to being so exposed.
30:39
That type of movement. And then, by doing that along with running, you can protect yourself. I was reviewing it a bit.
30:45
Some articles show exactly that, that injuries occur as the muscles get tired and...
30:52
That's biomechanics, right? The physics of angles, lever arms, really.
30:58
In the body, they can negatively affect certain tissues and may eventually lead to injury. So, if you're going to participate in bigger races...
31:04
From 21, which means you need to run more during the week, and up to 42, okay? Est
31:10

Doing strength training will protect you, improve your performance, and prevent injury, because
31:15
You have a body that can withstand that stress for longer. Look, when we talk about injury, we kind of generalize what they are.
31:22
These are the most common types of injuries. Perfect. Your question is great, and everyone has a lot of doubts about them.
31:28
That's right, isn't it? When we talk about injuries, we can divide them into acute and chronic injuries. So, acute injuries happen...
31:35
However, it's not the focus of running; it happens much more often in impact sports, for example, soccer.
31:41
It has a twist, a hit, uh, volleyball or basketball, where you can also have some kind of jolt, or collision. In running...
31:49
We're talking about chronic injuries, so it's a structure that has been subjected to some kind of stress over time.
31:55
Beyond what she can handle, she ends up, due to overuse, causing injury.
32:01
And then it points out the main ones, right? Patellofemoral pain, that pain in the front of the knee.
32:06
Hmm. We even have a very characteristic sign, they say it's the cinema sign. A person sits for a long time, and when they try to get up, they get a pain.
32:12
In the knee. Ah, so because of this biomechanical issue, as we were saying, with the knee pointing inwards,
32:18
It can overload that area. Still focusing on the knee, the pain is on the side of the knee. And I've had that too.
32:24
Increasing my volume a little faster, it's like a stab you feel on the side of your knee.
32:29
It's precisely when you have slightly longer distances that the running becomes more difficult. Apart from that, then the articulation...
32:36
of the knee, this surface, this tendon in the lateral region, right, which is called the ilioptoid band, the bone itself, right, the
32:42
Stress fractures occur when a bone is subjected to more stress than it can withstand.
32:48
Chronic inflammation can eventually lead to excessive inflammation, resulting in edema or even fractures and other injuries.
32:55

They understand Achilles and it's easy to plant. Look, as we were discussing a little earlier,
33:01
Tendon injuries, including Achilles tendon injuries from plantar fasciitis, are also quite common.
33:06
So, I think those would be the main ones we would have, right, of the patellofemoral joint, iliopexy, fracture.
33:13
tibial stress, tendinitis, inflammation of the Achilles tendon and plantar fasciitis. And shin splints? Shin splints are also...
33:20
It's complicated. I only get it at the beginning, when I start warming up there, it gives me a little pain here in the front, then it goes away, then it gets better, right? Generally, I tend to...
33:27
I talk to the athletes who are going through this with me, right? Like I said, it's part of my daily routine to deal with these people who are going...
33:32
For races starting at 21, 42, or if you're looking to improve your performance, you need to understand how we can fit it in.
33:39
Life revolves around training to avoid developing these pains. So, shin splints are a fairly common injury, it's also like a...
33:45
To begin, it's initial information that's showing you what the bigger injury might be, right?
33:52
Oh no, I'm scared now. I'll have to concentrate and manage to absorb this...
33:58
Impact load, right? So, sometimes it can be related to a shoe, a shoe that doesn't help so much in controlling foot movement, but in
34:05
Generally, it causes an overload of the calf muscles, which forces them to...
34:10
It's kind of like it gets stuck in the shin bone. So this inflammation, this traction can generate a stiffness. I've also...
34:16
I developed shin splints at a time when I was going from two training sessions a week to three days of training, and I...
34:23
I've already set the intensity. So, instead of simply increasing the volume until I'm used to a volume of three...
34:28
Training, increasing intensity, doing more sprints—I went straight from higher-intensity training and felt it in both. And
34:34
That's when it's time to pull the handbrake, reinforce the strength training, and adjust the volume with the trainer.
34:40

suitable. I don't run, but I've danced my whole life and done one thing wrong my whole life, which I think is...
34:45
This is extremely important. We warm up, but we forget to cool down our bodies. This is called overtraining, and it's a real problem.
34:51
Doctor? We need to cool down the body. Yes, that's very true. When we talk about athletic performance, right, the
34:57
People give the body a stimulus so that it experiences that stimulus. So
35:02
I often say that we don't get stronger while we're training, right? While we're training,
35:07
When we run, we're telling our bodies that we want them to tire less with that stimulus. The time when we're really going to get stronger, the
35:13
That's when we rest and eat well. So, if you simply provide progressive stimuli, increasing the
35:19
If you don't put in the effort and neglect the other aspects of good nutrition, good sleep, and proper recovery, you may end up...
35:26
Having overtraining is when the body is chronically subjected to such a great strain that it begins to fail.
35:32
Look at that. And then you lose performance, and the risk of injury increases significantly. So that can...
35:38
It can happen. Everyone has a limit in this case. Exactly. Everyone has a limit. I think it's interesting that we, and with a
35:43
Running is really becoming very popular. That's excellent. We need to promote physical activity. That's a...
35:48
Something I always raise the flag for is that the idea is for us to have longevity in sports and that...
35:54
People should be able to do some physical activity as old as possible. I tell everyone I meet that I want them all to run a marathon like Dr.
36:00
Drau Varela was there until he was 80 years old. Uh-huh. So, for us to have that longevity, it's important that we have...
36:05
This control involves combining what we already have in terms of theory and science, right? What we have from the health field...
36:11
I try to study what the person knows about themselves. So I tell my athletes that when I combine theory, because I...
36:17

I study perhaps a little more than they do, but with the knowledge that each one has of their own body, which is obviously much greater than mine, that's what we do.
36:23
With this good combination, we achieve very good results, better performance, injury protection, and faster injury recovery.
36:29
So, everyone is different. Running can be for everyone, but since everyone is different, it's good to individualize your approach.
36:36
How will your journey be so that you have a longer running career and stay in the sport for a long time?
36:41
That way you won't get injured again. Definitely. And doctor, for someone who has already had an injury, how can they return to running normally?
36:48
Perfect. That's another very common question, it's a great question. Uh, we can go back to running, but
36:56
There are a few parameters that we try to make a little more objective. Because the main thing is...
37:01
The parameter we have regarding evolution is a very subjective piece of data, which is pain, right? Everyone has it.
37:07
a different pain threshold. So I try to minimize it a bit by using
37:12
Some technology that helps us predict this. Thermography, which is an image that I take with a camera.
37:18
Thermal insulation helps a lot with that. I can see it objectively; it's the temperature difference and how much...
37:25
which is inflammation in one area or another. This is something quite commonly used today in football clubs, even professional ones, and it helps a lot to...
37:31
to reduce the level of injury. So it's important for us to have this type of
37:36
analysis and very close conversation with other people in the health field
37:42
who are helping that athlete. So there is very close contact with the nutritionist, the coach, and the physiotherapist. Each one is able to use
37:48
His expertise, understanding, look, he's already provided me with certain factors in rehabilitation that I think he's...
37:54
Okay. The coach said, "Look, I can adapt the training because it has volume and I think it's feasible." And the coach himself
37:59

The athlete said, "Look, no, I'm feeling good, I'm feeling confident, I think I can do it." I think that's how we can mitigate as much as possible and reduce the chance of...
38:07
A re-injury. Yes. Because having a previous injury, unfortunately, is still the main factor.
38:12
...of risk for you to develop another injury. Look, so we try to surround ourselves with objective data and make a more informed decision.
38:19
Multidisciplinary, I think the most important and challenging thing for us is to achieve this return without too much...
38:24
Risk. Doctor, I think a very important point we need to raise here is the issue of being overweight and running. Obviously.
38:30
That's great, it's a very democratic sport, you know, you can play it in the street and everything, but
38:36
What are the risks of injury for a person who is overweight? Actually, I think the risks are if she
38:43
Trying to do this alone. Uh-huh. Right? So, alone we can go faster, but we won't go further. If one
38:50
For someone who is overweight or about to start a physical activity, I think it's fundamental. If she has a good trainer, it's because he will be able to achieve the desired result.
38:57
adjust the volumes she should do, because we know that improving body composition and overall health,
39:04
It depends much more on the consistency of chronic overload than acute overload. So, it's sometimes preferable to have...
39:11
A little more patience at the beginning, for someone who isn't in great shape, getting the necessary medical tests done...
39:17
This initial checkup assesses her heart and ensures she is fit to engage in physical activity.
39:23
He is very important and has a coach who will allow her to progress gradually. If the person is
39:28
If she's overweight and wants to go alone, she'll be able to make an initial gain, yes. But the chance of us not being able to achieve a...
39:35
Consistency yields satisfactory results in the medium and long term, and therefore, the main advice for those...
39:41
If you're overweight, out of shape, and want to start a physical activity program, invest in this initial phase to get off to the right start.
39:47

The chance of it staying is much higher. Absolutely. I loved chatting with you, doctor, come back anytime so we can talk about this, okay?
39:53
Sure. Just give us a call and we can chat. It's great. And hey, his Instagram is on your screen, guys, @drodrigo
39:58
Vicente. Come on, follow him on social media so you can stay up to date on everything, okay, Nati? Christmas
40:04
It's almost here, and then comes the Secret Santa game. Some people love it, others hate it. The good thing is that at least the tradition continues.
40:11
It always makes for some really fun stories. Gibes Manioto is going to tell us all the details now in this article.
40:20
Secret Santa, secret friend, who hasn't participated in this at least once in their life?
40:25
Even though I don't really like this gift-giving ritual? I gave a t-shirt.
40:31
I gave the guy a Corinthians jersey, even though I'm a Palmeiras fan.
40:36
A survey of Brazilian retailers indicates that 36% of consumers
40:41
They plan to participate in Secret Santa this year. That's more than 60 million.
40:47
people and the average cost of each gift will be R$70. It is estimated that this
40:53
This whole thing will generate around R$ billions of reais in the economy.
40:59
The team from the company took their lunch break to celebrate the end of the year.
41:08
And when we pick someone who isn't really a friend, or someone we don't even know,
41:13
These people work from home, each in a different corner of the country and the world.
41:18
Some people have never met in person. Bruno says he wouldn't like to receive clothes as a Secret Santa gift. Guess what?
41:25
Did he win? As I was saying before, I love getting clothes. I really enjoy it, especially when it comes from...
41:31
People who come from the top, from the chef position. Wow, wonderful. Look how well it fits. It fits with all of my...
41:37
skin. Oh, the research revealed that among those who should join in the fun, 50% love it.
41:43
Participating in Secret Santa: 40% consider it a good way to give gifts while spending less money.

41:51
And 15% participate only to avoid being judged as antisocial.
41:56
I think we don't know what to give as a gift to other people. So, precisely for that reason, we say: "Wow,
42:02
What am I going to give to the other person? What am I going to say about them in the Secret Santa? To conclude, we're going to use...
42:07
This video was generated by artificial intelligence, but it says a lot about this.
42:12
Tradition. Are you excited about the company's Secret Santa? God forbid. Last year I gave an expensive perfume set and received a keychain. Me
42:19
I look like Santa Claus, giving great presents and getting nothing in return. Exactly, Nati. So cute. And
42:26
Look, when it comes to trust and quality, the Gabeta group is a benchmark in the funeral industry. With 20 units.
42:34
Currently in operation, it offers complete funeral services, wreaths, and flower arrangements.
42:40
Plaques and photos for graves, as well as ground and air transfers in Brazil.
42:45
and abroad. With personalized service 24 hours a day, it is always ready to assist.
42:51
You and your family. And there's more, you know? Members can count on a network of benefits that offers discounts.
42:58
Exclusive deals with over 3,000 partners. Watch this video now.
43:03
Grupo Gabeta, the most complete company on the market, present in more than 10 cities to better serve our clients.
43:10
Follow us on social media and check out all our services or visit grupo.com.br.
43:19
And it's easy, you know? Just show your card. Look at ours here. Get yours at the nearest store, okay, Nati?
43:26
The Gabeta group also offers medical and hospital equipment rental and has dental offices.
43:33
Our own. That's it. I scanned the QR code on the screen to speak with the nearest unit, Grupo Gabeta, with and for you.
43:43
Okay, so let's take a quick break, Nati. But first, I want the folks at home to join us, because we have a question, right?
43:50

Really? That's right. Hey, you there who are 50 or older, what has changed in your life since then?
43:56
What has changed in you since you turned 50? What has improved? Then come join us and tell us what has changed in you after you turned 50.
44:03
Years. Oh, there it is, it's passing by. What has changed in you after your 50s? Send us the area code 1991969255.
44:10
A break is quick, less than 2 minutes and we're back to playing. [Music]
46:20
[Music] is back. And look, tomorrow is the day for
46:27
Blitz here on Band TV. Tomorrow our team will be at Nissan Daruj in Campinas starting at 11:30 AM, bringing...
46:33
Bringing you the best opportunities in the region. How fantastic! And the best part is, you can check out all these offers live.
46:40
Here on Band de Mulher and also on Donos da Bola, okay? So do the following, you too, starting at 11:30, to...
46:46
Nissan Daruj, write down the address: Avenida José de Souza Campos 2256, Chácara da Barra, here in Campinas.
46:52
Lari, they're going to compete for lots of prizes. So take advantage of it, okay? That's right. So participate. Look,
46:59
Tatiba Park has gained an extra attraction, you see? Now anyone visiting the park will be able to see it up close.
47:06
Atanáio has arrived and is already adapting very well to the new space.
47:12
A southern white rhinoceros that is actually grayish, is 5 years old.
47:17
He is 18 years old and weighs almost 2 tons. This is the newest resident of the zoo park.
47:23
Itatiba. Atanásio, who arrived on December 3rd, was born in a zoo in
47:29
Chile, and I had to leave the place because of the living conditions and the lack of space. That's when...
47:34
that's when the negotiations with Brazil began. We've had years of negotiations and conversations going on, you know, regarding...
47:41
Regarding the sanitary aspects, the bureaucratic part, all the documentation, right, all the licenses so that we can bring the
47:47

Athanasius. And besides, it's a very different kind of transport, right? So, an animal weighing almost 2 tons has a whole...
47:53
Very specific logistics, right? So he came by cargo plane, he spent quite a while getting used to it.
47:59
He got into the box so he would be calm and comfortable during transport, ensuring everything went as smoothly as it did.
48:05
Atanásio is one of three rhinoceroses born in captivity in Latin America. A docile, calm animal, and already super
48:13
Adapted here. Loves affection and eats a lot. The next step in this
48:18
The story of the Athanasius here in Brazil is to help increase the species. The veterinarians here at the Zoo are already...
48:24
studying his approach to the females so that a baby rhinoceros is born here.
48:29
We're also conditioning him for semen collection. So the quickest way we can achieve this is really...
48:36
Focus on their attempt to reproduce. The two potential future mothers are...
48:42
Lama and the fat one. The atanasio and the females are already living very close together and who
48:47
You'll soon have confirmation of the pregnancy, which lasts about 16 months, and...
48:54
There is great support, as the species is nearly threatened with extinction. Their numbers in the wild have been declining.
49:01
mainly because of hunting there for the horns, right? So the idea is that we can really contribute to the projects in the future.
49:07
conservation. Oh my, how cute. When you went to the zoo, what did you
49:12
When you were a child, what was your favorite animal to see? A lion. A lion? Yes. Mine is a giraffe.
49:18
The craziest animal there is. Seriously, I've always liked felines. Lions, tigers, jaguars. I've always been very...
49:25
I'm fascinated by these felines, I don't know why. I already liked unusual animals, you know? I thought rhinoceroses were cool,
49:31
The hippopotamus, I think it's sensational. But the giraffe gets me because, think about it, it's not a horse, but it has, it has the

49:37
It has the body of a giant horse. She's not actually that big of an animal; he's huge, but her face is cute.
49:44
Oh my God, she's so clumsy when she struggles to walk, she looks so awkward. How cute. Oh, so sweet. Oh, you who are following along...
49:51
Band de Mulher, do you think it's cute too? Because we think it's adorable, go check out our Instagram @bandvcampinas
49:57
Because we posted a story there for you to answer a piece of advice you would give to your 20-year-old self. Go there and comment.
50:04
@bandvcampinas and of course, don't forget to follow me and Nati. My Instagram is @larilopesv.
50:10
Go ahead, follow me because, oh, starting next Monday, I won't be here. Oh, how wonderful.
50:17
I'll be on vacation, but I'll be back too, okay everyone? Then [someone] will be on vacation too. Yeah, we have to give it a try.
50:23
The mermaid has to eat a little too. Go check out my page too, follow me, please. @natlques we're going to do a
50:30
Party time here. These last two weeks of ours here, you know, before the New Year.
50:35
Let's get started, it's going to be a huge party, we'll be doing all the coverage here at Band. It'll turn around.
50:41
It's something we love. Well, there's going to be a lot of good stuff on the show, so you can't miss it, okay? Never miss our show.
50:48
Oh, there's participation, production. I want to see what people are saying. Look, Maria from Araras sent it to us. Hi,
50:54
Girls, you look beautiful as always. Gorgeous. I'm 58 years old, I go to the gym, I love to dance. Oh my, it has to be like this.
51:00
Wow, Maria, that's great! That's exactly it. You nailed it! Look, this is from Campinas. Hey girls! I love this show. Me
51:07
I consider that I love this sport. My focus now is on getting a black belt. I'm going to pursue it with...
51:13
Sure, right? Let's go. That's it, you nailed it. Kisses for you. Look, Eliete from Campinas. Good afternoon,
51:20
Girls, look, age doesn't change anything for me. I'm 72 years old. Very well.

51:25
Thank you, and I hope for a rich crown to end life even better.
51:30
Wonderful. Wonderful, that's right. You deserve all of this and
51:36
Much more. Definitely for love, huh? A kiss. I'll kiss you. Look, Javan from Campinas. Nati, good afternoon, queen of Band.
51:43
From a woman. Congratulations. You said it all. Lari is 60 years old today. I take much better care of myself than...
51:48
That's when I was 17 or 20 years old. Having you in our homes is more than a gift, it's wonderful. How sweet!
51:56
That's true. We have to take care of ourselves like that forever, right? Definitely. Look, Ieda sent this to us, she's also from Espírito Santo.
52:03
Santo do Pinhal. Good afternoon, how are you? I am 62 years old, very active, although
52:08
I have lower back problems because I do all the housework myself, in addition to
52:13
I go to the gym, do water aerobics, and go for walks. I'm not one to complain and stay still. My family made friends
52:19
Secret. I think it's very fun and we like it. Cool. Ieda, I liked it, you know Ieda? Kisses
52:26
You. We can't stop, we always have to be active, you know? That's right. Look, Mario from Rio Claro is always active too.
52:32
With us. Good afternoon, Nati. Lari, Nati, you looked gorgeous in that all-pink dress. Lari, you too. This
52:38
Cream tone, everything perfect. Matching sandals. About turning 50, I'm already 67 and very happy.
52:45
Wow, look at that! Thank you! Dresses, dresses and...
52:50
Beautiful outfits from Amor Razaram. That's it. Odet also sent us this: "Good afternoon, ladies. After 50 years old, my life changed."
52:57
I gained more experience and patience. And it's true, my mother says so. She says that now that my mother is 50...
53:03
It's been years, hasn't it? My mother also turned 50 this year. And she said that nowadays she doesn't care about anything anymore.
53:09
Really? Nowadays, I, Larissa, also have things I say: "Oh, I don't want to know, I don't care, everyone minds their own business, I'm...

53:15
"I don't care." I hung up. I wasn't like this. I used to care a lot. My mom says it gets better. Oh, wait.
53:21
Even if the world is falling apart now that she's 50, she'll still be here, just chilling. You said, "Wow, what a dream."
53:27
Oh, what a dream come true, everyone! Look at that dream. A dream come true. So good. Odete. A kiss for you, okay? A kiss, beautiful. Look, Isabel too!
53:33
She sent this to us. Good afternoon, ladies. I've noticed that after 50 we only pay attention to what adds value to our lives.
53:39
As a human being. I don't even care about criticism anymore. That's it, Isabel. You nailed it, you said it all. And that's it too.
53:46
You at home, you who sent in your entry or who are watching, but didn't want to send in your entry, we get our inspiration from...
53:52
You, because I want to reach 50 years old, just like you, active, and well...
53:58
Life, like Eliete, is a wonderful chorus. That's right. We have to
54:03
To continue like this forever and not be able to stop, isn't that something? Absolutely. Our dreams, they never...
54:08
They can leave, you know? They're there for a reason. We have a purpose in this life, and we have to fulfill it.
54:14
Age is just a number, you know? It's just a number, and every day that passes we realize that, don't we? Exactly. And that's how we go on.
54:20
That's all for today's program. There's much more to come tomorrow, folks! We'll be almost at Christmas, and of course we'll be...
54:27
Wait until 1:30 PM. Kisses Nati, kisses L, kisses everyone. Now you get the best of the afternoon. Then there's Brazil.
54:33
Urgent with Heitor Fredo right next door. Volta e Cena is coming with Band de Cidade 10 to 7 at night. Larissa Lopes too.
54:39
We're bringing you all the weather updates. Bye everyone. See you tomorrow. Ciao

7:15 I'll start by asking you, Dr. Alessandra, if eyes end up itching even more in dry weather.
7:22 Yes, dry weather is a factor that can worsen itchy eyes, but there are other causes as well.
7:29 People need to take things into consideration, right? Itchy eyes can also be due to allergies.
7:35 Uh-huh. And other eye diseases. Now, there are people who actually have
7:40 A habit of rubbing your eyes, doctor? There are people who rub them out of habit.
7:46 That's true, but most cases are due to a triggering factor. And it's important to...
7:52 A person should seek a specialized evaluation because, within all these causes, there are their own...
7:58 allergies, eyelid pathologies themselves, and dry eye, which

TRANSCRIPT

0:00
Get out of here! We fell, but we didn't give up.
0:07
In the cold of the night, the bond endured. A hug warms, that's all there is. The magic.
0:16
It lives on, it will always be there. The magic is back, come celebrate!
0:25
Christmas is for everyone, it's a time to love. Clap your hands, smile, let the light guide you.
0:33
The magic has returned and will continue.
0:39
I thought darkness was my home, but I learned that forgiving is starting over.
0:48
Now I sing with you too. Christmas is the light of good people.
0:56
The magic is back. Come celebrate! Oh my, how beautiful!
1:04
This is how we're starting this very special Friday. Just a little taste for you, my friend, my...
1:11
Friend, welcome! You who were tuned in to Balanço Geral during Hora da Venenosa and now you're here on stage.
1:18
Ours. It's all happening this Friday through TH Record, also through
1:23
our social media. You got a taste, didn't you? But I left you wanting more, because today Vila do
1:30
Christmas here live on our stage. We're going to talk about this show that's enchanting not only São Paulo, but
1:36
People from all over Brazil are going to visit. You'll understand how it works, where it happens, what it's all about.
1:43
These are the days, how do you go about visiting, or rather, how do you get into this immersion that really refers to this?
1:50
Such a beautiful, magical moment. We're here with a very dear representative, with a gorgeous smile, who will...
1:56

Talk to us only at the very beginning. There's sausage here, there's a lot of stuff. You know that miscellany from our program that...
2:03
Do you love it? So, today our program is just the way you like it before...
2:08
To tell you everything I hoped for. Boys, welcome. Thank you so much for being here. From here to
2:15
We'll do a little more, but it's just a piece of this beautiful show, right? Welcome. Thank you! And look who's joining us!
2:23
She's here to talk to us about this subject; she's the spokesperson for this great show, Jessica. Welcome.
2:30
Thank you. Thank you for being here with us. It's Christmas Village. It's São Paulo's Christmas Village.
2:36
The Christmas Village in São Paulo is a wonderful spectacle happening in São Paulo. It's more than just a show, isn't it? A
2:42
Immersion, it's an experience. It was truly a project that was thought out and planned for...
2:48
so that both younger and older children could have fun and
2:54
Experience a beautiful, unique, and magical moment in there. You'll see some images; you're already seeing some of them. Yes, yes.
3:00
Something very charming. We're going to talk about that. But look, we're also talking about serious topics here today, because
3:07
This topic we're going to talk about regarding the Christmas Village is a serious matter, but why? So you can stroll around, so you can enjoy yourself.
3:12
During this month, bring the family. Now, did you know that when the weather is drier, we rub our eyes more?
3:20
That's true. We end up rubbing our eyes, and this can cause several problems for eye health. Now there is
3:28
People who rub their eyes out of habit. Did you know that, guys? Does anyone here have a habit of rubbing their eyes?
3:34
Yes. Fabio says he does. I scratch too, you know? Since I was little, but it's bad for me.
3:40
Hey Jessica, do you rub your eyes? Oh, I'm so glad I don't have that habit.
3:45
There isn't. Thank goodness, because this beautiful young woman who's here with us, who is...

3:50
Doctor, it's the ophthalmologist Alessandra Dantas, I don't know if she'll talk or...
3:56
Pulling our ear. Yes, welcome, doctor. Good afternoon everyone. Good afternoon, Fernanda.
4:02
Jessica, good afternoon to those of you who are at home today. Thank you for the invitation. We're going to talk about this subject, but only...
4:08
A little spoiler. Can I take a look, doctor? No, no, no. So, if you're on my side...
4:15
Folks, you already know what to expect. But listen, to accompany all this chatting this Friday, there's something delicious!
4:22
In our kitchen. Let me ask you something. Are all sausages the same?
4:29
No, I don't know. You don't know? I'll tell you. Not me, right? He's the one who's going to tell you, he's a master.
4:36
Sausage maker. Yes, there are master sausage makers. In fact, there's a history behind it.
4:41
behind the sausage, because in this case, the tradition comes from the family. You know that
4:47
Sausage passed down from father to son? I have a great expert here on our stage.
4:53
Today, we have Pedro Berna from Berna. Welcome!
4:58
Thank you so much. Thank you so much for the opportunity, Fernanda. I'm so happy to have you here, and I didn't say anything.
5:03
Nonsense, he's a master sausage maker. No, you're right. It's a profession.
5:09
Like a baker, like a chef, and we're very proud of that. And my father really started all this back then.
5:16
Switzerland and I have been making sausages, among other products, for 50 years.
5:21
Among other products. But this sausage that's here in our kitchen today is even more special.
5:28
She is special, and the sausage is special, and the presentation is...
5:33
Different. Because in Germany, where they eat sausage, they speak like that, they eat it.
5:40
Sausage with bread. And here we often eat bread with mashed potatoes and a sausage lost in the mix.
5:47
Halfway. That's true. Which isn't the case, you'll see it here, you'll be able to taste it there.
5:53

party. There at the party. Because you're also in the Christmas village. We're there in the Christmas village with a
5:59
Very nice kiosk, selling sausages, and we're preparing them there. Okay.
6:05
Preparing there, she'll prepare here. And who is that pretty girl next to you? Oh, Edilene is our culinary expert from...
6:12
Our company, and since I came here to talk to her about working here, she's the one who's going to prepare the hot dogs.
6:19
Edilene, welcome! Thank you. Thank you for being here with us! Thank you. So, we'll be going in a little while.
6:25
Let's chat in your kitchen, okay, boss? Great. I promise you I'm not nosy, I'll just be there to observe and get a feel for things.
6:31
I can smell it up close, but I'm not one to give unsolicited advice, because great chefs don't like having too many people in the kitchen, right?
6:37
No, you can come, you can come. You can come. Ah, then you'll be here soon. Hey boss, tell me something. There's nothing to...
6:44
I'll look into it, but I'll ask the boss. The boss is very nice, very kind. Does he have a habit of rubbing his eyes?
6:49
No. Yeah, I avoid it, you know? Especially those of us who work in gastronomy and stuff, the
6:55
People try to avoid it. It's true, isn't it? The hand has to be very, very careful. But sometimes it depends on the weather and the time of day.
7:01
Sometimes things get tough. So, and now at this time, boss, look, our weather is very dry here in...
7:08
Brazil, right? Well, it does rain occasionally, but most days the weather is extremely dry. And then I
7:15
I'll start by asking you, Dr. Alessandra, if eyes end up itching even more in dry weather.
7:22
Yes, dry weather is a factor that can worsen itchy eyes, but there are other causes as well.
7:29
People need to take things into consideration, right? Itchy eyes can also be due to allergies.
7:35
Uh-huh. And other eye diseases. Now, there are people who actually have
7:40
A habit of rubbing your eyes, doctor? There are people who rub them out of habit.
7:46
That's true, but most cases are due to a triggering factor. And it's important to...

7:52
A person should seek a specialized evaluation because, within all these causes, there are their own...
7:58
allergies, eyelid pathologies themselves, and dry eye, which is now getting worse
8:04
time. I confess to you, doctor, that I actually have a habit of scratching my...
8:10
eyes. And you know, Jessica, it seems like the more we scratch, the more it itches.
8:15
And then you really want to scratch. I say, and since we wear a lot of makeup on TV and every day, I say, I don't know if it's...
8:22
That's why, but there are days when the feeling, I don't do this, but you know, you even feel like scratching your eyes with your nails.
8:28
Yes, I brought a video to show you, if you can pass it along. We'll play the video while Dr.
8:35
To explain it to us here. But, look, this video is very interesting. It's an MRI. This part
8:42
That little white thing over there is the eye. And you can see the person when they squint, look there, see? Look!
8:47
When he squeezes his eye to scratch it, look how the eyeball becomes completely deformed. So, life,
8:54
Imagine this happening to you every day, rubbing your eye. So, really...
8:59
There are consequences. Oh my goodness, right? Yes, doctor. Normally, look, we're seeing that.
9:05
The image shows a child rubbing their eye. Children often have the habit of putting their little hands in their eyes.
9:13
She's scratching and doesn't have the same hygiene as an adult. She doesn't have the same concern about washing her hands all the time. It's worse.
9:19
Still. Actually, that concern about washing your hands is correct, but ideally...
9:26
Don't scratch at all. Uh-huh. I even usually suggest a way that, ideally, as I said, is not to scratch.
9:33
But if you have a moment when you have nothing to do, you can press firmly.
9:38
Take the corner of your eye here, not on top of the eyeball, but here in the corner of your eyelid or here in the corner.
9:45
From the side, apply light pressure. Sometimes you can put a little cold water on your face.

9:51
Apply a light cold compress; it doesn't have to be chamomile tea or peppermint tea. Just plain water. Or you could use...
9:59
There are some specific eye drops for that. So, for someone who rubs their eyes a lot, it's not normal to feel that way.
10:06
Constant itchy eyes? Rubbing your eyes isn't normal. It's a sign that your...
10:11
The eye may have some kind of problem; it needs to be investigated by a specialist and treated accordingly.
10:18
And as we saw there, the eyeball suffers when we're rubbing it, if the person doesn't seek medical attention...
10:24
She's an expert and she does indeed have this habit of rubbing her eyes day after day. What could happen to her eyes if she...
10:31
Why don't you seek a specialist, proper treatment? Doctor, that's a very important question, Fernanda. Did you see that in that image?
10:39
The eye becomes quite deformed from the pressure of squeezing it. This can then exert a mechanical force on the cornea, which...
10:47
It's that transparent part of the eye. This force can lead to a disease called
10:53
Keratoconus is one of the most common causes of the consequence of rubbing the eye in this way.
10:59
It's developing this disease. You touch, I'll explain quickly, it's a disease where
11:04
The cornea, which is normally spherical, begins to become pointed, hence the name cornea. And as it becomes pointed
11:12
It distorts your vision a lot, so the quality of your vision is greatly impaired, and that's something you...
11:18
It could have been avoided. Of course, sitocone has other causes, but scratching can also contribute to its development.
11:26
So, if you're following us now and you're going through this, you have this exacerbated itching, you notice that...
11:33
It rubs your eye every day, look how much your eye might be suffering from what the doctor is telling us here, it needs to be...
11:39
Seek a specialist. Exactly. Eye drops help, doctor, to alleviate this.
11:45

Itching? Eye drops can help, but, as I mentioned initially, there are several causes of it.
11:51
Itching. So, we apply eye drops or ointments depending on the cause.
11:56
So, for example, if it's an allergic reaction, I prescribe one type of eye drop. If it's dry eye, it's a different type.
12:03
Eye drops. If it's an inflammation of the eyelid, that's something else. So, that's why...
12:08
A specialist is the best person to recommend the best treatment. And one important thing is that...
12:14
What I wanted to let you know is that there are commercially available eye drops for itching.
12:19
It's available freely in pharmacies, but some may contain corticosteroids and require corticosteroid use.
12:26
Chronic, continuous, untreated problems will also bring you issues such as
12:31
It increases the incidence of cataracts and glaucoma. So not all eye drops are safe.
12:37
Over-the-counter medication that you can use when you have an itchy eye. Very important information because...
12:43
Sometimes, since sales aren't controlled, we tend to think all eye drops are the same.
12:48
Honestly, this is very relevant information. I didn't even have it.
12:53
the notion that eye drops with corticosteroids
12:59
And he says, "Oh, I want some eye drops." But if you don't have the knowledge, if you don't know, sometimes instead of helping, you...
13:06
It gets worse, right? It definitely gets worse. So, here's this great expert talking to us, and since in this time...
13:13
Dryness can worsen the itching; if you feel something is wrong, you really need to see a specialist, because
13:20
It could also be something that's not serious at all, nothing grave; with a specialist, it tends to go away or improve.
13:27
To alleviate this situation. Exactly. Exactly. Because ideally you should treat the cause. Uh-huh.
13:32
And not just the consequence, okay? Look, doctor, bringing us this important information. Now
13:38

Taking a walk and seeing a beautiful spectacle is good for our eyes. Very, very good, right, doctor? And look, Jessica is...
13:45
I'm here today, folks, to talk about this show that's happening in São Paulo, which isn't a one-off event, if I don't...
13:51
You're mistaken, it's a month-long show, Jessica. Yes, it started on November 28th and we...
13:57
We'll go until December 28th. Until December 28th. That's it. So there's no...
14:02
That excuse of "oh, there wasn't enough time," or "oh, it's because it's the weekend," or "there isn't one."
14:09
We're there except on Tuesday, so from Wednesday to Monday.
14:15
There is an option. So there's no excuse for "oh, I can't go." Look, you're following some...
14:21
Beautiful images that delight our eyes, but I'll ask Jessica to explain a little more what it is.
14:27
Indeed, the village of Natal. The village of Natal was born from the desire to
14:33
to bring an inspired experience from the world's greatest Christmas events. So, uh, that was brought together.
14:43
those, sorry, anyway, all of them were gathered together, the whole context.
14:50
so that people could truly live an experience, an immersion, and feel it.
14:57
the energy of Christmas. So, Soraia Carrasco, who is our CEO and the
15:02
The project's creator, along with her team, designed the entire project and structure so that not only the children,
15:10
but so that the whole family could live and enjoy being in the village. So,
15:16
Look, those who have been there say it's a truly unmissable tour for...
15:21
The whole family, because in addition to these great shows, you'll be a part of this.
15:28
party. Really, because there are several attractions. Yes, we have the Christmas Wall, there are
15:35
More than 200 characters within the village, both in the parade and circulating.
15:40
Inside the village, we have Santa's house, which is a house that was actually built. You walk around...
15:47
Inside Santa's house, you can visit everything. We have the food village, where you will...

15:52
We'll be able to try the sausage. This sausage is causing quite a stir, we're going to the kitchen right now.
15:59
This sausage is famous. We have a theater that's something new. This is the
16:04
This is the second edition of the village festival. The previous edition didn't include theater, so now we have theater with a written play.
16:11
Exclusively for the village. So she brings the plot, the context of the village. Hmm.
16:17
Uh, I'm the author of the play. Oh, how lovely. And so, the play isn't just because it is
16:23
Yes, but everyone leaves there truly impacted, because it's a message that's not just for children.
16:31
It was all conceived in a very simple, very light way, but it also carries a very profound message for adults.
16:38
Inside the village we also have workshops, we have toys, and there's the issue of accessibility.
16:46
So there isn't, oh, I don't have access, it was all thought out, well designed so that
16:52
so that everyone would have access. We also have social programs, so
16:58
We had a dog adoption fair, and we have a toy drive where the toys are distributed to charities.
17:05
partners of the event. So, it's a project like that, it's very inspiring.
17:12
Magnificent, inspiring, isn't it? Very beautiful, well worth a visit, you know? Eh, a
17:17
Your visit alone isn't enough, is it? It's worth giving yourself this gift, because you'll get there, you'll have fun, you'll...
17:23
Interact, you'll enjoy it, you'll keep that in your memory for many, many years to come. Where does it happen?
17:31
The Christmas village is located in Vila Lobos Park. It takes place from Wednesday to Monday.
17:38
We are only closed on Tuesdays, from 5 am to 11 am on weekdays and from 5 pm to 1 pm on weekdays.
17:44
midnight on weekends. A super unmissable outing for the family, wonderful for families, for adults, for
17:51
child, for grandma, for uncle, for everyone. And as she told us here, look,
17:56

There are shows that we'll be able to watch in a little while. There's wonderful food, right? An area of...
18:01
Very special cuisine. Oh, mmm, delicious. It's so delicious.
18:08
That's right. And you'll be able to catch a little bit of this show, but first...
18:13
Besides that, let me just give you an important message, you who are tuned in to our program, because whoever
18:19
Training knows that pushing yourself to the limit is part of the process, right Andrade? But the creatine from
18:25
Top Terme may be the boost you need to gain more energy.
18:32
Yes, Fernando, we know that creatine is very important for those who are doing physical exercise, precisely because it further strengthens the...
18:40
The musculature of someone who trains. But from the age of 50, our bodies tend to lose muscle mass. Our muscle
18:46
As we get weaker, we lose muscle mass. So what happens? We know, anyone over 50 is feeling it. You don't...
18:53
You can't go for the walks you used to, you can't go to the supermarket, you can't pick up your grandchild, your children in your arms,
7:00 PM
Precisely because it's weak. And when you replenish with Top Term creatine, the creatine is with the
19:06
With the Top Term quality seal, this reality changes. It strengthens your muscles, it restores your...
19:12
resourcefulness. You can go back to taking that walk, keep your muscles strong, carry the bag,
19:17
Carrying your grandchild in your arms, and best of all, all this with a 60% discount!
19:22
Hey Feró, listen up! In addition to the 60% discount, you can also pay in installments via bank slip.
19:28
with the first one towards the end of the year. So, take advantage and call now. 0800 770,
19:35
In addition to the 60% discount, payable in installments via bank slip, you'll receive a smartwatch as a gift. So grab your phone and...
19:41
Call now. 08007700125. Fernanda, what are you waiting for, my friend? My
19:47

Hey friend, look, it's 087700125. They have your Top Terme creatine there.
19:53
your home. You get a 60% discount, a gift, and you can still pay in the way that...
19:59
If you want. 08007700125.
20:06
And now we're going to see a little bit of one of the magical moments that happens in...
20:12
Christmas village, where these great artists prepare a beautiful show for everyone who attends.
20:20
This place is incredible.
20:26
We fell, but we didn't give up. In the cold of the night, our unity endured. One
20:34
A hug warms you, that's all there is. Magic is
20:39
It lives on, it will always be there. The magic is back, come celebrate.
20:48
Christmas is for everyone, it's a time to love. Clap your hands, smile, let the light guide you.
20:56
The magic has returned and will continue.
21:02
I thought darkness was my home, but I learned that forgiving is starting over.
21:10
Now I sing with you too. Christmas is the light of good people.
21:18
The magic is back. Come celebrate Christmas, it's for everyone, it's time to love.
21:26
Clap your hands, smile, let the light guide you. The magic has returned and will continue.
21:37
Avant! Here's the new guardian. I think Christmas will be well organized now.
21:48
Look at this, it's beautiful, everyone. Wonderful. Look at this team!
21:55
Hey everyone. It's Thago. Who is Thiago? Thaago, Fabio,
22:01
Joe and Dani are beautiful. And look, these shows, they just keep happening.
22:08
throughout and the entire time there in the house. That's it. This presentation is one of the
22:15
songs that are part of the Santa Claus Theatre show, The Secret Map.
22:21
So, it's a play with musical elements. This is just one of the songs, and the theater...
22:29
We have three daily sessions, at 6 PM and 7:30 PM.
22:34
And at 9 PM. So there are three performances every day. The play talks a lot.

22:42
about magic, about love, about when we sometimes let ourselves
22:49
erase, you know? Those moments when you say, "Wow, Christmas," and then...
22:55
She comes to truly rekindle, to revive that Christmas flame. So everyone
23:00
They are part of our theater, there are some of them, we couldn't bring them all.
23:06
The team, we have an even bigger team and they are our actors who make it happen.
23:13
Part of our show. What is Fábio? A soldier. That's right. Captain Pinhão. Captain Pinhão. Oh, Captain Pinhão. And the
23:20
What does it mean to you when each look there, you know, enters into that magic, into that?
23:25
A playful moment during the show? Man, it's very rewarding. Just yesterday we had a presence of...
23:31
More than 40 children from an institution came and they were super excited, they want to talk to us.
23:37
Taking a picture. So it's really nice to even relive our childhood, you know, and say: "Wow, I've been on that side,
23:42
"I'm delighted, and today we're able to provide this for them." It's really, really cool. Beautiful. And look, already
23:49
We're talking about dreams and parties here, and today she's our party planner, our dear TIG, she's not...
23:56
She's here with us because she's on a mission, folks. Yes, she's going to show...
24:01
For us, the flower market at Seasa has everything you need.
24:07
to decorate your home, especially now at Christmas time. But before...
24:13
Call this VT, you see Marcela, I wanted to take this opportunity on behalf of the entire team of
24:18
Tacum Tudo and here from TH Mais Record to send our congratulations to our dear TIG.
24:24
Very special, because today is her birthday! She's our resident party girl!
24:31
She's the one who makes our dream party come true. More than 100,000 people...
24:37
They registered, and several parties were held. Thanks also to the partnership.
24:42

with TIG, and it's that wonderful team. So, my friend, oh, may God bless you greatly always, may you
24:49
Enjoy your day to the fullest, and now we'll take the opportunity to follow along with this special feature together.
24:56
Today is amazing, it's blooming, just the way we like it and the way you at home deserve. We came to the market...
25:03
Flowers here inside Seasa Campinas, that place that's a decorator's passion. But my tip for you...
25:11
If you, like me, love flowers, this is the perfect place for you too. And I'll show you.
25:17
Why? Come with me. We really get lost among so many flowers and so many colors. Here, for example, you...
25:24
You see the planted pots, the kind you can pick up, take home, and plant in your garden bed. So,
25:31
Of course, right? Those are the kinds of care every flower deserves to stay beautiful. But...
25:36
Now, if you want to create an arrangement, if you want to be daring, the Flower Market also has you covered.
25:41
We have the famous cut flowers. Want to see?
25:50
But if you suddenly enjoy getting your hands dirty, it's practically a
25:56
Therapy. Mixing these colors and aromas can give your home a therapeutic atmosphere.
26:02
Very special. And if you don't have much experience, everyone here at the flower market can even help you.
26:09
To help and inspire you. Just give wings to your imagination and let your heart speak.
26:14
Higher up. After all, working with flowers is spreading love. And for you orchid lovers, go for it! A
26:22
The variety is immense, and one gets lost among the colors and species. I
26:27
I confess I'm just here, completely in love and drooling, because if there's one flower that goes with every setting, it's this one.
26:35
From here, look. And now I'm going to give you a tip if you like to entertain at home with charm. How about putting in...
26:41
Are those little pots of herbs on your table? Look, I'm lost here among basil,

26:48
Mint and chili pepper. Besides perfuming your table, this adds a touch of charm.
26:53
Special. If I were you, I would try it. And for those who think the flower market is just about flowers,
27:00
You're very mistaken. Here we have very green trees, which you can see is a big trend. Box shops, of
27:07
Ribbon, bow, scented, tree-themed, and anything else you can imagine. And if you want...
27:13
To find out if the price here is really lower, you can be sure. So stay here.
27:19
I invite you to visit the Flower Market. But, please note the opening hours, as there are some times when...
27:25
These are exclusive. For decorators and those times that are free for the
27:30
public and for you to know.
27:42
And we leave the flower market and come to a market that I really like. What do you think, doctor?
27:48
It's really nice, isn't it? Right? It's a moment we really enjoy, and today especially, because look, I don't...
27:54
I knew there was a master sausage maker. It's a profession, it's a profession that we certainly...
28:01
He really likes it. Actually, I want to thank the boss, the master sausage maker, for being here. Sending kisses to everyone.
28:07
These are the great chefs who are always here in our kitchen. And today we welcome Pedro Berna, who...
28:14
Come talk about the history of the sausage. Edilene's here with you, right, Edilene?
28:19
This beautiful young lady here is going to tell us that not all sausages are the same. She'll tell you a little more about...
28:26
It's a story, right, boss? Yeah, I'm not going to tell the whole story, 50 years of making sausage is a long time. But
28:33
In short, first of all, I want to say that it's an honor to be here with you, Fernanda, here on
28:38
on the show "Tá com tudo" (It's got everything). It's an opportunity for us to talk about a good sausage, a good product. Like in
28:46

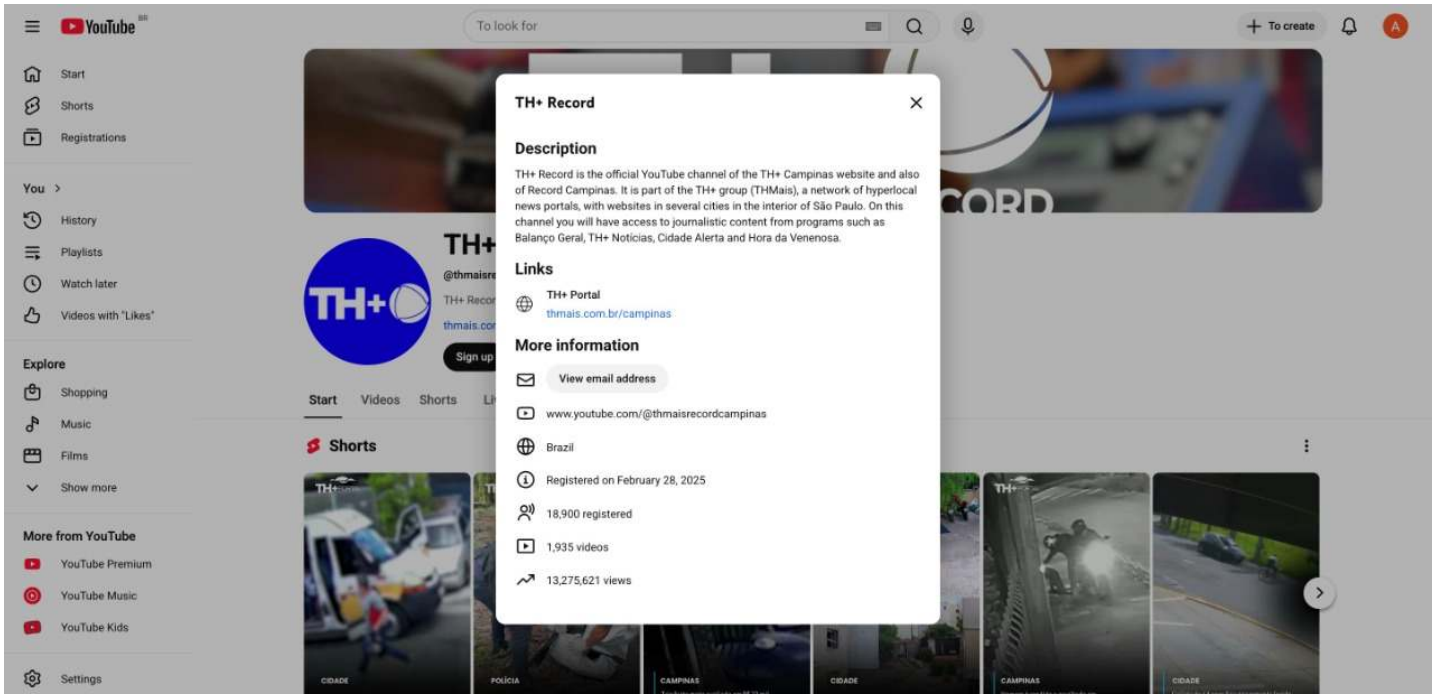

In Germany, when it comes to beer, they talk a lot about the purity of the product and maintaining tradition.
28:52
a recipe, don't keep changing it, uh, don't prioritize cost and...
28:58
Profit, but first and foremost quality and health. And we know that we have sausages of all kinds.
29:05
The way and how much it is, the type. So, we have very strict control over it.
29:11
Federal Inspection and such. So, uh, we have quality in Brazil both
29:17
How much do they have in Germany, elsewhere. No, no, no, no, we don't need to be ashamed, we shouldn't.
29:22
For no one, right? And in this project we had the idea of doing a joint...
29:28
A sausage in a special size. Actually, there are two recipes, one German recipe and one Swiss recipe, which are...
29:34
Three types of sausage. You'll see the details at the party later, right? You'll go there to try them.
29:40
But just for show, we even invented a name for the Spof VS sausage, because it...
29:46
It started back in São Paulo. What's that? Spoff. Now let's practice German.
29:51
Trein isn't even German, it's São Paulo October Fest Burst. And that's where it was born.
29:57
And she was so successful while I was already learning German. (I'm leaving)
30:03
horse. It falls in FR. We can speak German too, there's no
30:08
Don't complicate things. Or, Swiss is even harder than German. That's where it gets complicated. Oh well, it's alright. Yeah, it's better if I stick to Portuguese.
30:14
The basic thing here is to avoid embarrassment. So, for us, it's a great opportunity.
30:19
It's great to be able to be at Christmas, not just at Oktoberfest, but also at Christmas with...
30:24
An original product that mothers can give to their children without fear. In fact, uh, the
30:32
Edilene works with me, my wife also works with me, we're a company, my son who's now at
30:38
At the head of the company, it's not me anymore, after 50 years, they say: "Put someone else there, right?" Oh, never mind.
30:43

Now, right? Now I just want to eat the sausage. These things are a really cool thing for us to be able to follow, because the
30:49
We are very proud of what we do. So much so that in our company, the phrase we coined from the beginning,
30:56
We only give our customers what we serve to our own children. Oh, that's great. That's a very important thing.
31:03
Important. First and foremost, quality. And if it's enough for us to survive, I'm not even talking about it.
31:09
Profit. If it's enough to survive, we'll continue. It's already worthwhile, but we're very proud of what we've achieved.
31:15
Yes. And in that sense, uh, I can only speak in German if you go there.
31:21
Appetite. A good appetite in Portuguese. Appetite. It's good appetite. It is
31:28
Appetite. That's it. Done. I'm feeling better here. Now what I want
31:33
Let me show you, first of all, that we have a little screen here. I'm going to ask them to put the screen of "What's on this?"
31:39
Hey, is this the little screen you're watching? It's one of the three recipes you're watching, because it's arrived...
31:45
Take the screenshot at the moment of the screenshot. You take the picture there with your cell phone, but later if you want to stay updated on this chat...
31:51
For details and to follow along, you can go to our website, which will also be available for you. Oh, but what I...
31:58
I want to show you today, as I joked at the beginning of the program, that all sausages are the same.
32:03
No. Why did I say that, boss? Because some people actually have a prejudice against eating sausage. I
32:09
I've always really liked sausage. A while back, a few years ago, some mean people made some videos.
32:16
Well, they ended up going viral on social media talking about the sausage. This sausage, you know? Sausage, folks, it's something like that, I...
32:24
I particularly like it, I've been giving it to my daughter her whole life. And the sausage, when it's of good quality, when it's from a...
32:31

A place you trust, it's amazing food. So I think it's important.
32:36
We can talk about that. Yes, of course, just like with any other food, you need to know its origin.
32:43
that you're buying and bringing into your home. But I think it's important for us to talk about this because sausage is a
32:50
This is a food that Brazilians love, right? Who hasn't eaten the famous hot dog, right? Well, his is more...
32:58
It's special, too. Can I hold one in my hand? Because I want to show you, because where it is now, it won't be possible to...
33:04
See, I said, no, all sausages are the same, you'll understand why not. This is São Paulo. This is, take a look at my hand here.
33:11
It's what I said at the beginning of the program, when the sausage is good, you don't need to put so much on it. Put one
33:17
Just a little something to keep track of, because it's part of the process. But the star here is the sausage. And we made it 30 cm long.
33:25
It's a sausage, right, guys? Yes, it weighs more than 100g, it's actually a product.
33:30
That's really cool. And to summarize, here you brought her with...
33:36
with three things. The first is that Brazilians love fried bacon, so we have it with a little bit of bacon.
33:42
Fried on top, and of course, a little mustard is always a must. And the bread is very important too.
33:48
Because you also have to get the bread right, heat it up so it's really delicious.
33:54
Okay. I see there's a German mix here. Yes, that's Munichen. We call Munichen sauerkraut, sauerkraut.
33:59
German, sauerkraut, etc. Yes, it has a little bit of... Sauerkraut is fermented cabbage, we make it very mild and...
34:06
Also with ketchup and a little mustard, right? And here's another option.
34:12
And the third is the traditional one. So I suggest you start with the traditional one, and when you get to Christmas,
34:19
First you get a traditional one. When you get hungry, you come and get the...
34:24

São Paulo and to leave. And if they don't want to eat, they take the German home. Home they take from m to home to another
34:31
Good morning, isn't that right? Let's all be here. Look, we're going for a quick...
34:38
Break. We'll continue this nice chat soon. It'll be quick, okay? It's a back-and-forth. How do you say "back-and-forth"?
34:45
there? Now I got you in German. Hören wir einig, dann kommen wir wieder zurück. Das Fest geht weiter. Fest continues
35:06
Presented by the Giane family, our family's restaurant for your family.
35:13
Christmas: Paths of Dreams. A spectacle of magic and emotion in Campinas. Come!
35:19
Experience the magic of Santa's Village and the Entrepreneur's Christmas Fair.
35:24
the traditional Christmas parade, enchanting shows for the whole family and much more
35:29
More. From November 28th to December 28th, check out the full schedule.
35:35
On the Natal Caminhos dos Sonhos website, the party is for everyone.
35:43
72 hours of unbeatable offers in São Vicente. Take advantage! Packaged beef sirloin steak R$9.90 per kilo. Beef flank steak
35:50
Vacuum-packed R$4.90 per kg. Fine plate rice 5 kg R$21.89. Only until Sunday.
35:56
Come to São Vicente.
36:16
To keep your company on track, it's good to have support when you need it most. Promotion starts at 80 Unimed Campinas.
36:21
Business plan with an 80% discount, spread over four monthly payments. Visit the website and sign up now.
36:37
Indaiatuba, a city that welcomes, that grows, that inspires. For 195 years, each
36:44
Every street, every square, and every smile helps to write a story made of work.
36:49
Tradition and future, where quality of life embraces newcomers and makes natives proud. We celebrate not only the city, but
36:57
Congratulations to everyone who builds it day after day. Happy 195th birthday, Iatuba!
37:04
Message from TH+ Record. Christmas has arrived in a wave of fun. There are toys, there are
37:11
Gifts and offers galore. Mesa Aposta also has heart. Come running!

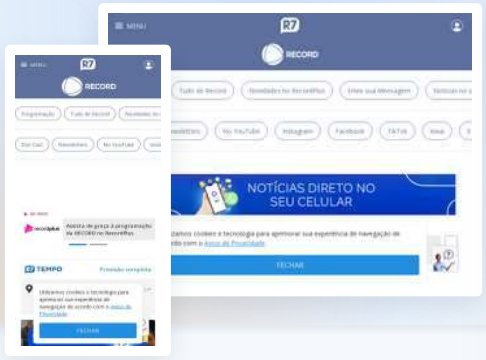

37:17
Guaranteeing the best prices. Wonders are coming. Wonders. The Christmas store.
37:23
Here you'll find low prices and a wide variety of items. Mara has everything to make your Christmas even more magical. With stores
37:29
Open every day until 10 PM and with parking. A special Christmas at Maravilhas do Lar. Come visit!
37:35
Running. Enjoying. Weekend at Arena. Savings that are worth it. Packaged beef sirloin steak.
37:41
R$9.90 per kg. Vacuum-packed beef flank steak R$34.90 per kg. Sprouted carioca beans
37:47
Legal 1 kg 6.79. Only Friday, Saturday and Sunday. I came to Arena Atacado.
37:54
It's got everything. Brought to you by the Giane family, our family's restaurant for yours.
38:01
family. Look,
38:08
We're reaching the end of our program. I want to thank everyone for being here, thank you for...
38:14
Just a reminder that you'll have 7 minutes of peace with the bishop next, and we'll be back tomorrow.
38:21
Here we are again. And now our goodbye will be in German. How is it? Bispot.
38:27
Bye. Kisses, everyone. See you tomorrow. Bye. Bye.

Subject: Invitation to Review for Arquivos Brasileiros de Oftalmologia (ABO) - FIVE DAYS DEADLINE
Answer to: rodrigopclira@hotmail.com

09-Oct-2025

Dear Dr. Dantas:

Manuscript ID ABO-2025-0287 entitled "Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting" with Miss Castro as contact author has been submitted to Arquivos Brasileiros de Oftalmologia (ABO).

I invite you to review this manuscript. The abstract appears at the end of this letter, along with the names of the authors.

Please let me know IN FIVE DAYS if you will be able to accept my invitation to review.

If you are unable to review at this time, I would appreciate you recommending another expert reviewer. You may e-mail me with your reply or click the appropriate link at the bottom of the page to automatically register your reply with our online manuscript submission and review system.

Once you accept my invitation to review this manuscript, you will be notified via e-mail about how to access ScholarOne Manuscripts, our online manuscript submission and review system. You will then have access to the manuscript and reviewer instructions in your Reviewer Center.

I realize that our expert reviewers greatly contribute to the high standards of the Journal, and I thank you for your present and/or future participation.

Sincerely,
Prof. Rodrigo Lira
Arquivos Brasileiros de Oftalmologia (ABO) Associate Editor

MANUSCRIPT DETAILS

TITLE: Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting

AUTHORS: Castro, Heloiza; Joao Victor Tenorio Lossio de Macedo, João Victor Lossio; Ferro, Rafael ; Andrade, Gabriel

ABSTRACT: Purpose: Early detection of diabetic retinopathy (DR) is directly associated with better disease outcome. However, the rising prevalence of diabetes mellitus (DM) and access to a retina specialist are barriers to effective screening of all individuals with DM. Artificial intelligence (AI) is proving a promising tool for optimizing DR screening programs. A cross-sectional study to assess the effectiveness of an AI system for detecting DR versus assessment by a retina specialist using a portable retinograph, was conducted as part of a DR screening program implemented at a primary care center.Methods: Patients with type 2 diabetes mellitus were recruited and tested using an Eyer portable retinograph. The EyerMaps AI algorithm was used for analysis, classifying images as normal or abnormal. Images were also assessed by a retina specialist, serving as the gold standard. Subsequently, the sensitivity, specificity and accuracy of AI was assessed.Results: A total of 163 eyes of 85 patients were assessed. The sensitivity and specificity of AI were 84.48% and 98.04%, respectively, and accuracy was de 0.913.Conclusion:The AI system showed high sensitivity and specificity for detecting DR, comparable to the performance of a retina specialist. AI-based DR screening at primary care clinics can broaden access, particularly in remote areas, potentially improving patient outcomes through early diagnosis and intervention.

Manuscript ID ABO-2025-0287 now in your Reviewer Center

Answer to: rodrigopclira@hotmail.com

10-Oct-2025

Dear Dr. Dantas:

Thank you for agreeing to review Manuscript ID ABO-2025-0287 entitled "Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting" for Arquivos Brasileiros de Oftalmologia (ABO). Please try your best to complete your review by 31-Oct-2025.

In your review, please answer all questions. On the review page, there is a space for "Comments to Editor" and a space for "Comments to the Author." Please be sure to put your comments to the author in the appropriate space.

To access just the manuscript for review directly with no need to enter log in details, click the link below :

https://mc04.manuscriptcentral.com/abo-scielo?URL_MASK=6c1ea2665c694cb0a9927269cdad0223.

To login to your account on Arquivos Brasileiros de Oftalmologia (ABO) - ScholarOne Manuscripts site at https://mc04.manuscriptcentral.com/abo-scielo, your case-sensitive USER ID is alekdantas@nco.med.br. For security purposes your password is not listed in this email. If you are unsure of your password you may click the link below to set a new password.

https://mc04.manuscriptcentral.com/abo-scielo?URL_MASK=8a83ec394b4d4188955bbc11d0304ba9 Please note that the single use link will expire on 13-Oct-2025 12:37:59 PM GMT / 13-Oct-2025 9:37:59 AM BRT. If the single use link has expired, you can generate a single use password by entering your email address into the Password Help function on your site log in page: https://mc04.manuscriptcentral.com/abo-scielo

Once you are logged in, the Main Menu will be displayed. Please click on the Reviewer Center, where you will find the manuscript listed under "Awaiting Reviewer Scores." You can click on the manuscript title from this point or you can click on the "View Details" button to begin reviewing the manuscript.

If you wish to view the manuscript and the review form simultaneously, click on the HTML or PDF icons – the manuscript will open in a new window. Leave the new window open, switch back to the main window, and open the score sheet by clicking on the Score Sheet tab. Follow the instructions for reviewers provided in the ScholarOne Manuscripts site. I strongly encourage you to elaborate on your review in the space provided. Your specific comments will offer valuable feedback to improve future work. It is essential that you click the "Save" button if you wish to exit the review before you submit it to the Editor. Otherwise, none of the information that you have entered will be saved in the system. When you have completed your review and are ready to submit it to the Editor, click on "Submit."

All communications regarding this manuscript are privileged. Any conflict of interest, suspicion of duplicate publication, fabrication of data or plagiarism must immediately be reported to me.

Thank you for evaluating this manuscript.

Sincerely,
Prof. Rodrigo Lira

Clarivate™

Dear Alessandra Dantas,

Thank you again for reviewing "Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting" for *Arquivos Brasileiros de Oftalmologia*. You indicated that you would like to receive recognition for your review on the Web of Science, which you can do now by claiming your review here:

Add your review to your Web of Science researcher profile

Once you've created your researcher profile your review will be verified and added to it. Your anonymity is protected by default but you may be able to reveal additional details of your review if our review policy on the Web of Science allows it.

Please contact us if you have any questions.

Thank you for submitting your review of Manuscript ID ABO-2025-0287 for Arquivos Brasileiros de Oftalmologia (ABO)

12-Oct-2025

Dear Dr. Dantas:

Thank you for reviewing manuscript # ABO-2025-0287 entitled "Performance Analysis of AI-Based Tools for Diabetic Retinopathy Detection in a Primary Care Setting" for Arquivos Brasileiros de Oftalmologia (ABO).

On behalf of the Editors of Arquivos Brasileiros de Oftalmologia (ABO), we appreciate the voluntary contribution that each reviewer gives to the Journal. We thank you for your participation in the online review process and hope that we may call upon you again to review future manuscripts.

Sincerely,
Prof. Rodrigo Lira
Associate Editor, Arquivos Brasileiros de Oftalmologia (ABO)

About

Brief History

IMPACT FACTOR

1,029

The journal *Arquivos Brasileiros de Oftalmologia* (ABO) started its activities in 1938. The founder and first editor was Dr. Waldemar Rangel Belfort Mattos. ABO has been published continuously since then. On September 29, 2000, ABO was transferred to the Brazilian Council of Ophthalmology (Conselho Brasileiro de Oftalmologia - CBO). The purpose of the journal is to disseminate original research, clinical cases of scientific interest, and continuous medical updates in ophthalmology, ocular health, prevention of blindness, and visual sciences.

Open Science Compliance

ABO follows the Open Science Diamond model (no fees for authors or readers).
ABO editorial board studies ways to implement Open Science practices and, in view of this, the corresponding author must send the Open Science Compliance Form with the submission files, as a way of understanding their position on this way of publishing. The form template can be found on the File Upload page in ScholarOne Manuscripts.

Publication Ethics

All research must be approved by the Research Ethics Committee of the institution where the research was conducted. The ethical principles must be in accordance with the legal framework of the country where the research was carried out and with the Declaration of Helsinki in its latest version.
ABO adopts the guidelines of Committee on Publication Ethics (COPE): https://publicationethics.org/.

Focus and Scope

The focus of ABO is to publish original articles and reviews that provide insights into the understanding of the physiology and issues related to vision. The scope ranges from anatomy through the molecular biology of structures related to normal vision to diseases that affect eye and visual health, from *in vitro* models to experimental, translational, and clinical studies, as well as aspects of epidemiology, prevention of blindness, signs and symptoms, complementary tests, therapeutic, pharmacological, and surgical approaches. Additionally, it covers the well-being and functional rehabilitation of new diseases or new approaches to ocular or visual system diseases.

Digital Preservation

This journal follows the standards defined in the Digital Preservation Policy of the SciELO Program.

EDITORIAL POLICY

Preprints

ABO accepts articles that are already available as *preprints*. This condition, as well as the repository, must be mentioned at the time of submission.

Peer review process

The evaluation process involves a preliminary analysis of the manuscript to ensure that the submission meets the journal's requirements. Subsequently, specialized editors evaluate whether the article meets ABO's scope and focus, and from there, anonymous volunteer reviewers are selected.

Open data

ABO offers authors the possibility to keep data open and recommends the SciELO data repository. Other repositories are equally accepted. This policy refers to "the sharing of data, codes, methods, and other materials used and resulting from research that usually underlie the texts of articles published by journals."

- TOP Guide: https://wp.scielo.org/wp-content/uploads/Guia_TOP_en.pdf
- Research data citation guide: https://wp.scielo.org/wp-content/uploads/guia-de-citacao-de-dados_pt.pdf
- List of research data repositories: https://wp.scielo.org/wp-content/uploads/Lista-de-Repositorios-Recomendados_pt.pdf

Fee Collection

ABO is a Diamond Open Access journal. It does not charge fees for submission, proofreading, editing, color figures, or publication of articles.
Financial sustainability is managed by the Brazilian Council of Ophthalmology (Conselho Brasileiro de Oftalmologia - CBO) and adheres to the SciELO Declaration on Financial Sustainability: https://mailchi.mp/scielo/declaracao-sobre-sustentabilidade

Policy on Ethics and Misconduct, Erratum, and Retraction

ABO's ethical issues shall be addressed by the editorial board, and the decisions shall be communicated to the Board of Directors. Decisions will follow SciELO's Good Practices policies:

- Good Practices Guide: https://wp.scielo.org/wp-content/uploads/Guide-to-Best-Practices-for-Strengthening-Ethics-in-Scientific-Publishing.pdf
- Guide to erratum registration and publication: https://wp.scielo.org/wp-content/uploads/guia_errata.pdf

- Guide to the registration and publication of a retraction: https://wp.scielo.org/wp-content/uploads/guia_retratacao.pdf

Conflict of Interest Policy

ABO's conflict of interest policies follow the guidelines of the International Committee of Medical Journal Editors (ICMJE). The conflict of interest may be personal, commercial, political, academic, or financial in nature. Conflicts of interest can occur when authors, reviewers, or editors have interests that may influence the preparation or evaluation of manuscripts.
When submitting the manuscript, authors are responsible for acknowledging and disclosing financial or other conflicts that may have influenced the work. If there is even a potential conflict of interest, the author(s) must inform it in a specific document signed and attached on the submission platform.
For more information see Disclosure of Financial and Nonfinancial Relationships and Activities, and Conflicts of Interest.

Adoption of similarity-checking software

ABO uses similarity and automated text generation-checking software that uses artificial intelligence. All submitted manuscripts are checked, and it is up to the editorial board to decide whether the similarity compromises scientific integrity and to notify the authors about it.
Cases of misconduct in publication will be judged according to the criteria and recommendations of the COPE (http://publicationethics.org).

Sex and Gender Issues

The ABO editorial team and the authors who publish in the journal must always follow the Sex and Gender Equity in Research (SAGER) guidelines. SAGER is a set of guidelines for reporting sex and gender information in study design, data analysis, results, and interpretation of findings.
In addition, ABO observes the policy of gender equality in the formation of its editorial board.

Ethics Committee

The authors should send a Letter of approval by the Human or Animal Research Ethics Committee of the organization where the study was conducted, or the IRB approval. Studies conducted in Brazil must provide the number of the CAAE - Certificate of Presentation for Ethical Consideration.

If the Ethics Committee approval does not apply to the study, the corresponding author should send a report stating that the evaluation of the project by the committee is not necessary.

For Eye Images, if the image includes identifiable information about a patient, the authors must obtain written informed consent from the patient or their legal guardian.

Copyright

Authors of articles published in ABO retain the copyright of their works by licensing them under the Creative Commons Attribution license, which allows articles to be reused and distributed without restriction, as long as the original work is correctly cited.

Intellectual Property and Terms of Use

Site responsibility:

There are no rights reserved by the ABO portal.

Author's responsibility:
ABO encourages authors to self-archive their accepted manuscripts by publishing them on personal blogs, institutional repositories, and scholarly social media, as well as posting them on their personal social media, provided the full citation of the version on the journal's website is included.
The license adopted by ABO (https://creativecommons.org/share-your-work/cclicenses/) is CC-BY. All journal content and articles published in ABO are licensed under the *Creative Commons Attribution* license, except where otherwise specified.

CAMPINAS CITY HALL
MUNICIPAL HEALTH SECRETARIAT

TECHNICAL CHAMBER OF SPECIALTIES

PROTOCOL FOR ACCESS AND RISK ASSESSMENT IN OPHTHALMOLOGY

Campinas
November 2011

GUIDELINES FOR SCHEDULING OPHTHALMOLOGY APPOINTMENT

1. GENERAL GUIDELINES

- Referral using the reference and follow-up referral form, completed legibly, including identification of the healthcare unit, and the signature and stamp of the requesting physician;
- Referrals of elective patients who meet the risk criteria for preventable blindness may be made by nurses;
- Properly complete the form with clinical history, visual acuity test, and diagnostic hypothesis;
- Specify the reason/justification for the referral and the risk classification;
- Instruct the patient to arrive 15 minutes before the scheduled appointment, bringing the following documents: ID, Unified Health System (SUS) card (temporary or permanent), reference and follow-up referral form, appointment slip, and any necessary exams for referral;
- For chronic patients, it is essential to bring the monitoring card (blood glucose/blood pressure) to the appointment, especially for diabetic patients;
- Whenever possible, attend the ophthalmology appointment accompanied by an adult;
    – Children and elderly patients must be accompanied by an adult, as pupil dilation with eye drops may be required (a medical certificate will be provided if necessary).

2. SPECIFIC GUIDELINES

- For cases referred to the Ophthalmology Emergency Room, prior medical evaluation is required;
- Verify with the patient whether they are already receiving care at another facility – Have they previously been seen by an ophthalmologist? Where? How long ago? If yes and follow-up is required, the patient should return to the original service;
- Prioritize scheduling of surgical cases in facilities with surgical support.

- For patients over 10 years of age seen in ophthalmology outpatient clinics in whom no conditions with risk of preventable blindness are identified, annual follow-up with an ophthalmologist is not necessary.
- In cases of decreased or altered visual acuity, the patient should undergo a new visual acuity test with correction (using eyeglasses).
- Bring to the appointment any prior ophthalmologic reports and examinations, if available.

Important notes:

⇨ If the patient wears eyeglasses, remember to measure visual acuity with the glasses, ensuring whether they are for near or distance vision;

⇨ Bring eyeglasses to the appointment, even if they are weak or damaged;

⇨ If diabetic, bring the most recent blood glucose test result;

⇨ Diabetic patients must have blood glucose levels less than or equal to 160 mg/dL for at least 4 weeks before visual acuity or refraction testing;

⇨ Bring any eye drops and medications currently in use.

Guidelines

- The organization is based on risk assessment criteria.
- **The purpose of risk classification in ophthalmology is to ensure prioritized access for cases of preventable blindness.**
- The Health Unit is responsible for optimizing the available appointment slots, that is, prioritizing cases according to the established risk criteria.
- Visual acuity testing must be performed by the Health Units prior to referral to an ophthalmologist.

RISK ASSESSMENT IN OPHTHALMOLOGY

RED – URGENCY / EMERGENCY

Referral criteria for ophthalmologic emergencies to Celso Pierro Hospital and Maternity / PUC-Campinas and to the UNICAMP Clinical Hospital:

Emergency cases shall be regulated through SAMU (Mobile Emergency Care Service).

- **Penetrating Ocular Trauma (Ocular Perforation)**
  - Clinical history of injury involving sharp objects or objects capable of causing perforation or rupture of the eyeball;
  - Eye pain;
  - Red eye;
  - Decreased vision, which may vary depending on the extent of the perforation.

  Initial Clinical Examination:
  - Check the visual acuity of the affected eye,
  - Perform inspection using a flashlight to identify the location of the lesion (cornea or sclera), and determine the presence or absence of intraocular contents in the wound (iris, choroid, vitreous), as well as any pupillary deviation.

  Referral Procedures:
  - Apply a protective eye shield without exerting pressure on the eyeball;
  - Administer systemic analgesics and antiemetics;
  - Instruct fasting in preparation for surgical repair as soon as possible.

- **Acute Glaucoma**
  - Severe eye pain;
  - Nausea and vomiting;
  - Significant decrease in visual acuity;
  - Red eyes;
  - Corneal opacity, lacking luster or with a milky appearance;
  - Mydriatic and paralytic pupil;
  - Increased tension and hardness of the eyeball are positive findings.
    - ❖ Palpate the eyeball with the tips of the index fingers, asking the patient to look downward, and repeat the same maneuver with the patient's other eyeball or with your own eyeball.

- **Retinal detachment with attached macula (diagnosed by an ophthalmologist);**

- **Endophthalmitis (diagnosed by an ophthalmologist).**

IMPORTANT – Patients who have been evaluated by an ophthalmologist and received eye drops during the consultation are at increased risk of developing an acute glaucoma attack.

Therefore, having had an ophthalmology appointment within the previous 48 hours should be considered a risk factor, not a reassuring factor.

Referral Criteria to the Ophthalmology Emergency Unit of the Ouro Verde Hospital Complex

- Ocular trauma
- Foreign body in the eye;
- Ocular burns (electric welding, chemical agents);
- Sudden loss of vision;
- Sudden visual changes;
- Acute eye pain;
- Suspected uveitis (intraocular inflammation);
- Eyelid lesions (edema, hordeolum/stye);
- Conjunctival lesions, including:
    - Conjunctivitis with more than 7 days of treatment, associated with visual loss or eye pain;
    - Edema;
    - Hemorrhages;
    - Dry eye

IMPORTANT:

- Patients with chemical ocular burns must have their eyes irrigated thoroughly with saline solution immediately in the same unit where they received initial care.

- Diplopia in adults constitutes a neurological emergency.

YELLOW – PRIORITY SCHEDULING

- **Children**

1. Newborn with: prematurity, prematurity requiring oxygen therapy, white pupil (leukocoria), strabismus, photophobia, and enlarged eyes with associated tearing;
2. Strabismus after 6 months of age;
3. Absence of strabismus, but visual acuity with glasses less than or equal to 0.5 in either eye;
4. Children aged 4 to 7 years with visual acuity less than or equal to 0.5 (20/40 on the Snellen chart) in either eye;
5. Difference of two lines in visual acuity between the eyes.

- **Diabetic Patients**

  At diagnosis, refer for a fundus examination. If no diabetic retinopathy is present, the Health Center should refer the patient annually for evaluation.

- **Glaucoma**

1. Family history of multiple cases of glaucoma (risk factors: Black race, age over 40 years, and myopia);
2. Previous diagnosis of glaucoma with loss to follow-up

- Refer preferably to the service where the patient was previously monitored.

- **Pterygium involving the pupillary area**

- **Toxoplasmosis IgM (+) with acute visual impairment and/or signs of ocular inflammation**

- **Eyelid or conjunctival tumor in fair-skinned individuals over 50 years of age**

- **Cataract**

GREEN – ROUTINE SCHEDULING

- Child with corrected visual acuity > 0.5;
- Blindness in one eye;
- Replacement of eyeglasses due to visual acuity < 0.7;
- Individuals over 40 years with difficulty reading at near distance (presbyopia), not yet using eyeglasses, and with an impact on professional activity;
- Chronic obstruction of the lacrimal ducts;
- Eyelid margin abnormalities (entropion and ectropion).

BLUE

- Consultation for replacement of eyeglasses for adults and/or children when visual acuity with glasses is equal to or greater than 0.8; not considered a priority criterion, provided none of the previous conditions are present;
- Individuals over 40 years with difficulty reading at near distance (presbyopia) for review of previous prescription.

Loss or Damage of Eyeglasses:

Adults can keep their lens prescription for up to 1 year.

Children may be keep their lens prescription for up to 6 months.

In these situations, whenever possible, request a copy of the previous prescription from the original outpatient clinic.

CAMPINAS CITY HALL

RISK ASSESSMENT FORM FOR VISUAL ACUITY TESTING

PATIENT NAME		
DATE OF BIRTH	SUS CARD	MEDICAL RECORD

Visual acuity test value (if the patient wears distance glasses, their use is mandatory during the test)

WITH CORRECTION		WITHOUT CORRECTION	
OD (Right Eye):	OE (Left Eye):	OD (Right Eye):	OE (Left Eye):

1. Does the patient have a family history of multiple cases of glaucoma or a prior diagnosis of glaucoma without follow-up?

_____ If yes – YELLOW risk ____ No

2. Is the patient **diabetic**? (If not, proceed to question 3)

_____ If yes – YELLOW risk ____ No

2.1 If diabetic, what is the value of the last blood glucose test? _____ Date of exam: _____

Note: If blood glucose is above 160 mg/dL and glycated hemoglobin (HbA1c) is above 6.5%, glycemic control is required for at least 4 weeks before scheduling refraction testing and eyeglass prescription. If the referral is for fundus examination, the patient may be referred even without glycemic control.

3. Child:

- ☐ 3.1 Newborn with prematurity, prematurity requiring oxygen therapy, white pupil (leukocoria), strabismus, photophobia, and enlarged eyes with associated tearing;
- ☐ 3.2 Strabismus up to 7 years of age;
- ☐ 3.3 Absence of strabismus, but visual acuity with glasses ≤ 0.5 in either eye;
- ☐ 3.4 Difference of two lines in visual acuity between the eyes;
- ☐ 3.5 Age 4 to 7 years with visual acuity ≤ 0.5 (20/40 on the Snellen chart) in either eye;
  If any of the conditions 3.1 to 3.5 are present → YELLOW risk
- ☐ 3.6 Child with corrected visual acuity > 0.5 → GREEN risk
- ☐ 3.7 Consultation for replacement of eyeglasses when visual acuity with glasses ≥ 0.8 → BLUE risk

- ☐ 4. Pterygium involving the pupillary area
- ☐ 5. Toxoplasmosis IgM (+) with acute visual impairment and/or signs of ocular inflammation
- ☐ 6. Eyelid or conjunctival tumor in fair-skinned individuals aged 50 years
- ☐ 7. Suspected cataract
  If any of conditions 4, 5, 6, or 7 are present → YELLOW risk

- ☐ 8. Blindness in one eye
- ☐ 9. Replacement of eyeglasses with visual acuity < 0.7
- ☐ 10. Individuals aged 40 years with difficulty reading at near distance (presbyopia), not yet using eyeglasses, and with an impact on professional activity
- ☐ 11. Chronic obstruction of the lacrimal ducts
- ☐ 12. Eyelid margin abnormalities (entropion)
  If any of the conditions 8 to 12 are present → GREEN risk

- ☐ 13. Consultation for eyeglass replacement in adults when visual acuity with glasses ≥ 0.8
- ☐ 14. Individuals aged 40 years with difficulty reading at near distance (presbyopia) for review of previous prescription
  If any of the conditions 13 and 14 are present – BLUE risk

CÂMARA TÉCNICA DE ESPECIALIDADES

PROTOCOLO DE ACESSO E AVALIAÇÃO DE RISCO EM OFTALMOLOGIA

CAMPINAS

Novembro 2011

ORIENTAÇÕES PARA AGENDAMENTO DE CONSULTA EM OFTALMOLOGIA

1. ORIENTAÇÕES GERAIS

- Encaminhamento em impresso de referência e contrarreferência, com letra legível, contendo identificação da unidade de saúde, assinatura e carimbo do médico solicitante.
- Encaminhamentos de pacientes eletivos que preencham os critérios de risco para cegueira evitável poderão ser realizados pelos enfermeiros.
- Preencher adequadamente com história clínica, teste de acuidade visual e hipótese diagnóstica.
- Especificar motivo/justificativa do encaminhamento e classificação de risco.
- Orientar para que o usuário chegue 15 minutos antes do horário agendado para consulta, levando os documentos: RG, cartão SUS (provisório ou definitivo), impresso de referência e contrarreferência, ticket de agendamento e os exames necessários para encaminhamento.
- Para os pacientes crônicos, é fundamental levar o cartão de controle (glicemia/PA) na consulta, principalmente para os pacientes diabéticos.
- Sempre que possível comparecer à consulta de oftalmologia com acompanhante adulto.
  - Crianças e idosos deverão estar obrigatoriamente com acompanhante adulto, pois as pupilas poderão ser dilatadas com colírio (será fornecido atestado se houver necessidade).

2. ORIENTAÇÕES ESPECÍFICAS

- Para os casos encaminhados ao Pronto-Atendimento Oftalmológico, é necessária avaliação médica prévia.
- Conferir com o usuário se já acompanha em outro serviço - Foi atendido com oftalmologista? Em qual local? Há quanto tempo? Se positivo e necessário seguimento, retomar acompanhamento no serviço de origem.
- Priorizar agendamento de casos cirúrgicos em serviços com retaguarda cirúrgica.

Documento revisado novembro 2011

- Para pacientes com idade acima de 10 anos atendidos nos ambulatórios de oftalmologia nos quais não sejam detectados agravos com risco para cegueira evitável não há necessidade de retorno anual com o oftalmologista.
  Em caso de diminuição/alteração da acuidade visual, o usuário deverá ser submetido a novo teste de acuidade visual com correção (usando os óculos).
- Levar na consulta os laudos e exames oftalmológicos realizados previamente, se tiver.

Alguns destaques importantes:

⇨ Se o paciente usar óculos, lembrar de medir a visão com os óculos, certificando se eles são para perto ou para longe;

⇨ Levar os óculos à consulta, mesmo que "fraco" ou quebrado;

⇨ Se for diabético, levar o último resultado de exame de glicemia;

⇨ Pacientes diabéticos devem estar com a glicemia menor ou igual a 160 mg/ml há pelo menos 4 semanas para fazer o exame de acuidade visual ou de refração;

⇨ Levar colírios e medicações em uso.

Diretrizes

- A organização é baseada em critérios de risco.
- **O objetivo da classificação de risco em oftalmologia é garantir acesso prioritário aos casos de cegueira evitável.**
- A Unidade de Saúde é responsável pela otimização das vagas disponibilizadas, isto é, a **priorização** dos casos considerando os critérios de risco.
- O teste de acuidade visual deverá ser obrigatoriamente realizado pelas Unidades de Saúde previamente ao encaminhamento ao oftalmologista.

AVALIAÇÃO DE RISCO EM OFTALMOLOGIA

VERMELHO – URGÊNCIA / EMERGÊNCIA

Critérios de encaminhamento de EMERGÊNCIAS oftalmológicas ao Hospital e Maternidade Celso Pierro/PUC Campinas e ao Hospital de Clínicas/UNICAMP:

A regulação dos casos de emergência será realizada pelo SAMU.

- **Trauma ocular penetrante (perfuração ocular)**
  - história clínica de acidente com materiais pontiagudos ou capazes de causar perfuração ou ruptura do globo ocular;
  - dor ocular;
  - olho vermelho;
  - baixa da visão, que pode variar dependendo do tamanho da extensão da perfuração.

  Exame clínico prévio:
  - verificar a acuidade visual do olho acometido,
  - realizar inspeção com uso de lanterna, podendo detectar o local da lesão (córnea ou esclera), com presença ou não de conteúdo intraocular no ferimento (íris, coróide, vítreo), desvio pupilar.

  Para encaminhamento:
  - realizar curativo sem compressão do globo ocular,
  - administrar analgésicos e antieméticos sistêmicos,
  - orientar jejum para ser submetido à cirurgia reparadora o mais breve possível.

- **Glaucoma agudo**
  - dor ocular de forte intensidade;
  - náusea e vômito;
  - baixa importante da acuidade visual;
  - olhos vermelhos;
  - córnea opaca, sem brilho ou com aspecto leitoso;
  - pupila midriática e paralítica;
  - consistência do globo ocular – tenso, endurecido é sinal positivo.
    - Palpar o globo ocular com as pontas dos dedos indicadores, pedindo para o paciente olhar para baixo e repetir a mesma manobra com o outro globo ocular do paciente ou com o seu próprio globo ocular.

- Descolamento de retina com mácula aplicada (diagnóstico do oftalmologista)

- Endoftalmites (diagnóstico do oftalmologista)

IMPORTANTE – pacientes que foram atendidos pelo oftalmologista e que utilizaram colírio durante a consulta, apresentam risco aumentado para desenvolver crise de glaucoma agudo.
Portanto, o fato do paciente ter passado em consulta oftalmológica nas 48 horas anteriores representa fator de risco e não de tranqüilidade.

Critérios para encaminhamento ao Pronto-Atendimento Oftalmológico do Complexo Hospitalar Ouro Verde

- Trauma ocular
- Corpo estranho
- Queimadura ocular (solda elétrica, produtos químicos)
- Perda súbita da visão
- Alteração súbita da visão
- Dor ocular aguda
- Suspeita de uveíte (infecção intraocular)
- Lesões da pálpebra – edema, hordéolo (terçol)
- Lesões de conjuntiva:
    - conjuntivite com mais de 7 dias de tratamento, acompanhado de perda visual ou dor ocular
    - edema
    - hemorragias
    - olho seco

IMPORTANTE:
- Pacientes com queimadura química ocular deverão ter os olhos lavados abundantemente com soro fisiológico, imediatamente, na própria Unidade do primeiro atendimento.
- Diplopias em adultos são urgências neurológicas.

AMARELO – PRIORIDADE NO AGENDAMENTO

- **Crianças**

1. Recém nascido com: prematuridade, prematuridade em oxigenoterapia, com pupila branca, estrabismo, fotofobia e olhos grandes com lacrimejamento associado
2. Estrabismo após 6 meses de idade
3. Sem estrabismo, porém com acuidade visual medida com óculos menor ou igual a 0,5 em qualquer um dos olhos
4. Crianças de 4 a 7 anos com acuidade visual menor ou igual a 0,5 (20/40 – tabela de Snellen) em qualquer um dos olhos
5. Diferença de duas linhas na acuidade visual entre os olhos

- **Diabéticos**

Ao diagnóstico, encaminhar para fundo de olho. Caso não apresente retinopatia diabética, o Centro de Saúde deverá encaminhar anualmente para avaliação.

- **Glaucoma**

1. História familiar de múltiplos casos de glaucoma (fatores de risco: raça negra, idade acima de 40 anos e miopia)
2. Diagnóstico prévio de glaucoma com perda do acompanhamento

- Encaminhar prioritariamente ao serviço onde o paciente já acompanhava.

- **Pterígio atingindo área pupilar**

- **Toxoplasmose IgM(+) com comprometimento visual agudo e/ou sinais de inflamação ocular**

- **Tumoração na pálpebra ou conjuntiva em indivíduos de pele clara acima de 50 anos de idade**

- **Catarata**

VERDE – AGENDAMENTO NA ROTINA

- Criança com acuidade visual corrigida > 0,5
- Cegueira de um dos olhos
- Troca de óculos com acuidade visual < 0,7
- Indivíduos > de 40 anos com dificuldade para ler de perto (presbiopia) ainda sem prescrição de óculos e com comprometimento da atividade profissional
- Obstrução crônica de vias lacrimais
- Alterações das margens das pálpebras (entrópio e ectrópio)

AZUL

- Consulta para troca de óculos adulto e/ou criança, se a acuidade visual medida com os óculos for igual ou superior a 0,8; não é critério de prioridade desde que não tenha nenhuma das situações anteriores
- Indivíduos > de 40 anos com dificuldade para ler de perto (presbiopia) para revisão de prescrição anterior

Quebra ou perda dos óculos:

Adultos – é possível manter a prescrição das lentes por até 01 ano

Crianças – é possível manter a prescrição das lentes por até 06 meses

Nessas situações, quando possível, solicitar cópia da receita anterior ao ambulatório de origem.

PREFEITURA MUNICIPAL DE CAMPINAS

SUS

ROTEIRO PARA AVALIAÇÃO DE RISCO NO TESTE DE ACUIDADE VISUAL

NOME DO PACIENTE

DATA DE NASCIMENTO	CARTÃO SUS	PRONTUÁRIO

Valor do teste de acuidade visual (se o paciente tiver óculos para longe é obrigatório o seu uso no teste)

COM CORREÇÃO		SEM CORREÇÃO	
O.D:	O.E:	O.D.	O.E.

1. Paciente tem história familiar de múltiplos casos de **glaucoma** ou diagnóstico prévio de glaucoma sem acompanhamento?

se a resposta for sim - risco AMARELO	não

2. Paciente é **diabético**? (paciente não tem DM, vá para questão 3)

se a resposta for sim - risco AMARELO	não

2.1 Se for diabetico, qual o valor da última glicemia?_____ data do exame: _____

Obs.: Se a glicemia estiver superior a 160 mg/ml e a hemoglobina glicada (HbA1C) acima de 6,5%, é necessário controle por pelo menos 4 semanas antes do agendamento para exame de refração e prescrição de óculos.
Se o encaminhamento for para realização do exame do fundo de olho, pode ser encaminhado mesmo sem controle da glicemia.

3. **Criança:**

3.1 Recém nascido com: prematuridade, prematuridade em oxigenoterapia, com pupila branca, estrabismo, fotofobia e olhos grandes com lacrimejamento associado.

3.2 Com estrabismo até 7 anos de idade.

3.3 Sem estrabismo, porém com acuidade visual medida com óculos menor ou igual a 0,5 em qualquer um dos olhos.

3.4 Diferença de duas linhas na acuidade visual entre os olhos.

3.5 De 4 a 7 anos de idade com acuidade visual menor ou igual a 0,5 (20/40 na tabela de Snellen) em qualquer um dos olhos.

Se apresentar qualquer uma das situações 3.1, 3.2, 3.3, 3.4, 3.5 ⇨ risco AMARELO

3.6 Criança com acuidade visual corrigida > 0,5 ⇨ risco VERDE

3.7 Consulta para troca de óculos se a acuidade visual medida com os óculos for igual ou superior a 0,8 ⇨ risco AZUL

4. Pterígio atingindo área pupilar

5. Toxoplasmose IgM(+) com comprometimento visual agudo e/ou sinais de inflamação ocular.

6. Tumoração na pálpebra ou conjuntiva em indivíduos de pele clara de 50 anos de idade.

7. Suspeita de catarata.

Se apresentar qualquer uma das situações 4, 5, 6, 7 ⇨ risco AMARELO

8. Cegueira de um dos olhos

9. Troca de óculos com acuidade visual < 0,7

10. Indivíduos > de 40 anos com dificuldade para ler de perto (presbiopia) ainda sem prescrição de óculos e com comprometimento da atividade profissional.

11. Obstrução crônica de vias lacrimais.

12. Alterações das margens das pálpebras (entrópio)

Se apresentar qualquer uma das situações 8, 9, 10, 11, 12 ⇨ risco VERDE

13. Consulta para troca de óculos em adulto se acuidade visual medida com os óculos for igual ou superior a 0,8

14. Indivíduos > de 40 anos com dificuldade para ler de perto (presbiopia) para revisão de prescrição anterior.

Se apresentar qualquer uma das situações 13 e 14 ⇨ risco AZUL

INTRODUCTION

This protocol aims to establish clear and standardized guidelines for the referral flow of patients in the field of ophthalmology within the healthcare network. Through this document, we seek to ensure that all referrals are carried out efficiently, in an organized manner, and in accordance with best clinical practices, thereby ensuring timely and high-quality care for patients requiring specialized ophthalmological services.

The implementation of this protocol is intended to improve communication among different levels of care, optimize the use of available resources, and provide a more satisfactory experience for both patients and healthcare professionals involved. The referral flow steps described herein were developed based on clinical and administrative guidelines, with the purpose of facilitating access to ophthalmology services and promoting continuity of care.

We expect this protocol to significantly contribute to improving ophthalmology services and remain open to suggestions for its continuous enhancement.

GUIDELINES FOR SCHEDULING OPHTHALMOLOGY APPOINTMENT

- When completing the referral in the reference and follow-up referral form, ensure that legible handwriting is used and that the healthcare unit identification is included, as well as the signature and stamp of the requesting physician or nurse. Also include the risk assessment form (Form FO972), and ensure that the clinical history, visual acuity test, and diagnostic hypothesis are properly documented.
- Instruct the patient to arrive 30 minutes before the scheduled appointment, bringing the necessary documents: ID, Unified Health System (SUS) card, reference and follow-up referral form, appointment confirmation, and any relevant exams related to the referral.
- For chronic patients, especially those with diabetes, it is essential that they bring their glycemic/blood pressure monitoring card and the most recent HbA1c test result to the appointment.
- Diabetic patients must be reassessed annually and present blood glucose levels less than or equal to 160 mg/dL for at least 4 weeks prior to visual acuity or refraction testing; additionally, HbA1c levels should be up to 7%. For fundus examination, blood glucose must be under stable control.
- Whenever possible, it is recommended that the patient be accompanied by an adult during the ophthalmology appointment.
- Children, elderly patients, and diabetic patients must be accompanied by an adult, as pupil dilation with eye drops may be necessary.
- Pregnant women should be scheduled according to risk classification.
- Instruct patients to bring their eyeglasses to the appointment, even if they are damaged or outdated, along with their previous prescription.
- Additionally, patients should bring any eye drops and medications currently in use.
- Cases referred to the Ophthalmology Emergency Room, according to established criteria, require prior evaluation by a physician or nurse.

GUIDELINES

- Organization follows risk assessment criteria.
- In ophthalmology, the purpose of risk classification is to ensure priority care for cases of preventable blindness.
- The Health Unit is responsible for optimizing appointment allocation and prioritizing care according to the established risk criteria.

- Before referring a patient to an ophthalmologist, it is necessary to perform a visual acuity test at the Health Units.
- For adults, the prescription for corrective lenses may be maintained for up to 2 years, provided there are no new complaints.
- For children, the prescription for corrective lenses may be maintained for up to 1 year, provided there are no new complaints.
- If a patient loses or damages their eyeglasses, it is important to request a copy of the previous prescription, issued within the last 12 months, from the healthcare facility where it was originally obtained.

RISK ASSESSMENT IN OPHTHALMOLOGY

RED – URGENCY / EMERGENCY – regulated through SAMU

PENETRATING OCULAR TRAUMA (OCULAR PERFORATION)

- History of injury involving sharp objects or objects capable of perforating the eyeball.
- Eye pain.
- Redness of the eye.
- Decreased vision, varying according to the extent of the perforation.

Initial Clinical Examination

- Assessment of visual acuity in the affected eye.
- Inspection using a flashlight to identify the location of the lesion (cornea or sclera) and to verify the presence of intraocular contents in the wound (iris, choroid, vitreous), as well as possible pupillary deviations.

Referral Procedures

- Application of a protective eye shield using a disposable cup (avoiding the use of gauze) without applying pressure to the eyeball.
- Administration of systemic analgesics and antiemetics.
- Instructions for fasting, aiming at preparing for prompt surgical repair as soon as possible.

ACUTE GLAUCOMA

Symptoms

- Severe eye pain.
- Nausea and vomiting.
- Significant decrease in visual acuity.
- Red eyes.
- Corneal opacity, lacking luster or appearing cloudy.
- Dilated pupil unresponsive to light.
- Increased tension and rigidity of the eyeball are positive indicators.

Procedure

- Palpate the eyeball with the index finger, asking the patient to look downward, repeat the same procedure on the patient's other eye or the contralateral eye, comparing the tensions.

SUDDEN DECREASE IN VISUAL ACUITY

Sudden onset of decreased visual acuity (symptoms beginning within the last 7 to 10 days).

TOXOPLASMOSIS

- Presence of toxoplasmosis with a positive IgM test, presenting with sudden visual impairment and/or signs of ocular inflammation.

IMPORTANT

Patients who have undergone an ophthalmologic appointment and received eye drops for pupil dilation are at increased risk of developing an acute glaucoma attack. Therefore, having had an ophthalmology appointment within the last 48 hours is considered a risk factor.

REFERRAL CRITERIA TO THE OPHTHALMOLOGY EMERGENCY ROOM OF THE PREFEITO EDIVALDO ORSI HOSPITAL COMPLEX

- Ocular trauma;
- Presence of a foreign body in the eye;
- Ocular burns (from welding, chemical agents, etc.);
- Sudden loss of vision;
- Sudden visual changes;
- Acute eye pain;
- Suspected uveitis (intraocular inflammation);
- Eyelid lesions, such as edema or hordeolum (stye);
- Conjunctival lesions, including:
  - o Conjunctivitis with more than 7 days of treatment, associated with visual loss or eye pain;
  - o Edema;
  - o Hemorrhages;
  - o Dry eye;
  - o Sudden/acute red eye;
  - o Newborns with enlarged eyes, tearing, opaque cornea, and white pupil.

IMPORTANT

- In cases of chemical ocular burns, it is essential to immediately irrigate the eyes thoroughly with saline solution at the initial care unit.
- Diplopia in adults represents a neurological emergency.

YELLOW – PRIORITY SCHEDULING

CHILDREN

- Premature newborn (gestational age less than 30 weeks, birth weight less than 1.5 kg, need for oxygen therapy and surfactant);
- Development of strabismus after 6 months of age;
- Absence of strabismus, but visual acuity with glasses less than or equal to 0.5 in one eye;
- Children aged 4 to 7 years with visual acuity less than or equal to 0.5 (20/40 on the Snellen chart) in one eye;
- Difference of two lines in visual acuity between the eyes;
- Diagnosis of congenital syphilis;
- Diagnosis of congenital glaucoma.

DIABETIC PATIENTS

After diagnosis, refer for a fundus examination.

In cases where the patient is already under ophthalmologic follow-up, they should be referred back to the original service.

GLAUCOMA

Family history of glaucoma in multiple cases (risk factors include Black race, age over 40 years, and myopia).

Previous diagnosis of glaucoma with loss to follow-up. Refer to the service where the patient was previously monitored.

PTERYGIUM

With extensive involvement and symptoms of reduced visual acuity.

EYELID OR CONJUNCTIVAL TUMOR

CATARACT

GREEN – ROUTINE SCHEDULING

- Child with corrected visual acuity greater than 0.5;
- Need for replacement of eyeglasses due to visual acuity less than 0.7;
- Individuals over 40 years old experiencing difficulty with near vision due to presbyopia, without eyeglass prescription, and with an impact on professional activity;
- Chronic obstruction of the lacrimal ducts;
- Presence of eyelid margin abnormalities, such as entropion and ectropion.

BLUE – ROUTINE SCHEDULING

- Appointment for replacement of eyeglasses for adults and/or children when visual acuity with glasses is equal to or greater than 0.8;
- Review of previous prescription for individuals over 40 years old experiencing difficulty with near vision due to presbyopia.

LIST OF SERVICES

MUNICIPAL MANAGEMENT

- Polyclinic 2;
- Ouro Verde Hospital Complex;
- Specialty Outpatient Clinic;
- Ophthalmology Emergency Room;
- Celso Pierro Hospital and Maternity / PUC-Campinas;
- Penido Burnier Foundation.

APRESENTAÇÃO

Este protocolo tem como objetivo estabelecer diretrizes claras e padronizadas para o fluxo de encaminhamento de pacientes na área de oftalmologia dentro da rede de saúde. Através deste documento, buscamos garantir que todos os encaminhamentos sejam realizados de maneira eficiente, organizada e em conformidade com as melhores práticas clínicas, assegurando assim um atendimento de qualidade e tempestivo para os pacientes que necessitam de cuidados oftalmológicos especializados.

A implementação deste protocolo visa melhorar a comunicação entre os diferentes níveis de atendimento, otimizar o uso dos recursos disponíveis e proporcionar uma experiência mais satisfatória tanto para os pacientes quanto para os profissionais de saúde envolvidos. As etapas do fluxo de encaminhamento aqui descritas foram desenvolvidas com base em diretrizes clínicas e administrativas, com o intuito de facilitar o acesso aos serviços oftalmológicos e promover a continuidade do cuidado.

Esperamos que este protocolo contribua significativamente para a melhoria dos serviços de oftalmologia oferecidos e estamos abertos a sugestões para o seu aprimoramento contínuo.

ORIENTAÇÕES PARA AGENDAMENTO DE CONSULTA EM OFTALMOLOGIA

- Ao preencher o encaminhamento no formulário de referência e contrarreferência, certifique-se de utilizar letra legível e incluir a identificação da unidade de saúde, além da assinatura e carimbo do médico ou enfermeiro solicitante. Adicione também o roteiro de avaliação de risco (impresso FO972), e assegure-se de incluir de forma apropriada a história clínica, o teste de acuidade visual e a hipótese diagnóstica.
- Oriente o usuário a comparecer 30 minutos antes do horário marcado para a consulta, trazendo consigo os documentos necessários: RG, cartão SUS, formulário de referência e contrarreferência, comprovante de agendamento e quaisquer exames pertinentes ao encaminhamento.
- Para pacientes crônicos, especialmente aqueles com diabetes, é essencial que tragam consigo o cartão de controle de glicemia/PA e o resultado mais recente do exame de HbA1c para a consulta.
- Pacientes diabéticos devem ser reavaliados anualmente e apresentar uma glicemia menor ou igual a 160 mg/dL por pelo menos 4 semanas antes do exame de acuidade visual ou refração; além disso, o nível de HbA1c deve ser até 7%. Para a realização do exame de fundo de olho, o controle da glicemia deve estar estável.
- Sempre que possível, é recomendado que o paciente seja acompanhado por um adulto durante a consulta oftalmológica.
- Crianças, idosos e pacientes diabéticos devem estar obrigatoriamente acompanhados por um adulto, já que pode ser necessário dilatar as pupilas com colírio.
- Gestantes devem ser agendadas de acordo com a classificação de risco.
- Oriente os pacientes a levar os óculos à consulta, mesmo que estejam danificados ou antigos, juntamente com a receita anterior.
- Além disso, é importante que os pacientes tragam consigo os colírios e medicamentos em uso.
- Casos encaminhados ao Pronto-Atendimento Oftalmológico, conforme critérios estabelecidos, necessitam de avaliação prévia por um médico ou enfermeiro.

DIRETRIZES

- A organização segue critérios de avaliação de risco.
- Na oftalmologia, o propósito da classificação de risco é assegurar prioridade de atendimento para casos de cegueira evitável.
- A Unidade de Saúde é encarregada de otimizar a distribuição de vagas e priorizar os atendimentos conforme os critérios de risco estabelecidos.

- Antes de encaminhar um paciente ao oftalmologista, é necessário realizar o teste de acuidade visual nas Unidades de Saúde.
- Para adultos, a prescrição das lentes pode ser mantida por até 2 anos, desde que não haja novas queixas.
- Para crianças, a prescrição das lentes pode ser mantida por até 1 ano, desde que não haja novas queixas.
- Se um paciente perder ou danificar seus óculos, é importante solicitar uma cópia da receita anterior, emitida nos últimos 12 meses, ao serviço de saúde onde foram obtidos originalmente.

AVALIAÇÃO DE RISCO EM OFTALMOLOGIA

VERMELHO – URGÊNCIA / EMERGÊNCIA - regulados através do SAMU

TRAUMA OCULAR PENETRANTE (PERFURAÇÃO OCULAR)

- Histórico de acidente envolvendo objetos pontiagudos ou capazes de perfurar o globo ocular.
- Dor ocular.
- Vermelhidão nos olhos.
- Diminuição da visão, variando de acordo com a extensão da perfuração.

Exame clínico inicial

- Avaliação da acuidade visual do olho afetado.
- Inspeção utilizando uma lanterna para identificar a localização da lesão (na córnea ou na esclera) e verificar a presença de conteúdo intraocular no ferimento (íris, coroide, vítreo), além de possíveis desvios pupilares.

Procedimentos para encaminhamento

- Aplicação de um curativo utilizando um copinho de café (evitando o uso de gaze) sem exercer pressão sobre o globo ocular.
- Administração de analgésicos e antieméticos por via sistêmica.
- Orientação para jejum, visando a preparação para uma cirurgia reparadora o mais rápido possível.

GLAUCOMA AGUDO

Sintomas

- Dor ocular intensa.
- Náuseas e vômitos.
- Diminuição significativa da acuidade visual.
- Olhos vermelhos.
- Opacidade da córnea, sem brilho ou com aspecto turvo.
- Pupila dilatada e sem resposta à luz.
- Tensão aumentada e rigidez do globo ocular são indicadores positivos.

Procedimento

- Palpe o globo ocular com os dedos indicadores, solicitando ao paciente que olhe para baixo, e repita o mesmo procedimento no outro olho do paciente ou no olho contralateral, comparando as tensões.

BAIXA DE ACUIDADE VISUAL SÚBITA

- Início súbito de baixa acuidade visual (sintomas que começaram há 7 a 10 dias).

TOXOPLASMOSE

- Presença de toxoplasmose com teste IgM positivo, manifestando-se com comprometimento visual repentino e/ou sinais de inflamação nos olhos.

IMPORTANTE

Pacientes que passaram por consulta oftalmológica e receberam colírio para dilatar as pupilas correm um risco elevado de desenvolver uma crise de glaucoma agudo. Portanto, o fato de ter consultado um oftalmologista nas últimas 48 horas é considerado um fator de risco.

CRITÉRIOS PARA ENCAMINHAMENTO AO PRONTO-ATENDIMENTO OFTALMOLÓGICO DO COMPLEXO HOSPITALAR PREFEITO EDIVALDO ORSI

- Trauma ocular;
- Presença de corpo estranho no olho;
- Queimadura ocular (por solda elétrica, produtos químicos, etc.);
- Perda súbita da visão;
- Alteração súbita da visão;
- Dor ocular aguda;
- Suspeita de uveíte (inflamação intraocular);
- Lesões na pálpebra, como edema ou hordéolo (terçol);
- Lesões na conjuntiva, incluindo:
  - Conjuntivite com mais de 7 dias de tratamento, acompanhada de perda visual ou dor ocular;
  - Edema;
  - Hemorragias;
  - Olho seco;
  - Olho vermelho súbito/agudo;
  - Recém-nascidos com olho grande, lacrimejante, córnea opaca e pupila branca.

IMPORTANTE

- Em casos de queimadura química ocular, é crucial lavar os olhos abundantemente com soro fisiológico imediatamente, na própria Unidade do primeiro atendimento.
- Diplopia em adultos representa uma urgência neurológica.

AMARELO – PRIORIDADE NO AGENDAMENTO

CRIANÇAS

- Recém-nascido prematuro (idade gestacional inferior a 30 semanas, peso ao nascer inferior a 1,5 kg, necessidade de oxigenoterapia e surfactante);
- Desenvolvimento de estrabismo após os 6 meses de idade;
- Ausência de estrabismo, porém acuidade visual medida com óculos inferior ou igual a 0,5 em um dos olhos;
- Crianças de 4 a 7 anos com acuidade visual inferior ou igual a 0,5 (20/40 na tabela de Snellen) em um dos olhos;
- Diferença de duas linhas na acuidade visual entre os olhos;
- Diagnóstico de sífilis congênita;
- Diagnóstico de glaucoma congênito.

DIABÉTICOS

Após o diagnóstico, encaminhar para exame de fundo de olho.

Em casos em que o paciente já está em acompanhamento oftalmológico, ele deve ser redirecionado ao serviço de origem.

GLAUCOMA

Antecedentes familiares de glaucoma em múltiplos casos (fatores de risco incluindo raça negra, idade superior a 40 anos e miopia).

Histórico prévio de diagnóstico de glaucoma com perda de seguimento. Encaminhar serviço onde o paciente estava em acompanhamento anteriormente.

PTERÍGIO

Com extensa área afetada e sintomas de acuidade visual reduzida.

TUMORAÇÃO NA PÁLPEBRA OU CONJUNTIVA

CATARATA

VERDE – AGENDAMENTO NA ROTINA

- Criança com acuidade visual corrigida superior a 0,5.
- Necessidade de troca de óculos devido à acuidade visual inferior a 0,7.
- Pessoas com mais de 40 anos que enfrentam dificuldades na leitura de perto devido à presbiopia, sem prescrição de óculos e com impacto na atividade profissional.
- Obstrução crônica das vias lacrimais.
- Presença de alterações nas margens das pálpebras, como entrópio e ectrópio.

AZUL – AGENDAMENTO NA ROTINA

- Consulta para substituição de óculos para adultos e/ou crianças, quando a acuidade visual medida com os óculos for igual ou superior a 0,8.
- Revisão da prescrição anterior para pessoas com mais de 40 anos que enfrentam dificuldades na leitura de perto devido à presbiopia.

Federal Official Gazette
No. 11,940 - Year XLVII | Wednesday, October 10, 2018 | Campinas City Hall www.campinas.sp.gov.br

DECREE No. 20,044 OF OCTOBER 9, 2018

REGULATES MUNICIPAL LAW NO. 15,528 OF DECEMBER 5, 2017, WHICH ESTABLISHES "BRILLIANT OCTOBER" MONTH, AND MUNICIPAL LAW NO. 14,668 OF AUGUST 30, 2013, WHICH ESTABLISHES THE PREVENTION AND COMBAT OF BLINDNESS FROM CATARACTS WEEK.

The Mayor of the Municipality of Campinas, in the exercise of his legal attributions, and
CONSIDERING that actions for the prevention and promotion of visual health begin at birth, with the mandatory provision of a free clinical diagnostic examination for retinopathy of prematurity in maternity wards and similar hospital facilities in the State, established by State Law No. 12,969 of April 29, 2008,
CONSIDERING that there is a protocol for access and risk assessment for the ophthalmology specialty, aiming to organize the referral process and ensure priority access for cases of preventable blindness,
CONSIDERING that visual acuity testing must be carried out by the Health Unit teams prior to referral to an ophthalmologist,
DECREES:
Article 1. Educational actions shall be carried out annually during the week of the second Thursday of October, with the objective of guiding and raising public awareness about eye health, with a focus on actions for the prevention of blindness.
Article 2. The following are considered actions for the prevention and awareness of visual health, to be developed in the Units of the Municipal Public Health System of Campinas**,** in partnership with Educational and Healthcare Institutions of the Municipality of Campinas:
I - lectures on eye health, as well as occupational risks to visual acuity, to be held in the waiting rooms of Health Units.
II - active outreach to users with Systemic Arterial Hypertension (SAH) and Diabetes Mellitus (DM) who have not previously undergone a fundus examination, conducted by the teams of the Health Centers, for retinopathy evaluation by an ophthalmologist, in accordance with the recommendations of the Non-Communicable Chronic Conditions (NCCC) Protocol - Ministry of Health, 2017.
Article 3. Educational materials shall be prepared, such as leaflets to be distributed to users and banners to be displayed in public places with high foot traffic.
Article 4. This Decree shall enter into force on the date of its publication.

Campinas, October 9, 2018.

Diário Oficial
Nº 11.940 - Ano XLVII Quarta-feira, 10 de outubro de 2018 Prefeitura Municipal de Campinas
www.campinas.sp.gov.br

DECRETO Nº 20.044 DE 09 DE OUTUBRO DE 2018

REGULAMENTA A LEI MUNICIPAL Nº 15.528, DE 05 DE DEZEMBRO DE 2017, QUE INSTITUI O MÊS OUTUBRO BRILHANTE, E A LEI MUNICIPAL Nº 14.668, DE 30 DE AGOSTO DE 2013, QUE INSTITUI A SEMANA DE PREVENÇÃO E COMBATE À CEGUEIRA POR CATARATA.

O Prefeito do Município de Campinas, no uso de suas atribuições legais, e
CONSIDERANDO que as ações de prevenção e promoção à saúde visual se inicia desde o nascimento, com a obrigatoriedade de realização de exame gratuito de diagnóstico clínico de retinopatia da prematuridade em maternidades e estabelecimentos hospitalares congêneres do Estado, instituído pela Lei Estadual nº 12.969, de 29 de abril de 2008,
CONSIDERANDO que existe protocolo de acesso e avaliação de risco para a especialidade de oftalmologia, visando organizar o processo de referenciamento e garantir acesso prioritário aos casos de cegueira evitável,
CONSIDERANDO que o teste de acuidade visual deverá ser realizado pelas equipes das Unidades de Saúde previamente ao encaminhamento ao oftalmologista,
DECRETA:
Art. 1º As ações educativas serão realizadas anualmente na semana da 2ª quinta-feira do mês de outubro, com o objetivo de orientar e conscientizar a população sobre a saúde ocular e enfoque nas ações de prevenção à cegueira.
Art. 2º São consideradas ações de prevenção e conscientização acerca da saúde visual a serem desenvolvidas nas Unidades da Rede Pública Municipal de Saúde de Campinas, em parceria com as Instituições de Ensino e Assistenciais do Município de Campinas:
I - palestras sobre saúde ocular, bem como risco ocupacional à acuidade visual, em salas de espera das Unidades de Saúde.
II - busca ativa de usuários com quadro de Hipertensão Arterial Sistêmica (HAS) e Diabetes Mellitus (DM) sem exame prévio de fundo de olho, realizada pelas equipes dos Centros de Saúde, para avaliação de retinopatia pelo médico oftalmologista, de acordo com recomendação do Protocolo de Condições Crônicas Não Transmissíveis (CCNT) - Ministério da Saúde 2017.
Art. 3º Serão elaborados materiais educativos, tais como folhetos para serem distribuídos aos usuários e banners para serem a fixados em locais públicos e de grande fluxo de pessoas.
Art. 4º Este Decreto entra em vigor na data de sua publicação.

Clinical Management and Training Regulation

Clinical Management is a set of micromanagement technologies aimed at promoting health care that is excellent and high-quality, person-centered, effective, structured, and grounded in scientific evidence; safe for both patients and professionals; efficient, timely, equitable, and humane. Its governance is based on four dimensions: clinical performance and evaluation; professional development; risk and safety; and values and patient engagement.

The possible connections between Management, Health Care, and Education (which are encompassed within Clinical Management) can be understood in light of contemporary society, and in order to address these challenges, it is important to learn and experience the coexistence of certainty and uncertainty through a critical mindset that is open to change and innovation.

In the State of Espírito Santo, these connections—Management, Health Care, and Education—have been implemented through projects and initiatives of the Capixada Institute for Education, Research, and Innovation in Health (ICEPi), an instrument for Education and Health Care, through professional residency programs and public calls for staffing and training scholarships, instruments for promoting, qualifying, and expanding Primary Healthcare and Family Health.

With the same purpose, the Training Regulation Program was more recently conceived. In this context, it is essential that the teaching and learning process incorporate training regulation and evaluation, with the objective of helping students and tutors learn, develop practical skills, and grow professionally.

Training regulation is grounded in learning processes based on cognitive, affective, and relational aspects, as well as meaningful and functional learning applied across different contexts. In response to these changes and innovations, the adoption of new Clinical Management and Training Regulation practices and concepts in the State became inevitable.

2021-X3RQ6W - E-DOCS - ORIGINAL DOCUMENT - 01/27/2021 04:17 AM - PAGE 5 / 16

Introduction

Since graduation, efforts have been made to enable non-specialist physicians to diagnose and treat certain ocular conditions, thereby preventing negative outcomes, including blindness, as well as to promote appropriate referrals to the ophthalmology specialist, a field dedicated to the study and treatment of eye diseases and refractive errors.

Currently, the demand for outpatient ophthalmology consultations has increased, resulting in long waiting lists, which require criteria for symptom classification. With the goal of improving patient care, the Ophthalmology Consultation Regulation Protocol in the State of Espírito Santo has been revised.

This is a Regulation Protocol for Referrals to the Ophthalmology Specialty, aimed at ensuring comprehensive health care for patients, as well as improving the triage of regulated demand, thereby enhancing the services provided to users.

Gestão da Clínica e Regulação Formativa

A Gestão da Clínica é um conjunto de tecnologias de micro gestão destinada a promover atenção à saúde com excelência e qualidade, centrada em pessoas, efetiva, estruturada e com base em evidências científicas, segura para as pessoas e para os profissionais, eficiente, oportuna, equitativa e humanizada. Sua Governança têm quatro dimensões: desempenho clínico e avaliação; desenvolvimento profissional; risco e segurança; e, valores e envolvimento do paciente.

As possíveis conexões entre Gestão, Atenção à Saúde e Educação (que se configuram no âmbito da Gestão da Clínica) podem ser compreendidas à luz da contemporaneidade social e, para que possamos conviver com esses desafios, é importante aprender e vivenciar a simultaneidade entre supostas certezas e incertezas, por meio de uma consciência crítica e aberta às mudanças e inovações.

No estado do Espírito Santo tais conexões/Gestão, Atenção à Saúde e Educação vêm se concretizando por meio de projetos e iniciativas do Instituto de Capixaba de Ensino, Pesquisa e Inovação em Saúde (ICEPi), um instrumento de Educação e Atenção à Saúde, mediante as Residências profissionais e Editais de provimento e Bolsas de formação instrumentos de promoção, qualificação e expansão da Atenção Primária à Saúde e da Saúde da Família.

Com a mesma finalidade, mais recentemente foi idealizado o Programa de Regulação formativa. Sobre essa, é emergente que o processo de ensino e aprendizagem dê lugar às regulação e avaliação formativas, com o objetivo de ajudar os alunos e tutores a aprenderem, aprenderem a fazer e a se desenvolver.

A Regulação formativa, está fundamentada nos processos de aprendizagem, baseadas em seus aspectos cognitivos, afetivos e relacionais e na aprendizagem significativa e funcional aplicada em diversos contextos. Atentos a essas mudanças e inovações foi inevitável a adoção de novas práticas e conceitos de Gestão da Clínica e de Regulação formativa no Estado.

Apresentação

Desde a graduação tenta-se capacitar o médico não especialista para diagnosticar e tratar algumas doenças oculares, evitando assim impactos negativos e até cegueira, bem como promover encaminhamentos qualificados ao especialista em Oftalmologia, especialidade que se dedica ao estudo e tratamento das doenças e erros de refração dos olhos.

Atualmente a demanda por consulta Ambulatorial de Oftalmologia tem aumentado, gerando longas filas de espera, e essas exigem critérios para classificação dos sintomas. Pensando no melhor atendimento aos usuários, redefiniu-se o Protocolo de Regulação de Consulta Oftalmológica no Espírito Santo.

Trata-se do Protocolo de Regulação para Encaminhamentos para a Especialidade de Oftalmologia, visando garantir a assistência integral à saúde dos pacientes, além de qualificar a triagem da demanda regulada melhorando assim o serviço ofertado ao usuário.

INSTITUTIONAL DECLARATION - PUBLIC HEALTH IMPACT

I hereby declare, for all due purposes, that Dr. Alessandra Kurahashi Dantas, ophthalmologist, serves as a medical professional within the Municipal Program for the Promotion of Eye Health and Prevention of Blindness of the Municipality of Campinas - São Paulo, established and regulated by Municipal Decree No. 20,044, of October 9, 2018.

The program constitutes a municipal public policy, implemented throughout the entire public health system of Campinas, with a focus on the prevention of avoidable blindness, through structured strategies of eye health education, early vision screening, and organization of access to specialized ophthalmological care within the Unified Health System (SUS).

In the context of pediatric public health, the program is part of a continuous care pathway that begins at birth, aimed at the early identification of ocular abnormalities and the reduction of childhood visual impairment. The actions carried out within primary care and municipal health services benefit thousands of children annually, directly or indirectly, especially those belonging to socially vulnerable populations.

Since its implementation in 2018, the program has been applied continuously and systematically, establishing itself as an institutional strategy with significant population-level impact in the prevention of blindness and the promotion of eye health in the municipality.

In 2025, Dr. Alessandra Kurahashi Dantas contributes to this program as an ophthalmologist, providing technical support to its objectives and enhancing its public health impact, with an emphasis on primary and secondary prevention, early diagnosis, and protection of visual function.

The actions related to this program are coordinated within the Municipal Health Secretariat of Campinas, with the participation of the Center for Medical Examinations and Specialties (CEEM) under my coordination.

Sincerely,

Ana Paula de Oliveira Souza

DECLARAÇÃO INSTITUCIONAL – IMPACTO EM SAÚDE PÚBLICA

Declaro, para os devidos fins, que a Dra. Alessandra Kurahashi Dantas, médica oftalmologista, atua como profissional médica nas ações do Programa Municipal de Promoção da Saúde Ocular e Prevenção da Cegueira do Município de Campinas – SP, instituído e regulamentado pelo Decreto Municipal nº 20.044, de 09 de outubro de 2018.

O programa constitui uma política pública de abrangência municipal, implementada em toda a rede pública de saúde de Campinas, com foco na prevenção da cegueira evitável, por meio de estratégias estruturadas de educação em saúde ocular, triagem visual precoce e organização do acesso ao atendimento oftalmológico especializado no Sistema Único de Saúde (SUS).

No contexto da saúde pública pediátrica, o programa integra uma linha de cuidado contínua que se inicia desde o nascimento, voltada à identificação precoce de alterações oculares e à redução da deficiência visual infantil. As ações desenvolvidas no âmbito da atenção primária e dos serviços assistenciais municipais beneficiam milhares de crianças anualmente, direta ou indiretamente, especialmente aquelas pertencentes a populações socialmente vulneráveis.

Desde sua implementação, em 2018, o programa vem sendo aplicado de forma contínua e sistemática, consolidando-se como estratégia institucional de impacto populacional relevante na prevenção da cegueira e na promoção da saúde ocular no município.

A Dra. Alessandra Kurahashi Dantas contribui no ano de 2025 para esse programa como médica oftalmologista, apoiando tecnicamente seus objetivos e reforçando seu impacto em saúde pública, com ênfase em prevenção primária e secundária, diagnóstico precoce e proteção da função visual.

As ações relacionadas a este programa são coordenadas no âmbito da Secretaria Municipal de Saúde de Campinas, com participação do Centro de Exames e Especialidades Médicas (CEEM) sob minha coordenação.

Atenciosamente.

Ana Paula de Oliveira Souza
Coordenação

Bright October: special campaign offers 3,400 slots for free ophthalmological consultations.

Tests in Campinas begin this Wednesday, October 1st, and most will be at CEEM. A public-private partnership includes the offering of 30 diagnostic tests in this specialty by a clinic.

01/10/2025 - 08:00

Patient during an ophthalmological examination at CEEM, in Campinas.

The Campinas Health Department and partner institutions will begin offering 3,434 free ophthalmological consultations this Wednesday, October 1st. This public-private initiative is part of "Brilliant October," a movement created to raise awareness about the importance of visual health care.

The selected patients were awaiting appointments through the Municipal SUS (Unified Health System), and the consultations will take place throughout the month according to each location's schedule.

(Brilliant October - number of consultations)

- Medical Examination and Specialties Center (CEEM): 1,018 (adults) and 398 (pediatrics)
- Penido Burnier Institute: 424 (adults) and 120 (pediatric)
- PUC-Campinas Hospital: 97 (adults) and 21 (pediatric)
- São Leopoldo Mandic: 720 (adults)
- Ouro Verde Hospital Complex: 398 (adults) and 50 (pediatric)
- Specialized Medical Outpatient Clinic (AME): 188 (adults)
- *Total: 2,845 (adults) and 589 (pediatric)*

The Bright October campaign was also reinforced with an offer of 30 diagnostic exams by the Holanda Ophthalmology clinic. The list is part of the ophthalmology care line and includes assessments such as retinography, pachymetry, optical coherence tomography, and campimetry.

Eyeglasses for children and adolescents

Children and adolescents who are medically indicated for eyeglasses will receive lenses and frames free of charge. They will be donated by the following private institutions: Óptica Mario Neto, Ótica & Cia, Ótica Conceição, Unik, and Zeiss Vision.

Importance of CEEM

Most consultations are concentrated at the Center for Medical Examinations and Specialties (CEEM) in the city center. The unit opened in December 2024 and marked the beginning of a new health model in the city with the sectorization of services by specialty.

CEEM has an Ophthalmology Clinic that, since April, has been operating even on Saturday mornings , which has facilitated access, especially for those who work on weekdays during business hours. Patients of the Municipal SUS (Unified Health System) are treated at the unit through referrals from health centers (CSs) via the Centralized Bed Allocation System.

History of the campaign

: The "Brilliant October" campaign was established by the City Hall in 2017. At that time, the law establishing the Week for the Prevention and Combat of Blindness was also regulated, defining that educational actions on the subject should be carried out annually in October to guide the population on eye health, focusing on the prevention of blindness.

Paciente durante exame oftalmológico no CEEM, em Campinas

A Secretaria de Saúde de Campinas e instituições parceiras iniciam nesta quarta-feira, 1º de outubro, a realização de 3.434 consultas oftalmológicas gratuitas. A ação público-privada faz parte do Outubro Brilhante, movimento criado para conscientizar sobre a importância dos cuidados com a saúde visual.

Os pacientes selecionados aguardavam consultas pelo SUS Municipal e os atendimentos ocorrem ao longo do mês, conforme calendário de cada local.

Outubro Brilhante - número de consultas

- Centro de Exames e Especialidades Médicas (CEEM): 1.018 (adultos) e 398 (pediátrica)
- Instituto Penido Burnier: 424 (adultos) e 120 (pediátrica)
- Hospital PUC-Campinas: 97 (adultos) e 21 (pediátrica)
- São Leopoldo Mandic: 720 (adultos)
- Complexo Hospitalar Ouro Verde: 398 (adultos) e 50 (pediátrica)
- Ambulatório Médico de Especialidades (AME): 188 (adultos)
- *Total: 2.845 (adultos) e 589 (pediátrica)*

O Outubro Brilhante também foi reforçado com uma oferta de 30 exames de diagnóstico pela clínica Holanda Oftalmologia. A lista integra a linha de cuidado em oftalmologia e inclui avaliações como retinografia, paquimetria, tomografia de coerência óptica e campimetria.

Óculos para crianças e adolescentes

As crianças e adolescentes atendidos, que tiverem indicação médica para uso de óculos, receberão gratuitamente as lentes e armações. Elas serão doadas pelas seguintes instituições privadas: Óptica Mario Neto, Ótica & Cia, Ótica Conceição, Unik e Zeiss Vision.

Importância do CEEM

A maioria das consultas está concentrada no Centro de Exames e Especialidades Médicas (CEEM), no Centro. A unidade foi aberta em dezembro de 2024 e marcou o início de um novo modelo de saúde na cidade com a setorização dos atendimentos em especialidades.

O CEEM tem um Ambulatório de Oftalmologia que desde abril funciona inclusive aos sábados pela manhã, o que facilitou o acesso sobretudo para quem trabalha em dias úteis no horário comercial. Os pacientes do SUS Municipal são atendidos na unidade mediante encaminhamento dos centros de saúde (CSs) por meio da Central de

Regulação de Vagas.

Histórico da campanha

O Outubro Brilhante foi instituído pela Prefeitura em 2017. À época também foi regulamentada a lei que institui a Semana de Prevenção e Combate à Cegueira, que definiu que ações educativas sobre o tema devem ser feitas anualmente em outubro para orientar a população sobre a saúde ocular, com enfoque na prevenção à cegueira.

Campinas eliminates backlog of ophthalmology appointments, says Health Department.

Reorganization of the care pathway expanded the availability of appointments and improved access for patients.

By Editorial Staff — October 6, 2025 in Health and Wellness Reading time: 3 minutes

THE THE

Most of the job openings for the Bright October program are concentrated at CEEM. Photo: Rogério Capela/PMC

The average monthly number of consultations reached 3,000 throughout 2025, a 50% increase compared to the previous year. In September 2024, the Municipal SUS (Unified Health System) had an accumulated demand of 14,537 patients.

2024

- **Average number of available appointment slots (adults + children) – 2,000**
- **Demand in September: 14,537 patients**

2025

- **Average number of available appointment slots (adults + children) – 3,000**
- **Demand in September: 2,461 patients**

What has changed?

The reorganization of the ophthalmological care pathway in Campinas occurred after measures were planned and executed in an integrated manner between the municipal administration and health services.

Among the main changes made is the revision of the work processes of the units involved in providing services in this specialty.

Furthermore, the creation of the Regulatory Directorate by the Health Secretariat in 2023 has allowed for a gradual improvement in waiting lists, including a reduction in the loss of available appointments, as well as greater efficiency in scheduling and managing care.

> **“This reorganization reaffirms the municipality's commitment to the health of the population and to building a more efficient, humane healthcare network focused on the needs of its users,” explained the coordinator of Secondary Care, Sara Sgobin.**

Bright October

Another initiative by the Municipality in the field of ophthalmology is the Bright October campaign, which began on Wednesday, October 1st , to raise awareness about the importance of visual health care. By the end of this month, 3,434 patient appointments will have been carried out in health services and partner institutions.

Most consultations are concentrated at CEEM. The unit opened in December 2024 and marked the beginning of a new healthcare model in the city with the sectorization of care by specialty.

CEEM **has an Ophthalmology Clinic that, since April, has been operating even on Saturday** mornings , which has facilitated access, especially for those who work on weekdays during business hours. Patients from the Municipal SUS (Unified Health System) are seen at the unit through referrals from health centers (CSs) via the Centralized Bed Allocation System.

The campaign was established by the Administration in 2017. At that time, the law establishing the Week for the Prevention and Combat of Blindness was also regulated, defining that educational actions on the subject should be carried out annually in October to guide the population on eye health, focusing on the prevention of blindness.

- São Leopoldo Mandic: 720 (adults)
- Ouro Verde Hospital Complex: 398 (adults) and 50 (pediatric)
- Specialized Medical Outpatient Clinic (AME) : 188 (adults)
- Total : 2,845 (adults) and 589 (pediatric)

Glasses and reinforcement

Children and teenagers who are medically prescribed eyeglasses will receive lenses and frames free of charge. These will be donated by the following private institutions: Óptica Mario Neto, Ótica & Cia, Ótica Conceição, Unik, and Zeiss Vision.

The Bright October campaign was also reinforced with an offer of 30 diagnostic exams by the Holanda Ophthalmology clinic. The list is part of the ophthalmology care pathway and includes assessments such as retinography, pachymetry, optical coherence tomography, and campimetry.

ÚLTIMAS CIDADE E REGIÃO COLUNISTAS ARTE E LAZER OPINIÃO ESPORTES
EDUCAÇÃO E CIDADANIA SAÚDE E BEM-ESTAR BRASIL E MUNDO ECONOMIA E NEGÓCIOS

A média mensal de consultas chegou a 3 mil ao longo de 2025, aumento de 50% no comparativo com o ano passado. Em setembro de 2024, o SUS Municipal tinha demanda acumulada de 14.537 pacientes.

2024

- **Média de vagas de consultas (adultos + crianças) – 2 mil**
- **Demanda em setembro: 14.537pacientes**

2025

- **Média de vagas de consultas (adultos + crianças) – 3 mil**
- **Demanda em setembro: 2.461 pacientes**

O que mudou?

A reorganização da linha de cuidado oftalmológico em Campinas ocorreu após medidas planejadas e executadas de forma integrada entre a gestão municipal e serviços de saúde.

Entre as principais mudanças feitas está a revisão dos processos de trabalho das unidades envolvidas na oferta de atendimentos nesta especialidade.

Além disso, a criação da Diretoria de Regulação pela Secretaria de Saúde em 2023 permitiu, de forma gradativa, qualificação das filas, incluindo a redução da perda de consultas disponíveis, além de maior eficiência nos agendamentos e condução dos atendimentos.

> **“Essa reorganização reafirma o compromisso do município com a saúde da população e com a construção de uma rede assistencial mais eficiente, humanizada e centrada nas necessidades dos usuários”, explicou a coordenadora da Atenção Secundária, Sara Sgobin.**

Outubro Brilhante

Outra iniciativa do Município na área de oftalmologia é o Outubro Brilhante, campanha iniciada na quarta-feira, 1º, para conscientizar sobre a importância dos cuidados com a saúde visual. Até o fim deste mês serão realizados 3.434 atendimentos a pacientes em serviços da Saúde e de instituições parceiras.

A maioria das consultas está concentrada no CEEM. A unidade foi aberta em dezembro de 2024 e marcou o início de um novo modelo de saúde na cidade com a setorização dos atendimentos em especialidades.

O **CEEM tem um Ambulatório de Oftalmologia que desde abril funciona inclusive aos sábados** pela manhã, o que facilitou o acesso sobretudo para quem trabalha em dias úteis durante o horário comercial. Os pacientes do SUS Municipal são atendidos na unidade mediante encaminhamento dos centros de saúde (CSs) por meio da Central de Regulação de Vagas.

A campanha foi instituída pela Administração em 2017. À época também foi regulamentada a lei que institui a Semana de Prevenção e Combate à Cegueira, que definiu que ações educativas sobre o tema devem ser feitas anualmente em outubro para orientar a população sobre a saúde ocular, com enfoque na prevenção à cegueira.

- Hospital PUC-Campinas: 97 (adultos) e 21 (pediátrica)
- São Leopoldo Mandic: 720 (adultos)
- Complexo Hospitalar Ouro Verde: 398 (adultos) e 50 (pediátrica)
- Ambulatório Médico de Especialidades (AME): 188 (adultos)
- Total: 2.845 (adultos) e 589 (pediátrica)

Óculos e reforço

As crianças e adolescentes atendidos, que tiverem indicação médica para uso de óculos, receberão gratuitamente as lentes e armações. Elas serão doadas pelas seguintes instituições privadas: Óptica Mario Neto, Ótica & Cia, Ótica Conceição, Unik e Zeiss Vision.

O Outubro Brilhante também foi reforçado com uma oferta de 30 exames de diagnóstico pela clínica Holanda Oftalmologia. A lista integra a linha de cuidado em oftalmologia e inclui avaliações como retinografia, paquimetria, tomografia de coerência óptica e campimetria.

Article | About the authors | Statistics | Comments | Related content

ABSTRACT

Purpose: To analyze the effects of 100 mg of sildenafil citrate (Viagra®) on the retrobulbar circulation and visual field. Methods: A double masked, placebo controlled study was conducted in 10 males with a mean age of 27.7 + 5.68 years. The right eye of each volunteer underwent orbital color Doppler imaging and automated perimetry (Humphrey, program 30-2, Full-Threshold Strategy) at 3 occasions: baseline, 1 hour after placebo and 1 hour after 100 mg of sildenafil. The foveal threshold and the mean deviation (MD) were analyzed by automated perimetry on the three occasions. Color Doppler imaging allowed the measurement of the peak systolic velocity (PSV), end diastolic velocity (EDV) and Pourcelot index (PI) in the central retinal artery and ophthalmic artery. Results: The foveal threshold and the mean deviation did not show a significant change following the administration of sildenafil. The ophthalmic artery peak systolic velocity and end diastolic velocity significantly increased after the administration of sildenafil ($p<0.001$). The hemodynamic parameters in the central retinal artery and the ophthalmic artery PI did not significantly change. Conclusions: Sildefanil citrate increased the blood flow velocities in the ophthalmic artery in normal subjects, with no significant changes in the foveal threshold and mean deviation in the automated perimetry.

Keywords: Retinal artery; Visual fields; Piperazines; Blood flow velocity; Color ultrasonography Doppler; Fovea centralis; Single dose; Double-blind method

RESUMO

Objetivo: Estudar os efeitos na circulação retrobulbar e no campo visual de uma dose oral única de 100 mg de citrato de sildenafil (Viagra®). Métodos: Um estudo duplo-mascarado e controlado por placebo foi realizado em 10 voluntários do sexo masculino, com idade média de 27,7 + 5,68 anos. O olho direito de cada voluntário foi submetido aos exames de Doppler colorido de órbita e análise de campo visual por meio de perimetria computadorizada (Humphrey, programa 30-2, estratégia "Full Threshold") em 3 ocasiões: "baseline", 1 hora após placebo e 1 hora após 100 mg de sildenafil via oral. No campo visual, analisaram-se o limiar foveal e o "mean deviation" (MD) nas 3 ocasiões. No Doppler colorido, medimos a velocidade sistólica máxima (VSM), a velocidade diastólica final (VDF) e o índice de resistência (IR) da artéria central da retina (ACR) e da artéria oftálmica (AO) nas 3 ocasiões. Resultados: A administração do sildenafil não alterou significativamente o limiar foveal e o "mean deviation" em relação ao "baseline" e ao placebo. Houve um aumento significativo da velocidade sistólica máxima e velocidade diastólica final na artéria oftálmica após a administração do citrato de sildenafil ($p<0,001$). Não houve alteração significativa dos parâmetros hemodinâmicos na artéria central da retina e no índice de resistência da artéria oftálmica. Conclusões: A administração de 100 mg de citrato de sildenafil promoveu um aumento da velocidade de fluxo sanguíneo na artéria oftálmica de indivíduos normais e não promoveu alteração significativa no limiar foveal e "mean deviation" da campimetria computadorizada.

Descritores: Artéria retiniana; Campos visuais; Piperazinas; Velocidade do fluxo sanguíneo; Ultra-sonografia Doppler em cores; Fóvea central; Dose única; Método duplo-cego

Instructions to Authors

Accepted Document Types

Authors' Contributions

Manuscript Preparation

Article Submission Format

Digital Assets

Citations and References

Supplementary Documents

Funding Statement

Contact

Only articles sent in English will be reviewed. Manuscripts are categorized into the following types based on the methodology used:

Clinical studies

Descriptive or analytical studies involving humans or evaluating the literature relevant to humans.

Epidemiological studies

Analytical studies involving results from human populations.

Laboratory experimental studies

Descriptive or analytical studies involving animal models or other biological, physical, or chemical techniques.

Theoretical studies

Descriptive studies involving the description and theoretical analysis of new hypotheses based on the knowledge available in the literature. Theoretical results must add new information to the literature.

Accepted Document Types

Manuscripts submitted to ABO should fit into one of the aforementioned categories according to their format. The maximum number of words, figures, tables and references for each type of manuscript are provided in parentheses at the end of the

description for each type. The word count of the manuscript includes the text from the beginning of the introduction up to the end of the discussion. Therefore, the following items are not included in the word count: title page, abstract, references, acknowledgments, tables, figures, and legends.

Editorials

Editorials are contributed by invitation and should be related to topics of current interest, preferentially related to articles published in the same issue of ABO (title, maximum of 1,000 words, 2 figures or tables, and 10 references).

Original Articles

Original Articles present complete experiments with results that have never been published before (title, structured abstract, maximum of 3,000 words, 8 figures or tables, and 30 references). The evaluation of the manuscripts is based on the following priorities:

1. New and relevant information based on a study that uses appropriate methodology.
2. Repetition of information available in the literature, not previously confirmed locally, based on a study that uses appropriate methodology.
3. Repetition of information available in the literature and previously confirmed locally, based on a study that uses appropriate methodology.

* Manuscripts that contain speculative conclusions unsubstantiated by the results or are based on a study with inappropriate methodology will not be accepted.

Letters to the Editor

Letters to the editor are considered for publication if they contain comments related to manuscripts previously published in ABO or, exceptionally, the results of original studies with content insufficient to be submitted as original article. These letters should present new information or a new interpretation of existing information. When the content of a letter refers to an article previously published in ABO, such an article should be mentioned in the first paragraph of the letter and included in its reference list. In these cases, letters will be linked to the article, and the authors of the article will have their right of reply guaranteed in the same issue. Congratulation letters will not be published (title, maximum of 700 words, 2 figures or tables, and 5 references).

Review Articles

Review articles should follow the editorial guidelines and are accepted by invitation only by the editor. Suggestions of topics for review articles should be sent directly to the editor. However, manuscripts cannot be submitted without an invitation (title, unstructured abstract, maximum of 4,000 words, 8 figures or tables, and 100 references).

Eye Images

These include typical images in ophthalmology demonstrating clinical signs, surgeries, microscopy, ultrasonography, optical coherence computed tomography, magnetic resonance imaging, followed by an explanatory text (maximum of 150 words and 5 references).

The image can be either a single picture or a composite figure of up to 4 related images. Images should be of high quality, with good resolution and clarity. If the image includes identifiable information about a patient, authors must obtain written informed consent from the patient or their legal guardian.

Authors' Contributions

The Author Contributions Form (https://aboonline.org.br/export/Author-Contributions-Form.docx) shall be inserted in the text, indicating full name of each author in all items that they contributed, using the template below and inserting it filled out at the end of the manuscript before the References (only one filled form for all authors. It is not necessary to insert one for each author).

AUTHOR CONTRIBUTIONS:

Significant contribution to conception and design:

Data Acquisition:
Data Analysis and Interpretation:
Manuscript Drafting:
Significant intellectual content revision of the manuscript:
Have given final approval of the submitted manuscript (mandatory participation for all authors):
Statistical analysis:
Obtaining funding:
Supervision of administrative, technical, or material support:
Research group leadership:

Manuscript Preparation

Manuscripts should only be submitted online using the appropriate interface of ABO (http://www.scielo.br/scielo.php?script=sci_serial&pid=0004-2749&lng=en&nrm=iso). The following guidelines were based on the format suggested by the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/) and published as Uniform Requirements for Manuscripts Submitted to Biomedical Journals. (https://www.icmje.org/icmje-recommendations.pdf)

Only the manuscripts complying with these guidelines will be considered for review.

All authors are required to link their ORCID (https://orcid.org/) (Open Researcher and Contributor ID) record to their ScholarOne (https://mc04.manuscriptcentral.com/abo-scielo) account (how to associate your ORCID (https://youtu.be/yCr1VIskmoA)).

The text should be sent as a digital file. Only .doc or .docx files are accepted. The text should be typed double-spaced, in 12-point font. The pages should be numbered in Arabic numerals, and each section should start on a new page.

The manuscript should be structured as follows: Title page, Abstract and Keywords, Introduction, Methods, Results, Discussion, Acknowledgments (if any), Author Contributions (https://aboonline.org.br/export/Author-Contributions-Form.docx) Form and References.

Article Submission Format

1. Title Page. This page should contain the following: **a)** title (no more than 135 characters with spaces); **b)** running title to be used as a page heading (no more than 60 characters with spaces); **c)** authors' names as they should appear in print; **d)** each author's affiliation* (city, state, country and, if applicable, department, school, and university); **e)** corresponding author's name, address, phone number, and e-mail; **f)** sources of financial support (if any); **g)** project number and institution responsible for the ethical approval, or the Research Ethics Committee; **h)** statement of conflicts of interests of all authors; and I) clinical trial registration number on a public trial registry.
* Professional or academic degrees and job position will not be published.

2. Approval of the Institutional Review Board. On the title page, all retrospective, cross-sectional, or prospective studies involving primary data collection or clinical and surgical reports should include the project number and name of the institutional IRB that approved the study. Studies involving humans should be compliant with the Declaration of Helsinki (https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/), whereas studies involving animals should be in accordance with the principles suggested by the Association for Research in Vision and Ophthalmology (https://www.arvo.org/About/policies/arvo-statement-for-the-use-of-animals-in-ophthalmic-and-vision-research/).

3. Statement of conflicts of interest. The title page should contain the statement of conflicts of interest of all authors (even if there is no conflict of interest). For more information about potential conflicts of interest, refer to the World Association of Medical Editors: Conflict of interest in peer-reviewed medical journals (http://www.wame.org/about/wame-editorial-on-coi).

4. Clinical Trials. All clinical trials shall include on the title page the registration number from an international registry that allows free access to trial information (e.g., U.S. National Institutes of Health (https://www.clinicaltrials.gov/), Australian and New Zealand Clinical Trials Registry (http://www.anzctr.org.au/), International Standard Randomised Controlled Trial Number –ISRCTN (http://isrctn.org/), University Hospital Medical Information Network Clinical Trials Registry –UMIN CTR (https://www.umin.ac.jp/ctr/index.htm), Netherlands Trial Register (https://onderzoekmetmensen.nl/en), and Registro Brasileiro de Ensaios Clínicos (http://www.ensaiosclinicos.gov.br/) – ReBEC).

5. Abstract and Keywords. Structured abstracts (Objective, Methods, Results, and Conclusions) should have no more than 300 words, whereas unstructured abstracts should have no more than 150 words. After the abstract, five keywords in English listed by the National Library of Medicine (MeSH - Medical Subject Headings (http://www.ncbi.nlm.nih.gov/sites/entrez?db=mesh&term=)) are provided.

6. Introduction, Methods, Results, and Discussion. In the text, citations should be presented as superscript Arabic numerals in parentheses (Vancouver Style). The names of the authors should not be mentioned in the text.

7. Acknowledgments. This section should include the collaboration of people, groups, or institutions that deserve to be acknowledged but do not meet the criteria for authorship. Statisticians and medical editors may meet the criteria for authorship and thus should be acknowledged as authors. When they do not meet the criteria for authorship, they should be mentioned in this section. Writers who are not identified in the manuscript cannot be accepted as authors; therefore, professional writers should be mentioned in this section.

8. Author Contributions. In this section, the authors must provide the contribution of each author to the manuscript. Use initials to refer for each author name to: conceptualization of the manuscript and development of the methodology, data collection and curation, data analysis, data interpretation, funding acquisition and resources and project administration, supervision, writing the original draft of the manuscript, and writing–review and editing. All authors read and agreed to the published version of the manuscript.

9. References. Citations (references) of authors in the text should be in Vancouver Style, numbered sequentially as they are cited and identified using superscript Arabic numerals. References should be in accordance with the format suggested by the International Committee of Medical Journal Editors (ICMJE) (https://www.nlm.nih.gov/bsd/uniform_requirements.html).

10. Abbreviations and Acronyms. Abbreviations and acronyms should be preceded by the spelled-out abbreviation on the first mention in the text and in the legends of tables and figures (even if they have been previously mentioned in the text). Titles and abstracts should not contain abbreviations and acronyms.

11. Units of Measurement: Values of physical quantities should be used in accordance with the standards of the International System of Units.

12. Language. Texts should be clear to be considered appropriate for publication in a scientific journal. Use short sentences, written in a direct and active voice. Foreign words should be in italics. Therapeutic agents should be mentioned by their generic names with the following information in parentheses: trade name, manufacturer's name, city, state, and country of origin. All instruments or apparatus should be mentioned including their trade name, manufacturer's name, city, state, and country of origin. The superscript symbol of trademark ® or ™ should be used in all names of instruments or trade names of drugs. Whenever there are doubts about the style, terminology, units of measurement, and related issues, refer to the AMA Manual of Style 10th edition (http://www.amamanualofstyle.com/).

13. Original Documents. Corresponding authors should keep the original documents and the letter of approval from the Research Ethics Committee for studies involving humans or animals, consent form signed by all patients, statement of agreement with the full content of the study signed by all authors, statement of conflict of interest of all authors, and records of the data collected for the study results.

14. Corrections and Retractions. Errors may be noted in published manuscripts that require the publication of a correction. However, some errors pointed out by any reader may invalidate the results or the authorship of a manuscript. If substantial doubt arises about the honesty or integrity of a submitted manuscript, it is the editor's responsibility to exclude the possibility of fraud. In these situations, the editor will inform the institutions involved and the funding agencies about the suspicion and wait for their final decision. If there is confirmation of a fraudulent publication in ABO, the editor will act in compliance with the protocols suggested by the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/recommendations/browse/publishing-and-editorial-issues/scientific-misconduct-expressions-of-concern-and-retraction.html) and by the Committee on Publication Ethics (COPE) (http://publicationethics.org/resources/flowcharts).

Checklist

Before submitting the manuscript, authors should ensure that all the following items are adhered to:

- The manuscript is prepared in accordance with the instructions to authors.
- The maximum number of words, tables, figures, and references is followed according to the manuscript type.
- Title page containing the clinical trial registration number is not included in the main document.
- No figures and tables are embedded in the main text of the manuscript.
- All figures and tables were uploaded separately as supplementary documents.
- The Author Contribution Statement is completed and inserted at the end of the manuscript before the References.
- The Disclosure of Potential Conflicts of Interest forms of all authors must be completed and saved as digital files to be sent as supplementary documents.
- The digital version of the report provided by the Institutional Review Board containing the approval of the project should be sent as a supplementary document.

Digital Assets

Tables and Figures should be sent as supplementary documents, separately from the main file. They must be mentioned in the text.

Tables

Tables should be numbered sequentially using Arabic numerals in the order they are mentioned in the text. All tables should have a title and a heading for all columns. Their format should be simple, with no vertical lines or color in the background. All abbreviations (even if previously defined in the text) and statistical tests should be explained below the table. When the table is extracted from another study, provide the bibliographical source of the table. Do not include tables in the main document of the manuscript; they should be uploaded as supplementary documents in DOC or DOCX format.

Figures (graphs, photos, illustrations, and charts)

Figures should be numbered sequentially using Arabic numerals in the order they are mentioned in the text. The figures will be published by ABO at no cost to the authors.
Graphs should be in shades of gray on a white background and without three-dimensional or depth effects. Instead of using pie charts, data should be included in tables or described in the text.
Photos and illustrations should have a minimum resolution of 300 DPI for the size of the publication (about 2,500 x 3,300 pixels for a full page). Image quality is considered in the evaluation of the manuscript.
The main document should contain all figure legends, typed double-spaced and numbered using Arabic numerals.
Do not embed figures in the main text. They should be uploaded as supplementary documents in JPG or TIF format.

Citations and References

Citations (references) of authors in the text should be numbered sequentially as they are cited and identified using superscript Arabic numerals (Vancouver Style). References should be in accordance with the format suggested by the International Committee of Medical Journal Editors (ICMJE) (http://www.nlm.nih.gov/bsd/uniform_requirements.html), based on the examples below.
The titles of the journals should be abbreviated according to the style provided by the National Library of Medicine.

The names of all authors should be cited for references with up to six authors. For studies with seven or more authors, cite only the first six authors followed by *et al*.

Supplementary Documents

As a supplementary document, the corresponding author should send the IRB approval or its report stating that the evaluation of the project by the committee is not necessary. The author cannot decide on the need for evaluation by the Research Ethics

Committee.

Letter of approval by the Human or Animal Research Ethics Committee of the organization where the study was conducted. Studies conducted in Brazil must provide the number of the CAAE - Certificate of Presentation for Ethical Consideration (https://plataformabrasil.saude.gov.br/login.jsf (https://plataformabrasil.saude.gov.br/login.jsf)).

For Eye Images, if the image includes identifiable information about a patient, the authors must obtain written informed consent from the patient or their legal guardian.

All authors should send the International Committee of Medical Journal Editors: Form for Disclosure of Potential Conflicts of Interest (http://www.icmje.org/coi_disclosure.pdf) as supplementary documents (one filled form for each author).

All authors should send the Open Science Compliance Form (https://aboonline.org.br/export/ABO-Open-Science-Compliance-Form.docx) as a mandatory document, attached in the “Open Science Compliance Form” field.

Funding Statement

Studies that obtained financial support must indicate the name of the institution and the process number on the Title Page, in addition to indicating, on the Author Contributions form (https://aboonline.org.br/export/Author-Contributions-Form.docx), the author(s) responsible for obtaining this support.

Guidelines for submitting Free Themes and Case Reports

General Rules for Submitting Free Themes and Case Reports

→ Abstracts must be original and unpublished in an indexed journal by the date of submission to the conference.

→ The lead author must be properly registered for the conference.

→ The CBO only accepts digital submissions. Abstracts should not be sent by mail. The deadline for submission is **April 10, 2026** at **5:00 PM** and can be modified until **April 12, 2026.** Abstracts that are in draft form cannot be finalized after April 10, 2026.

→ No later shipments will be accepted, without exception for any order.

→ Each participant may be the first author of only one abstract.

→ There is no limit to how many times a participant appears as a co-author in abstracts.

→ Do not submit an abstract if you do not intend to attend the conference; your registration cannot be cancelled.

→ The abstracts submitted must contain, if accepted, the same content as what will be presented at the conference.

→ CBO reserves the right to reject abstracts as determined by the reviewers.

→ Literature review papers will not be accepted.

→ Abstracts that do not meet the formatting guidelines and character limit will be summarily eliminated. Abstracts for scientific papers must contain: Objective, Method, Results, and Conclusion. Papers whose results are not yet complete will not be reviewed.

→ Case reports should be submitted as a PDF file, already in the final format for poster presentation. They should include: Objective, Case Report, and Conclusion, as well as images. **Do not include author information: names of authors and co-authors and institutions linked to the case** . **Click here to download the template.** (https://sfo3.digitaloceanspaces.com/iweventos/imagens/cbo/2026-04/CBO26-PPT-RELATOCASO-MODELO_v2.pptx)

→ It is mandatory to upload at least one attachment: exclusively an image for case reports and an image or table for scientific papers. Submitting a file that is not relevant to the abstract or is of low quality may result in the immediate rejection of the abstract.

→ The character limit is automatically calculated by the system, and the author is notified when it is exceeded (Title: 120 characters – Content: 2100 characters*). Abstracts must be submitted exclusively in Portuguese. Abstracts submitted in other languages will be disregarded for evaluation and excluded from the congress. Abstracts that are approved must be submitted exclusively in Portuguese.

→ The evaluation process is confidential, and the evaluators sign a confidentiality agreement, prohibiting them from discussing it outside the evaluation committee.

→ Authors who are unable to attend must request in writing to the CBO (Brazilian Council of Ophthalmology) by April 30th to withdraw their registration. Abstracts where the first author is not present for presentation (both oral and poster), and whose absence has not been justified, will be considered a serious offense, and the institution where the research was conducted will be officially warned by the CBO. Authors who do not attend the full time and period designated for the "Meet with the Author" during the congress will not receive a certificate of presentation.

→ Works not presented on the selected day will under no circumstances be rescheduled for other days.

→ The Authors agree to strictly adhere to the schedule for the exhibition and/or presentation of their work as notified in the approval letter sent by email.

→ Commercial interests must be explicitly stated and declared by all authors and co-authors.

→ ATTENTION: The list of authors will be published according to the registration on the website. Under no circumstances will corrections or substitutions be made to the authors' names after confirmation of abstract registration.

NOTE: * All characters used in the names of authors and co-authors, primary and secondary institutions, and the content of the abstract itself are considered, including spaces (an invisible character represented by a single empty space). Characters used in the TITLE of the work are excluded from the count.

Please note that the abstracts submitted must contain, if accepted, the same content as what will be presented at the congress, and the names of the authors and institutions will not be corrected later. Names spelled incompletely (by abbreviation or omission of one or more surnames) will not be changed and will appear in the official program and digital certificate as informed by the main author at the time of registration.

Submissions must be written exclusively in Portuguese, the national language. Works written in languages other than the official language will not be accepted. (Internal Regulations of the Brazilian Classification of Occupations, Chapter 7, Article 85, Sole Paragraph.)

Guidelines for submitting Case Reports and Case Series (Posters)

→ Case reports and case series may include a maximum of one author and two co-authors.

→ Case reports will only be accepted in poster format and must be submitted for evaluation as a single file, a single-slide PDF file in portrait format (90x120), in its final form which, if accepted, will be displayed during the Congress. **The file under evaluation must not include authorship data (authors and co-authors) or institutions linked to the case** . **Click here to download the template .** (https://sfo3.digitaloceanspaces.com/iweventos/imagens/cbo/2026-04/CBO26-PPT-RELATOCASO-MODELO_v2.pptx)

→ The inclusion of data that allows for the identification of the patient (full-face photos without proper processing; patient initials in the abstract or patient name and registration number in the images) will result in the summary rejection

of the Case Report.

→ The authors of the case reports do not need to be present for the presentation.

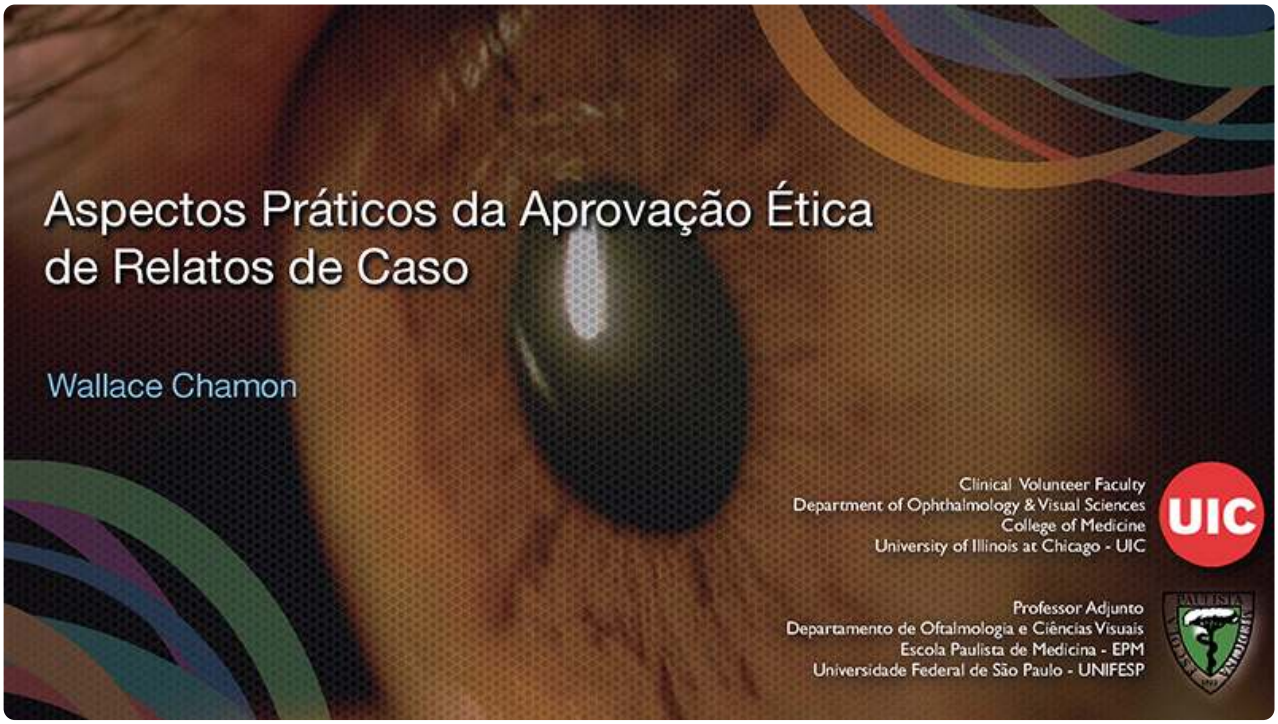

→ There will be no evaluators present on-site to take reports of cases.

→ Case report posters will have a designated area for presentation.

→ Case reports that identify patients by initials, name, or medical record number in the text or images provided will not be considered for evaluation and will be summarily excluded.

→ In its evaluation, the Scientific Committee will take into account the rarity, the quality of the documentation, and the scientific knowledge generated by the case.

→ Scientific presentation of case reports requires formal evaluation by a Research Ethics Committee affiliated with the National Institute of Research Ethics (INAEP).

CASE REPORTS AND CONEP

CLICK TO LEARN MORE (HTTPS://SFO3.DIGITALOCEANSPACES.COM/IWEVENTOS/IMAGENS/CBO/2026-03/RELATOS_DE_CASO_E_CONEP.PDF)

Guidelines for submitting Case Reports for Presentation at the Grand Round (Oral Presentation)

Case reports submitted for oral presentation may include a maximum of one author and two co-authors.

- The authors of case reports submitted for oral presentation must be students or residents of courses accredited by the CBO (Brazilian Council of Ophthalmology).

SUBMIT YOUR WORK (/EVENTO/CBO2026/TRABALHOS)

- One of the co-authors of the case report must be the Coordinator of the Course Accredited by the CBO (Brazilian Council of Ophthalmology).
- The first author agrees to give the oral presentation; their replacement is prohibited.
- Oral presentations of case reports will be given exclusively during the Grand Round Session.
- Case reports that identify patients by initials, name, or medical record number in the text or images provided will not be considered for evaluation and will be summarily excluded.
- In its evaluation, the Scientific Committee will take into account the rarity, the quality of the documentation, and the scientific knowledge generated by the case.
- Scientific presentation of case reports requires formal evaluation by a Research Ethics Committee affiliated with the National Institute of Research Ethics (INAEP).

Guidelines for submitting free themes (oral presentations and posters)

→ Free themes may include a maximum of one author and eight co-authors.

→ The first author agrees to give the poster or oral presentation; substitution is prohibited.

→ Authors should specify the presentation format (oral or poster).

→ All clinical trials involving intervention in human subjects and group comparisons must be registered on international clinical trial websites. Several websites validated by WHO criteria exist where this registration can be carried out. The Brazilian Council of Ophthalmology (CBO) recommends using the **Plataforma Brasil** (https://plataformabrasil.saude.gov.br/login.jsf) .

→ All scientific papers must have been approved by a Research Ethics Committee. This requirement is part of **CNS Resolution 466** (https://cbo.iweventos.com.br/temas/cbo2020/arquivos/resolucao-466.pdf) , of December 12, 2012.

→ Based on the experience of International Ophthalmology Congresses, the CBO (Brazilian Ophthalmology Council) seeks to improve and enhance the presentation of scientific works in poster format. To this end, the author must be present on the indicated date (to be informed upon approval of the work) for the full two-hour period during which their work will be evaluated and discussed by an Evaluation Committee. Their certificate will be available for online printing on the congress website after approval by this Committee.

Project Submission on the Brazil Platform - Stage 1 (https://www.youtube.com/watch?v=sQj6AjosyeE&list=PL1V4yELy3L8PXlN3QuFFBGeqxQRJc_FbZ&index=6) (April 3, 2019)
Project Submission on the Brazil Platform - Stage 2 (https://www.youtube.com/watch?v=WpzT5BdQT60&list=PL1V4yELy3L8PXlN3QuFFBGeqxQRJc_FbZ&index=6) (February 23, 2021)
Project Submission on the Brazil Platform - Stage 3 (https://www.youtube.com/watch?v=JyMY3cNT3o8&list=PL1V4yELy3L8PXlN3QuFFBGeqxQRJc_FbZ&index=12) (July 21, 2021)

Regarding the award ceremony

Abstracts detailing data collection or experiments conducted in Brazil may be eligible for the following awards:

→ "Brazilian Council of Ophthalmology Award" – for the best work;

→ "Surgical Ophthalmology Award"

→ "Clinical Ophthalmology Award"

→ "Basic Research Award" (laboratory or animal);

→ "Eye Health Education"

→ "Regional Awards" (North, Northeast, South, Southeast and Midwest).

→ “CBO-ABLAO Award” (given to the best work submitted by an Academic in Ophthalmology)

Works carried out abroad must be submitted in Portuguese. If approved, the oral or poster presentation of the work must be in Portuguese. These works will compete exclusively for the "International Work" award.
At the initiative of the CBO board, the main authors – first author – of each winning work will receive a complimentary registration for CBO2027*.

CLAUSE ONE - CORPORATE NAME AND REGISTERED ADDRESS

The limited liability company operates under the corporate name **"NOVA CAMPINAS OFTALMOLOGIA LTDA."** and has its registered office and jurisdiction at **Rua Viscondessa de Campinas No. 399 - Upper Floor, Nova Campinas, ZIP Code 13092-135, in the city of Campinas, State of São Paulo**, registered with the Commercial Registry under NIRE No. **35.233.949.797** and with CNPJ No. **09.417.076/0001-91**, and may, at the discretion of the partners, open or close branches within and outside the national territory, in compliance with the applicable legal provisions. *(Art. 997, II, Civil Code/2002)*

CLAUSE TWO - BUSINESS PURPOSE

The company's business purpose is to engage in the following activities:

- **MEDICAL CLINIC ACTIVITIES LIMITED TO CONSULTATIONS;**
- **EYE CLINIC WITH RESOURCES FOR PERFORMING COMPLEMENTARY EXAMINATIONS;**
- **EYE CLINIC WITH RESOURCES FOR PERFORMING SURGICAL PROCEDURES.** *(Art. 997, II, Civil Code/2002)*

Paragraph One: The company carries out organized economic business activity and is therefore classified as a business company, pursuant to Article 966, caput, and the sole paragraph of Article 982, both of Law No. 10,406/2002.

Paragraph Two: Whenever it is in the interest of the company and conducive to the achievement of its objectives, the company may associate with other companies, form corporate networks or joint ventures, as well as participate in other companies as a shareholder or stockholder, and may acquire or dispose of equity interests.

CLAUSE THREE - TERM OF DURATION

The term and duration of the company shall be indefinite, with its operations commencing on January 22, 2008. *(Art. 997, II, Civil Code/2002)*

CLAUSE FOUR - SHARE CAPITAL

The share capital amounts to R$ **1,040.00 (one thousand and forty reais)**, divided into **1,040 (one thousand and forty)** shares of R$ **1.00 (one real)** each, fully subscribed and fully paid in at the time in the country's legal currency, and allocated among the partners as follows: *(Art. 997, III, Art. 1,055, Civil Code/2002)*.

No.	PARTNERS	%	SHARES	AMOUNT	TOTAL
1	**IVAN VALLIM BRISOLA**	21.25	221	R$ 1.00	R$ 221.00
2	**DENISE FORNAZARI DE OLIVEIRA**	21.25	221	R$ 1.00	R$ 221.00
3	**FERNANDO JUSTINO DANTAS**	10	104	R$ 1.00	R$ 104.00
4	**HELENA LUISA REIMER DIAS**	6.25	65	R$ 1.00	R$ 65.00
5	**VANESSA GONÇALVES CRESPI FLORES**	6.25	65	R$ 1.00	R$ 65.00
6	**ALESSANDRA KURAHASHI DANTAS**	2.50	26	R$ 1.00	R$ 26.00
7	**POLLYANA ASSUNÇÃO HUEB MARCHI**	6.25	65	R$ 1.00	R$ 65.00
8	**WILSON MANCIO MARCHI JÚNIOR**	5	52	R$ 1.00	R$ 52.00
9	**LEONARDO ASSUNÇÃO HUEB**	6.25	65	R$ 1.00	R$ 65.00
10	**FERNANDA CREMASCO**	7.50	78	R$ 1.00	R$ 78.00
11	**ALANA MENDONÇA DE SANTANA**	7.50	78	R$ 1.00	R$ 78.00
TOTAL		**100%**	**1,040**		**R$ 1,040.00**

Sole Paragraph: The partners' liability is limited to the amount of their shares, but all partners are jointly and severally responsible for the full payment of the share capital, pursuant to *Article 1,052 of Law No. 10,406/2002*.

CLAUSE FIVE - MANAGEMENT

The management of the company shall be carried out individually by the partners **VANESSA GONÇALVES CRESPI FLORES AND LEONARDO ASSUNÇÃO HUEB**, with a term of office of 4 (four) years, holding the position of Administrators. They shall be responsible for all operations and shall represent the company, both actively and passively, in judicial and extrajudicial matters, in court or otherwise, and may perform all acts encompassed by the corporate purpose. The use of the company name for transactions unrelated to the corporate purpose is prohibited. *(Art. 997, VI, Arts. 1,015, 1,060 to 1,064, Civil Code/2002).*

-----//Signatures//--

WITHOUT CERTIFICATE VALUE

JUCESP
+2 10 24
Validated:
Checked:
ID No. 27.885.885-5

Sole Paragraph: It is the responsibility of the administrators, in the exercise of the company's management, to plan, to establish and determine the general guidelines and direction of the company's activities, making the decisions they deem appropriate for the development of its operations. For this purpose, they may operate the company's bank accounts, sign checks, promissory notes, lease agreements, loan and leasing contracts, bills of exchange, and other instruments inherent to business administration, as well as appoint attorneys on behalf of the company, within the limits of the powers and authority granted to them.

Paragraph Two: The use of the company name or corporate designation for guarantees, endorsements, approvals, sureties, or commitments in favor of third parties that are not aligned with the company's corporate purpose is strictly prohibited.

Paragraph Three: Pursuant to *Article 1,061 of Law No. 10,406/2002*, this agreement may be amended to appoint administrators who are not members of the company, provided that such appointment is approved by two-thirds of the partners.

CLAUSE SIX - OWNER'S WITHDRAW

Each Managing Partner shall be entitled to a remuneration equivalent to 1 (one) monthly minimum wage, as in effect on the date of payment, in accordance with applicable regulations. This amount shall be paid as owner's withdraw and recorded as a general expense of the company.

CLAUSE SEVEN - FISCAL YEAR

The fiscal year shall coincide with the calendar year, ending on December thirty-first of each year, at which time the general balance sheet shall be prepared and the results determined, in accordance with the applicable legal provisions. Any profits or losses thus determined shall be distributed to or borne by the partners in proportion to their respective shares of the Share Capital. *(Art. 1,065, Civil Code/2002)*

Paragraph One: Without prejudice to or replacing the provisions in the main paragraph of this clause, the distribution of profits, at the partners' discretion, may be carried out in a manner not proportional to the number of capital shares held by each partner, always subject to mutual agreement among the partners, as permitted by Article 1,007, without violating Article 1,008, and in compliance with the requirements set forth in Article 1,009, all of Law No. 10,406/2002.

Paragraph Two: The publication of the Balance Sheet is hereby waived, in accordance with the provisions of the applicable law.

-----//Signatures//--

WITHOUT CERTIFICATE OF VALUE

Validated:
Checked:
ID No. 27.885.885-5

Paragraph Three: Within the four months following the end of the fiscal year, the partners shall deliberate on the accounts and appoint the administrators, where applicable.

Paragraph Four: Interim balance sheets or trial balances may be prepared, and if profits exist, they may be distributed to the partners in proportion to their respective capital shares, subject to the partners' approval.

CLAUSE EIGHT - WITHDRAWAL AND DEATH

The withdrawal of any partner shall not result in the dissolution of the company, which shall continue with the remaining partner and another partner who may be admitted. However, in the event of death, the heirs of the deceased shall have the right to their shares, if they do not wish to participate in the company, the remaining partner shall pay them the value of their shares and any accrued profits, based on a balance sheet prepared as of the date of death, in twelve monthly installments.

Paragraph One: Until the completion of the estate inventory and distribution of the deceased's assets, the estate administrator shall, for all legal purposes, represent the interested parties both actively and passively before the company. The heirs may, through the estate administrator or legal representative, withdraw from the company.

Paragraph Two: In the event of withdrawal, the partner must notify the remaining partner in writing at least 60 (sixty) days in advance, indicating the price and conditions for the transfer. This period may be shortened by mutual agreement between the parties. The payment of the withdrawing partner's equity, determined in a Balance Sheet prepared specifically for this purpose, shall be made in twelve monthly installments, or under conditions agreed upon at the time, respecting the company's economic and financial capacity.

CLAUSE NINE - TRANSFER AND ASSIGNMENT OF SHARES

The shares are indivisible and may not be assigned or transferred to third parties without the consent of the other partner, who shall have the right of first refusal to acquire them on equal terms and at the same price.

Paragraph One: The partners representing the majority of the share capital may amend the articles of association, regardless of the express or implied consent of the other partners, particularly regarding the exclusion of a partner for just cause who places the continuity of the company at risk due to acts of undeniable severity. In such cases, the partner's equity shall be paid in accordance with the provisions set forth in Clause Eight of this agreement. *(Arts. 1,030 and 1,085, Civil Code/2002)*

-----//Signatures//--

JUCESP
·2 10 24
Validated:
Checked:
ID No. 27.885.885-5

Paragraph Two: The exclusion may only be determined in a meeting specially convened for this purpose, with the accused partner given sufficient notice to allow their attendance and the exercise of the right to a defense.

Paragraph Three: A partner who has been declared bankrupt, or whose shares have been liquidated to satisfy a personal creditor of the partner, shall also be automatically excluded from the company by operation of law.

Paragraph Four: The company's shares are not subject to creditors' claims and are thus exempt from seizure and non-transferable. All assets necessary and useful for the conduct of the company's essential activities shall also be considered exempt from seizure.

CLAUSE TEN - COMPANY RESOLUTIONS

The withdrawal, exclusion, or death of a partner does not release them, or their heirs, from liability for the company's prior obligations, for up to two years after the company's resolution has been registered. *(Art. 1,032, Civil Code/2002)*

CLAUSE ELEVEN - OMISSIONS

Any omissions or uncertainties arising from this agreement shall be addressed or resolved in accordance with the supplementary rules applicable to corporations under *Law No. 6,404/76*, or other applicable legal provisions.

CLAUSE TWELVE - MEETINGS

Whenever necessary, the partners' resolutions shall be made through a **meeting**, convened either by the majority partner or by the minority partners holding at least one-fifth of the share capital. All resolutions or decisions shall be recorded in the "Minutes of Board Meetings" book.

For a resolution to be valid, the presence of the majority of the partners shall be required. *(Arts. 1,010, 1,071, 1,072, and 1,073, Civil Code/2002)*

Paragraph One: In cases involving the incorporation, merger, dissolution of the company, or the cessation of its liquidation status, the approval of at least three-quarters of the share capital shall be required.

Paragraph Two: When a meeting is required, notice shall be given at least 8 (eight) days in advance, through a reliable method, such as: a) personally, with acknowledgment of receipt; or b) by mailing a letter with acknowledgment of receipt; or c) by fax transmission, accompanied by a letter with acknowledgment of receipt.

Paragraph Three: The formalities of convening or holding a meeting shall be waived when all partners declare in writing that they are aware of the location, date, time, and the matters to be addressed at the meeting. (Art. 1,072, §3, Civil Code/2002).

Paragraph Four: A partners' meeting is convened with the presence, at the first call, of partners holding shares representing at least three-quarters of the share capital, and, at the second call, with any number of partners.

Paragraph Five: It is agreed among the partners that the company shall not have a fiscal council.

CLAUSE THIRTEEN - COMPANY OBLIGATIONS

Pursuant to the reference made by *Article 1,054 of Law No. 10,406/2002* to Article 997 of the same legislation, it is expressly stated that the partners shall not be jointly liable for the company's obligations.

CLAUSE FOURTEEN - TERMINATION AND DISSOLUTION

The company may be dissolved or terminated, provided there is an agreement among the partners, or by a decision of three-quarters of the share capital, or otherwise in accordance with the provisions of the law.

Sole Paragraph: In the event of the company's termination or dissolution, a balance sheet shall be prepared, and after settling any existing debts, the remaining assets shall be distributed among the partners in proportion to their participation in the share capital.

CLAUSE FIFTEEN - DECLARATION OF NO CRIMINAL DISQUALIFICATION

The administrators declare, under the penalties of law, that they are not prohibited from managing the company by any special law, by virtue of a criminal conviction, or due to being under the effects of any penalty that temporarily or permanently bars access to public office; nor for bankruptcy crimes, malfeasance, bribery, extortion, embezzlement, offenses against the national economy, the financial system, competition laws, consumer relations, public faith, or property. (Art. 1,011, §1, Civil Code/2002).

CLAUSE SIXTEEN - JURISDICTION

The courts of the judicial district of the city of **Campinas, State of São Paulo**, are hereby chosen to resolve any actions arising from this Agreement, to the exclusion of any other jurisdiction, however privileged it may be.

CLÁUSULA QUINTA – DA ADMINISTRAÇÃO

A administração da sociedade será exercida isoladamente pelos sócios **VANESSA GONÇALVES CRESPI FLORES E LEONARDO ASSUNÇÃO HUEB**, com mandato por prazo de 4 (quatro) anos, designando o cargo de Administradores, que se incumbirá de todas as operações e representara a sociedade ativa e passiva, judicial e extrajudicialmente, em Juízo ou fora dele, podendo praticar todos os atos compreendidos no objetivo social, ficando vedado o uso da denominação, em negócios estranhos aos fins sociais. *(art.997 VI , art.1015, 1060 a 1064 CC/02).*

JUCESP
+2 10 24

Visto:
Conferido:
RG. nº 27.885.885-5

Parágrafo Primeiro: Compete aos administradores, no exercício da administração da sociedade, planejar, deliberar, traçar e decidir as diretrizes gerais e orientação das atividades sociais, tomando as decisões que julgar convenientes no desenvolvimento de suas operações, podendo para tanto, movimentar contas bancárias da sociedade, assinar cheques, notas promissórias, contratos de aluguel, empréstimos e leasing, duplicatas e demais títulos inerentes à administração dos negócios, constituindo procuradores em nome da sociedade e nos limites das atribuições e poderes conferidos.

Parágrafo Segundo: Fica desde já terminantemente proibido o uso da firma ou denominação social para avais, endossos, abonos, fianças e compromissos em favor de terceiros e que não condigam com os fins sociais.

Parágrafo Terceiro: Nos termos do *artigo 1.061 da Lei 10.406/2002*, fica permitida a alteração deste contrato para a nomeação de administradores não integrantes do quadro societário, desde que aprovado por dois terços dos sócios.

CLÁUSULA SEXTA – DO PRÓ-LABORE

A cada Sócio Administrador será atribuída uma remuneração no valor de 1 (um) salário mínimo mensal, tal como vigente à data do pagamento, em conformidade com as normas aplicáveis. O valor da remuneração será pago a título de pró-labore, sendo levado à conta de despesas gerais.

CLÁUSULA SÉTIMA – DO EXERCÍCIO SOCIAL

O exercício social coincidirá com o ano calendário, terminando em trinta e um de dezembro de cada ano, quando serão procedidos o levantamento do balanço geral e a apuração de resultados, em conformidade com as disposições legais pertinentes, e os lucros e ou prejuízos apurados serão distribuídos ou suportados entre os sócios, na proporção de suas quotas do Capital Social. *(art.1065 CC/02)*

Parágrafo Primeiro: Sem prejudicar ou substituir o disposto no caput da presente cláusula a distribuição dos lucros apurados a critério dos sócios, poderá ser adotado na forma não proporcional à quantidade de quotas de capital que cada sócio possui na sociedade, prevalecendo sempre o comum acordo entre os sócios, conforme permite o artigo 1007, sem ofensa ao artigo 1008, e com a observância das determinações previstas no artigo 1009 todos da Lei 10.406/2002.

Parágrafo Segundo: Ficando dispensado a publicação do Balanço, conforme previsto na lei vigente.

JUCESP

Visto:
Conferido:
RG. nº 27.885.885-5

Parágrafo Terceiro: Nos quatro meses seguintes ao termino do exercício social deliberarão sobre as contas e designarão os administradores quando for o caso.

Parágrafo Quarto: Poderão ser levantados balanços ou balancetes intermediários e havendo lucros, por deliberação dos sócios poderão ser distribuídos aos quotistas na proporção de suas quotas de capital.

CLÁUSULA OITAVA – DA RETIRADA E FALECIMENTO

A retirada de qualquer um dos sócios, não acarretará na dissolução da sociedade, que prosseguirá com o sócio remanescente e outro que será admitido. Porém na hipótese de falecimento, os herdeiros do falecido exercerão o direito às suas quotas, entretanto não havendo interesse destes em participar da sociedade, o sócio remanescente, os pagará o valor de suas quotas sociais e seus eventuais lucros acumulados, com base em balanço levantado na data do óbito, em doze parcelas mensais.

Parágrafo Primeiro: Até que se ultime, no processo de inventário à partilha dos bens deixados pelo de cujus, incumbirá ao inventariante para todos os efeitos legais, a representação ativa e passiva dos interessados perante a sociedade, podendo os herdeiros, através do inventariante ou representante legal, retirar-se da sociedade.

Parágrafo Segundo: No caso de retirada o sócio deverá comunicar o remanescente por escrito, com antecedência mínima de 60 (sessenta) dias, indicando preço e as condições para a cessão, podendo este prazo ser inferior desde que haja comum acordo entre as partes, o pagamento dos haveres do sócio retirante, apurados em Balanço especialmente levantado para esta finalidade, lhes serão pagos em doze parcelas mensais, ou em condições a serem acordadas na ocasião respeitando as possibilidades econômico-financeiras da sociedade.

CLÁUSULA NONA – DA TRANSFERÊNCIA E CESSÃO DE QUOTAS

As quotas são indivisíveis e não poderão ser cedidas ou transferidas a terceiros sem o consentimento do outro sócio, a quem fica assegurado em igualdade de condições e preço o direito de preferência para a sua aquisição.

Parágrafo Primeiro: Os sócios que representam à maioria do capital social poderão promover a alteração do contrato social, independentemente do consentimento expresso ou tácito, por parte das demais sócios, especialmente no que tange a exclusão de sócio por justa causa que passe a colocar em risco a continuidade da empresa, em virtude de atos de inegável gravidade, ocasião na qual serão pagos seus haveres societários, conforme disposição contida na cláusula 8ª do presente contrato. *(art. 1030, art. 1085 CC/02)*

RG. nº 27.885.885-5

Parágrafo Segundo: A exclusão somente poderá ser determinada em reunião especialmente convocada para este fim, ciente o acusado em tempo hábil para permitir seu comparecimento e o exercício do direito de defesa.

Parágrafo Terceiro: Será também de pleno direito excluído da sociedade o sócio declarado falido, ou aquele cuja quota tenha sido liquidada para o pagamento de credor particular do sócio.

Parágrafo Quarto: As quotas da sociedade não estão sujeitas para satisfação de créditos, sendo impenhoráveis e incomunicáveis, serão também considerados impenhoráveis todos os bens necessários e úteis ao exercício das atividades essenciais desta sociedade.

CLÁUSULA DÉCIMA – DAS DELIBERAÇÕES SOCIAIS

A retirada, exclusão ou morte do sócio, não o exime, ou a seus herdeiros, da responsabilidade pelas obrigações sociais anteriores, até dois anos depois de averbada a resolução da sociedade. *(art. 1032 CC/02)*

CLÁUSULA DÉCIMA PRIMEIRA – DAS OMISSÕES

As omissões ou dúvidas oriundas do presente contrato serão supridas ou resolvidas com a regência supletiva da sociedade pelas normas regimentais da Sociedade-Anônima, *Lei 6.404/76,* ou de outros dispositivos legais aplicáveis à espécie.

CLÁUSULA DÉCIMA SEGUNDA – DA REUNIÃO

As deliberações dos sócios sempre que forem necessárias, serão tomadas através de **reunião**, mediante convocação do sócio majoritário ou pelos sócios minoritários cujas quotas formem pelo menos um quinto do capital social, e suas resoluções ou decisões constarão no livro de "Atas de Reuniões da Diretoria".

Para que a deliberação seja valida será necessária à presença da maioria societária. *(art.1010, 1071, 1072 e 1073 CC/02)*

Parágrafo Primeiro: Nos casos previstos que envolvam a incorporação, a fusão e a dissolução da sociedade ou cessação do estado de liquidação, serão necessária a aprovação de no mínimo três quartos do capital social.

Parágrafo Segundo: A convocação para a reunião, quando necessária, deverá ser efetuada com, no mínimo, 08 (oito) dias de antecedência, mediante aviso transmitido por meio idôneo, tais como: a) pessoalmente, mediante protocolo; ou b) por postagem de carta com aviso de recebimento; ou c) mediante transmissão de fax, com concomitante envio de carta com aviso de recebimento.

Parágrafo Terceiro: As formalidades da convocação ou da reunião tornam-se dispensáveis quando todos os sócios declararem, por escrito, cientes do local, data, hora, e, sobre a matéria que seria objeto dela, (art. 1072 § 3° CC/02)

Parágrafo Quarto: A reunião dos sócios instala-se com a presença, em primeira convocação, de sócios titulares de quotas representativas de, no mínimo ¾ (três quartos) do capital social, e, em segunda convocação, com qualquer número.

Parágrafo Quinto: Fica convencionado entre os sócios que a sociedade não terá conselho fiscal.

CLÁUSULA DÉCIMA TERCEIRA – DAS OBRIGAÇÕES SOCIAIS

Segundo remissão determinada pelo *artigo 1.054 da Lei 10.406/2002 ao artigo 997* da mesma legislação, fica expresso que os sócios não respondem, subsidiariamente pelas obrigações sociais.

CLÁUSULA DÉCIMA QUARTA – DA EXTINÇÃO E DISSOLUÇÃO

A sociedade poderá ser dissolvida ou extinta, desde que haja acordo entre os quotistas ou por decisão de ¾ do capital social, ou ainda por disposições da lei.

Parágrafo Único: Em caso de extinção ou dissolução da sociedade, será apurado o balanço e os bens direitos e obrigações, depois de pagas às dívidas porventura existentes o saldo será rateado entre os sócios na proporção da participação dos sócios no Capital.

CLÁUSULA DÉCIMA QUINTA – DA DECLARAÇÃO CRIMINAL

Os administradores declaram, sob penas da lei, de que não estão impedidos de exercerem a administração da sociedade, por lei especial, ou em virtude de condenação criminal, ou por se encontrarem sob os efeitos dela, a pena que vede, ainda que temporariamente, o acesso a cargos públicos; ou por crime falimentar, de prevaricação, peita ou suborno, concussão, peculato, ou contra a economia popular, contra o sistema financeiro nacional, contra normas de defesa da concorrência, contra as relações de consumo, fé publica, ou a propriedade. (art. 1.011 §1° CC/02).

CLÁUSULA DÉCIMA SEXTA – DO FORO

Fica eleito o foro da Comarca da cidade de **Campinas, Estado de São Paulo**, para dirimir quaisquer ação fundada no presente Contrato, com exclusão de qualquer outro, por mais privilegiado que seja.

RECOMMENDATION LETTER FOR DR. ALESSANDRA KURAHASHI DANTAS

February 11th, 2025

To Whom It May Concern,

I, Dr. Denise Fornazari de Oliveira, CRM/SP 65.058 (professional medical registration issued by the Regional Medical Council of the State of São Paulo, Brazil), ophthalmologist graduated from UNESP (1983–1988), with medical residency in Ophthalmology at UNICAMP (1989–1993), a Master's degree (2007) and a PhD (2013) in Ophthalmology from UNICAMP. I currently serve in senior clinical and leadership roles related to the Cornea Procurement Organization at UNICAMP and as a senior physician in the Cornea and External Diseases service. With extensive experience in corneal transplantation, ocular surface diseases, and eye bank management, write this letter to attest to the critical role of Dr. Alessandra Kurahashi Dantas as founding partner, owner, and practicing ophthalmologist at *Nova Campinas Oftalmologia*, located in Campinas, SP.

I have known Dr. Alessandra professionally since 1998, and I have had the opportunity to work closely with her at *Nova Campinas Oftalmologia*, where I served as Medical Director from 2002 to 2017. During this period, I was able to observe her fundamental role in the establishment and growth of the clinic.

Nova Campinas Oftalmologia is an ophthalmology clinic in Campinas that has been operating since 2002, performing consultations, exams, procedures and surgeries in its own surgical center. The clinic offers excellence in all ophthalmology subspecialties, including cataract, refractive surgery, cornea and anterior segment, strabismus, glaucoma, contact lenses, pediatric ophthalmology, ocular plastics, and retina. It is equipped to perform a wide range of diagnostic exams and surgical procedures, including advanced imaging studies and intraocular and extraocular surgeries, as well as laser-based therapeutic interventions.

Dr. Alessandra is an ophthalmologist who, in addition to her ownership role, also provides direct clinical care to patients at the clinic. She routinely conducts outpatient consultations, follows patients longitudinally, and performs ophthalmologic procedures and surgeries within her field of practice. In her clinical activity, she participates in the indication and execution of surgical treatments, in the interpretation of complementary exams, and in the coordination of care plans for patients with chronic or complex ocular conditions, in alignment with the clinic's protocols.

As an owner, she is responsible for the strategic direction and governance of the clinic, including defining the scope of services offered, approving major investments in equipment and infrastructure, and making high-level decisions about the clinic's positioning and expansion. She participates in the approval of annual budgets, monitors financial performance at a strategic level, and takes part in decisions regarding the hiring and allocation of medical and administrative staff. She exercises authority over these matters even when operational tasks are delegated has a determining voice in setting quality standards for patient care, in approving internal protocols, and in ensuring that the clinic complies with regulatory and ethical requirements.

Nova Campinas
Oftalmologia

Under her ownership and leadership, the clinic has grown consistently in both structure and activity. Today, *Nova Campinas Oftalmologia* has a medical team composed of 11 ophthalmologists and a support staff of 23 employees, and it serves approximately 16,000 patient consultations and 800 surgical procedures such as annually and has demonstrated steady growth of approximately 5% per year. The clinic currently performs also outpatient consultations, diagnostic testing, and surgical procedures in areas such as surgeries for cataract, refractive errors, cornea and anterior segment, glaucoma, pediatric ophthalmology, strabismus, retina, and oculoplastics. This growth in the number of physicians, staff and patients reflects the effectiveness of the strategic decisions for which Dr. Alessandra has exercised a central leadership role, particularly in the expansion of services, the acquisition of advanced diagnostic and surgical technology, and the consolidation of the clinic's presence in the regional market.

Dr. Alessandra has also participated, in her capacity as owner, in decisions to establish and maintain contracts with health insurance providers and other institutional partners. Over the years, *Nova Campinas Oftalmologia* has entered into agreements and partnerships with Unimed, Vivest Saúde, Sul América Saúde, Bradesco Saúde, Petrobrás Ams, Porto Seguro Saúde, Amil and a few others, which have contributed to increasing access to specialized ophthalmologic care and to strengthening the clinic's patient base.

The clinic's reputation is evidenced by its comprehensive service offering, its modern infrastructure with a dedicated surgical center, and its long history of continuous operation in the city. Within this context, Dr. Alessandra's dual role as owner and practicing ophthalmologist has been essential to maintaining the level of investment, quality of services, and long-term stability that support *Nova Campinas Oftalmologia's* standing as a reputable institution in ophthalmology in the Campinas region.

Her contribution as founding partner, owner, and practicing ophthalmologist has therefore been critical to the clinic's creation, consolidation and ongoing success.

I am available to provide any additional information that may be necessary.

Sincerely,

Dr. Denise Fornazari de Oliveira
Ophthalmologist

MINISTRY OF FINANCE **INCOME TAX - INDIVIDUAL**

SPECIAL SECRETARIAT OF THE FEDERAL REVENUE OF BRAZIL **TAX YEAR 2023** **CALENDAR YEAR 2022**

Ms. ALESSANDRA KURAHASHI DANTAS, registered under the CPF No. 797.088.039-87.

THE RECEIPT NUMBER for your declaration submitted on 05/17/2023, at 09:44:09 a.m., is:

35.88.32.88.41 - 32

This number is for personal use and SHOULD NOT be provided to third parties. It is mandatory for:

- rectifying this declaration;
- generating an access code for obtaining information and performing services available on the website of the Special Secretariat of the Federal Revenue of Brazil such as:
  - My Income Tax (DIRPF – Individual Tax Return - Statement):
    - information on the processing status;
    - presentation of any pending issues and guidance on how to resolve them;
    - modification or cancellation of automatic installment payments;
    - Display of overdue tax installments and issuance of updated Documents for Federal Revenue Collection (Darf).
  - Tax Status:
    - Information on any pending issues, including those related to the Federal Government's Active Debt, and guidance on how to regularize them.

Attention: Keep this number to provide it in the 2024 tax return, in the field "previous year's declaration receipt number".

Information on the Darf Printing

The Annual Adjustment Statement Program for Individual Income Tax allows the printing of the Darf for the payment of all installments, including those overdue. The Darf will be printed with interest equivalent to the reference rate of the Special System for Settlement and Custody (Selic) for federal securities, accumulated monthly, calculated from 06/01/2023 until the month prior to payment, and 1% in the month of payment.

If the installment payment is made after its due date, a late payment penalty of 0.33% per day will apply, with a maximum limit of 20%.

For printing the Darf, the taxpayer should use the option **Declaration** / **Print** / **Darf of the IRPF** and select the installment for printing.

In the case of installments resulting from amended declarations that lead to a change in tax payable, for printing the DARF, access the e-CAC Portal on the RFB (Brazilian Federal Revenue) website at (http://gov.br/receitafederal). Then, click on **"Declarations and Statements"**, select the service **"My Income Tax (DIRPF Statement Extract)"**. In the list of services found, click on "**Payment - Check Debts, Issue DARF**, and **Change Installments**". After viewing the quantity of installments and the status of each one, click on the "**Print**" icon to generate the DARF for the desired month.

Additional Information

Tax Year	Tax Audit
2018	No
2019	No
2020	No
2021	Yes
2022	No

=> Tax Audit discrepancies are typically issues that can be resolved by the taxpayer.

=> Pending debits usually refer to unpaid amounts or amounts paid with the wrong codes.

For further clarification and guidance on how to resolve these discrepancies, consult the IRPF Statement.

Follow the processing of your declaration on the e-CAC or on your mobile device.

I, André Vinícius Inacio Penna Mello, telephone number 415 425-2508, mailing address P.O. MINISTÉRIO DA FAZENDA **IMPOSTO SOBRE A RENDA - PESSOA FÍSICA**

SECRETARIA ESPECIAL DA RECEITA FEDERAL DO BRASIL **EXERCÍCIO 2023** **ANO-CALENDÁRIO 2022**

Sr(a) ALESSANDRA KURAHASHI DANTAS, inscrito no CPF sob o nº 797.088.039-87.

O NÚMERO DO RECIBO de sua declaração apresentada em 17/05/2023, às 09:44:09, é:

35.88.32.88.41 - 32

Este número é de uso pessoal e NÃO deve ser fornecido a terceiros. Ele é obrigatório para:

- retificar esta declaração;
- gerar um código de acesso para obter informações e realizar serviços disponíveis na página da Secretaria Especial da Receita Federal do Brasil na Internet, tais como:
  - Meu Imposto de Renda (Extrato da DIRPF):
    - informação da situação do processamento;
    - apresentação de eventuais pendências e orientações sobre como resolvê-las;
    - alteração ou cancelamento de débito automático das quotas;
    - exibição de quotas do imposto em atraso e emissões dos Documentos de Arrecadação de Receitas Federais (Darf) atualizados.
  - Situação Fiscal:
    - Informação de eventuais pendências, inclusive as relativas à Dívida Ativa da União, e orientação sobre como regularizá-las.

Atenção: Guarde este número para informá-lo na declaração do exercício de 2024, no campo "número do recibo da declaração do ano anterior".

Informações sobre a Impressão do Darf

O programa da Declaração de Ajuste Anual do Imposto sobre a Renda da Pessoa Física permite a impressão do Darf para pagamento de todas as quotas, inclusive as em atraso. O Darf será impresso acrescido de juros equivalentes à taxa referencial do Sistema Especial de Liquidação e Custódia (Selic), para títulos federais, acumulada mensalmente, calculados a partir de 01/06/2023 até o mês anterior ao do pagamento e de 1% no mês do pagamento.

Se o pagamento da quota for efetuado após o seu vencimento, incidirá multa de mora de 0,33% ao dia, observado o limite máximo de 20%.

Para impressão do Darf o contribuinte deve utilizar a opção **Declaração** / **Imprimir** / **Darf do IRPF** e selecionar a quota para impressão.

No caso de quotas decorrentes de declarações retificadoras em que ocorra mudança de imposto a pagar, para impressão do DARF acesse o Portal e-CAC no site da Receita Federal na Internet (https://www.gov.br/receitafederal/pt-br). Em seguida, clique em "**Declarações e Demonstrativos**", selecione o serviço "**Meu Imposto de Renda (Extrato da DIRPF)**". Na lista dos Serviços encontrados, clique em "**Pagamento - Consultar Débitos, Emitir DARF e Alterar Quotas**". Após visualizar o quantitativo de quotas e a situação de cada uma delas, clique no ícone "**Impressão**" para emitir o DARF do mês desejado.

Informações Adicionais

Exercício	Malhas
2018	Não
2019	Não
2020	Não
2021	Sim
2022	Não

=> Pendências de Malhas normalmente são questões que podem ser resolvidas pelo contribuinte.

=> Pendências de Débitos normalmente referem-se a valores não liquidados ou pagos com códigos errados.

Para maiores esclarecimentos e orientações sobre como resolver essas pendências consulte o Extrato do IRPF.

Acompanhe o processamento da sua declaração no e-CAC ou no seu dispositivo móvel.

Attention: Keep this number to provide it in the 2025 tax return, in the field "previous year's declaration receipt number"

Information on the Darf Printing

The Annual Adjustment Statement Program for Individual Income Tax allows the printing of the Darf for the payment of all installments, including those overdue. The Darf will be printed with interest equivalent to the reference rate of the Special System for Settlement and Custody (Selic) for federal securities, accumulated monthly, calculated from 06/03/2024 until the month prior to payment, and 1% in the month of payment.

If the installment payment is made after its due date, a late payment penalty of 0.33% per day will apply, with a maximum limit of 20%.

For printing the Darf, the taxpayer should use the option **Declaration** / **Print** / **Darf of the IRPF** and select the installment for printing.

In the case of installments resulting from amended declarations that lead to a change in tax payable, for printing the DARF, access the e-CAC Portal on the RFB (Brazilian Federal Revenue) website at (http://gov.br/receitafederal). Then, click on **"Declarations and Statements"**, select the service **"My Income Tax (DIRPF Statement Extract)"**. In the list of services found, click on "**Payment - Check Debts, Issue DARF**, and **Change Installments**". After viewing the quantity of installments and the status of each one, click on the "**Print**" icon to generate the DARF for the desired month.

Follow the processing of your declaration on the e-CAC or on your mobile device.

MINISTÉRIO DA FAZENDA **IMPOSTO SOBRE A RENDA - PESSOA FÍSICA**

SECRETARIA ESPECIAL DA RECEITA FEDERAL DO BRASIL **EXERCÍCIO 2024** **ANO-CALENDÁRIO 2023**

Sr(a) ALESSANDRA KURAHASHI DANTAS, inscrito no CPF sob o nº 797.088.039-87.

O NÚMERO DO RECIBO de sua declaração apresentada em 01/05/2024, às 11:49:16, é:

36.87.81.84.35 - 58

Este número é de uso pessoal e NÃO deve ser fornecido a terceiros. Ele é obrigatório para:

- retificar esta declaração;
- gerar um código de acesso para obter informações e realizar serviços disponíveis na página da Secretaria Especial da Receita Federal do Brasil na Internet, tais como:
  - Meu Imposto de Renda (Extrato da DIRPF):
    - informação da situação do processamento;
    - apresentação de eventuais pendências e orientações sobre como resolvê-las;
    - alteração ou cancelamento de débito automático das quotas;
    - exibição de quotas do imposto em atraso e emissões dos Documentos de Arrecadação de Receitas Federais (Darf) atualizados.
  - Situação Fiscal:
    - Informação de eventuais pendências, inclusive as relativas à Dívida Ativa da União, e orientação sobre como regularizá-las.

Atenção: Guarde este número para informá-lo na declaração do exercício de 2025, no campo "número do recibo da declaração do ano anterior".

Informações sobre a Impressão do Darf

O programa da Declaração de Ajuste Anual do Imposto sobre a Renda da Pessoa Física permite a impressão do Darf para pagamento de todas as quotas, inclusive as em atraso. O Darf será impresso acrescido de juros equivalentes à taxa referencial do Sistema Especial de Liquidação e Custódia (Selic), para títulos federais, acumulada mensalmente, calculados a partir de 03/06/2024 até o mês anterior ao do pagamento e de 1% no mês do pagamento.

Se o pagamento da quota for efetuado após o seu vencimento, incidirá multa de mora de 0,33% ao dia, observado o limite máximo de 20%.

Para impressão do Darf o contribuinte deve utilizar a opção **Declaração** / **Imprimir** / **Darf do IRPF** e selecionar a quota para impressão.

No caso de quotas decorrentes de declarações retificadoras em que ocorra mudança de imposto a pagar, para impressão do DARF acesse o Portal e-CAC no site da Receita Federal na Internet (https://www.gov.br/receitafederal/pt-br). Em seguida, clique em "**Declarações e Demonstrativos**", selecione o serviço "**Meu Imposto de Renda (Extrato da DIRPF)**". Na lista dos Serviços encontrados, clique em "**Pagamento - Consultar Débitos, Emitir DARF e Alterar Quotas**". Após visualizar o quantitativo de quotas e a situação de cada uma delas, clique no ícone "**Impressão**" para emitir o DARF do mês desejado.

Acompanhe o processamento da sua declaração no e-CAC ou no seu dispositivo móvel.

SPECIAL SECRETARIAT OF THE FEDERAL REVENUE OF BRAZIL **TAX YEAR 2025** **CALENDAR YEAR 2024**

Ms. ALESSANDRA KURAHASHI DANTAS, registered under the CPF No. 797.088.039-87.

THE RECEIPT NUMBER for your declaration submitted on 05/21/2025, at 2:26:45 PM, is:

27.82.79.73.80 - 94

This number is for personal use and SHOULD NOT be provided to third parties. It is mandatory to amend this return.

Check your return, verify pending issues, pay the tax, check your refund, download copies of documents, and more through:

- Federal Revenue Digital Services Portal https://servicos.receitafederal.gov.br
- Federal Revenue APP on your mobile device

Attention: Keep this number to provide it in the 2026 return, in the field "Receipt number of the last return filed for the 2025 tax year".

Information on the Darf Printing

The Annual Adjustment Statement Program for Individual Income Tax allows the printing of the Darf for the payment of all installments, including those overdue. The Darf will be printed with interest equivalent to the reference rate of the Special System for Settlement and Custody (Selic) for federal securities, accumulated monthly, calculated from 06/02/2025 until the month prior to payment, and 1% in the month of payment.

If the installment payment is made after its due date, a late payment penalty of 0.33% per day will apply, with a maximum limit of 20%.

For printing the Darf, the taxpayer should use the option **Declaration / Print / Darf of the IRPF** and select the installment for printing.

In the case of installments resulting from amended declarations that lead to a change in tax payable, for printing the DARF, access the e-CAC Portal on the RFB (Brazilian Federal Revenue) website at (http://gov.br/receitafederal). Then, click on **"Declarations and Statements"**, select the service **"My Income Tax (DIRPF Statement Extract)"**. In the list of services found, click on "**Payment - Check Debts, Issue DARF**, and **Change Installments**". After viewing the quantity of installments and the status of each one, click on the "**Print**" icon to generate the DARF for the desired month.

Additional Information

Tax Year	Tax Audit
2020	No
2021	Yes
2022	No
2023	No
2024	No

=> Tax Audit discrepancies are typically issues that can be resolved by the taxpayer.

=> Pending debits usually refer to unpaid amounts or amounts paid with the wrong codes.

For further clarification and guidance on how to resolve these discrepancies, consult the IRPF Statement.

Follow the processing of your declaration on the e-CAC or on your mobile device.

DECLARATION OF PERFORMANCE AS A SPECIALIST IN A RADIO PROGRAM

Dear Sir or Madam,

Through this letter, we hereby record that Dr. Alessandra Kurahashi Dantas participated in an interview on our radio programming as a guest specialist in oculoplastics, contributing with technical and informative content focused on eye health.

The participation took place in the program “Manhã Brasil,” broadcast by Rádio Brasil Campinas, on November 24, at 9:20 a.m., in a live program format, hosted by journalist Camilla Godoy.

The central topic of the interview was blepharoplasty, addressed from the perspective of oculoplastics, clarifying for the public the indications for the procedure, functional and aesthetic aspects, medical criteria, surgical safety, and care related to the pre- and postoperative periods.

Rádio Brasil Campinas, headquartered in Campinas, São Paulo, has continuous radio broadcasting and wide dissemination, reaching Campinas, the Metropolitan Region, and several cities in the interior of the state, with programming dedicated to journalism, variety, and content of public interest, including health topics.

Dr. Alessandra Kurahashi Dantas was invited due to her medical training in ophthalmology, her specialized practice in oculoplastics, and her clinical and surgical experience, being considered a qualified professional to address complex ophthalmological topics in a wide-reaching environment.

We emphasize that her participation occurred in a professional manner and upon invitation, reflecting the recognition of her technical competence and medical authority in the field of oculoplastics.

This declaration is issued for the purposes of institutional record and proof of participation in media.

Sincerely,

Camilla Godoy

DECLARAÇÃO DE ATUAÇÃO COMO ESPECIALISTA EM PROGRAMA RADIOFÔNICO

Prezados,

Por meio da presente, registramos que a Dra. Alessandra Kurahashi Dantas participou de entrevista em nossa programação radiofônica na condição de especialista convidada em oculoplástica, contribuindo com conteúdo técnico e informativo voltado à saúde ocular.

A participação ocorreu no programa Manhã Brasil, transmitido pela Rádio Brasil Campinas, no dia 24 de novembro, às 9h20, em formato de programa ao vivo, sob apresentação da jornalista Camilla Godoy.

O tema central da entrevista foi blefaroplastia, abordado sob a perspectiva da oculoplástica, com esclarecimentos ao público sobre indicações do procedimento, aspectos funcionais e estéticos, critérios médicos, segurança cirúrgica e cuidados relacionados ao período pré e pós-operatório.

A Rádio Brasil Campinas, sediada em Campinas, São Paulo, possui transmissão radiofônica contínua e de ampla difusão, alcançando Campinas, a Região Metropolitana e diversas cidades do interior do estado, com programação dedicada a jornalismo, variedades e

conteúdosde interesse público, incluindo temas de saúde.

A Dra. Alessandra Kurahashi Dantas foi convidada em razão de sua formação médica em oftalmologia, de sua atuação especializada em oculoplástica e de sua experiência clínica e cirúrgica, sendo considerada profissional habilitada para tratar de temas oftalmológicos complexos em meio de grande alcance.

Ressaltamos que sua participação ocorreu de forma profissional e mediante convite, refletindo o reconhecimento de sua competência técnica e autoridade médica na área da oculoplástica.

Esta declaração é emitida para fins de registro institucional e comprovação de participação em mídia.

Atenciosamente,

Camilla Godoy

Alessandra Kurahashi Dantas

Ophthalmologist

"Campinas welcomed me with open arms, where I had the opportunity to begin my career in Ophthalmology and to meet my husband, Fernando Justino Dantas, also an ophthalmologist. Here, we grew together and built a solid professional career, along with a beautiful family and surrounded by good friends."

Alessandra Kurahashi Dantas is an ophthalmologist specializing in Blepharoplasty and Periocular Rejuvenation. She is a member of the Brazilian Society of Ocular Plastic Surgery (SBCPO) and the Brazilian Council of Ophthalmology (CBO). She attended medical school at the Federal University of Paraná and soon began her residency at UNICAMP, where she completed her graduate studies in Ophthalmology and specialization in Oculoplastics. She worked for many years as a volunteer physician supervising residents and is currently fully dedicated to her private practice in the city of Campinas.

She was born in Cornélio Procópio, in the State of Paraná, and has lived in Campinas for 27 years. For her, Campinas is a city recognized for excellence in education, healthcare, quality of life, business infrastructure, and as a technology hub. Today, practicing in the city, always with great ethics, diligence, and respect for her patients, she states that she continuously strives to deliver excellent results through ongoing professional development in courses in Brazil and abroad, as well as technical refinement combined with one of the best clinical and surgical ophthalmology infrastructures in the city of Campinas.

0:00
When it comes to retirement, talk to Leandro and Lia from Deféria Assessoria. Deféria has already retired.
0:09
Thousands of people have already achieved their dream, and you could be the next one to conquer it.
0:14
Retirement. So don't waste any more time. Call now and secure your retirement.
0:21
Your retirement with Leandro and Lia from Defé Assessoria. Note the number of
0:27
Phone number: 991585313. I'll repeat: 99158
0:34
5313. The advisory service is approved. A new sky, a new sound. Magnífica FM.
0:43
FM. You, a member of the Magnificent family, are our
0:49
special guest to celebrate the 30th anniversary mass of the radio station, which is an idea of
0:55
God. The celebration will be on December 8th at 8 PM at
1:01
São Domingos de Guzmão community, in Parque Egisto Ragazzo in Limeira,
1:07
presided over by Bishop José Roberto Fortes Palau and priests of the diocese. Come.
1:13
Celebrate this important date with us. Bring your family and friends.
1:19
My soul glorifies the Lord.
1:26
My spirit exults with joy.
1:31

Radio Magnífica FM, 30 years on the air. I am part of this blessing.
1:41
An idea of God.
1:48
Information in a light and relaxed conversation. Panel starts now.
1:54
Magnificent with Juliana de Paula.
2:11
Hello, my dears. Good afternoon. We're starting another Magnificent Panel this Thursday. There's a...
2:18
My dear friend Ana Cecília, who says, "Thursday is almost Friday." Which is just to give a boost to those who are waiting.
2:23
Have a great weekend. Another great day. Another great day. May you be...
2:29
Living their big day there. Today we have another topic, or rather, two topics.
2:36
We have some very special people today to talk about here on our panel. Cintia, good afternoon, my dear.
2:41
Good afternoon, my dear. Just go. But look, let's talk to our...
2:47
This is an audience that you can and should participate with us, because otherwise this program is no fun at all without you.
2:52
Participation. So, we have two topics today. Both, Cinttia, are about health or about the health of our eyes.
3:01
That pleasant itch you get in your eye. Ah, I had that today, girl. Yeah, me.
3:07
We're closing in, as they say, until we fall off the perch, right? Nice, girl. Is this for real? We
3:12
No, I can't. Just this week I was scratching my left cheek so hard I...
3:18
I hurt myself. I almost made an appointment with an ophthalmologist. I don't even know if the doctor will tell me to do that, but anyway.
3:24
Let's talk about this, the precautions, the risks involved in maintaining your eye health. And then, still on the program...
3:30
Today, we're going to talk to a physical therapist about this time of year when we...
3:37
You end up getting a little more tired because you're afraid, you have work, you have this and that, right? There are some pains that they
3:43
They start appearing there in the lower back, feet, and legs. Feeling that too.
3:49

It's my daughter because she looks like she's carrying the weight of the whole year, so she'll also give us some guidance, or
3:55
In short, there are many reasons for you, who are following us, to participate, send your questions, say good afternoon, and talk.
4:02
That you love us, that you love our company, because we love you.
4:07
Yours. So participate, okay? We already have our first interviewee, Cíntia?
4:12
Yes, we do. Let's check if it's already available in audio and video; we can already see it there. It's beautiful. Very good.
4:20
Good afternoon, Dr. Alessandra Curache Dantas.
4:26
Dantas. I got it right. Curacha. You got it right. Good afternoon, Juliana. Good afternoon
4:32
To all our listeners. It's a pleasure to be here today talking with you. And it's a pleasure to have you join us.
4:40
Speaking. Doctor, a doctor who is an ophthalmologist and also a specialist in eye surgery.
4:47
I'll even extend an invitation for her to come back with more time so we can talk about these main surgeries.
4:52
That's what our audience likes to know. Cintia, it's starting to sag a little, what do we do with it?
4:59
Sometimes it's not just a matter of aesthetics, but of health, in short. But today,
5:04
Dr. Alessandra, I'd like you to talk a little bit about this itching issue. I even joked about it.
5:11
With Cintia, right? Oh, itchy. Good, good, doctor. But I know, it's a little problem, right? No. Tell us about it.
5:19
Why can rubbing your eyes be so problematic for our eyes?
5:26
Well, Juliana, this complaint of itchy eyes is one of the most common complaints in...
5:32
our ophthalmology clinic. However, we have to understand that rubbing your eyes is not normal. So, when the
5:40
The patient comes in with this complaint, and we have to explain that we need to investigate the cause of the itching and look for...
5:48
Treat according to the cause. So, indeed, the eyes can cause some problems.
5:55
There are several situations that we need to investigate.

6:01
Doctor, and what are the main causes? We can list them, for example, there are...
6:07
Dry weather can cause more itching in the eyes. I use
6:12
Contact lenses can also cause dryness, leading to discomfort and the urge to scratch. There are causes that...
6:19
Can we list them? Yes. The most common cause is allergies.
6:25
Uh-huh. Those are atopic patients who may have allergies in their eyes, allergies in their nose,
6:30
That runny nose. And usually in these allergic cases, they are related to common allergens.
6:38
That can be in everyone's house, for example, household dust, dust mites, right? Or makeup, makeup.
6:45
that you use face cream or makeup around your eyes, shampoos,
6:51
It's nail polish, food. That's one of the most common causes.
6:57
The second important cause, which you mentioned, is dry eye. What?
7:02
What does dry eye mean? Dry eye is not more common in dry weather. Dry eye is
7:08
It may appear, but the patient may have dry eye at any time of year. Dry eye is when...
7:15
tears lack both the quality and quantity necessary to lubricate the
7:21
cornea. Then the patient starts to have a sensation that there's sand in it, that
7:26
There's a foreign object present, and it might also cause itching. Lastly, I will...
7:31
Let's list the most common causes, OK? It's when the patient has inflammation on the edge of the eyelid, where the root of the...
7:38
eyelashes, where some patients may have a scab growing in that area.
7:44
The technical name is blepharitis or meibomitis, which is also a very common cause of itchy eyes.
7:51
And this itching, right? This way we... because with itching, we just go there with our thumb. My God, when...
7:57
We remember how sensitive it is, it even hurts our hearts to see how much we scratch. But there's a...
8:03
The question is, that's what you call keratoconus, doctor. This itching can lead to that.

8:11
It's not a disease, right? It's a, I don't know how I could put it,
8:17
What is it and why might it cause this? So, when you rub your eye, you do a
8:24
Mechanical trauma to the eye, especially to a structure called the cornea, which is
8:31
Imagine it as if it were the eye, a little clock. That little glass of the clock is...
8:36
The cornea in our eye, that transparent part. And by applying that pressure, you alter the architectural structure of the...
8:44
cornea. And what happens? Instead of being a round structure, it starts to become pointed, it
8:51
It has a cone-like shape, hence the name ceratocone. And what does that mean?
8:57
What kind of harm? The harm is that the patient will experience a decrease in visual acuity, in
9:02
Quality and quality. Often, we can't improve things with glasses.
9:08
Sometimes patients have to wear rigid contact lenses, and in some cases surgery, even a cord transplant.
9:16
Oh no! The act of scratching can actually intensify that chance of you...
9:23
Developing contact, you understand? And there's also the possibility, through
9:29
This act of retinal detachment is also very serious, right?
9:35
Yes, it exists, it's not the most common consequence of rubbing your eye, but
9:41
There are reported cases that may involve patients with retinal detachment due to...
9:46
This extremely vigorous, aggressive rubbing of the eyes. The most common symptom is...
9:52
So, doctor, once we identify it, you already said that, look, it's...
9:57
Itching isn't something you should be scratching. So, if it's itching, you need to identify something. It's either an allergy or this type of infection.
10:04
That's where we end up influencing it, either with the makeup or the cream, right? So, at that point of...
10:10
Given the use of creams and makeup, women end up feeling this more acutely.
10:17
The need to rub your eyes, or is it unrelated, doctor? No, it's unrelated because the cause is...
10:25
It's multifactorial, right? But it's very common for the patient...

10:32
Atopic dermatitis is a condition affecting patients who have allergies that manifest in various parts of the body. So, it's generally that type of allergy.
10:38
child who has a dog, cat, at home
10:43
stuffed animal, room with lots of furry rugs, furry blanket,
10:50
Curtains that generate dust. So, that's the most common scenario.
10:55
In other words, almost everywhere in the house, right, folks? Pets. Exactly. For those with children, stuffed animals.
11:02
So, doctor, another point I've noticed is self-medication.
11:07
I don't know, I believe so, that it must be a problem too when we talk about eyes. So we go there and
11:12
They say it's just a little eye drop. Then you go and think you're doing great, because it's going to lubricate your eyes and...
11:19
Use the eye drops, I don't know, to soothe, to moisten the area a little, you know.
11:26
Never. How should we proceed? Or is there an eye drop that is OK to use?
11:31
In situations of heightened irritability, what guidance do you offer our audience regarding...?
11:37
Yes, Juliana? Uh, as I said before, the cause of the eye problem is...
11:43
There are many reasons for itching. So, depending on the cause, the treatment will vary. Therefore
11:50
Ideally, the patient should see an ophthalmologist, because they are a specialist who will be able to determine the best course of action.
11:56
exactly what he will need to pass on to that patient. So, for example, if the patient has allergies to...
12:03
Eye drops are a type of eye drop. If the patient has dry eyes, it's because of...
12:08
Dry eye that causes itchy eyes is completely different, you understand? If he has that inflammation in the eyelid, it's...
12:15
another type of treatment. Now, there are several eye drops available at the pharmacy that are
12:20
Antihistamines, which are available over-the-counter, can be purchased by the patient. However, the only

12:26
One thing I like to make quite clear is that some people may use
12:34
Eye drops containing corticosteroids to improve allergy symptoms. Uh-huh. No.
12:39
There is no problem using corticosteroids, however they should be used sparingly.
12:44
Caution and for a short period of time. Because chronic use of corticosteroids without
12:50
supervision is important, as it can have some consequences for the eye, mainly
12:56
Increased eye pressure, which is a disease called glaucoma, and the appearance of cataracts, which is that
13:03
Clouding of the lens that causes decreased vision. Guys, it's much more serious than...
13:09
That's what we imagine, right? And I think people somewhat neglect, you know, doctor, the seriousness of it. Oh, yes.
13:18
Just a little itch, or is it just a little eye drop I'm going to put on? Actually, it's going to do me good. You
13:23
You realize there's a lot of that among us, right? Among Brazilians, anyway.
13:28
Oh, look, I'm not going to suddenly give it as much importance as I do to other parts of my body.
13:34
Exactly. Exactly. Uh, to scratch your eye, you have to.
13:39
Remember that it's not normal. It's not normal for your eye to be itchy, right? It's a sign that...
13:44
There's a problem with the eye, and we need to investigate. People don't give it much importance, but it really is an issue that...
13:53
This is worrying. At my house, for example, my son, who is the son of an ophthalmologist, scratches a lot, and today I picked up the...
14:00
On his own two feet, I teach him, I show him videos, it's difficult, but we have the role of being there.
14:06
Guiding, right? Uh-huh. And guiding in the right way. What I wanted to say is this,
14:11
If you're in a situation where your eye is very itchy and you have no other option, you can put some cold water on it.
14:18
For your face, you can apply a small cold compress directly to your eyes.
14:24
It doesn't need to be a compress with chamomile tea, peppermint tea, or water.

14:30
Cold. But what do you use, doctor? A little cotton ball, a cloth, a little cotton ball, a damp cloth, or
14:37
You put the ice in the bag, place a cloth over it to protect your skin, and then put the ice on top. Uh-huh.
14:43
You have those little thermal bags, you know, that you can use. And lastly...
14:48
In cases where you really can't avoid it, because ideally you shouldn't scratch, you
14:55
You can press a little here, in the corner of your eye near your nose.
15:01
Gently, or here in the corner to the side, without pressing on the eyeball.
15:07
I'm practicing like this already, see? Something very elegant, right, doctor? Like,
15:13
When we're about to cry, look. Don't squeeze your eyes shut, okay? Not in here, right? It was even...
15:20
Commenting, right, doctor? I even sent it to you in the audio. I said, I was commenting with her, Ctia, that you already... these days
15:26
Use your thumb, folks. It's kind of automatic. My eye started itching, and I even hurt this little eye here. In a
15:32
In a situation like this, doctor, now I can clearly see that everything is OK, right?
15:38
I haven't been to the doctor yet, but in a situation like that where you see it's causing a little injury, the ideal thing to do is to seek medical attention.
15:44
Specialist, doctor. Oh, yes. Because you can do that.
15:49
In that urgent need to rub your eye forcefully, you might... oat is something that appears very...
15:56
Later, right? Not right away, but you can hurt the thin membrane covering your eye, which is the conjunctiva. Uh-huh.
16:04
You can actually injure your cornea, which gives that foreign body sensation. So, if you're feeling something that isn't...
16:11
It's normal, we just do it in the office using a device that is a
16:16
Using a magnifying microscope and a special dye, we can see if there are any injuries.
16:22
Perfect. Doctor, you've mentioned several possible causes of this itching.
16:28

In that need that you already emphasized, which isn't normal. Uh, but there are some risk factors. For example, we
16:35
We have air conditioning, we have screens, right? We spend all our time glued to our phones or computers. Uh, uh.
16:42
This can give a bad feeling and encourage, you know, this desire to
16:49
Itching your eyes, that discomfort, you know, if you're using air conditioning, uh, screens, all of that makes you...
16:56
In drier environments and with excessive screen use, we end up forgetting to blink.
17:02
There are studies that have been done that have counted the number of times
17:07
That the person blinks in normal situations or when they are using a screen. So
17:13
There is a very large decrease in the number of blinks. And when you blink less, you lubricate your eye less and
17:22
It feels more like discomfort, right? And when you get that warning sign that leaves you speechless, you...
17:28
You need to schedule an appointment with an ophthalmologist, doctor, it's too much, I'm itching so badly, I can't stand it anymore. When is that appointment?
17:34
At this moment, doctor? The eye can give some signs for
17:39
People. So, for example, it can turn abnormally red, it can
17:44
to present a slight swelling in that little piece of skin that covers the eyeball, which is
17:50
Conjunctiva. Uh-huh. You can hurt the cornea, which causes, well, it's like a little scratch.
17:56
A condition called keratitis in the cornea causes pain, decreased vision, or even itching.
18:02
That's intense, and you realize it's out of the ordinary. Those are signs that you really need to seek help.
18:10
Perfect. Cintia, some people have been asking for the doctor's contact information, right?
18:15
Yes. Look how great, our audience is arriving here. You said not to leave us alone, people are arriving and saying good afternoon to the doctor.
18:23
Asking where the doctor practices, and if we can share her contact information and address.
18:28
You have the doctor's Instagram, right? You can find her there. Doctor Alessandra
18:33

K Dantas. Correct. Correct. That's it. Doctor, do you see patients in Campinas?
18:39
Where is it located? Yes, I see patients in Campinas, on Visconde de Campinas street.
18:45
Uh-huh. It's in Nova Campinas. Perfect. Call me if you want, I can leave it later. Great. Okay. Leave it like that.
18:52
We're sending this to our broadcast list so people can follow along. And have you all been there yet?
18:58
You can follow the doctor's work, because she also does a lot of work on social media, so you can get to know her style a little better, what
19:05
She posts things there. I saw that she was giving an interview somewhere else today too. I already went to check out her Instagram.
19:12
It's marathon day, right, doctor? And we also have a question, Ju. Oh, we have a question, doctor. Let's go.
19:19
Our listener, Ana, she had facial paralysis 10 years ago, and the neurologist and the
19:24
The ophthalmologist prescribed an eye drop called hypromellose 3 mg for daily use. And
19:31
She would like to know the doctor's opinion on whether this could cause problems over time, associated with facial paralysis.
19:38
No, she should use lubricating spoons, mainly because when you have facial paralysis,
19:47
He has difficulty closing his eye. The facial nerve is a nerve that innervates a
19:52
The muscles that close the eyes. If you have paralysis, you can't close them.
19:58
Closing your eyes means they aren't lubricated. This can have many consequences.
20:04
So yes, it's important to lubricate the eye with eye drops, and ideally, it should be done with care.
20:11
that don't contain preservatives. The hypromellose she uses is a good option. Perfect. Doctor, thank you very much. I found it.
20:18
This conversation went by too fast. I want to say goodbye and thank you for your participation.
20:24
If you're still with us, stay tuned, we'll be right back on our panel. Let's go to our first break. But...
20:29
Dr. Alessandra, thank you in advance, I wanted to leave this space for you to also share a message, even if it's just a brief one.
20:34

A quick word of advice for whoever is listening now, to summarize everything you've shared with us so far.
20:41
What I like to say is that rubbing your eyes is not normal.
20:48
This is a sign that there may be a problem with your eye. It's a good idea to see a doctor.
20:54
A specialist will help you receive the appropriate treatment. Avoid scratching whenever possible.
9:00 PM
The glasses. Thank you so much. And we even learn that we look more elegant, darling. Here, in the corner, look. Oh, give me a...
21:06
Just a little something. Show me, Cynthia, here. Here. Okay? Okay. Done. I'll do it.
21:13
That's because my eye is itchy and whatever happens, I'm going to make an appointment with Dr. Alessandra to get my eye checked, you know, that
21:18
I ended up hurting myself while scratching. Doctor, come back anytime. Let's talk about...
21:24
Other matters. You'll always be very welcome here, you know? Kisses. Have a great Thursday. Bye-bye.
21:30
Thank you for the invitation, Juliana. See you soon. Bye-bye. Let's go to our break. Don't go anywhere. (Illegible text)
21:37
We're still on the topic of health, but now we're shifting focus away from the eyes. Let's talk about it.
21:43
...of pain in the legs, lower back, everywhere. So stay with us. We'll be right back to talk to...
21:49
Our other expert, Dr. Mariana. Just two minutes.
22:01
Don't go away. Magnifica Panel will be right back.
22:11
33.5 noon and 23 minutes.
22:17
Cultural support: Electronics at Parque Hipólito. Technical assistance for TVs, microwaves, and home theaters.
22:24
Theater systems, powered speakers, car audio amplifiers, equipment, professional sound systems, and speaker repairs.
22:32
Sales of cables and accessories in general and equipment for car audio. Parque Hipólito Electronics, Avenida
22:39
Marial Deodoro da Fonseca, 106, Parque Hipólito, Limeira. Telephone 34526657
22:48

or 3495 2795. Parque Hipólito Electronics.
22:57
Come and discover Pil Sapor e Paneteria, your new flavor hotspot in Limeira.
23:03
We are located at 400 João de Eberger Street in a super container.
23:09
Cozy in Egisto Ragazzo Park. Next to Magnífica radio, here you
23:15
You can find traditional and artisanal breads, a variety of cold cuts and dairy products,
23:21
In addition to cakes and cookies with that homemade taste. Always fresh and high-quality products.
23:27
Ready to make your day much more enjoyable. And Sapor, the flavor that...
23:33
embrace. An idea from God. 103.5.
23:43
May your heart be filled with tenderness and warmth to welcome the child.
23:49
Jesus. One
23:57
Blessings in our home.
24:05
You are on the Magnifica Panel.
24:28
We're back with today's Magnificent panel, packed with great information and excellent...
24:34
Experts, two guests. We just talked about the care we need to take with this itchy eye.
24:40
Especially when the weather is dry, right? Cintia, oh my God, what agony. We even learn if you arrived.
24:46
Now, afterwards you can go to YouTube and see how to scratch properly, elegantly and healthily, okay?
24:51
With elegance so as not to strain our little eyes. Oh, it's such a precious thing, isn't it, folks? We only have two, we have to take care of them. There you go.
24:58
Now we're going to talk even more about health, but first I want to reinforce with you, if you're not already participating in the...
25:06
Magnific's Christmas campaign this year. Participate. The investment for you.
25:12
Entering to win three amazing prizes costs only R$12. We also...
25:17
Actually, I'm saying here, we still have, we still have our little notes there. Yes, man.
25:23

Take advantage of Ju's hours here and get yours now. We're lucky, you know? It's amazing when we bring good fortune.
25:29
Exactly. Lucky charm. Okay then. We're lucky charms. And look, let's reinforce for everyone the prizes, which are so wonderful. The
25:35
The first money in your pocket is great. If it's R$... Jô, almost there, like us.
25:41
It mentions a 14th salary there. So, it's worth it. Oh, I didn't get it. There's a second one.
25:46
The prize is a Christmas CA for 10 people. A complete, delicious, and complete meal.
25:53
Delicious. And the third prize, just as beautiful and cool, a lovely nativity scene.
25:58
And there's a detail we acquired in Aparecida during our wonderful family's visit from there.
26:04
In October. That's it, folks. So, participate. How do you do it? This is the contact that we...
26:09
It always passes to you, so you can participate with us, the 19992005515,
26:15
It's our Pix. There you'll make the R$12 payment, or however many R$12 payments you want, to...
26:21
You'll be in even greater contention for the prizes. Do it, send a Pix payment, that's it.
26:26
Here's a little proof of payment: make a Pix payment to this number, send the proof of payment to this number as well, and then our team...
26:31
Our production team will send your ticket soon, and you'll be entered into the draw. When will the drawing be, everyone? Tom
26:37
Lost here, look. One ticket, three chances to win, and the drawing will be in the federal lottery on [date].
26:43
December 20th. Done. It's exactly December 20th, it's right there.
26:48
Because Christmas is already knocking on the door. Delicious. Participate, send me a message!
26:53
Now, I want us to give you all the instructions, okay? Let's go so we can really enjoy our time together.
27:00
Next topic, our next guest who's already ready with us,
27:06
Dr. Mariana Milazoto, physiotherapist and master in medical science. Hi, doctor.
27:12
Is everything alright? Everything's fine. Good afternoon, Dr. Mariana, good afternoon. Can you hear me well?

27:17
I'm listening to you. You are, I don't know if you're hearing your own voice, but I can hear you perfectly well, okay? Anything
27:23
Okay, great, we'll adjust things here. Dr. Mariana adjusted her schedule to be here with the...
27:29
People on our panel. Thank you so much, doctor! You're welcome, you're welcome. It's a pleasure.
27:35
It's so great to have you here. Doctor, I loved this topic because, well,
27:40
Indeed, at this time of year, it's common for some aches and pains to appear.
27:47
More often, because it's kind of frantic, right? We do a lot of things, it's a crazy rush. And what...
27:54
That causes these pains, right? What are the reasons and what are the main pains in this condition?
28:00
Time of year? So, uh, Juliana, uh, in December...
28:06
The pace of life and the rhythms of Brazilians change, right? Uh, these are the parties that are...
28:12
Upon arrival, the get-togethers begin to take place. So, uh, especially for the
28:20
women who end up taking on domestic chores, many of whom work
28:25
Outside of work, they also need to fulfill their commitments. So, they
28:30
They often have many complaints of leg pain, lower back pain, and so on.
28:38
Swelling at the end of the day. These are complaints that are recurrent throughout the year, but that
28:43
They usually get worse because of this faster pace we have in
28:49
December. Generally, this is due to the long periods of standing for women who stay...
28:56
more time spent on household chores, cooking, planning dinner,
29:02
Planning lunches is also for female executives who need to...
29:08
participating in many get-togethers, being there at many events, that's what happens.
29:15
They add up to the work routine, right? Uh, in general, women have much more
29:20
complaints about what men have at that time. And stress or even fatigue has

29:28
some intensity, contributes in some way to the intensity in that
29:33
Pain? Is it something physical or does emotional pain also weigh on this situation? Wanting to give
29:39
Tell me everything, it'll be alright, let me do it, how does that work, right? And if it changes
29:45
Yes, doctor. Those who don't usually experience these pains, and those who already have pain all year round, experience an intensification of them.
29:52
Okay? Yes. So, stress, we know today that stress is a trigger.
29:58
Significant inflammation. So, for those who have pain, stress increases cortisol, which is a stress hormone.
30:06
Our body, uh, it tends to amplify these pains, these pains in the legs.
30:13
when there are vascular complaints, when a woman, for example, presents with lipedema, which is another very common complaint.
30:20
common, because 12% of Brazilian women have lipedema,
30:26
Lower back pain, and beyond that, stress, and sleep deprivation, right?
30:32
Because of this rhythm, we end up reducing our sleep hours a bit.
30:38
...and also the quality of sleep, not just the hours. And sleep deprivation or lack of sleep.
30:44
Repairing also contributes significantly to this increase in pain. And yes,
30:51
Women who already experience these pains throughout the year often complain that they intensify during this period.
30:59
It's a time of year because of all this multitasking, especially for those who have children.
31:04
You have to speed up all the preparations for the children's end-of-year school parties. And it's party favors.
31:12
Christmas for everyone. So, there's a lot to do, and it's organizational.
31:19
That also causes stress; it's an important emotional issue as well.
31:24
Right? And as you mentioned, stress increases pain in most cases.
31:30
People, it increases muscle tension. And then you mentioned an important point that has been discussed a lot, including...
31:36

Lately, the issue of lipema has been very popular. You're an expert on this topic, right? I want you to come back to this later.
31:42
To talk specifically about that. Have you ever heard of lipedema? I'm not familiar with it.
31:47
Girl, this is a fantastic topic. It's rare, doctor, for women to have it. It's like, I'm going to say something quite vulgar...
31:54
So, it's like cellulite, a lump, localized fat in the abdomen.
32:00
Legs especially, right, doctor? Well, you know I'm not an expert, but anyway, just so we can visualize it. Tell me.
32:07
Just a little bit about that for us. Actually, lipedema isn't rare, okay? There are studies that show that...
32:13
12% of the Brazilian female population has a disease that is prevalent in
32:18
Women. 12% of women have or will have symptoms of lipedema during their lifetime.
32:25
Life. A disease that's related to a genetic history, as well as hormonal imbalances.
32:32
related to estradiol. That's why it's a prevalent disease in women.
32:37
And the fat cells in the legs, they become inflamed in a way that... it's a...
32:43
Disproportionate inflammation. We call it a chronic inflammatory mycovascular disease. And these cells of
32:51
fat, they become inflamed and accumulate fluid between them, and it also increases
32:59
fibrous. So it has that orange peel cellulite appearance, but it's a painful cellulite, because lipedema is...
33:06
A type of fat that hurts to the light touch, unlike cellulite, caused only by changes.
33:12
It's a habit, right? It's a type of fat that you can press on and it doesn't bother you when you touch it.
33:19
In lipedema, pain on touch is significant, pain on light touch is significant.
33:25
So, that's the big difference. Perfect. And generally, lipedema occurs in the lower part of the body.
33:33
Can it occur in the legs, or also in the arms, for example? Yes, we have several types of lipedema.
33:39
And we primarily see that the disproportionate accumulation is in the limbs. Uh, the

33:46
Depending on the type, it's either on the hips, or on the thighs, or on the hips.
33:53
thighs and leg, that thick leg, that ankle. It looks like an ankle brace holding it back, but actually
34:00
It doesn't have one. So, we call it a garrote. Uh, uh, that woman who wears
34:05
The boot and the boot zipper won't close because the zipper is too big. So,
34:10
It happens on the legs, and for some women it can also happen on the arms. We observe the wrist.
34:19
usually a little bit plumper. This area of the arm here with modules
34:24
palpable fat deposits. It's not just a chubby arm, it's an arm that has lumps of...
34:30
Palpable fat deposits and those nodules hurt. Uh-huh. That's an interesting sign then. It's painful. You just don't
34:37
Grab the little bump. It hurts. That really bothers you, doesn't it? It's a mild discomfort. So, most people...
34:45
Regarding complaints, for example, "Oh, my husband puts his hand on my leg at night while watching television, and I feel it."
34:50
It's as if the weight of the touch is greater for these women.
34:56
I understand, doctor. And in that case, then, the tension is doubled, right? Because we're talking about a type of pain that ends up...
35:03
intensifying at this time of year. For those who already have lipedema, which is everything you explained, or even
35:08
Inflammatory conditions, the tendency with this stress, with this fatigue, with this very hectic pace.
35:15
Why is standing for so long that this discomfort is greater in these specific cases?
35:21
Ah, yes. First, when we talk about lipedema, there's a question...
35:27
functional lymphatic system, which is the system that, uh, uh, uh, helps to
35:34
to eliminate excess fluid from the body. And then these women usually have a
35:39
a feeling of heaviness and swelling in the legs at the end of the day. So, at that time,
35:45
When you spend more time standing, it becomes even more evident, right? There are...
35:51

pain, also due to swelling, is common in women, for example, who already...
35:57
Do you have any complaints about back problems, muscle problems, or spending a lot of time in...
36:04
Standing, spending a lot of time doing housework, sometimes wearing unsuitable footwear, high heels.
36:12
High temperatures also intensify the postural and muscular issues associated with these pains.
36:18
Lower back pain. Uh, but we have some tips that we sometimes give, which are...
36:24
They're kind of silly, but they help a lot. People think they're silly. Uh-huh.
36:29
But this change in daily habits helps a lot in alleviating these complaints.
36:34
And we'll want to, doctor, but I'll do the following: I'll go to our break, we'll go to CBBIN, and I...
36:41
I'm also a little hoarse here, actually, but we'll be right back so you can tell us how...
36:47
Physical therapy can help. Not just at the end of the year, but in general, for those who have these pains in the lower back, legs, etc.
36:54
feet, shoulders, right? That weight we feel and those changes in habits, in routines, because everything that
37:01
To help, to avoid pain, that's what we want. We'll be right back. So, doctor, just a minute.
37:15
Don't go away. Magnifica Panel will be right back.
37:24
Magnific is on. Meodia and 38 minutes. Cultural support.
37:33
When we think of pizza, our mouths water. And when we think of pizza from an Italian pizzeria, it's impossible not to.
37:40
Resist. Delicious pizzas, with fresh ingredients and a diverse menu. Every Thursday there is...
37:46
Special offer! Buy a savory pizza? Get a free small sweet pizza. Pizzaria de Itália, Avida Antônio de
37:53
Andreia, number 15, Nossa Senhora das Dores. Telephone 3443450
37:59
or 3453 1975 and our WhatsApp 19995316281.
38:07
A pizzeria from Italy, made with love for those who love pizza.
38:13

The Christmas spirit has already taken over Vitor Optics. Our store is beautiful and full of new items. Perfect for those who...
38:20

38:35
With your complete eyeglasses purchase, you receive a beautiful personalized Vito bag. Visit one of our locations and take advantage of this offer.
38:41
December promotions. Remember that Vito comes to you at no cost. Just schedule a visit to one of our locations.
38:48
Very close to you. In Limeira, three stores. Rua Pedro Elias 1059, Jardim Vista Alegre. Rua Luís Pântano 825
38:56
Parque Novo Mundo. Rua Nelson Aparecido do Nascimento 876 in Vitório Lucato.
39:02
Vitor Optics, a family-owned, customer-friendly business, has been taking care of customers for 17 years.
39:07
for the health of your eyes.
39:17
An idea sprang from the heart of God, and Mary rejoiced.
39:24
On the radio that brings us Jesus, it says he has done wonders in me.
39:31
The mighty God, holy, is his name, and his glory descends throughout the earth.
39:39
Magnificat, magnificence, the idea of God. Magnificat.
39:47
an idea of God. You
39:54
It's on the Magnifica Panel.
40:03
We're back. Before we begin our chat with Dr. Mariana, a physiotherapist, about pain in the...
40:10
Lower back, shoulders, legs, especially at this time of year. Let's go
40:15
To reinforce this, because I want you to win one of these prizes from our promotion.
40:20
Natal, an investment of R$12, is the Pix payment you'll make to enter the contest. There's a prize of R$500.
40:28
There's a second prize, which is a complete Christmas dinner for the whole family, because it serves up to 10 people.

40:35
People. Cintia, look, if the family is large, if there are 20, if there are 30, a portion is guaranteed.
40:40
Help. Details, folks, delicious. And if it's small, you have the food for supper and
40:46
For the restaurant. Invite your friends. Yeah, you know what a restaurant is? Order it? Of course I know it's...
40:53
What a treat on the 25th there. And there's also the third prize, which is a beautiful nativity scene that was even purchased.
41:02
And that's the best part, I think, about this award. Tell our audience. In the month of October, those who follow...
41:08
Our programming team knows that the Magnificent Family was in Aparecida, celebrating Mass. So everyone went.
41:14
And at that point in the trip, André and his team chose a beautiful nativity scene to be part of this initiative.
41:21
Among friends. And here it is, you can enter and win, okay? That's what's really the
41:26
The representation, you know, having physical people there depicting the birth of Jesus, makes the whole atmosphere much more special on our night.
41:32
Christmas, throughout these days leading up to Christmas. So, it's worth participating. Just make a Pix payment.
41:38
1992005515. Send your proof and stay tuned.
41:44
Hold out your ticket so you can enter the contest. They say the panel is standing.
41:50
Hot. I second that. So you can take advantage and get yours, say "I want one" while we're at A
41:57
Here, okay? It's a ticket. Three chances to win and you're entered into the federal lottery on the 20th.
42:03
December. Scribble it on the calendar to check the result. December 20th.
42:09
Exactly. Message delivered because we have to deliver our messages here for you, our followers. In addition to the information about...
42:15
You have a lot of quality here. Let's continue with Dr. Mariana Milazoto, physiotherapist and master of science.
42:22
doctors. She's talking today about pain in her legs, lower back, shoulders, that kind of thing.
42:28

This fatigue, this stress that ends up arriving and weighing a little more heavily at this time of year. Dr. Mariana, very much.
42:36
Thank you once again for being here. And in the previous segment, you already brought up several causes for us, several...
42:42
The reasons that lead to this pain, this greater discomfort. And what can we do?
42:47
How should I proceed, doctor? First, how can physiotherapy help in this process, including at Lipedema?
42:54
which you explained a little while ago, right? So, like, uh, thinking about
43:00
Basic daily guidelines that physiotherapy can provide for these people.
43:07
which, uh, become overloaded at this time of year. So, for example,
43:12
Let's consider the scenario of that lady or woman who has been in for a long time.
43:18
Foot doing the chores in the kitchen, right? Right, organizing dinner, organizing
43:24
It's about the dishes, anyway. Overall, this woman, besides having pain and a
43:31
If she feels heaviness in her legs at the end of the day, she may have a lower back complaint, that
43:36
a burning sensation in the lower back, a feeling of fatigue in the lower back due to postural overload.
43:43
Standing for long periods of time. What advice do I give to that person? In general, everyone...
43:49
There's a cabinet under the sink, a cupboard under the sink, that you open.
43:55
the doors and he'll have where we put the pots and pans, he has a
44:00
little step. Look, if I'm standing at the sink for too long, I'll put one foot on the floor and...
44:09
One foot will remain inside the cabinet. Why? Because I need it to be a few centimeters higher than the other.
44:16
Another one. Hmm. If you don't have the closet, if you don't have the cabinet, if your kids are downstairs,
44:23
You can pick up something about the height of a brick, for example. In the old days...
44:28
We used to talk about phone books, but they don't exist anymore. Something's blocking them.
44:34
But it's something, isn't it? It's a phone book, it ends up condemning everyone to know.

44:42
How old am I? Yes, exactly. Everything's fine, we're together. That's it. But anyway, either you open the
44:49
Put your foot inside the cabinet, so that one foot is on the ground and the other is slightly higher.
44:56
Then you alternate, stay a few minutes with one foot, switch feet, put the other foot inside and the opposite foot down. Or if
45:04
If you don't have one, you put something roughly the height of a thick brick or a shoebox.
45:12
So you can get that support. We say it's at the height of a step, like a gym step, okay? That's...
45:20
It helps a lot to reduce that sensation of discomfort and burning in the area.
45:26
lower back pain, fatigue in that area. For those who have a lot of leg pain, it is
45:32
It's important to alternate this routine of spending a lot of time on your feet with some
45:38
rest periods and, if possible, rest with limbs elevated, because
45:44
normally when you raise your legs slightly above the level of your torso,
45:50
You can improve venous return, improve lymphatic return, and relieve...
45:57
That feeling of heaviness, of tiredness, in the legs. Regarding the shoulders, what do we...
46:04
You need to understand the daily tasks during that time, uh, during that period.
46:11
Regarding preparations for the festivities, that shoulder position, the closer the
46:17
If the shoulder is closer to the ear, you're bringing more tension to that area. In general,
46:23
This will cause both neck pain and many headaches. People have
46:29
Tension headaches, also known as tension headaches. Uh-huh.
46:34
So, it's important to always pay attention to whether the shoulders are far enough away from the ears.
46:41
Whenever you can remember, remember to lower your shoulders, remember to fit in.
46:47
The scapulae, which are these little bones here at the back, that we call wings, but they are scapulae, that's the name.
46:54
Technical. I opened my chest, but without forcing it too much. It's a very subtle posture adjustment that...

47:01
Relax those cervical muscles and reduce the pain we feel there.
47:07
neck. So, these are basic physiotherapy tips, but it's obvious that for this
47:13
For someone with this complaint, it's important that they think about organization.
47:19
So, in addition to her trying to distribute the tasks among other people...
47:25
family, organizing time is everything she needs to do, listing what
47:32
what she needs to do and organize in order to allow herself periods of rest.
47:38
This is very important, as we said before, because you need to sleep better, you need to rest during the day.
47:45
sleep, really to lower cortisol levels, reduce stress and
47:51
consequently the pain. Perfect, doctor. These are really simple guidelines, but...
47:59
It makes a difference. So, that thing about raising your leg at the end of the day, not just at this time of year, right, doctor, that really does make a difference.
48:06
That makes sense. And does that hot or cold compress thing help?
48:12
So, it helps when we're talking about those leg pains, those kinds of pains.
48:18
For example, with lipedema, elevating the leg and applying these compresses helps.
48:25
It's not cold, it's not the kind of compress I use when I pat something dry and put ice on it, okay?
48:31
Those complex ones where, oh, the child stubbed their toe, I'll go there, get the ice from the freezer and put it on. It's not that, it's a
48:38
A cold, stingy purchase. It's like going to the tap and turning it on on certain days.
48:44
When it's colder, the water comes out cooler, and that's when I put this damp towel in.
48:50
Cooling your legs to ease the discomfort, okay? Perfect. When I'm talking about pain...
48:56
muscular pains, for example, in the cervical or lumbar region, hence
49:02
I'm talking about using slightly warm compresses to really relax the muscles.
49:08
You can, for example, lie down, elevate your legs, and apply a compress.
49:14
Warm this area of your neck or lie down with your lower back on top of a

49:19
A warm compress can help relieve muscle tension.
49:25
Generally, you can sometimes find these compresses in pharmacies, the kind you put in the microwave.
49:31
Heat it up a little and it will become lukewarm. Or you can also grab a towel,
49:38
A face towel, for example, dampen the towel with water and place it...
49:44
Microwave for 15 to 20 seconds. It will heat up a little and then you...
49:49
Place this small bag on the area where you feel muscle pain.
49:54
That's already a relief. I'm right here. It's really nice. You can hear me talking. So, why?
50:01
For example, here in the lower back area, we just heat up the towel in the microwave.
50:07
This can be done in the microwave. They've already eaten so much that they set everything on fire.
50:12
No, for God's sake. It's only a few seconds, okay everyone? It's not going to fry or roast your...
50:18
Put the washcloth in the microwave and then place it on the heat source. If the washcloth has embroidery, then...
50:23
If it has a golden line, it will fry in the microwave. Guys, it's the one without anything on it. Come on, come on.
50:28
Down to the smallest detail. Let's state the obvious here, doctor. Then, heat it up for a few seconds and put it there for how long?
50:35
How long can we leave it like this? Oh, until you feel it starting to get too cold. Then you can heat it up.
50:41
...and add a little more. Ideally, leave it on for at least 10 to 15 minutes. Great. Perfect. And many people use the...
50:49
Those socks, right? They're for helping with that discomfort, or you can buy them online. Which one?
50:56
We need to be careful with this, doctor, right? Or is it okay to use them? So, compression stockings, they are...
51:03
Excellent, especially for those who have lipedema, for those who have that feeling of tiredness, of heaviness in the legs at the end.
51:10
of the day, it greatly helps to assist both venous and lymphatic return and

51:17
To reduce that complaint, right? Uh-huh. What we need to be careful about when we're going to buy a
51:23
socks, which I think it's important to get guidance from a professional before buying.
51:30
That's because there are several types of knit fabrics for these socks. So, we have the...
51:35
Circular knits, which are stitches made in a circle, and we have the knits
51:40
Flat seams, which are the vertical seams. Uh-huh. Depending on the leg size, not even...
51:48
Compression stockings will always fit that leg properly. And then for some women
51:55
She starts making tourniquets. Then you see her sometimes wearing the stocking, the
52:01
My ankle is so tight it's like I'm wearing an ankle brace. Oh, that has the opposite effect, doesn't it?
52:07
That's because then you impede the flow, because the tourniquet is much more...
52:12
It's more harmful than wearing nothing at all. I understand. So, socks are important, they are
52:20
It is highly recommended and is part of the treatment for women who have lipidema, but it needs to be well-prescribed.
52:27
If you specify the right model, the right size, the correct type of mesh, then you'll have to choose the right one, because otherwise...
52:34
You may incur losses depending on what happens when you use it.
52:39
That sock. Perfect, doctor. We even had a question, and I had one too. Let's see if you can help us.
52:46
Doctor. Uh, Tercía, she's saying good afternoon to Ju, to the doctor.
52:51
Look, it's almost over, but it's coming, keeping us company. You can hear the replay, Tecil, right? At
52:56
9 PM, watch it on YouTube, right, Cintia? Exactly. And she'd like to know about the issue of leg syndrome.
53:03
restless, which ends up being more terrible at night, and also about the issue of
53:08
Foot baths: are they good to do, and if so, what to use?
53:13
So, Dr. Mari? Yes, restless legs syndrome is really a
53:20

It's a very difficult condition, because it's a major challenge for medicine.
53:27
to address. There are some issues that need to be investigated.
53:33
to see if you have anything else related, often vascular,
53:39
often neurological, but if you don't have any other
53:45
related condition, which is very helpful for those with leg syndromes.
53:51
Restless legs syndrome, because it worsens significantly in certain conditions.
53:56
...of stress and anxiety. Look at that again, folks. Yes. And what really helps to control it...
54:04
Many women practice meditation, and many women learn to practice it.
54:10
Deep breathing. We know today that some breathing techniques
54:16
They often help to lower stress and cortisol levels. And it's a super easy technique. You pull the
54:24
Breathe air deeply through your nose and count how many seconds it takes you to inhale.
54:31
Then you take a short break and try to exhale for twice as long as...
54:38
You pulled. So imagine I take 4 seconds to breathe. I'm going to pull...
54:44
Breathe in for 4 seconds, fill your chest completely with air. I pause and then exhale.
54:50
Slowly through the mouth. Like this, as if you were blowing for twice as long.
54:56
So, in my case, 8 seconds. And then you do this breathing exercise for 5 to 10 seconds.
55:02
With repetition, you start to notice that you're reducing stress, anxiety, and overall well-being.
55:09
Restless legs also improves that discomfort, because restless legs
55:14
It's nothing more than her moving around without you being able to control it. Uh-huh. Me.
55:20
I liked it, doctor, that you brought me here, you speaking and Cintia, my partner here, doing it.
55:27
But, oh, just because I know this technique, but like, it was something that was strictly timed, but when you say
55:33
So, no, you do it at your own pace, because sometimes a person can't hold it for 5 seconds, they just...
55:39
That's it, that's it, that's it. So, it's necessary, it's necessary. And little by little,

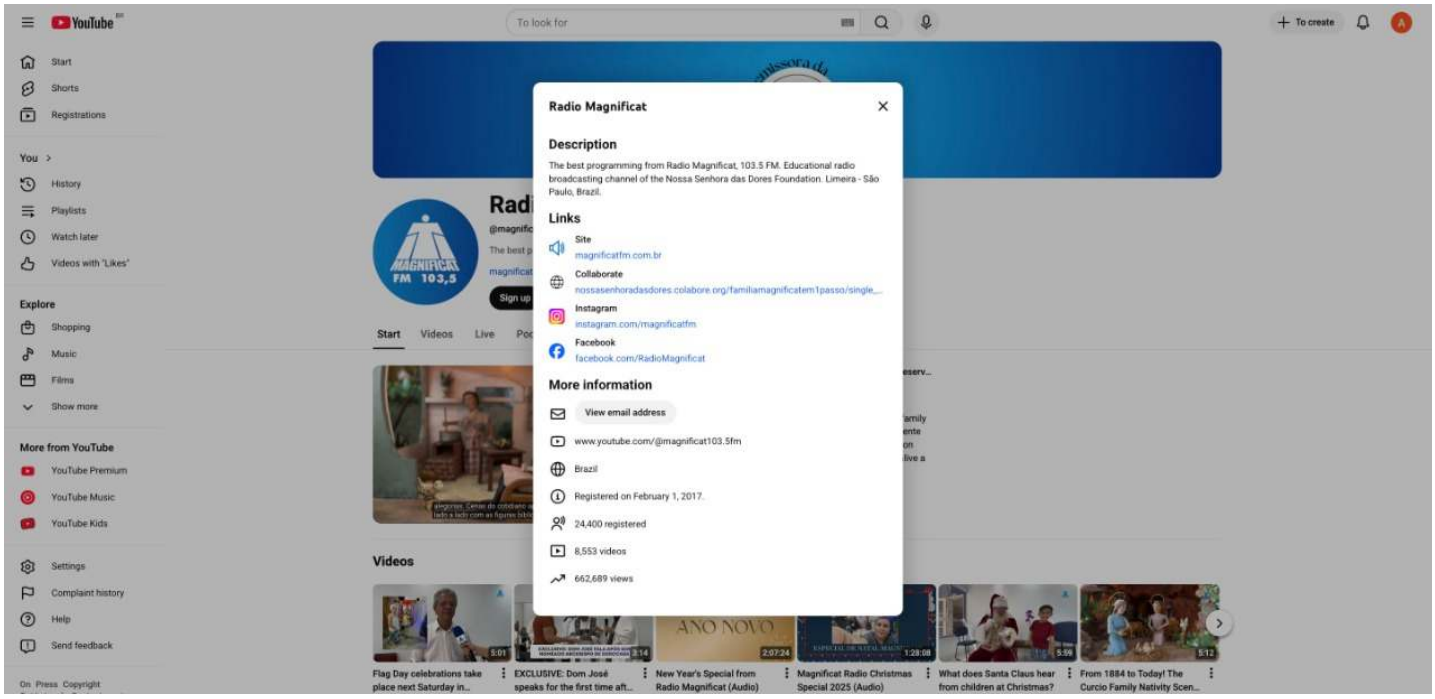

55:44
In general, you can even increase the time a little, but to start, I usually recommend this method.
55:50
Perfect. And then Tecila Teclilia also mentioned the foot baths. That's it, yes. Exactly. Foot baths are good and what can
55:57
Put it in the water too? That's good, doctor. Scalding is never a foot bath.
56:03
It's negative, unless you have a skin lesion, right?
56:10
That's complicated, but if you have intact skin, if you don't have any nail infections or anything like that...
56:17
Besides that, it's quite relaxing. Generally, people use just a little bit of salt.
56:23
roughly, some herbs for relaxation, such as
56:29
That purplish one, I forgot the name of the lavender. Lavender.
56:35
Yes, lavender. Cool. So, it's okay for you to use it.
56:41
Sometimes a little rosemary too. It really helps to improve that feeling.
56:48
...of weight and this relaxation of the legs. And in general, right, Dr. Mariana, already
56:53
What we're bringing up here is this issue of overload, which ends up affecting our bodies, you know.
56:59
Dividing the tasks there too. That's also about health, right, doctor? Oh, no. I'll do everything. I... I don't know how to ask.
57:06
If someone offers me help, that's fine, but I'm not going to keep asking for it. There are people who are like that too. But ideally...
57:12
You divide the tasks, right, to make it easier. Yeah. In general, uh, in general we women,
57:19
We have a mental overload that is very obscure, because people
57:26
They don't realize how much we spend mentally planning certain things.
57:32
For all of that to happen. So, for example, the woman, she's constantly thinking about what's in her...
57:39
refrigerator, what's in the freezer, what will she need to buy at the supermarket. Uh, and then, like that.
57:45
This is what we call mental overload. Often, those on the outside aren't really there.

57:50
Realizing how much effort I'm putting into planning something that I'll ultimately execute, right?
57:58
So, it's not just a matter of executing the task, it's a matter of planning. And then, when you go to plan, you
58:04
You can ask for help. Oh, but only I know how to make the Christmas turkey. Okay, but
58:09
To make a turkey, you'll need to do many things before you can actually cook it. So you can delegate...
58:16
For other people. Make your list, write it down, have grandma buy I don't know what.
58:22
What, the husband picking something or other, the son, anyway, get everyone involved in the routine, because that will
58:30
to make a difference as well, both in this physical overload and in the emotional one,
58:37
In the mental aspect as well. Perfect, Dr. Mariana. We'll even leave your Instagram here for the people who...
58:43
She's following us. We already posted it, right, Cíntia? It's Mari Milazoto. Yes, it is.
58:48
Doctor. Two. Milazoto. One two Z's and two T's. Two T's. There's quite a bit of content there too.
58:56
Doctor, I want to thank you very much for your participation, giving us this guidance so we don't have this problem.
59:01
Overload. But if you have it, you've already picked up several instructions and guidelines here.
59:08
to find out how to alleviate this. I loved the part about breathing, about the exercises,
59:13
Simple things, right, folks? And if this discomfort continues, you should see a specialist, doctor? You're here.
59:20
For that, right? Absolutely. Thank you so much! Thank you for...
59:26
invitation. Uh, I think our role is really to spread the
59:32
Information, simple, basic day-to-day information that everyone can follow, right? It can't be something...
59:38
It's very complicated and depends a lot on other help, right? Very good, doctor. Thank you. Great.
59:45
Have a great weekend and come back anytime. When you can, come in person for a coffee or tea with us.

59:51
Okay, everyone. Perfect. Thank you! Good afternoon. Have a great afternoon.
59:58
Oh, Ctnia, there were people, as we saw here, who arrived at the very end and still managed to get the answer there,
1:00:05
Right? But would you like to hear it again? Because, as a reminder, today we had two experts, one talking about health.
1:00:11
of the eyes, another one now finally, Dr. Mariana talking about the health of our legs, in short, of our...
1:00:17
Our muscles, so sore, right? What a great gift today, huh, Jo? A fantastic gift, right? For you who follow us. So, you can review it, you can...
1:00:24
Listen again, okay, in a little while, right on time, right now, right? Oh, yes. You can find it on YouTube, you
1:00:31
Choose. Share this gift with your family and friends, along with helpful tips from experts and followers.
1:00:38
Tune in to 103.5 FM promptly at 9 am for the replay. That's it. And you who enjoyed it, already...
1:00:44
Congratulations, you just got your ticket! A little coupon for you to enter a draw for three prizes. Oh, girl, I haven't done it yet.
1:00:50
Go ahead and do it. I'm telling you, Dad, right? Lucky charms will help you. We've already had three people interested, haven't we?
1:00:57
He'll want to give you a receipt soon. If he wins dinner, he'll invite Ju for dinner. Yeah. Oh, I'll do it later, you can forget about it.
1:01:03
Woman. You forget, man. Make R$12 now to enter our contest.
1:01:09
The first prize there is R$. The second is the Christmas prize for 10 people, and our third is a
1:01:16
A beautiful nativity scene to make yours even more beautiful. Look over there. And there's more.
1:01:22
A special invitation, Ju. True. Don't miss Monday. As good as...
1:01:27
A celebration among friends is participating in a thanksgiving mass with friends. Oh, but that's really special, folks.
1:01:33
Monday, December 8th, at 8 PM, is our thanksgiving mass. We hadn't invited you. Here's our message.
1:01:39

Special invitation here, then, December 8th, Monday already, right, Cintia?
1:01:44
8 PM in the São Domingos community, in front of our radio station. Come!
1:01:50
Join us! It's such an important moment, isn't it, for our radio station, important for you who are listening to us.
1:01:57
For so many years. We'll love having you there during this most blessed moment, a moment of gratitude, of
1:02:03
Many blessings to our radio station, and to you who are listening to us. So, a very special invitation for you, and you are the...
1:02:10
Our special guest, for sure. Ju, I don't know if you already know the news, but there will be pastries and cake at the mass on that day.
1:02:17
Hmm, I didn't know that, but I really like it. Oh, how delicious! Oops, I'm going to run off!
1:02:25
I'll be at work and I'll arrive. Maybe a little late, but I'll definitely get there to support this event.
1:02:30
Beautiful. You're part of this blessing, of course. And everyone who listens to us is too, everyone. So, everyone has to be there together, all together, mixed up.
1:02:37
so that we can also participate in this blessing, which will be our Mass of Thanksgiving.
1:02:43
Thanks on December 8th, 20 hours, 8 pm, you are our guest.
1:02:48
Okay? If you have any questions, ask us here on WhatsApp. Kisses to you all. We'll continue with our...
1:02:54
Schedule. Stay with us here. But the panel is back tomorrow. We'll be waiting for you from noon onwards. Bye!
1:03:00
goodbye.
1:03:16
We have just unveiled the Magnificent Panel.
1:03:25
Radio Magnific FM 103.5
1:03:31
MHz, educational radio station of the Nossa Senhora das Dores Foundation, Limeira, São Paulo.
1:03:37
Paul, a magnificent idea of God is in
1:03:46
1:4 4 minutes. Cultural support.
1:03:52
Do you need to have your vehicle aligned and balanced? Balbom Rodas does it.
1:03:57

Did you scratch, dent, or scrape your car's wheel on the curb, or do you want to make it look nicer? Balbom can do that too. All the...
1:04:05
Services are provided with excellence and great customer service. Count on a company with over 30 years of experience in the business. Balbom
1:04:12
Bbom Rodas. Those who know it recommend it and come back. Bbom Rodas is located on Avenida Laranjeiras.
1:04:18
2147, Parque Gisto Ragazzo in Limeira. Telephone 3451 0700. 3451700.
1:04:29
Balbão Rodas. A new sky, a new sound. Magnífica FM.
1:04:36

RADIO MAGNIFICAT – CONFIRMATION OF PARTICIPATION IN MEDIA PROGRAM

Subject: Confirmation of Participation – Dr. Alessandra Kurahashi Dantas

Dear all,

We hereby certify the participation of Dr. Alessandra Kurahashi Dantas as a guest specialist in our radio programming.

Radio Magnificat, headquartered in Limeira, São Paulo, is a broadcast station with continuous radio transmission and wide reach, covering multiple cities in the interior of the state of São Paulo. Its programming is focused on information, journalism, and content of public interest, including the regular broadcasting of health-related topics.

Program: Painel Magnificat
Date: December 4, 2025
Host: Juliana de Paula
Topic covered: Itchy eyes (ocular pruritus), with a focus on eye health
Format: Live radio program
Estimated reach: Wide-reach radio broadcast, covering different municipalities of the state of São Paulo

Dr. Alessandra Kurahashi Dantas's participation was due to her professional recognition as an ophthalmologist, her specialized training, and her clinical and surgical experience, qualities that justify her selection as an expert source to address ophthalmological topics on a wide-reaching radio medium.

During the program, topics related to eye health, visual function, and preventive guidance were addressed, with a technical and informative focus on ocular pruritus.

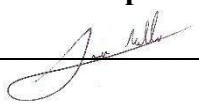

We emphasize that Dr. Alessandra Kurahashi Dantas participated in the program in her professional capacity as an ophthalmologist, evidencing the recognition of her technical authority by the station.

Sincerely,

Juliana de Paula
Journalist / Editor and Host

RÁDIO MAGNIFICAT – CONFIRMAÇÃO DE PARTICIPAÇÃO EM PROGRAMA DE MÍDIA

Assunto: Confirmação de Participação – Dra. Alessandra Kurahashi Dantas

Prezados,

Certificamos a participação da Dra. Alessandra Kurahashi Dantas como especialista convidada em nossa programação radiofônica.

A Rádio Magnificat, sediada em Limeira - São Paulo, é uma emissora com transmissão radiofônica contínua e ampla difusão, alcançando múltiplas cidades do interior do estado de São Paulo. Sua programação é voltada à informação, jornalismo e conteúdos de interesse público, incluindo a veiculação regular de temas relacionados à saúde.

Programa: Painel Magnificat
Data: 4 de dezembro de 2025
Apresentadora: Juliana de Paula
Tema abordado: Coceira nos olhos (prurido ocular), com foco em saúde ocular
Formato: Programa de rádio ao vivo
Alcance estimado: Transmissão radiofônica de ampla difusão, alcançando diferentes municípios do estado de São Paulo

A participação da Dra. Alessandra Kurahashi Dantas ocorreu em razão de seu reconhecimento profissional como médica oftalmologista, de sua formação especializada e de sua experiência clínica e cirúrgica, qualificações que justificam sua seleção como fonte especializada para tratar de temas oftalmológicos em meio radiofônico de grande alcance.

Durante o programa, foram abordados temas relacionados à saúde ocular, função visual e orientações preventivas, com enfoque técnico e esclarecedor sobre o prurido ocular.

Ressaltamos que a Dra. Alessandra Kurahashi Dantas participou do programa em sua capacidade profissional como médica oftalmologista, evidenciando o reconhecimento de sua autoridade técnica pela emissora.

Atenciosamente,

Juliana de Paula
Jornalista / Editora e Apresentadra

CERTIFICADO

— DE RECONHECIMENTO —

O **Rotary Club de Atibaia Pedra Grande** confere a

Alessandra Kurahashi Dantas

este certificado em reconhecimento pela sua valiosa contribuição ao Projeto Menina dos **Olhos de** Atibaia, realizado em 27 de setembro de 2025, que proporcionou exames oftalmológicos às crianças da rede pública de ensino da cidade de Atibaia, promovendo mais saúde e qualidade de vida.

Atibaia - SP, 27 de setembro de 2025.

CAROLINA SANTANA DORATHIOTTO
PRESIDENTE DE CLUBE 2025-26

MARIA DA PENHA DOS SANTOS FARIA
1º SECRETÁRIA 2025-26

January 20th, 2026

Re: Dr. Alessandra Kurahashi Dantas, MD

To Whom It May Concern,

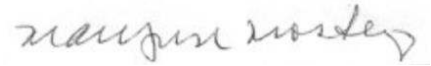

My name is Maria Augusta Montenegro, PhD. I am a Pediatric Neurologist and Clinical Professor at the University of California, San Diego, affiliated with Rady Children's Hospital. I am writing to provide an independent professional assessment of Dr. Alessandra Kurahashi Dantas, MD; an ophthalmologist whose trajectory I have followed over many years. Although my specialty is neurology and I have not worked directly with Dr. Dantas, I am familiar with her professional standing and her clinical work within the medical community.

Dr. Dantas has performed outstanding public service as an ophthalmologist at the Health Department in the City of Campinas since August 1998. In a high-demand outpatient setting, her record reflects an ongoing care volume of approximately 240 patients per month, based on a regular work schedule of 20 hours per week. This volume of long-term patient reliance reflects sustained recognition of her skill, judgment, and outcomes within the medical community and among the patient population she serves. Her ability to maintain such a high level of clinical engagement over an extended period demonstrates that she plays a critical role in delivering ophthalmologic care.

In addition, Dr. Dantas has also distinguished herself in the field as a recognized reference for oculoplastic and lacrimal surgeries. Her record also reflects ongoing volunteer work with the non-governmental organization (ONG) "Sírius" since 2023, providing weekly social assistance to vulnerable populations, which aligns with a broader pattern of service-oriented commitment beyond formal clinical duties.

In conclusion, Dr. Dantas's credentials, sustained clinical excellence, continuous public service within a high-demand municipal setting makes her an extraordinary ophthalmologist whose work has generated sustained recognition and meaningful, long-term impact in her field. Please feel free to contact me for any further details.

Sincerely,

Maria Augusta Montenegro, PhD
Pediatric Neurologist, Clinical Professor
University of California, San Diego, Rady Children's Hospital
mam99@health.ucsd.edu

Name: Maria Augusta Montenegro

Date of birth: March 30, 1972

Phone: 55 19 981987650 / **email**: mam99@health.ucsd.edu

Medical School: University of Campinas, Brazil (03/1990 to 11/1995)

Residency in Pediatric Neurology: University of Campinas, Brazil (2/1996 to 1/2000). Last year was a Fellowship in EEG and Epilepsy.

PhD: University of Campinas, Brazil (2/2000 to 2/ 2003)
Research Fellowship: Columbia University, New York, US (9/2006 to 6/2007)

Research Fellowship: Herscot Center for TSG / Massachusetts General Hospital (7/2007 to 10/2007) Harvard Medical School

USMLE: Step 1 (PASS 86), Step 2 CK (PASS 93), Step 2 CS (PASS), Step 3 (PASS 223)

Visa Status: Permanent Resident since 4/14/2022 (Green Card, USCIS# 067-711-227)

California Medical License: A199057

CT Medical License: 83149

Academic Appointments

1/2005 to 5/2007: Assistant Professor at University of Campinas, Brazil
06/2006 to 10/2007: Post Doctoral Research Fellowship
1/2008 to 6/2022: Private Practice (pediatric neurology and EEG).
01 2009 to 06/2022: Assistant Professor at University of Campinas, Brazil 2/2006 to 6/2022
1/2017 to the 6/2022: Chief of Pediatric Neurology at University of Campinas, Brazil

8/2022 to 6/2025: University of California San Diego / Rady Children's Hospital (Clinical Professor).

7/2025: Yale University (Clinical Professor).

BOOK EDITOR

EEG na Prática Clínica

Authors: Maria Augusta Montenegro, Fernando Cendes, Marilisa M. Guerreiro, Carlos Alberto M. Guerreiro

Language: Portuguese
First edition: Lemos, 2001 (ISBN 85-7450-080-1)
Second edition: Revinter, 2012 (ISBN 978-85-372-0404-0)
Third edition: Thieme-Revinter, 2018 (ISBN 978-85-5465-031-5)
Fourth edition: Thieme-Revinter, 2022.

Neuropediatria Ilustrada: Imagens Clínico Radiológicas
Authors: Maria Augusta Montenegro, Carlos Eduardo Baccin
First edition (Portugues): Revinter, 2010 (ISBN 978-85-372-0326-2)
First edition (Spanish): Revinter 2012 (ISBN 978-85-372-0326-2)

Nem Tudo é Déficit de Atençaõ
Author: Maria Augusta Montenegro
First edition: Pontes, 2017 (ISBN 978-85-7113-809-4)
Second edition: Pontes, 2018 (ISBN 978-85-7113-809-4)

Transtorno do Espectro Autista: Manual Prático de Diagnóstico e Tratamento Authors: Maria Augusta Montenegro, Eloisa Helena Rubello Valler Celeri, Erasmo Barbante Casella
First edition: Thieme-Revinter, 2018 (ISBN 978-85-5465-080-3)

1. **Experiências Incríveis / Incredible Experiments**

Authors: Felipe Baccin, Maria Augusta Montenegro

OFTALMOLOGIA
UNICAMP

UNIVERSIDADE ESTADUAL DE CAMPINAS
FACULDADE DE CIÊNCIAS MÉDICAS
ÁREA DE OFTALMOLOGIA
January 7th of 2026.

1963 - 2003
FACULDADE DE CIÊNCIAS MÉDICAS

Dear Immigration Officer,
São Paulo, Brazil

My name is Carlos Eduardo Leite Arieta, MD, PhD, and I am a Full Professor of Ophthalmology at the Faculty of Medical Sciences of the Universidade Estadual de Campinas (UNICAMP) in Brazil. I have served as Head of the Department of Ophthalmology and Otolaryngology and as Chief of the Ophthalmology Service atUNICAMP. Over the course of my academic career, I have combined clinical practice, research, and academic leadership in ophthalmology, with more than seventy-five scientific publications indexed in SCOPUS. My work has been recognized through national and international awards, including the António Champalimaud Vision Award, the Achievement Award of the American Academy of Ophthalmology, and the Vision Excellence Awards of the International Agency for the Prevention of Blindness. I am a member of the Conselho Brasileiro de Oftalmologia and the American Academy ofOphthalmology, and I have held leadership positions in professional societies within the field.

I am writing to provide this letter regarding the professional activities and contributions of Dr. Alessandra Kurahashi Dantas. I first met Dr. Dantas when she was a resident in ophthalmology at UNICAMP from 1996 to 1999. During which time, I supervised her training within our ophthalmology service. After she completed her residency, I invited Dr. Dantas to work in my private clinic in São Paulo as an assistant ophthalmologist, beginning in 1998. At my clinic, she worked with me regularly for many years, and we operated together on multiple occasions. In parallel with this private-practice collaboration, she also took on responsibilities in our university service related to resident training.

It is important to note that within ophthalmology, lacrimal system disorders and lacrimal surgery constitute a narrow subspecialty focused on the diagnosis and treatment of obstruction and dysfunction of the lacrimal drainage pathways. Surgical treatment in this area involves procedures such as dacryocystorhinostomy and related interventions, which require detailed anatomical knowledge and careful technique. In Brazil, relatively few ophthalmologists focus their practice on advanced lacrimal surgery, and there are limited training opportunities with substantial surgical volume in this field.

1963 - 2003
FACULDADE DE CIÊNCIAS MÉDICAS

In my private clinic, Dr. Dantas was the ophthalmologist to whom I routinely referred patients with lacrimal pathway disorders and related oculoplastic complaints. In practical

terms, she assumed responsibility for the evaluation and surgical treatment of these patients in the practice's plastic and lacrimal surgery area.

At UNICAMP, during the period from 1999 to 2007 and from 2018 to 2019, she was designated as an instructor for ophthalmology residents in lacrimal surgery. Residents in our program observed and, when appropriate, performed lacrimal procedures under her supervision. Given the relative scarcity of specialists in this area in Brazil and the limited training opportunities with substantial surgical volume, her simultaneous work in my clinic and as an instructor in our university service contributed directly to maintaining the availability of lacrimal surgery within our service and to ensuring that residents had consistent, structured exposure to this subspecialty.

Notably, in addition to her work in lacrimal surgery, Dr. Dantas conceived and organized an early structured course on the use of botulinum toxin in ophthalmology in Brazil. At the time botulinum toxin was being incorporated into ophthalmologic practice in our country, there was no widely established, structured course explicitlyfocused on its ophthalmic indications (e.g., blepharospasm, facial dystonias, and related conditions). Identifying this gap, Dr. Dantas proposed the creation of a course dedicated to botulinum toxin in ophthalmology. After reviewing the proposal, I approved the course under my overall responsibility, and Dr. Dantas assumed responsibility for designing and coordinating it.

As such, she defined the scientific program, coordinated the participation of invited faculty, handled logistical arrangements, and negotiated with industry partners to obtain the necessary materials and product samples. The course was held in São Paulo, Brazil, during the XI Simpósio Internacional de Córnea e Lentes de Contato, in March 2004, where she served as coordinator of the course "Uso da Toxina Botulínica em Oftalmologia (Use of Botulinum Toxin in Ophthalmology)".

This was among the first structured educational activities in Brazil dedicated explicitly to the ophthalmologic use of botulinum toxin. Later, other institutions and scientific meetings began offering similar courses. The chronological sequence suggests that this initial initiative by Dr. Dantas helped define a model that was subsequently adopted and replicated. From an academic and professional standpoint, the conception, coordination,

and execution of this early course represent an identifiable, original contribution to the dissemination of botulinum toxin techniques within Brazilian ophthalmology, with an impact that extended beyond her individual clinical practice.

In light of these facts and my direct professional experience with Dr. Alessandra Kurahashi Dantas in clinical practice, resident training, and academic activities, I consider that her background and contributions in ophthalmology, particularly in lacrimal system disorders and surgery, and in the early dissemination of botulinum toxin techniques in ophthalmology in Brazil, are of clear relevance for advanced ophthalmic practice and education. These contributions are identifiable in specific initiatives, such as her sustained role in lacrimal surgery within our services and her coordination of one of the first structured courses on the ophthalmologic use of botulinum toxin in Brazil, which, in my view, have influenced how these areas are practiced and taught.
I make myself available to answer any questions regarding the information above by email carieta@unicamp.br Phone: or by phone number: +55-11-98526-0030.

Sincerely,

Carlos Eduardo Leite Arieta, MD, PhD

January 27, 2026

To Whom It May Concern,

My name is Jeremiah Tao, MD and I am a professor of ophthalmology at the University of California, Irvine, and chief of oculofacial plastic and orbital surgery at the Gavin Herbert Eye Institute, a position I have held since 2007. In this role, I oversee a high-volume tertiary referral service focused on complex oculofacial and orbital disease, as well as academic training and clinical education. I am writing to provide an independent professional assessment of Dr. Alessandra Kurahashi Dantas, whom I first met through international oculoplastic surgery specialty meetings and more directly during her observership with our division from October 1 to November 1, 2024.

During this period, Dr. Dantas participated in clinical activities consistent with the scope of an observership at an academic medical center. She attended patient evaluations, surgical cases, and case discussions, demonstrating a solid understanding of oculoplastic principles and clinical reasoning. Her engagement reflected prior formal training in ophthalmology and oculoplastic surgery, as well as familiarity with subspecialty-level practice. Throughout her observership, Dr. Dantas conducted herself in a professional and academically appropriate manner. She demonstrated the ability to follow complex clinical discussions, interpret surgical decision-making, and engage thoughtfully with faculty and clinical material, consistent with expectations for an experienced ophthalmologist in a tertiary referral environment.

Based on my interactions with Dr. Dantas and my knowledge of her professional background, I consider her to be a well-trained ophthalmologist with established experience in oculoplastic surgery. Her participation in our academic setting was appropriate and consistent with the standards expected of visiting physicians at a university-based referral center. For these reasons, I support her petition from a professional standpoint and consider her qualified within her field. I am available to provide additional information if required. Please feel free to contact me at (949) 824-7944 or jeremiat@hs.uci.edu if I can provide further information.

Sincerely,

Jeremiah Tao, MD, FACS

To the United States Citizenship and Immigration Services (USCIS),

I am writing to provide my professional assessment and strong support for Dr. Alessandra Kurahashi Dantas' petition. This evaluation is based on my extensive experience in ophthalmology and on my long-standing professional acquaintance with Dr. Kurahashi Dantas and her work.

My name is Pablo Cibils, MD, and I currently serve as President of the Sociedad Paraguaya de Retina y Vítreo. I have also previously served as President of the Sociedad Paraguaya de Oftalmología. My professional career has been dedicated to clinical practice, academic activity, and leadership within national ophthalmologic societies.

I first became acquainted with Dr. Kurahashi Dantas during our medical residency training at the State University of Campinas (UNICAMP). Since that time, I have followed her professional trajectory through continued interactions at international congresses and scientific meetings. As an ophthalmologist practicing in another country and as a leader of national scientific organizations, I can confidently attest to her solid professional background, ethical conduct, and consistent clinical performance.

Dr. Kurahashi Dantas has built a solid reputation for clinical excellence, with a professional profile centered on comprehensive ophthalmology and oculoplastic and lacrimal system care. Throughout her career, she has demonstrated consistent clinical judgment, technical reliability, and a high level of professionalism in the management of complex ophthalmic cases. Based on my long-standing professional acquaintance with her work, I can attest to her strong commitment to quality patient care, careful clinical decision-making, and responsible management of both medical and surgical ophthalmic conditions.

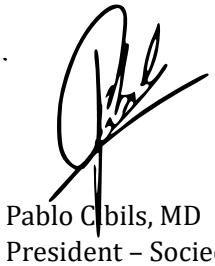

Her work within the public healthcare system deserves special recognition, as it reflects a high degree of professional dedication, adaptability, and efficiency in demanding clinical environments. Dr. Kurahashi Dantas consistently demonstrates a strong sense of responsibility, ethical conduct, and commitment to maintaining high standards of care while managing a substantial clinical workload.

In addition to her clinical practice, Dr. Kurahashi Dantas remains actively engaged in the academic environment, participating in scientific meetings and contributing to the advancement of ophthalmology through continued professional development. Her professional profile encompasses comprehensive ophthalmology, oculoplastic and lacrimal surgery, cataract surgery, and ophthalmic emergency care.

Based on my direct knowledge of her career, professional integrity, and sustained clinical performance, I strongly support Dr. Alessandra Kurahashi Dantas' application and consider her a physician of exceptional ability whose work brings meaningful value to the medical community.

I offer this letter in full support of her petition and remain available to provide any additional information if required.

Sincerely,

Pablo Cibils, MD
President – Sociedad Paraguaya de Retina y Vítreo
Former President – Sociedad Paraguaya de Oftalmología
Asunción, Paraguay

BAYLOR COLLEGE OF MEDICINE
Cintia S. de Paiva, MD, PhD
Professor

Houston, January 27, 2026

The United States Citizenship and Immigration Services (USCIS)

To Whom It May Concern,

It is my great pleasure to write this letter of support for Dr. Alessandra Kurahashi Dantas, whom I have known through long-standing academic and professional interactions within the ophthalmology community.

I am a tenured Professor in the Department of Ophthalmology at Baylor College of Medicine (BCM), Houston, Texas, USA. My research is oriented toward cellular immunology, with an emphasis on Sjögren disease, the microbiome, and aging. I authored or co-authored >180 peer-reviewed publications and seven book chapters (h-index = 70, Google Scholar). As an educator, I have mentored over 15 postdoctoral fellows, two medical students in a research track, and nearly 20 medical students in their elective research rotations. My mentees became Assistant Professors or transitioned to high-level Industry positions as Medical Liaisons and Directors at Contract Research Organizations. In 2019, Baylor College of Medicine recognized my efforts as an educator by presenting me with two prestigious Norton Rose Educational Awards in the categories of "Teaching and Evaluation" and "Enduring Materials." Recently, I received the Caroline Elles Endowed Professorship in the Department of Ophthalmology at Baylor College of Medicine. Currently, I am the Editor-in-Chief of The Ocular Surface and an expert in ocular immunology, transcriptomics, and ocular surface diseases.

I have had the opportunity to follow Dr. Dantas's professional development over several years, including during our earlier training period and through continued interaction at national and international scientific meetings. Throughout this time, she has demonstrated consistent clinical competence and a strong commitment to maintaining updated medical and surgical standards in ophthalmology.

Dr. Dantas has established solid experience in oculoplastic and lacrimal surgery, with clinical practice focused on periocular and lacrimal system disorders. Her work reflects technical consistency, sound clinical judgment, and adherence to evidence-based practice. She manages complex cases with attention to detail and appropriate surgical planning, characteristics expected of a physician with advanced training in this subspecialty. Her ongoing professional development is further demonstrated by her participation in international academic activities, including her observership in oculoplastic and lacrimal surgery at the University of California, Irvine, in 2024. She has also maintained active involvement in major ophthalmology meetings, including ASOPRS and the 31st International Oculoplastic Congress (CIOP), as well as her participation in the *Sociedade Brasileira de Cirurgia Plástica Ocular* (SBCPO). These

activities reflect her continued engagement with international standards of care and professional education.

Based on my knowledge of her background and clinical trajectory, I consider Dr. Dantas to be a well-qualified ophthalmologist with consistent professional development and a focused commitment to oculoplastic surgery. I believe her training and experience support her pursuit of continued professional activity in the United States.

Please feel free to contact me should further information be required.
